In order for the Department to use the PRC/Peace Target transaction price as the U.S. price, the Department would have to find that PRC producers knew or should have known the destination of their brushes. Peace Target sells to countries other than the United States, so PRC producers would not know whether particular brushes were destined for the United States. It is true that PRC producers received brush specifications from Peace Target, but there is no evidence on the record indicating that these specifications gave any clue to the destination of the merchandise. Chip paint brushes are a fungible commodity item. Therefore, the fact that Peace Target had the brushes made to certain specifications would not necessarily indicate that the brushes were being exported to the United States. Thus, the Department has determined that there is no support for a finding that PRC producers knew or should have known the destination of the brushes they sold to Peace Target. Therefore, it is appropriate to base U.S. price on the transaction price between Peace Target and the first unrelated purchaser in the United States.

Comment 2: PATAC claims that because the PRC government and its instrumentalities are parties to this proceeding on paint brushes, it is imperative for future reviews that the Department confirm in its final determination that the PRC is now on constructive notice of the destination of the brushes when sold to Peace Target.

Department's Position: The PRC exporter's knowledge of destination must be established on the basis of evidence submitted during the relevant review. In any reviews, we will determine whether the PRC producers knew of the destination of their merchandise based on the information submitted for those reviews.

Comment 3: PATAC argues that the Department is not following the precedent set in *Four H Corp.* v *U.S.*, 611 F. Supp. 981 (CIT 1985) in which the Court held that U.S. price must be based on the first sales transaction to an exporter outside a non-market economy. Since PRC sales to Peace Target were at arm's length, the Department should follow case precedent and use the PRC price to Peace Target.

Department's Position: In *Four H Corp* v *U.S.*, the Court held that the prices between the producer and the trading company were suspect, because the two entities were state agencies, located in the same state-controlled economy (PRC). The Court permitted the Department to use the price between the trading company and the U.S. importer. In this case, the reseller is an unrelated buyer in a non-state-controlled economy, purchasing from the PRC producers. Therefore, *Four H Corp.* does not apply to this case.

Comment 4: The China Chamber of Commerce argues that the Department should have used the price of goods sold from South Korea to the United States as foreign market value.

Department's Position: As discussed in the Department's response to Comment 5, foreign market value in this case is most appropriately based on sales of such or similar merchandise in the reseller's home market or other third countries. Since the reseller made adequate sales of such or similar merchandise to third countries, we do not need the price of goods sold from a surrogate country such as South Korea to the United States as foreign market value.

Comment 5: PATAC argues that the Department should not use Hong Kong sales to third countries as foreign market value. In the absence of Hong Kong third-country sales, the Department would have to construct a value based on Hong Kong factors of production, which would be inappropriate.

PATAC further maintains that if the Department relied on section 1677b(f) for using Hong Kong's third-country sales as the basis for foreign market value, the Department's reliance on that section was inappropriate. Section 1677b(f) permits the Department to treat Hong Kong as the country from which merchandise is exported only if the producer does not know of the destination of its merchandise. However, since the PRC producer is aware of the destination of its merchandise, section 1677b(f) cannot apply and cannot serve as the basis for foreign market value.

Peace Target claims that the Department must rely on section 1677b(f) to determine foreign market value based on the Hong Kong reseller's price. Since the PRC producer had no knowledge of the destination of its merchandise and the merchandise was not substantially transformed in Hong Kong, it is mandatory to calculate foreign market value based on the price from the intermediate country.

Department's Position: 19 U.S.C. 1677b(f) provides that, under certain circumstances, a country which is not the producing country may be treated as the exporting country for purposes of determining foreign market value. 19 U.S.C. 1677b(f) applies to the facts in this case. Peace Target, the reseller in Hong Kong (the intermediate country), purchases the merchandise from the PRC producers; the PRC producers do not know at the time of the sale to Peace Target the country to which Peace Target intends to export the merchandise (see Comment 1). The merchandise is exported by the PRC producers to a country other than the United States, Hong Kong. The merchandise enters the commerce of Hong Kong but is not substantially transformed, and the merchandise is subsequently exported to the United States. Since section 1677b(f) applies in this case, it is appropriate for the Department to use the reseller's price to third countries as foreign market value.

Comment 6: PATAC maintains that the PRC producers are dumping their

paint brushes to Hong Kong. If the Department does not examine the PRC/Peace Target transaction price, some of the dumping will be missed. The Department must base the purchase price on PRC's price to the first unrelated purchaser, Peace Target.

Similarly, PATAC argues that by using Hong Kong's price to third countries as foreign market value, the Department encourages further dumping of PRC brushes. Chinese producers can sell to resellers in third countries at less-than-fair value, thereby masking the first level of dumping. The third-country reseller can reduce the dumping margin to increase its profit and still sell at less than fair value.

Department's Position: In determining U.S. price, we found that PRC producers did not know that their brushes were destined for the United States (See Comment 1). Since PRC producers did not know the destination, they were not in a position to price discriminate. Further, PATAC has not provided us with a sufficient basis to depart from our normal methodology.

Comment 7: PATAC requests that we clarify why Peace Target does not receive the 127.07% *ad valorem* dumping duty applicable to all other paint brushes imported directly or indirectly from the PRC. Based upon the meager record in this case, there seems to be no justification for treating Peace Target differently from all other exporters of PRC paint brushes. PATAC claims such preferential treatment for Peace Target is unwarranted.

Department's Position: Because Peace Target was the only exporter for which a review was requested under § 353.22(a)(2) of the Commerce Regulations, it was the only exporter entitled to a review. Peace Target's response was adequate to determine a dumping rate for its sales. Therefore, Peace Target's rate is different from the rates established in the *Antidumping Duty Order; Natural Bristle Paint Brushes and Brush Heads from the People's Republic of China (PRC)* (51 FR 5580, February 14, 1986). For all other firms exporting PRC paint brushes to the United States during the review period, we are applying the existing dumping duty rate of 127.07% *ad valorem*.

Comment 8: Peace Target claims that the Department should make a difference-in-merchandise adjustment for differences in the thickness of the brushhead, the length and quality of the bristles, the painted handle and ferrule finish. Although Peace Target is a reseller and does not know the costs for these differences, Peace Target claims that § 353.37 of the Commerce Regulations provides for a reasonable allowance for difference-in-merchandise adjustments based on different market values.

Peace Target has submitted a price quotation sheet based on cost differences for different specifications and requests that we consider these price quotations to make difference-in-merchandise adjustments. Peace Target claims that different price quotations reflect relative market value differences between products.

Peace Target further suggests that we corroborate these prices based on information already on the record. Peace Target refers to the cost of production calculations submitted during the less-than-fair-value investigation. Peace Target suggests that the cost of production submissions could be used as support for the price quotations.

Finally, Peace Target argues that comparisons between U.S. price and foreign market value were not limited to the most comparable products. The Department should limit its comparisons to the most similar products.

Department's Position: 19 CFR 353.31(a)(ii) provides that information may be submitted at the earlier of the date of the publication of the preliminary results of the review or 180 days after the date of publication of the notice of initiation of the review. Peace Target submitted the price quotation information after the publication of the preliminary results. Therefore, Peace Target's submission of information regarding the difference-in-merchandise adjustment was untimely and was not considered for the final results of the review.

Finally, we made comparisons based upon the most similar merchandise. Peace Target has not indicated how our comparisons were not based upon the most similar products. Therefore, there is no reason to alter our calculations in order to make different comparisons.

Final Results of the Review

Based on our analysis of the comments received, the final results have not changed from those presented in the preliminary results of review, and we determine that the following margin exists:

Manufacturer/exporter	Time period	Margin (Percent)
Peace Target, Ltd.	02/01/86-01/31/89	47.1

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. The Department will issue appraisement instructions for Peace Target, Ltd., directly to the Customs Service. Individual differences between United States price and foreign market value may vary from the percentage stated above.

As provided for in section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above rate shall be required for the above firm. For any shipments from the remaining known manufacturers/exporters not covered by this review, the cash deposit will continue to be the rate applicable to each firm (127.07 percent) (51 FR 5580, February 14, 1986).

For any future entries of this merchandise from a new manufacturer/exporter or third-country reseller not covered in this or prior reviews, whose first shipments occurred after January 31, 1989, and who is unrelated to any reviewed firm, a cash deposit of 47.1 percent shall be required. These deposit requirements are effective for all shipments of natural bristle paint brushes and brush heads from the People's Republic of China entered, or withdrawn from warehouse, for consumption on or after the effective date of publication of this notice.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.22 of the Commerce Department's Regulations (19 CFR 353.22).

Dated: October 15, 1990.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-428-808]

Termination of Antidumping Duty Investigation: Phototypesetting and Imagesetting Machines and Subassemblies Thereof From the Federal Republic of Germany

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: In a letter dated October 10, 1990, Varityper, Inc. withdrew its petition for the imposition of antidumping duties filed on March 20, 1990, on phototypesetting and imagesetting machines and subassemblies thereof (PTMs) from the Federal Republic of Germany (FRG). Based on the withdrawal, we are terminating this investigation.

EFFECTIVE DATE: October 22, 1990.

FOR FURTHER INFORMATION CONTACT: James P. Maeder, Jr., Office of

Antidumping Investigation, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377–4929.

SUPPLEMENTARY INFORMATION:

Case History

On March 20, 1990, we received a petition in proper form from Varityper, Inc. on behalf of the U.S. industry producing PTMs.

We initiated an antidumping duty investigation on April 9, 1990 (55 FR 14099, April 16, 1990).

On May 4, 1990, the ITC preliminarily determined that there is a reasonable indication that an industry in the United States is being materially injured by reason of imports of PTMs from the FRG. On August 6, 1990, we granted petitioner's request that the Department extend the period for the preliminary determination until not later than October 16, 1990 (55 FR 33147, August 14, 1990).

Scope of Investigation

Imports covered by this investigation are shipments of PTMs consisting of hardware and dedicated software capable of producing high resolution (600 or more dots per inch) type and/or images on a photographic medium, either film or paper. The photographic medium output permits a high quality of final printed output. This output serves the needs of various users for high-resolution printing and publishing. Included in the hardware are image controller/processors, image recorders, imagesetters and phototypesetters. Image controller/processors are sophisticated computers that are capable of manipulating text and graphics in a manner that allows them to be output on a page of photographic medium. Computer codes are received from a front-end device (computer workstation) and are rasterized (*i.e.*, converted into a pattern of on and off pulses that create images or characters). These rasterized patterns/codes can be received by various output devices for transfer to the photographic media. Phototypesetters and imagesetters create graphic and text output on photosensitive media (paper or film) by scanning a laser beam across the media. As each scans, it turns the laser on and off to create tiny light spots. When these spots hit the photosensitive media, the exposure creates tiny black dots called pixels.

The subassemblies included in the scope of the investigation are limited to customized printed circuit board assemblies for the equipment operating system and for compressing data, raster image processor assemblies, and laser image and optical assemblies. Some subassemblies may be classified as parts. Furthermore, the subassemblies included are not capable of being used for products other than phototypesetting and imagesetting machines.

Phototypesetting and imagesetting machines are provided for in HTS subheading 8442.10.00. Phototypesetting and imagesetting machine parts are provided for in HTS subheading 8442.40.00. The HTS subheadings are provided for convenience and U.S. Customs Service purposes. The written description remains dispositive as to the scope of the product coverage.

Termination of Investigation

In a letter dated October 10, 1990, petitioner notified the Department that it is withdrawing its March 20, 1990, petition and requested that the Department terminate the investigation.

Under section 353.17 of the Department's regulations (19 CFR 353.17(a)), the Department may terminate an investigation after the withdrawal of the petition by the petitioner, after notifying all parties to the proceeding, and after consultation with the International Trade Commission (ITC). The Department may not terminate an investigation unless it concludes that the termination is in the public interest. We have notified all parties to the proceeding and consulted with the ITC. In addition, we have concluded that termination of the investigation is in the public interest. Accordingly, we are terminating the antidumping duty investigation of PTMS from the FRG. This action is taken pursuant to section 734(a)(1) of the Tariff Act of 1930, as amended.

Dated: October 16, 1990.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

Final Results of Antidumping Duty Administrative Review: Roller Chain, Other than Bicycle, From Japan

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On June 18, 1990, the Department of Commerce (the Department) published the preliminary results of its administrative review of the antidumping finding on roller chain, other than bicycle, from Japan. The review covers six manufacturer/exporters of the subject merchandise to the United States for the period April 1, 1987 through March. 31, 1988.

EFFECTIVE DATE: October 22, 1990.

FOR FURTHER INFORMATION CONTACT: Louis Apple or Bradford Ward, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–1769 or (202) 377–5288, respectively.

SUPPLEMENTARY INFORMATION:

Background

On June 18, 1990, the Department published in the Federal Register (55 FR 26243) the preliminary results of the administrative review of the antidumping finding on roller chain, other than bicycle (roller chain), from Japan (38 FR 9226, April 12, 1973). The Department has now completed the administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act). We have reviewed the following companies for the period April 1, 1987 through March 31, 1988: Sugiyama Chain Co., Ltd. (Sugiyama), I&OC of Japan Co., Ltd. (I&OC), Hitachi Metals Techno, Ltd. (Hitachi), Takasago RK Excel Co., Ltd. (Takasago), Pulton Chain Co., Inc. (Pulton), and Izumi Chain Manufacturing Co., Ltd. (Izumi).

Scope of Review

Imports covered by this review are shipments of roller chain from Japan. The term "roller chain, other than bicycle" as used in this review includes chain, with or without attachments, whether or not plated or coated, and whether or not manufactured to American or British standards, which is used for power transmission and/or conveyance. Such chain consists of a series of alternately assembled roller links and pin links in which the pins articulate inside the bushings and the rollers are free to turn on the bushings. Pins and bushings are press fit in their respective link plates. Chain may be single strand, having one row of roller links, or multiple strand, having more than one row of roller links. The center plates are located between the strands of roller links. Such chain may be either single or double pitch and may be used as power transmission or conveyor chain.

The review also covers leaf chain, which consists of a series of link plates alternately assembled with pins in such a way that the joint is free to articulate between adjoining pitches. The review further covers chain model numbers 25 and 35. Roller chain is currently classifiable under HTS sub-headings 7315.11.00 through 7315.12.00. These HTSsub-headings are provided for convenience and customs purposes. The written description remains dispositive.

A. Sugiyama Chain Co., Ltd. and I&OC of Japan Co., Ltd.

United States Price

Sugiyama made sales during the review period to I&OC, an unrelated trading company in Japan, and through a related party in the United States that sold the merchandise to unrelated purchasers after importation into the United States. Sugiyama knew at the time of the sale to I&OC that the ultimate destination of the merchandise was the United States. Therefore, all I&OC sales of Sugiyama-produced subject merchandise are subject to Sugiyama's antidumping duty rate.

As provided for in section 772(b) of the Act, we used purchase price between Sugiyama and I&OC to represent the United States price for all sales by I&OC, because Sugiyama knew that the ultimate destination of the merchandise was the United States at the time of the sale. We calculated the purchase price based on packed, f.o.b., Tokyo port prices, and made a deduction for foreign inland freight.

As provided for in section 772(c) of the Act, we used the exporter's sales price (ESP) to represent the United States price for all sales made through Sugiyama's related U.S. subsidiary because these sales were made to unrelated purchasers after importation into the United States. We made deductions, where appropriate, for foreign inland freight, foreign brokerage and handling, ocean freight, marine insurance, U.S. duty, U.S. freight and U.S. brokerage.

In accordance with section 772(e)(2) of the Act, we made additional deductions, where appropriate, for advertising, credit expenses and indirect selling expenses. Indirect selling expenses include U.S. and Japanese incurred selling expenses and inventory carrying costs. In accordance with section 772(e)(1) of the Act, we also deducted commissions.

Foreign Market Value

In accordance with section 773(a)(1)(A) of the Act, we calculated foreign market value based on packed, delivered prices to unrelated customers in the home market. We determined that sales to a related party were not at arm's length, as claimed by Sugiyama. Therefore, we did not use these sales in making our comparisons.

For comparisons involving purchase price sales, we made deductions for inland freight. We made circumstance of sale adjustments for differences in credit expense and advertising in accordance with 19 CFR 353.56. We deducted home market packing costs from the foreign market value and added U.S. packing costs.

For comparisons involving ESP sales, we made deductions, where appropriate, for inland freight. We made circumstance of sale adjustments, where appropriate, for differences in credit terms and for advertising expenses in accordance with 19 CFR 353.56. We deducted home market indirect selling expenses, including inventory carrying costs, product liability expenses, salesmen's travel expenses, and other indirect selling expenses. This deduction for indirect selling expenses was capped by the amount of indirect selling expenses and commissions incurred in the U.S. market, in accordance with 19 CFR 353.56. We deducted home market packing costs from the foreign market value and added U.S. packing costs.

For sales that could not be matched contemporaneously, we calculated a weighted-average foreign market value for each product based on all reported sales during the review period.

B. Hitachi Metals Techno, Ltd.

United States Price

As provided for in section 772(b) of the Act, we used purchase price to represent the United States price for certain sales by Hitachi because the merchandise was sold to unrelated parties prior to importation into the United States. We calculated the purchase price based on packed, c.i.f., duty paid, delivered prices to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, U.S. duty, U.S. freight and U.S. brokerage. Because respondent did not provide sufficient information to support its allocation methodology, we recalculated the above expenses, using data submitted by respondent as the best information available.

As provided for in section 772(c) of the Act, we used ESP for the remaining sales, where the merchandise was sold to unrelated purchasers after importation into the United States.

We calculated ESP based on packed, c.i.f., duty paid, delivered prices to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, U.S. duty, U.S. freight and U.S. brokerage. Because respondent did not provide sufficient information to support its allocation methodology, we recalculated the above expenses, using data submitted by respondent as the best information available.

In accordance with section 772(e)(2) of the Act, we made additional deductions, where appropriate, for credit expenses and indirect selling expenses, including bad debt expenses, mailing expenses, indirect advertising expenses, and other indirect selling expenses. The lack of appropriate prior price information on the record precluded the Department's confirmation of Hitachi's allocation methodology for these expenses for U.S. sales during the review period. Therefore, we recalculated indirect selling expenses for U.S. sales, including bad debt and other expenses, using Hitachi's ESP information as best information available because respondent did not provide sufficient information to support its own overall U.S. sales allocation methodology. In accordance with section 772(e)(1) of the Act, we also deducted commissions.

Foreign Market Value

In accordance with section 773(a)(1)(A) of the Act, we calculated foreign market value based on packed prices to related and unrelated customers in the home market. We used sales to related parties only when we determined that the sales were at prices reflective of arm's length transactions. We made circumstance of sale adjustments for differences in credit terms in accordance with 19 CFR 353.56.

For comparisons involving purchase price sales, we added U.S. commissions to the foreign market value and subtracted home market indirect selling expenses up to the amount of the U.S. commission.

For comparisons involving ESP sales, we deducted home market indirect selling expenses, including indirect advertising, and salesmen's salaries and expenses. This deduction for indirect selling expenses was capped by the amount of indirect selling expenses and commissions incurred in the U.S. market, in accordance with 19 CFR 353.56.

For sales that could not be matched contemporaneously, we calculated a weighted-average foreign market value for each product based on all reported sales during the review period.

BEST COPY AVAILABLE

In certain instances there were no sales of identical merchandise in the home market with which to compare merchandise sold in the United States. For some sales there were no matches provided, either identical or similar, and for other sales respondent provided similar matches, but failed to provide difference in merchandise adjustment information. For these transactions, because respondent did not provide us with the information necessary to calculate a margin, the Department applied the weighted-average margin calculated for comparison sales as the best information available.

C. Takasago RK Excel Co., Ltd.

Price Comparisons

As provided for in section 776(c) of the Act, the Department has determined that use of best information available is appropriate for all sales of the subject merchandise from Takasago. The Department's decision is based on Takasago's failure to provide adequate responses to the Department's questionnaire and deficiency letters prior to the preliminary determination. The magnitude of the omissions in its response precluded the calculation of a margin using Takasago's data. Specifically, Takasago failed to: (1) Submit the required sales data in computerized format; (2) provide sales data in a format that would enable the Department to make price to price comparisons; and (3) provide the cost data necessary to calculate difference in merchandise adjustments.

As the best information available, the Department used the highest rate calculated for a respondent in this administrative review. (See Takasago Comment 1.)

D. Pulton Chain Co., Ltd.

United States Price

As provided for in section 772(b) of the Act, we used purchase price to represent the United States price because all sales were made directly to unrelated parties prior to importation into the United States. We calculated the purchase price based on packed, c.i.f. or f.o.b. prices to unrelated customers in the United States. We made deductions, where appropriate, for foreign inland freight, brokerage, ocean freight and marine insurance.

We imputed credit for respondent's United States sales because respondent failed to provide any information on credit expenses incurred, including payment dates. We computed the credit period using the best information available. For two U.S. sales, we adjusted respondent's data in conformity with its written response to reflect the correct total quantity sold and total sales price. Where data was erroneously separated into two transactions in the database we combined the data into a single transaction.

Foreign Market Value

In accordance with section 773 of the Act, we calculated foreign market value for Pulton based on home market sales prices or constructed value (CV), as appropriate.

For price to price comparisons, we made deductions, where appropriate, for foreign inland freight. We deducted home market packing costs from the foreign market value and added U.S. packing costs. We recalculated home market credit based on the short-term interest rate and average credit period, as provided by respondent. We made a circumstance of sale adjustment, where appropriate, for differences in credit terms.

For those products sold in the United States for which no identical or similar model was sold in the home market and for which respondent provided cost of production data, we calculated foreign market value based on CV as provided for in section 773(e) of the Act.

Constructed value includes the cost of materials and fabrication of the merchandise, plus general expenses, profit and packing. For material, direct labor and overhead, the Department used the respondent's data. Actual selling, general and administrative expenses (SG&A) were used because these amounts exceeded the statutory minimum of ten percent. For general and administrative costs the Department derived the rate from the respondent's annual financial statements. Interest expense was also derived from the respondent's annual financial statements. Total interest expense was reduced by the ratio of accounts receivable to total assets, in order to account for imputed credit costs which were individually added to the constructed value. The Department also added a per unit amount of indirect selling expenses. For profit the Department used the statutory minimum of eight percent because actual profit was less than eight percent of the cost of production. The Department added the respondent's United States packing to arrive at total constructed value.

Where appropriate, we adjusted for differences in credit terms using home market credit expenses.

Best Information Available (BIA)

As provided for in section 776(c) of the Act, we have determined that partial use of best information available is appropriate for sales of some subject merchandise sold to the United States by Pulton during the administrative review period. We had no alternative but to apply the BIA rate because Pulton failed to provide a conversion.

The BIA rate referred to above was applied to those products sold in the United States for which no identical match existed in the home market and for which respondent failed to provide cost of production data. For those U.S. transactions, Pulton reported all unit amounts on the basis of yen per piece instead of yen per foot. All other sales transactions were properly reported in yen per foot. Because no formula exists on the record which enables the Department to convert the net prices to a unit basis of yen per foot, the Department applied BIA. The BIA rate applied is the weighted-average margin calculated for all identical and CV comparison sales.

E. Izumi Chain Manufacturing Co., Ltd.

Price Comparisons

As provided for in section 776(c) of the Act, the Department has determined that use of best information available is appropriate for all sales of the subject merchandise from Izumi. The Department's decision is based on the magnitude of the omissions and deficiencies in Izumi's responses. Specifically, Izumi failed to: (1) Provide the Department with convincing evidence to support its claim that its home market sales to a related party were at prices reflective of arm's length transactions, or provide the Department with information regarding the home market sales to the first unrelated purchaser; (2) properly match its U.S. sales with the most similar home market merchandise in accordance with the Department's requirements, or provide information that would allow the Department to select the most similar home market product; and (3) provide the information necessary to calculate the differences in merchandise costs associated with any new matches.

As the best information available, the Department used the highest rate calculated for a respondent in this administrative review.

Currency Conversion

In accordance with 19 CFR 353.60 we used the official exchange rates in effect on the appropriate dates for determining foreign market value. All currency conversions were made at the rates certified by the Federal Reserve Bank.

BEST COPY AVAILABLE

Interested Party Comments

A. Sugiyama Chain Co., Ltd. and I&OC of Japan Co., Ltd.

Comment 1: Sugiyama, I&OC and Hokoku contend that the Department should reverse its preliminary decision to apply a single dumping margin for Sugiyama sales through the I&OC and Hokoku distribution channels. Respondents argue that the Department correctly calculated separate margins for each distribution channel in prior administrative reviews. Furthermore, consistency with past practice requires the Department to continue to assign a separate dumping margin to each distribution channel because the parties have reasonably relied on prior margins to individually apply for a revocation of the dumping order. Respondents further maintain that the Department's circumvention concern, which may have motivated the Department to assign a single dumping rate to all Sugiyama sales, is unwarranted because Sugiyama does not retain the authority or control to shift sales between the different distribution channels.

Petitioner requests that the Department calculate a final margin for "Sugiyama/I&OC" sales based exclusively on sales between Sugiyama and I&OC rather than the weighted-average margin calculated on all Sugiyama sales. The weighted-average margin used in the final determination included all sales through different distribution channels.

DOC Position: We disagree that separate margins should be calculated for a company's individual distribution channels. In deciding whether it is appropriate to revoke a company out of an order, it is necessary to evaluate the pricing behavior of the company as a whole, as opposed to the pricing behavior to individual customers. To do otherwise would provide a company with the opportunity to switch distribution channels so as to limit dumping liability, or escape it altogether. Therefore, the Department has assigned only one margin for all of Sugiyama's sales, regardless of the distribution channel, based on the weighted-average margin of all its sales. The Department will, however, continue to list Sugiyama's separate distribution channels as an administrative convenience to the Customs Service.

Comment 2: Petitioner contends that Harima Enterprise Co., Ltd. (Harima) should receive Sugiyama's final margins in this review if Sugiyama generally knows the ultimate destination of the roller chain at the time of sale to Harima. If Sugiyama does not know the ultimate destination of the merchandise, the Department should continue to apply the most recent actual rate calculated for Harima.

DOC Position: Harima did not sell any subject merchandise to United States customers during this period of review. Any merchandise from Sugiyama/Harima that entries after this review period will be assigned Sugiyama's rate for deposit purposes.

Comment 3: Sugiyama contends that home market expenses reported as "other" should be deducted as direct expenses, rather than as indirect expenses, because these expenses were incurred to promote sales.

DOC Position: We disagree. These expenses, by respondent's own admission "cannot be tied to a specific product, sale or customer." These expenses represent overhead such as automobile repair and maintenance, gasoline costs, and train and airline tickets, all of which are costs that would be incurred regardless of whether a sale was made.

Comment 4: Sugiyama requests that the Department revise the home market credit expense calculations pursuant to Attachment 3 of Sugiyama's July 27, 1990 submission.

DOC Position: We disagree. We have used the credit methodology originally submitted by Sugiyama, and have confirmed that Sugiyama's narrative questionnaire response is consistent with the credit calculations reported on the tape. The Department cannot accept changes to data that were submitted in an untimely fashion, according to 19 CFR 353.31(a)(ii).

Comment 5: Sugiyama contends that the Department should use sales to a related customer in the home market to calculate foreign market value.

DOC Position: We disagree. Sugiyama admits that the customer in question is related. Through an analysis of the data, the Department has confirmed that the related customer is charged prices that are lower than those charged to unrelated customers. Thus, the sales were not made at arm's length, and fail to provide a suitable basis for establishing foreign market value.

Comment 6: Sugiyama requests that the Department make a level of trade adjustment for its sales through Hokoku.

DOC Position: We disagree. Sugiyama has offered no evidence in support of its claim that Hokoku's higher prices are caused by the higher costs Hokoku incurs due to its place in the distribution chain.

Comment 7: Sugiyama requests that the Department exclude from its calculations all Hokoku sales made to Canadian customers that were erroneously reported as U.S. sales.

DOC Position: The Department has excluded such sales from the calculation of Sugiyama's dumping margin.

Comment 8: Sugiyama requests that the Department correct the order dates for a list of invoices included in its July 27, 1990 submission.

DOC Position: The Department did not make these changes. The Department provided Sugiyama with ample opportunity to revise its questionnaire response. The Department cannot continue to make such changes if it is to fulfill its obligation to complete reviews on a timely basis. Sugiyama continues to find small errors in its data, and at this late date in the review, it is very burdensome for the Department to make the changes respondent requests. In addition, new data submitted at this time would be filed in an untimely fashion pursuant to 19 CFR 353.31(b).

Comment 9: Sugiyama contends that the DOC should not apply the ESP offset adjustment in this case because the use of it leads to margins where they would not otherwise exist.

DOC Position: We disagree. The ESP offset adjustment is correctly applied in situations of this kind pursuant to 19 CFR 353.56.

Comment 10: Sugiyama and Hokoku request that we apply a 90-day lag in exchange rates between October 28, 1987 and March 31, 1988 because of a sustained change in exchange rates between these dates.

DOC Position: The evidence respondent offers to support the use of a 90-day lag because of a change in exchange rates is not persuasive. Respondent claims that rates began a sustained increase on October 28, 1987. In fact, respondent's own data show that the rates for the fourth quarter of 1987 changed little from those for the third quarter. The October 28, 1987 rate appears to be an aberration. Moreover, respondent's request was untimely leaving insufficient time to properly investigate such a claim.

B. Hitachi Metals Techno, Ltd.

Comment 1: Hitachi argues that the Department incorrectly calculated inland freight, insurance, duty, and brokerage ratios for the review period. Hitachi maintains that the Department should have applied the listed percentages to the f.o.b. purchase price of chain sold instead of applying them to the U.S. selling price as was done for the preliminary results of review.

DOC Position: We disagree. For our preliminary results, we recalculated the above-named expenses as best information available because Hitachi did not provide sufficient information to

support its allocation methodology. Our position has not changed for these final results for several reasons. Because Hitachi did not provide the f.o.b. values, we were unable to confirm the accuracy of the allocations on the computer tape, which were provided in the form of percentage of f.o.b. Moreover, additional information regarding these expenses was untimely pursuant to 19 CFR 353.31(a)(ii). Finally, it does not appear likely that each of these expenses was incurred on a value basis rather than a weight, distance, volume, or other basis. For all of the above reasons, we have not altered our treatment of these expenses from the preliminary results.

Comment 2: Hitachi argues that the Department incorrectly deducted as an expense the bad debt reserve allowance from the U.S. selling price. This allowance is not an actual expense, but merely a reserve account used for covering future default payments by customers. Moreover, this fund was not drawn upon during the review period. Hitachi maintains that this should preclude the deduction of the allowance as an expense.

DOC Position: We disagree. Bad debt reserve is used to cover future losses resulting from customer's failure to pay. Irrespective of whether bad debt losses are actually incurred during the period of review, the setting aside of a reserve to cover such losses remains an indirect selling expense. Therefore, we have made the deduction from ESP.

Comment 3: Hitachi contends that the Department incorrectly calculated and deducted an imputed credit expense from the U.S. price. In addition, the Department double-counted the credit expense by also deducting the interest expense provided by Hitachi in its SG&A and interest expense calculations. Hitachi requests that the Department recalculate the SG&A and omit itemized interest expense data from the SG&A ratios.

DOC Position: We agree with Hitachi and have made the appropriate adjustments.

Comment 4: Hitachi contends that in its preliminary determination the Department calculated an imputed home market credit expense and deducted it as a direct expense from the home market price when calculating foreign market value. At the same time, Hitachi states that the Department declined to make a circumstance of sale adjustment by deducting home market interest expense from foreign market value. Hitachi contends that the Department should apply the same credit expense methodology used in the foreign market value calculations to the U.S. credit expense.

DOC Position: We made imputed credit expense adjustments to both the U.S. and home markets. To avoid double-counting we did not adjust for the claimed interest expense in the calculation of credit for both the home and U.S. markets.

Comment 5: Petitioner argues that because Hitachi has failed to supply sufficient information concerning foreign inland freight, ocean freight, marine insurance, U.S. duty, U.S. freight, U.S. brokerage, and U.S. indirect selling expenses, the Department should rely on the best information available in calculating the company's margin.

DOC Position: The Department's methodology for calculating the movement expenses is outlined in Hitachi Comment 1.

Comment 6: Petitioner argues that the Department should use the highest margin calculated for a matched Hitachi sale as the best information available for determining the margin to be applied to unmatched Hitachi sales. Petitioner states that the Department's decision to apply "the weighted-average margin calculated on identical comparison sales" unfairly rewarded Hitachi for its failure to supply requested data.

DOC Position: We disagree. To calculate the best information available rate for unmatched transactions, we applied the weighted-average margin calculated for all comparison sales. Application of the highest rate is inappropriate in this instance because than the highest individual rate appeared to be anomalous.

C. Takasaqo RK Excel Co., Ltd.

Comment 1: Takasago contends that the Department should reconsider its preliminary decision to apply to Takasago the highest rate calculated for a respondent under review. Specifically, Takasago suggests that the Department either (1) calculate Takasago's margin based on its non-computerized data through the use of sampling or averaging techniques; (2) permit Takasago to submit additional information to supplement the original responses; or (3) apply a less punitive best information available rate based on either an average of Takasago's prior margins, the last calculated rate which resulted in a margin greater than a *de minimis* amount, or Takasago's most recently determined best information available rate from the 1982-83 review period for the importer to whom Takasago exported merchandise during the review period.

Takasago argues that application of a rate other than the highest rate calculated for a respondent is justified because of Takasago's good faith attempts to comply with the Department's requests for information and Takasago's reliance on the Department's past practice in prior reviews. Takasago asserts that although numerous factors and circumstances prevented Takasago's complete compliance with the Department's requests, its cooperation and efforts to comply warrant a non-punitive best information available rate.

Takasago contends that language barriers and the lack of sophistication of company personnel and computer technology precluded Takasago from properly reporting all sales information. Absent a complete understanding of the Department's methodology and requests for information, Takasago relied on the Department's past practice of accepting the information submitted by Takasago as an indication of the sufficiency of its response. In prior review periods, the Department did not contact Takasago nor request additional information with regard to Takasago's submissions. In the current case, Takasago did not attach any special significance to the additional deficiency letters and requests for computerized data.

Takasago also contends that the Department's efforts to apprise Takasago of the Department's reinforced standards were "too subtle" and its assistance inadequate. Specifically, the telephone conversation initiated by a U.S Embassy interpreter in Tokyo failed to adequately explain the negative consequences of applying the best information available rate. In addition, correspondence from the Department was too technical to be understood and the firm was unable to comply within the required time frame. With the assistance of only Japanese counsel, Takasago continued to rely on the Department's practice in prior reviews as a guide to the Department's actual requirements.

Takasago's efforts to sufficiently fulfill the Department's requests were further hampered by the loss of necessary information during a recent merger, an insufficient staff to gather the data and compile the responses, the overwhelming amount of information requested on a large volume of sales transactions during the relevant review periods, and the absence of any computer facilities or computer-literate staff to provide information in the required computerized format. Takasago contends that the Department's requirement of computerized submissions constituted an extreme and unfair burden in that the company does not maintain computerized records and the time requirements imposed were

inadequate to enable the company to provide computerized information. Despite these obstacles, the response actually submitted by Takasago indicates Takasago's good faith effort to comply with the Department's demands.

Petitioner urges the Department to continue to apply the best information available rates from the preliminary determination due to the "woeful inadequacy" of Takasago's response.

DOC Position: The Department agrees with petitioner. In this case, the evidence on the record calls for use of the highest rate calculated for another respondent as a best information available rate for Takasago in the administrative review. The Department's application of best information available to calculate Takasago's dumping margin is reasonable and justified, because Takasago's original responses and deficiency response contain serious deficiencies that render them wholly inadequate for use in calculating dumping margins. Among the numerous deficiencies, the most egregious were lists of sales on a cumulative per-model basis rather than on a transactional basis, failure to separate U.S and home market charges and expenses, failure to allocate the charges on a transactional basis or even to attempt to formulate a reasonable allocation methodology, and failure to provide a computerized database. The omissions of information are so pervasive that any attempt to calculate a dumping margin using Takasago's data would be completely arbitrary.

Takasago contends that its good faith efforts and mitigating circumstances warrant application of a best information available rate other than the highest rate imposed on another respondent in the review. Takasago professes that its reliance on the Department's past practice of accepting its response was reasonable because the Department failed to adequately notify the respondents of a change in procedure. A review of the record indicates otherwise.

The Department repeatedly attempted to convey to Takasago the seriousness of its deficiencies. Over the course of the review period, Takasago received three deficiency letters. A February 28, 1990 letter specifically notified Takasago of the Department's requirement for computerized data. Given the explicit and numerous notices received by Takasago, Takasago cannot reasonably rely on the Department's past acceptance of its responses as an indication of approval for the response submitted in the review period. In prior years, as respondent notes, the Department sent no deficiency letter. In this review, it sent three. A reasonable conclusion is that something was different. In addition, the company could have resolved any misunderstandings resulting from linguistic problems by contacting the Import Administration attache at the American Embassy. In fact, the Import Administration attache/interpreter initiated contact with Takasago. As the record indicates, the Department took unprecedented and unusual steps to notify the company of the Department's procedures and to elicit the necessary information from the company to comply with the Department's requests. In this specific case, the Department more than satisfied any responsibility it has to assist a respondent in complying with the Department's requests.

Takasago also cites numerous other factors which prevented the company from adequately responding to the Department's requests within the specified time periods. Despite the alleged existence of these factors, the Department maintains that the appropriate best information available rate was applied in light of the total circumstances. The Department has numerous orders to administer, which it must do on a timely basis and in accordance with the law. It remains respondent's duty to apprise themselves of the requirements under the laws and to satisfactorily meet those requirements. In this case, respondents failed to present even the minimal information required.

D. Pulton Chain Co., Ltd.

Comment 1: Petitioner contends that the Department should continue to apply a rate based on the best information available for Pulton because it failed to submit computer diskettes in time for use in the preliminary results of review and did not provide the data necessary to match U.S. sales with home market transactions. Petitioner relies on 19 CFR 353.31(a)(ii) to support its position that respondent's submission of computer data is untimely and should not be used for the final results. Petitioner argues that use of a company's data without the opportunity for a domestic party to comment on the use or content of such data deprives the domestic party of its statutory rights and constitutional rights of due process.

Pulton requests that, in the final results of review, the Department use the company's data submitted on computer diskettes on April 16, 1990, May 8, 1990, June 1, 1990 and June 27, 1990 to calculate the antidumping margins for the review period. Pulton contends that the company submitted the data in response to each of the Department's requests. Furthermore, the data submitted by the company does not constitute new data. The multiple submissions of diskettes arose from a format problem with the computer diskettes and did not involve any changes in information submitted or any new information.

Pulton further argues that use of its data does not infringe upon petitioner's constitutional or statutory rights. Pulton states that petitioner was provided with an APO version of a printout of the computer tapes on July 1, 1990, at which time the petitioner could have commented on the material. Furthermore, the opportunity for clerical error review and judicial review presents the petitioner with the opportunity to comment on Pulton's data and the results of the use of that data. Pulton cites precedent for use of information submitted after the date of the preliminary results of review.

DOC Position: The Department agrees with respondent. Fairness and equity warrant use of respondent's data. As the record demonstrates, unusual technical difficulties occurred with Pulton's computer diskettes. Pulton consistently cooperated with the Department to remedy the problem which arose from the use of a computer system incompatible with the Department's system. Due to the nature of the technical problem, the Department notified Pulton in a letter dated June 18, 1990 that the Department would use the computer data in the final administrative review if the technical problem was corrected in conformity with our instructions by June 29, 1990. On June 29, 1990, Pulton submitted diskettes consistent with our instructions. The information submitted constituted an adequate response and we have used respondent's data to the extent possible to compute margins based on sales or constructed value information.

Petitioner's claim that use of Pulton's data deprives petitioner of its statutory and constitutional right to meaningful participation is without merit. The correspondence notifying respondent of the Department's decision to use the data if properly submitted by June 29, 1990 is contained in the public record. The June 18, 1990 letter serves as notice to all parties of the Department's possible use of the data in the final administrative review. Petitioner also received an APO version of Pulton's submission. Knowledge of the Department's possible use of the data and receipt of the respondent's APO version of its response provided

petitioner with the opportunity to comment on respondent's data. Any harm incurred by petitioner was due not to administrative actions but to petitioner's own failure to effectively participate in the administrative review proceedings. (See Best Information Available section.)

E. Izumi Chain Manufacturing Co., Ltd.

Comment 1: Izumi contends that it is unreasonable for the Department to request that Izumi report sales of Izumi-produced chain in the home market made by a party related to Izumi. Izumi argues that it has no control over the related party and could not compel the related party to respond to the Department's requests for information. Further, all sales between Izumi and the related party were arm's length transactions.

The petitioner contends that the Department was correct in requesting related party sales information. Such information is necessary for the calculation of U.S. price, because sales of Izumi roller chain made through a related party must be considered in calculating Izumi's antidumping margin. In addition, for sales made in the home market through a related party, the foreign market value must be based on the resale prices of the related party.

DOC Position: 19 CFR 353.45(b) provides that the Department may calculate foreign market value based on sales made through a related party. Pursuant to 19 CFR 353.45(a), it is the Department's practice to calculate foreign market value based on prices to related parties, if the respondent can show that those sales are as between two unrelated companies (*i.e.*, that the sales were arm's length transactions). If the respondent cannot show that the sales were at arm's length, and the sales made through the related party are a significant percentage of all sales in the home market, the Department calculates foreign market value on the basis of the sale price to the first unrelated party.

The Department provided Izumi with the opportunity to either show that its home market sales were at arm's length or to report the sales to the first unrelated purchaser.

Izumi could not show that its sales to the related party were at arm's length. In fact, these sales did not appear to be at market prices because the prices to the related party were uniformly lower than prices to unrelated parties. While Izumi claimed that the lower prices were attributable to economies of scale associated with its sales to the related party, Izumi was unable to show any correlation between manufacturing cost savings for merchandise sold to the related party and price discounting. In situations in which the transactions between related parties cannot be shown to be at arm's length and a substantial percentage of home market sales were made through a related party, the Department must rely on the sales to the first unrelated purchasers in calculating foreign market value. Izumi's refusal or inability to provide information on the sales to the first unrelated purchaser left the Department no basis with which to calculate foreign market value.

Comment 2: Izumi contends that in the absence of home market sales information, the Department is required to utilize third country sales or constructed value.

DOC Position: Section 773(A)(1) of the Act establishes a clear hierarchy for the calculation of foreign market value. The Act dictates that foreign market value be based on home market sales unless there were no home market sales or the quantity of home market sales is so small as to form an inadequate basis for comparison. Sales of Izumi's roller chain in the home market were significant enough to form an adequate basis for comparison. Where the home market is the appropriate basis for foreign market value and where a respondent is unable or unwilling to report those sales, the Act does not permit the calculation of foreign market value based on third country sales or constructed value.

Comment 3: Izumi argues that it has cooperated with the Department by submitting four responses, two deficiency responses, and six computer tapes and that this degree of cooperation does not warrant the total disregard of Izumi's data.

DOC Position: Izumi has not responded in a qualitative sense to the Department's requests for information. As noted in the *Price Comparisons* section of this notice, Izumi's responses were seriously deficient in a number of areas. Any one of the noted deficiencies alone would necessitate the use of the best information available. The Department is required, in accordance with section 776(c) of the Act, to use the best information available "whenever a party or other person refuses or is unable to produce information requested in a timely manner and in the form required."

Final Results of the Review

As a result of our analysis, we determine the margins to be:

Manufacturer/exporter	Margin (percent)
Sugiyama Chain Co., Ltd	1.36
I&OC of Japan Co., Ltd	1.36
Hitachi Metals Techno, Ltd	17.57
Takasago RK Excel Co., Ltd	17.57
Pulton Chain Co., Inc	0.07
Izumi Chain Co., Ltd	17.57

The Department will instruct the Customs Service to assess antidumping duties at the above rates on all appropriate entries. The Department will issue appraisement instructions directly to the U.S. Customs Service. Further, as provided for in section 751(a)(1) of the Act, the Department will require a cash deposit of estimated antidumping duties based on the above margins on entries of this merchandise from the manufacturers/exporters listed above. Because the weighted-average margin for Pulton Chain Co. is less than 0.50 percent and therefore *de minimis* for cash deposit purposes, the Department shall not require deposits on its shipments. For shipments from the remaining known manufacturers and exporters not covered by this review the cash deposit will continue to be the latest rate applicable to each of those firms. For any entries of this merchandise from a new exporter not covered in this or prior reviews, whose first shipments occurred after March 31, 1988, and who is unrelated to any reviewed firm or any previously reviewed firm, a cash deposit of 17.57 percent shall be required.

These deposit requirements are effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (9 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(8).

Dated: October 11, 1990

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

Final Results of Antidumping Duty Administrative Review; Roller Chain, Other than Bicycle, from Japan

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On June 18, 1990, the Department of Commerce (the Department) published the preliminary results of its administrative review of the antidumping finding on roller chain, other than bicycle, from Japan. The review covers seven manufacturer/exporters of the subject merchandise to the United States for the period April 1, 1988 through March 31, 1989.

EFFECTIVE DATE: October 22, 1990.

FOR FURTHER INFORMATION CONTACT: Louis Apple or Bradford Ward, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–1769 or (202) 377–5288, respectively.

SUPPLEMENTARY INFORMATION:

Background

On June 18, 1990, the Department published in the **Federal Register** (55 FR 26240) the preliminary results of the administrative review of the antidumping finding on roller chain, other than bicycle (roller chain), from Japan (38 FR 9226, April 12, 1973). The Department has now completed the administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act). We have reviewed the following companies for the period April 1, 1988 through March 31, 1989: Kaga Kogyo K.K./Kaga Industries Co., Ltd. (Kaga), APC Corporation, Sugiyama Chain Co., Ltd. (Sugiyama), I&OC of Japan Co., Ltd. (I&OC), Hitachi Metals Techno, Ltd. (Hitachi), Takasago RK Excel Co., Ltd. (Takasago), Pulton Chain Co., Inc. (Pulton), and Izumi Chain Manufacturing Co., Ltd. (Izumi).

Scope of Review

Imports covered by this review are shipments of roller chain from Japan. The term "roller chain, other than bicycle" as used in this review includes chain, with or without attachments, whether or not plated or coated, and whether or not manufactured to American or British standards, which is used for power transmission and/or conveyance. Such chain consists of a series of alternately assembled roller links and pin links in which the pins articulate inside the bushings and the rollers are free to turn on the bushings. Pins and bushings are press fit in their respective link plates. Chain may be single strand, having one row of roller links, or multiple strand, having more than one row of roller links. The center plates are located between the strands of roller links. Such chain may be either single or double pitch and may be used as power transmission or conveyor chain.

The review also covers leaf chain, which consists of a series of link plates alternately assembled with pins in such a way that the joint is free to articulate between adjoining pitches. The review further covers chain model numbers 25 and 35. Roller chain is currently classifiable under HTS sub-headings 7315.11.00 through 7315.12.00. These HTS sub-headings are provided for convenience and customs purposes. The written description remains dispositive.

Price Comparisons

A. Kaga Kogyo K.K./Kaga Industries Co., Ltd./APC Corporation

United States Price

As provided for in section 772(b) of the Act, we used purchase price to represent the United States price because Kaga knew at the time of the sale to an unrelated Japanese trading company that the ultimate destination of the merchandise was the United States. Purchase price was based on the packed, Yokohama port price to the unrelated trading company in Japan. We made adjustments for foreign inland freight.

Foreign Market Value

In accordance with section 773(a)(1)(A) of the Act, we calculated foreign market value based on packed, delivered prices to unrelated wholesalers and original equipment manufacturers in the home market. We made deductions, where appropriate, for inland freight.

We made circumstance of sale adjustments for differences in credit terms and technical service expenses, in accordance with 19 CFR 353.56. We deducted home market packing costs and added U.S. packing costs.

For sales that could not be matched contemporaneously, we calculated a weighted-average foreign market value for each product based on all reported sales during the review period.

B. Sugiyama Chain Co., Ltd. and I&OC of Japan Co., Ltd.

United States Price

Sugiyama made sales during the review period to I&OC, an unrelated trading company in Japan, and through a related party in the United States that sold the merchandise to unrelated purchasers after importation into the United States. Sugiyama knew at the time of the sale to I&OC that the ultimate destination of the merchandise was the United States. Therefore, all I&OC sales of Sugiyama-produced subject merchandise are subject to Sugiyama's antidumping duty rate.

As provided for in section 772(b) of the Act, we used purchase price between Sugiyama and I&OC to represent the United States price for all sales by I&OC, because Sugiyama knew that the ultimate destination of the merchandise was the United States at the time of the sale. We calculated the purchase price based on packed, f.o.b., Tokyo port prices, and made a deduction for foreign inland freight.

As provided for in section 772(c) of the Act, we used the exporter's sales price (ESP) to represent the United States price for all sales made through Sugiyama's related U.S. subsidiary because these sales were made to unrelated purchasers after importation into the United States. We made deductions, where appropriate, for foreign inland freight, foreign brokerage and handling, ocean freight, marine insurance, U.S. duty, U.S. freight and U.S. brokerage.

In accordance with section 772(e)(2) of the Act, we made additional deductions, where appropriate, for advertising, credit expenses and indirect selling expenses. Indirect selling expenses include U.S. and Japanese incurred selling expenses and inventory carrying costs. In accordance with section 772(e)(1) of the Act, we also deducted commissions.

Foreign Market Value

In accordance with section 773(a)(1)(A) of the Act, we calculated foreign market value based on packed, delivered prices to unrelated customers in the home market. We determined that sales to a related party were not at arm's length, as claimed by Sugiyama. Therefore, we did not use these sales in making our comparisons.

For comparisons involving purchase price sales, we made deductions for inland freight. We made circumstance of sale adjustments for differences in credit expense and advertising in accordance with 19 CFR 353.56. We deducted home market packing costs from the foreign market value and added U.S. packing costs.

For comparisons involving ESP sales, we made deductions, where appropriate, for inland freight. We made circumstance of sale adjustments, where appropriate, for differences in credit terms and for advertising expenses in accordance with 19 CFR 353.56. We deducted home market indirect selling

expenses, including inventory carrying costs, product liability expenses, salesmen's travel expenses, and other indirect selling expenses. This deduction for indirect selling expenses was capped by the amount of indirect selling expenses and commissions incurred in the U.S. market, in accordance with 19 CFR 353.56. We deducted home market packing costs from the foreign market value and added U.S. packing costs.

For sales that could not be matched contemporaneously, we calculated a weighted-average foreign market value for each product based on all reported sales during the review period.

For one sale there was no identical merchandise in the home market with which to compare merchandise sold in the United States. For this sale, we used the weighted-average margin calculated for the identical comparison sales.

C. Hitachi Metals Techno, Ltd.

United States Price

As provided for in section 772(b) of the Act, we used purchase price to represent the United States price for certain sales by Hitachi because the merchandise was sold to unrelated parties prior to importation into the United States. We calculated the purchase price based on packed, c.i.f., duty paid, delivered prices to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, U.S. duty, U.S. freight and U.S. brokerage. Because respondent did not provide sufficient information to support its allocation methodology, we recalculated the above expenses, using data submitted by respondent as the best information available.

As provided for in section 772(c) of the Act, we used ESP for the remaining sales, where the merchandise was sold to unrelated purchasers after importation into the United States.

We calculated ESP based on packed, c.i.f., duty paid, delivered prices to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, U.S. duty, U.S.freight and U.S. brokerage. Because respondent did not provide sufficient information to support its allocation methodology, we recalculated the above expenses, using data submitted by respondent as the best information available.

In accordance with section 772(e)(2) of the Act, we made additional deductions, where appropriate, for credit expenses and indirect selling expenses, including bad debt expenses, mailing expenses, indirect advertising expenses, and other indirect selling expenses. The lack of appropriate prior price information on the record precluded the Department's confirmation of Hitachi's allocation methodology for these expenses for U.S. sales during the review period. Therefore, we recalculated indirect selling expenses for U.S. sales, including bad debt and other expenses, using Hitachi's ESP information as best information available because respondent did not provide sufficient information to support its own overall U.S. sales allocation methodology. In accordance with section 772(e)(1) of the Act, we also deducted commissions.

Foreign Market Value

In accordance with section 773(a)(1)(A) of the Act, we calculated foreign market value based on packed prices to related and unrelated customers in the home market. We used sales to related parties only when we determined that the sales were at prices reflective of arm's length transactions.

We made circumstance of sale adjustments for differences in credit terms in accordance with 19 CFR 353.56.

For comparisons involving purchase price sales, we added U.S. commissions to the foreign market value and subtracted home market indirect selling expenses up to the amount of the U.S. commission.

For comparisons involving ESP sales, we deducted home market indirect selling expenses, including indirect advertising, and salesmen's salaries and expenses. This deduction for indirect selling expenses was capped by the amount of indirect selling expenses and commissions incurred in the U.S. market, in accordance with 19 CFR 353.56.

For sales that could not be matched contemporaneously, we calculated a weighted-average foreign market value for each product based on all reported sales during the review period.

In certain instances there were no sales of identical merchandise in the home market with which to compare merchandise sold in the United States. For some sales there were no matches provided, either identical or similar, and for other sales respondent provided similar matches but failed to provide difference in merchandise adjustment information. For these transactions, because respondent did not provide us with the information necessary to calculate a margin, the Department applied the weighted-average margin calculated for comparison sales as the best information available.

D. Takasago RK Excel Co., Ltd.

Price Comparisons

As provided for in section 776(c) of the Act, the Department has determined that use of best information available is appropriate for all sales of the subject merchandise from Takasago. The Department's decision is based on Takasago's failure to provide adequate responses to the Department's questionnaire and deficiency letters prior to the preliminary determination. The magnitude of Takasago's omissions and its complete failure to respond to the deficiency letters precluded the calculation of a margin using Takasago's data. Specifically, Takasago failed to: (1) Submit the required sales data in computerized format; (2) provide sales data in a format that would enable the Department to make price to price comparisons; and (3) provide the cost data necessary to calculate difference in merchandise adjustments.

As the best information available, the Department used the highest rate calculated for a respondent in this administrative review. (See Takasago Comment 1.)

E. Pulton Chain Co., Ltd.

United States Price

As provided for in section 772(b) of the Act, we used purchase price to represent the United States price because all sales were made directly to unrelated parties prior to importation into the United States. We calculated the purchase price based on packed, c.i.f. or f.o.b. prices to unrelated customers in the United States. We made deductions, where appropriate, for foreign inland freight, foreign brokerage, ocean freight and marine insurance.

We imputed credit for respondent's U.S. sales because respondent failed to provide any information on credit expenses incurred, including payment dates. As best information available, we based the credit calculation on an average credit period of 90 days. For a number of transactions we corrected respondent's database to conform to its written submissions, including one model match error for one transaction.

Foreign Market Value

In accordance with section 773 of the Act, we calculated foreign market value for Pulton based on home market sales prices or constructed value (CV), as appropriate.

For those products sold in the United States for which an identical model was sold in the home market, we deducted home market packing costs from the foreign market value and added U.S.

packing costs. We recalculated home market credit based on the short-term interest rate and average credit period, as provided by respondent. We made a circumstance of sale adjustment, where appropriate, for differences in credit terms.

For those products sold in the United States for which no identical model was sold in the home market and for which respondent provided cost of production data, we calculated foreign market value based on CV as provided for in section 773(e) of the Act.

Constructed value includes the cost of materials and fabrication of the merchandise, plus general expenses, profit and packing. For material, direct labor and overhead, the Department used the respondent's data. Some of these figures were adjusted using respondent's data to coincide with sales value information submitted on a per foot basis. Actual selling, general and administrative (SG&A) costs were used because these amounts exceeded the statutory minimum of ten percent. For general and administrative costs the Department derived the rate from the respondent's annual financial statements. Interest expense was also derived from the respondent's annual financial statements. Total interest expense was reduced by the ratio of accounts receivable to total assets, in order to account for imputed credit costs which were individually added to the constructed value. The Department also added a per unit amount of indirect selling expenses. For profit the Department used the statutory minimum of eight percent as actual profit was less than eight percent of the cost of production. The Department added the respondent's per unit amount of packing on a per foot basis to arrive at total constructed value.

We made a circumstance of sale adjustment for differences in home market and United States credit expenses.

F. Izumi Chain Manufacturing Co., Ltd.

Price Comparisons

As provided for in section 776(a) of the Act, the Department has determined that use of best information available is appropriate for all sales of the subject merchandise from Izumi. The Department's decision is based on the magnitude of the omissions and deficiencies in Izumi's responses. Specifically, Izumi failed to: (1) Provide the Department with convincing evidence to support its claim that its home market sales to a related party were at prices reflective of arm's length transactions, or provide the Department with information regarding the home market sales to the first unrelated purchaser; (2) Properly match its U.S. sales with the most similar home market merchandise in accordance with the Department's requirements, or provide information that would allow the Department to select the most similar home market product; and (3) Provide the information necessary to calculate the differences in merchandise costs associated with any new matches.

As the best information available, the Department used the highest rate calculated for a respondent in this administrative review.

Currency Conversion

In accordance with 19 CFR 353.60 we used the official exchange rates in effect on the appropriate dates for determining foreign market value. All currency conversions were made at the rates certified by the Federal Reserve Bank.

Interested Party Comments

A. Kaga Kogyo K.K./Kaga Industries Co., Ltd./APC Corporation

Comment 1: Petitioner requested that the Department verify Kaga's questionnaire response before issuing the final results of this administrative review. Petitioner contends that under the Department's regulations, the Department may conduct a verification where it determines that "good cause for verification exists." (19 CFR 353.36(a)(iv)).

DOC Position: The Department denied petitioner's request for verification of Kaga's questionnaire response. Petitioner's request was untimely in accordance with 19 CFR 353.38(a)(v)(A); and would have prevented the Department from properly carrying out its investigation within the statutory deadline.

B. Sugiyama Chain Co., Ltd. and I&OC of Japan Co., Ltd.

Comment 1: Sugiyama, I&OC and Hokoku contend that the Department should reverse its preliminary decision to apply a single dumping margin for Sugiyama sales through the I&OC and Hokoku distribution channels. Respondents argue that the Department correctly calculated separate margins for each distribution channel in prior administrative reviews. Furthermore, consistency with past practice requires the Department to continue to assign a separate dumping margin to each distribution channel because the parties have reasonably relied on prior margins to individually apply for a revocation of the dumping order. Respondents further maintain that the Department's circumvention concern, which may have motivated the Department to assign a single dumping rate to all Sugiyama sales, is unwarranted because Sugiyama does not retain the authority or control to shift sales between the different distribution channels.

Petitioner requests that the Department calculate a final margin for "Sugiyama/I&OC" sales based exclusively on sales between Sugiyama and I&OC rather than the weighted-average margin calculated on all Sugiyama sales. The weighted-average margin used in the final determination included all sales through different distribution channels.

DOC Position: We disagree that separate margins should be calculated for a company's individual distribution channels. In deciding whether it is appropriate to revoke a company out of an order, it is necessary to evaluate the pricing behavior of the company as a whole, as opposed to the pricing behavior to individual customers. To do otherwise would provide a company with the opportunity to switch distribution channels so as to limit dumping liability, or escape it altogether. Therefore, the Department has assigned only one margin for all of Sugiyama's sales, regardless of the distribution channel, based on the weighted-average margin of all its sales. The Department will, however, continue to list Sugiyama's separate distribution channels as an administrative convenience to the Customs Service.

Comment 2: Petitioner contends that Harima Enterprise Co., Ltd. (Harima) should receive Sugiyama's final margins in this review if Sugiyama generally knows the ultimate destination of the roller chain at the time of sale to Harima. If Sugiyama does not know the ultimate destination of the merchandise, the Department should continue to apply the most recent actual rate calculated for Harima.

DOC Position: Harima did not sell any subject merchandise to United States customers during this period of review. We will apply the Sugiyama rate from this administrative review to any entries of roller chain sold by Sugiyama/Harima.

Comment 3: Sugiyama contends that home market expenses reported as "other" should be deducted as direct expenses, rather than as indirect expenses, because these expenses were incurred to promote sales.

DOC Position: We disagree. These expenses, by respondent's own admission "cannot be tied to a specific product, sale or customer." These expenses represent overhead such as

automobile repair and maintenance, gasoline costs, and train and airline tickets, all of which are costs that would be incurred regardless of whether a sale was made.

Comment 4: Sugiyama requests that the Department revise the home market credit expense calculations pursuant to Attachment 3 of Sugiyama's July 27, 1990 submission.

DOC Position: We disagree. We have used the credit methodology originally submitted by Sugiyama, and have confirmed that Sugiyama's narrative questionnaire response is consistent with the credit calculations reported on the tape. The Department cannot accept changes to data that were submitted in an untimely fashion, according to 19 CFR 353.31(a) (ii).

Comment 5: Sugiyama contends that the Department should use sales to a related customer in the home market to calculate foreign market value.

DOC Position: We disagree. Sugiyama admits that the customer in question is related. Through an analysis of the data, the Department has confirmed that the related customer is charged prices that are lower than those charged to unrelated customers. Thus, the sales were not made at arm's length, and fail to provide a suitable basis for establishing foreign market value.

Comment 6: Sugiyama requests that the Department make a level of trade adjustment for its sales through Hokoku.

DOC Position: We disagree. Sugiyama has offered no evidence in support of its claim that Hokoku's higher prices are caused by the higher costs Hokoku incurs due to its place in the distribution chain.

Comment 7: Sugiyama requests that the Department exclude from its calculations all Hokoku sales made to Canadian customers that were erroneously reported as U.S. sales.

DOC Position: The Department has excluded such sales from the calculation of Sugiyama's dumping margin.

Comment 8: Sugiyama requests that the Department correct the order dates for a list of invoices included in its July 27, 1990 submission.

DOC Position: The Department did not make these changes. The Department provided Sugiyama with ample opportunity to revise its questionnaire response. The Department cannot continue to make such changes if it is to fulfill its obligation to complete reviews on a timely basis. Sugiyama continues to find small errors in its data and at this late date in the review, it is very burdensome for the Department to make the changes respondent requests. In addition, new data submitted at this time would be filed in an untimely fashion pursuant to 19 CFR 353.31(b).

Comment 9: Sugiyama contends that the DOC should not apply the ESP offset adjustment in this case because the use of it leads to margins where they would not otherwise exist.

DOC Position: We disagree. The ESP offset adjustment is correctly applied in situations of this kind pursuant to 19 CFR 353.56.

C. Hitachi Metals Techno, Ltd.

Comment 1: Hitachi argues that the Department incorrectly calculated inland freight, insurance, duty, and brokerage ratios for the review period. Hitachi maintains that the Department should have applied the listed percentages to the f.o.b. purchase price of chain sold instead of applying them to the U.S. selling price as was done for the preliminary results of review.

DOC Position: We disagree. For our preliminary results, we recalculated the above-named expenses as best information available because Hitachi did *not* provide sufficient information to support its allocation methodology. Our position has not changed for these final results for several reasons. Because Hitachi did not provide the f.o.b. values, we were unable to confirm the accuracy of the allocations on the computer tape, which were provided in the form of percentage of f.o.b. Moreover, additional information regarding these expenses was untimely pursuant to 19 CFR 353.31(a)(ii). Finally, it does not appear likely that each of these expenses was incurred on a value basis rather than a weight, distance, volume, or other basis. For all of the above reasons, we have not altered our treatment of these expenses from the preliminary results.

Comment 2: Hitachi argues that the Department incorrectly deducted as an expense the bad debt reserve allowance from the U.S. selling price. This allowance is not an actual expense, but merely a reserve account used for covering future default payments by customers. Moreover, this fund was not drawn upon during the review period. Hitachi maintains that this should preclude the deduction of the allowance as an expense.

DOC Position: We disagree. Bad debt reserve is used to cover future losses resulting from customer's failure to pay. Irrespective of whether bad debt losses are actually incurred during the period of review, the setting aside of a reserve to cover such losses remains an indirect selling expense. Therefore, we have made the deduction from ESP.

Comment 3: Hitachi contends that the Department incorrectly calculated and deducted an imputed credit expense from the U.S. price. In addition, the Department double-counted the credit expense by also deducting the interest expense provided by Hitachi in its SG&A and interest expense calculations. Hitachi requests that the Department recalculate the SG&A and omit itemized interest expense data from the SG&A ratios.

DOC Position: We agree with Hitachi and have made the appropriate adjustments.

Comment 4: Hitachi contends that in its preliminary determination the Department calculated an imputed home market credit expense and deducted it as a direct expense from the home market price when calculating foreign market value. At the same time, Hitachi states that the Department declined to make a circumstance of sale adjustment by deducting home market interest expense from foreign market value. Hitachi contends that the Department should apply the same credit expense methodology used in the foreign market value calculations to the U.S. credit expense.

DOC Position: Credit expense was imputed for both U.S. price and home market price. We made imputed credit expense adjustments to both the U.S. and home markets. To avoid double-counting we did not adjust for the claimed interest expense in the calculation of credit for both the home and U.S. markets.

Comment 5: Petitioner argues that because Hitachi has failed to supply sufficient information concerning foreign inland freight, ocean freight, marine insurance, U.S. duty, U.S. freight, U.S. brokerage, and U.S. indirect selling expenses, the Department should rely on the best information available in calculating the company's margin.

DOC Position: The Department's methodology for calculating the movement expenses is outlined in Hitachi Comment 1.

Comment 6: Petitioner argues that the Department should use the highest margin calculated for a matched Hitachi sale as the best information available for determining the margin to be applied to unmatched Hitachi sales. Petitioner states that the Department's decision to apply "the weighted-average margin calculated on identical comparison sales" unfairly rewarded Hitachi for its failure to supply requested data.

DOC Position: We disagree. To calculate the best information available rate for unmatched transactions, we applied the weighted-average margin calculated for all comparison sales. Application of the highest rate is inappropriate in this instance because

the highest individual rate appeared to be anomalous.

D. Takasago RK Excel Co., Ltd.

Comment 1: Takasago contends that the Department should reconsider its preliminary decision to apply to Takasago the highest rate calculated for a respondent under review. Specifically, Takasago suggests that the Department either (1) calculate Takasago's margin based on its non-computerized data through the use of sampling or averaging techniques; (2) permit Takasago to submit additional information to supplement the original responses; or (3) apply a less punitive best information available rate based on either an average of Takasago's prior margins, the last calculated rate which resulted in a margin greater than a *de minimis* amount, or Takasago's most recently determined best information available rate from the 1982–83 review period for the importer to whom Takasago exported merchandise during the review period.

Takasago argues that application of a rate other than the highest rate calculated for a respondent is justified because of Takasago's good faith attempts to comply with the Department's requests for information and Takasago's reliance on the Department's past practice in prior reviews. Takasago asserts that although numerous factors and circumstances prevented Takasago's complete compliance with the Department's requests, its cooperation and efforts to comply warrant a non-punitive best information available rate.

Takasago contends that language barriers and the lack of sophistication of company personnel and computer technology precluded Takasago from properly reporting all sales information. Absent a complete understanding of the Department's methodology and requests for information, Takasago relied on the Department's past practice of accepting the information submitted by Takasago as an indication of the sufficiency of its response. In prior review periods, the Department did not contact Takasago nor request additional information with regard to Takasago's submissions. In the current case, Takasago did not attach any special significance to the additional deficiency letters and requests for computerized data.

Takasago also contends that the Department's efforts to apprise Takasago of the Department's reinforced standards were "too subtle" and its assistance inadequate. Specifically, the telephone conversation initiated by a U.S Embassy interpreter in Tokyo failed to adequately explain the negative consequences of applying the best information available rate. In addition, correspondence from the Department was too technical to be understood and the firm was unable to comply within the required time frame. With the assistance of only Japanese counsel, Takasago continued to rely on the Department's practice in prior reviews as a guide to the Department's actual requirements.

Takasago's efforts to sufficiently fulfill the Department's requests were further hampered by the loss of necessary information during a recent merger, an insufficient staff to gather the data and compile the responses, the overwhelming amount of information requested on a large volume of sales transactions during the relevant review periods, and the absence of any computer facilities or computer-literate staff to provide information in the required computerized format. Takasago contends that the Department's requirement of computerized submissions constituted an extreme and unfair burden in that the company does not maintain computerized records and the time requirements imposed were inadequate to enable the company to provide computerized information. Despite these obstacles, the response actually submitted by Takasago indicates Takasago's good faith effort to comply with the Department's demands.

Petitioner urges the Department to continue to apply the best information available rate from the preliminary determination due to the "woeful inadequacy" of Takasago's response.

DOC Position: The Department agrees with petitioner. In this case, the evidence on the record calls for use of the highest rate calculated for another respondent as a best information available rate for Takasago in the administrative review. The Department's application of best information available to calculate Takasago's dumping margin is reasonable and justified, because Takasago's original responses and deficiency response contain serious deficiencies that render them wholly inadequate for use in calculating dumping margins. Among the numerous deficiencies, the most egregious were lists of sales on a cumulative per-model basis rather than on a transactional basis, failure to separate U.S and home market charges and expenses, failure to allocate the charges on a transactional basis or even to attempt to formulate a reasonable allocation methodology, and failure to provide a computerized database. The omissions of information are so pervasive that any attempt to calculate a dumping margin using Takasago's data would be completely arbitrary.

Takasago contends that its good faith efforts and mitigating circumstances warrant application of a best information available rate other than the highest rate imposed on another respondent in the review. Takasago professes that its reliance on the Department's past practice of accepting its response was reasonable because the Department failed to adequately notify the respondents of a change in procedure. A review of the record indicates otherwise.

The Department repeatedly attempted to convey to Takasago the seriousness of its deficiencies. Over the course of the review period, Takasago received three deficiency letters. A February 28, 1990 letter specifically notified Takasago of the Department's requirement for computerized data. Given the explicit and numerous notices received by Takasago, Takasago cannot reasonably rely on the Department's past acceptance of its responses as an indication of approval for the response submitted in the review period. In prior years, as respondent notes, the Department sent no deficiency letter. In this review, it sent three. A reasonable conclusion is that something was different. In addition, the company could have resolved any misunderstandings resulting from linguistic problems by contacting the Import Administration attache at the American Embassy. In fact, the Import Administration attache/interpreter initiated contact with Takasago. As the record indicates, the Department took unprecedented and unusual steps to notify the company of the Department's procedures and to elicit the necessary information from the company to comply with the Department's requests. In this specific case, the Department more than satisfied any responsibility it has to assist a respondent in complying with the Department's requests.

Takasago also cites numerous other factors which prevented the company from adequately responding to the Department's requests within the specified time periods. Despite the alleged existence of these factors, the Department maintains that the appropriate best information available rate was applied in light of the total circumstances. The Department has numerous orders to administer, which it must do on a timely basis and in accordance with the law. It remains respondent's duty to apprise themselves of the requirements under the laws and to satisfactorily meet those requirements. In this case, respondents

failed to present even the minimal information required.

E. Pulton Chain Co., Ltd.

Comment 1: Petitioner contends that the Department should continue to apply a rate based on the best information available for Pulton because it failed to submit computer diskettes in time for use in the preliminary results of review and did not provide the data necessary to match U.S. sales with home market transactions. Petitioner relies on 19 CFR 353.31(a)(ii) to support its position that respondent's submission of computer data is untimely and should not be used for the final results. Petitioner argues that use of a company's data without the opportunity for a domestic party to comment on the use or content of such data deprives the domestic party of its statutory rights and constitutional rights of due process.

Pulton requests that, in the final results of review, the Department use the company's data submitted on computer diskettes on April 14, 1990, May 8, 1990, June 1, 1990 and June 27, 1990 to calculate the antidumping margins for the review period. Pulton contends that the company submitted the data in response to each of the Department's requests. Furthermore, the data submitted by the company does not constitute new data. The multiple submissions of diskettes arose from a format problem with the computer diskettes and did not involve any changes in information submitted or any new information.

Pulton further argues that use of its data does not infringe upon petitioner's constitutional or statutory rights. Pulton states that petitioner was provided with an APO version of a printout of the computer tapes on July 1, 1990, at which time the petitioner could have commented on the material. Furthermore, the opportunity for clerical error review and judicial review presents the petitioner with the opportunity to comment on Pulton's data and the results of the use of that data. Pulton cites precedent for use of information submitted after the date of the preliminary results of review.

DOC Position: The Department agrees with respondent. Fairness and equity warrant use of respondent's data. As the record demonstrates, unusual technical difficulties occurred with Pulton's computer diskettes. Pulton consistently cooperated with the Department to remedy the problem which arose from the use of a computer system incompatible with the Department's system. Due to the nature of the technical problem, the Department notified Pulton in a letter dated June 18, 1990 that the Department would use the computer data in the final administrative review if the technical problem was corrected in conformity with our instructions by June 29, 1990. On June 29, 1990, Pulton submitted diskettes consistent with our instructions. The information submitted constituted an adequate response and we have used respondent's data to the extent possible to compute margins based on sales or constructed value information.

Petitioner's claim that use of Pulton's data deprives petitioner of its statutory and constitutional right to meaningful participation is without merit. The correspondence notifying respondent of the Department's decision to use the data if properly submitted by June 29, 1990 is contained in the public record. The June 18, 1990 letter serves as notice to all parties of the Department's possible use of the data in the final administrative review. Petitioner also received an APO version of Pulton's submission. Knowledge of the Department's possible use of the data and receipt of the respondent's APO version of its response provided petitioner with the opportunity to comment on respondent's data. Any harm incurred by petitioner was due not to administrative actions but to petitioner's own failure to effectively participate in the administrative review proceedings.

F. Izumi Chain Manufacturing Co., Ltd.

Comment 1: Izumi contends that it is unreasonable for the Department to request that Izumi report sales of Izumi-produced chain in the home market made by a party related to Izumi. Izumi argues that it has no control over the related party and could not compel the related party to respond to the Department's requests for information. Further, all sales between Izumi and the related party were arm's length transactions.

The petitioner contends that the Department was correct in requesting related party sales information. Such information is necessary for the calculation of U.S. price, because sales of Izumi roller chain made through a related party must be considered in calculating Izumi's antidumping margin. In addition, for sales made in the home market through a related party, the foreign market value must be based on the resale prices of the related party.

DOC Position: 19 CFR 353.45(b) provides that the Department may calculate foreign market value based on sales made through a related party. Pursuant to 19 CFR 353.45(a), it is the Department's practice to calculate foreign market value based on prices to related parties, if the respondent can show that those sales are as between two unrelated companies (*i.e.*, that the sales were arm's length transactions). If the respondent cannot show that the sales were at arm's length, and the sales made through the related party are a significant percentage of all sales in the home market, the Department calculates foreign market value on the basis of the sale price to the first unrelated party.

The Department provided Izumi with the opportunity to either show that its home market sales were at arm's length or to report the sales to the first unrelated purchaser.

Izumi could not show that its sales to the related party were at arm's length. In fact, these sales did not appear to be at market prices because the prices to the related party were uniformly lower than prices to unrelated parties. While Izumi claimed that the lower prices were attributable to economies of scale associated with its sales to the related party, Izumi was unable to show any correlation between manufacturing cost savings for merchandise sold to the related party and price discounting. In situations in which the transactions between related parties cannot be shown to be at arm's length and a substantial percentage of home market sales were made through a related party, the Department must rely on the sales to the first unrelated purchasers in calculating foreign market value. Izumi's refusal or inability to provide information on the sales to the first unrelated purchaser left the Department no basis with which to calculate foreign market value.

Comment 2: Izumi contends that in the absence of home market sales information, the Department is required to utilize third country sales or constructed value.

DOC Position: Section 773(A)(1) of the Act establishes a clear hierarchy for the calculation of foreign market value. The Act dictates that foreign market value be based on home market sales unless there were no home market sales or the quantity of home market sales is so small as to form an inadequate basics for comparison. Sales of Izumi's roller chain in the home market were significant enough to form an adequate basis for comparison. Where the home market is the appropriate basis for foreign market value and where a respondent is unable or unwilling to report those sales, the Act does not permit the calculation of foreign market value based on third country sales or constructed value.

Comment 3: Izumi argues that it has cooperated with the Department by submitting four responses, two deficiency responses, and six computer tapes and that this degree of cooperation does not warrant the total disregard of Izumi's data.

DOC Position: Izumi has not responded in a qualitative sense to the Department's requests for information. As noted in the *Price Comparisons* section of this notice, Izumi's responses were seriously deficient in a number of areas. Any one of the noted deficiencies alone would necessitate the use of the best information available. The Department is required, in accordance with section 776(c) of the Act, to use the best information available "whenever a party or other person refuses or is unable to produce information requested in a timely manner and in the form required."

Final Results of the Review

As a result of our analysis, we determine the margins to be:

Manufacturer/exporter	Margin (percent)
Kaga Industries Co., Ltd	0.00
APC Corporation	0.00
Sugiyama Chain Co., Ltd	0.62
I&OC of Japan Co., Ltd	0.62
Hitachi Metals Techno, Ltd	7.04
Takasago RK Excel Co., Ltd	7.04
Pulton Chain Co., Inc	1.08
Izumi Chain Co., Ltd	7.04

The Department will instruct the Customs Service to assess antidumping duties at the above rates on all appropriate entries. The Department will issue appraisement instructions directly to the U.S. Customs Service. Further, as provided for in section 751(a)(1) of the Act, the Department will require a cash deposit of estimated antidumping duties based on the above margin on entries of this merchandise from manufacturer/exporters listed above.

For shipments from the remaining known manufacturers and exporters not covered by this review the cash deposit will continue to be the latest rate applicable to each of those firms. For any further entries of this merchandise from a new exporter not covered in this or prior reviews, whose first shipments occurred after March 31, 1989, and who is unrelated to any reviewed firm or any previously reviewed firm, a cash deposit of 7.04 percent shall be required.

These deposit requirements are effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(8).

Dated: October 11, 1990.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-337-602]

Standard Carnations From Chile; Revised Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of revised preliminary results of antidumping duty administrative review.

SUMMARY: In response to comments by three respondents, the Department of Commerce has determined to revise the preliminary results in the administrative review of the antidumping duty order on standard carnations from Chile, published in the **Federal Register** on August 14, 1989 (54 FR 33263). The review covers four producers/exporters of this merchandise to the United States and the period November 3, 1986 through February 29, 1988. Based on our analysis, we have determined not to use best information otherwise available for three respondents and have revised the margins from those presented in our preliminary results of August 14, 1989. The margin for the fourth respondent, Agricola Longotoma, remains the same.

EFFECTIVE DATE: October 22, 1990.

FOR FURTHER INFORMATION CONTACT: Laurie A. Lucksinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5253.

SUPPLEMENTARY INFORMATION: On March 20, 1987, the Department of Commerce (the Department) published in the **Federal Register** (52 FR 8939) the antidumping duty order on standard carnations from Chile. The Floral Trade Council, the petitioner, and three respondents requested, in accordance with 19 CFR 353.53a(a)(1988), that we conduct an administrative review. On August 14, 1989, the Department published in the **Federal Register** (54 FR 33263) the preliminary results of that administrative review. Based upon comments from three respondents, the Department has decided to revise the preliminary results in this administrative review.

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by the review are shipments of standard carnations from Chile. During the review period such merchandise was classifiable under item 192.21 of the Tariff Schedules of the United States Annotated (TSUSA). This merchandise is currently classifiable under HTS item 603.10.90. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive. The review covers four producers/or exporters of standard carnations from Chile to the United States and the period November 3, 1986 through February 29, 1988.

Decision to Issue Revised Preliminary Results of the Review

In arriving at the preliminary results for this review period (54 FR 33263), the Department initially relied on the best information otherwise available because the questionnaire responses it received from three respondents, Coexflor, Ltda. (Coexflor), Flores de Chile, Ltda. (Flores de Chile), and Sociedad Agricola Arixtia Vallejos Y Cia, Ltda. (Sociedad Agricola), did not provide the information as requested. The Department also used the best information otherwise available for a fourth company, Agricola Longotoma, Ltda. (Agricola Longotoma), because it did not respond to the questionnaire.

We received comments in response to our preliminary results of review, however, which indicated that we could conduct a review based on the initial and supplemental questionnaire responses. We reexamined the questionnaire responses for Coexflor, Flores de Chile, and Sociedad Agricola and agree that they are adequate. Therefore, we have revised our analysis of these three companies for this review period. The following discussion of United States price and foreign market

value applies to the methodology used to analyze these three companies.

United States Price

For purposes of our revised preliminary results of review, we used purchase price when sales were made to unrelated purchasers prior to the date of importation, as provided in section 772(b) of the Tariff Act of 1930, as amended (the Tariff Act), and exporter's sales price when sales were made to unrelated purchasers in the United States after the date of importation, as provided in section 772(c) of the Tariff Act.

Purchase price was calculated based on the f.o.b., Santiago, packed price to unrelated purchasers in the United States. We made deductions, where appropriate for movement expenses and phytosanitary charges. Exporter's sales price was calculated based on the price to the first unrelated customer in the United States. Deductions were made, where appropriate for movement expenses, commissions, phytosanitary charges, credit expenses and duty drawbacks.

All United States prices were weight-averaged on a monthly basis in order to account for the perishability of the product. Unlike nonperishable products, sellers cannot withhold their flowers from the market until they can obtain a desired price. Rather they accept whatever return they can obtain on certain sales or destroy the merchandise. We believe that averaging United States prices over a relatively short period of time contributes to a fairer and more representative measure of fair value. Accordingly, we have continued to calculate a monthly United States price, as was done in the fair value investigation leading to the antidumping duty order, as well as antidumping reviews on flowers from other covered countries.

Foreign Market Value

Foreign market value was calculated based on monthly weighted-average home market prices. In accordance with section 773(a) of the Tariff Act, we calculated foreign market value based, where applicable, on packed prices to unrelated purchasers in the home market. We made deductions, where appropriate for movement expenses and adjustments, where appropriate, for commissions and credit.

When comparing foreign market value to United States price, comparisons were made on a grade-specific basis whenever possible. If grade-specific information was unavailable, comparisons were made on a standard carnation basis.

Revised Preliminary Results of the Review

As a result of our revised calculations, we preliminarily determine that the following margins exist for the period November 3, 1986 through February 29, 1988:

Manufacturer/exporter	Margin (percent)
Agricola Longotoma	28.78
Coexflor	0.00
Flores de Chile	0.04
Sociedad Agricola	0.00

Interested parties may request disclosure within five days of publication of this notice and may request a hearing within ten days of publication. Any hearing, if requested, will be held 44 days after publication or the first workday thereafter. Case briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues in those comments, may be filed not later than 37 days after publication. the Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Furthermore, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated dumping duties based on the above margin shall be required on shipments of standard carnations by Argicola Longotoma. No cash deposit will be required on shipments of standard carnations by Coexflor or Sociedad Argicola. Since he margin for Flores de Chile is less than 0.5 percent and, therefore, *de minimis* for cash deposit purposes, the Department shall not require a cash deposit of antidumping duties on entries of carnations from Flores de Chile. For any future entries of this merchandise from a new producer and/or exporter, not covered in this review or in the original investigation, whose first shipments occurred after February 29, 1988, and who is unrelated to the reviewed firms or any firm which was subject to the original investigation, no cash deposit shall be required.

These deposit requirements are effective for all shipments of standard carnations from Chile entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a) (1) of the Tariff Act (19 U.S.C. 1675(a) (1)) and 19 CFR 353.22(1990).

Dated: October 12, 1990.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

Television Receivers, Monochrome and Color, From Japan; Preliminary Results of Antidumping Duty Administrative Reviews

AGENCY: Import Administration/ International Trade Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative reviews.

SUMMARY: In response to requests by two domestic parties to the proceeding and one respondent, the Department of Commerce has conducted administrative reviews of the antidumping finding on television receivers from Japan. The reviews cover 11 manufacturers/exporters of this merchandise to the United States and various periods from September 29, 1983 through February 28, 1990. The reviews indicate the existence of dumping margins for certain firms during certain periods.

As a result of the reviews, the Department has preliminarily determined to assess antidumping duties equal to the difference between United States price and foreign market value.

If we received no company-supplied information or if information was inadequate or untimely, we used the best information available for assessment and cash deposit purposes.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: October 22, 1990.

FOR FURTHER INFORMATION CONTACT: David Levy, Simone Alfeld, or John R. Kugelman, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2923/3601.

SUPPLEMENTARY INFORMATION:

Background

On September 4, 1990, the Department of Commerce (the Department)

published in the **Federal Register** (55 FR 35916) the final results of its last administrative review (Sharp for 4/81–2/86) of the antidumping finding on television receivers, monochrome and color, from Japan (36 FR 4597, March 10, 1971). Two domestic parties to the proceeding, Zenith Corporation and the United Electrical Workers of America, Independent, International Brotherhood of Electrical Workers, International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers, AFL–CIO, and Industrial Union Department (the Unions), and one respondent, Fujitsu General, requested that we conduct administrative reviews for various periods from September 29, 1983 through February 28, 1990, in accordance with § 353.22(a) of the Department's Regulations. We published notices of initiation on April 18, 1986, July 9, 1986, March 8, 1988, April 28, 1989, and April 27, 1990. The Department is now conducting those administrative reviews pursuant to section 751 of the Tariff Act of 1930 (the Tariff Act).

Questionnaire responses were submitted by Fujitsu General, Funai, Hitachi, Matsushita, Mitsubishi, NEC, Sanyo, Seiko Epson, Sharp, Toshiba, and Victor, covering various periods.

Scope of the Review

Imports covered by the review are shipments of television receivers, monochrome and color, from Japan. Television receivers include, but are not limited to, units known as projection televisions, receiver monitors, and kits (containing all parts necessary to receive a broadcast television signal and produce a video image). Not included are certain monitors not capable of receiving a broadcast signal, certain combination units, and certain subassemblies not containing the components essential for receiving a broadcast television signal and producing a video image. During the review periods, television receivers, monochrome and color, were classifiable under items 684.9230, 684.9232, 684.9234, 684.9236, 684.9238, 684.9240, 684.9245, 684.9246, 684.9248, 684.9250, 684.9252, 684.9253, 684.9255, 684.9259, 684.9258, 684.9262, 684.9263, 684.9265, 684.9270, 684.9275, 684.9400, and 684.9655 of the Tariff Schedules of the United States Annotated (TSUSA). This merchandise is currently classifiable under Harmonized Tariff Schedule (HTS) items 8528.10.80, 8528.11.00, and 8528.20.00. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

These reviews cover 11 manufacturers/exporters of Japanese television receivers, monochrome and color, and various periods from September 29, 1983 through February 28, 1990. All reviewed periods are identified in the *Preliminary Results of Review*.

Of the eleven firms covered in these reviews, only Fujitsu General's (FG) eighth review rate is based on analysis of a questionnaire response. However, because FG's responses to the Department's ninth review questionnaires were untimely submitted, we used best information available (BIA) for FG's ninth review rate. Since FG had no commercial shipments during the eleventh review, for that period we used FG's rate from the ninth review.

Victor's questionnaire response for the ninth review period was inadequate because Victor provided information for only the first half of the review period. In addition, Matsushita declined to respond to the Department's ninth review questionnaire, Matsushita and Victor declined to respond to the Department's tenth review questionnaire, and Matsushita and NEC declined to respond to the Department's eleventh review questionnaire. In the eleventh review period, although Mitsubishi had no shipments, it did have sales of merchandise shipped during prior review periods; however, it declined to furnish information on these inventory sales. Therefore, for these four firms for the periods noted above, we used as BIA the highest rate for any firm from the most recent reviewed period, which is FG's 49.56 percent rate from the eighth review period.

Although Hitachi's and Sanyo's responses to the Department's antidumping questionnaire indicated that they had no commercial shipments during their respective reviewed periods, we have evidence from U.S. Customs of numerous entries of merchandise produced by these firms. Since it is unclear whether the imported merchandise is covered by this finding or whether these two firms had any knowledge of commercial shipments to the United States of covered merchandise, we determined not to use the most adverse BIA. Therefore, for Hitachi for periods 5 and 6, we used Funai's rate as BIA, which was the highest final rate for the periods. For both of these firms for periods 9, 10, and 11, as BIA we used the highest final rate for those periods, which was Funai's rate for period 9 and NEC's rate for period 10.

Funai, Sharp, and Toshiba had no shipments during their respective reviewed periods, and Victor had no shipments during the eleventh review period. Therefore, for these firms for these review periods we used their own rates from the last period in which there were shipments by these firms.

Seiko also had no shipments during the eleventh period of review. However, because this is the first review requested for Seiko, we applied the automatic liquidation rate in effect at the time of its last known shipment to the United States, which was in November 1986.

United States Price

In calculating United States price for FG in the eighth review, the Department used purchase price (PP) or exporter's sales price (ESP), both as defined in section 772 of the Tariff Act, as appropriate. PP and ESP were based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in the United States. We made adjustments, as applicable, for ocean freight, marine insurance, U.S. and Japanese inland freight, inland freight insurance, U.S. and Japanese brokerage fees, forwarding and handling charges, export selling expenses incurred in Japan, discounts, royalties, rebates, commissions to unrelated parties, and the U.S. subsidiaries' selling expenses.

Foreign Market Value

In calculating foreign market value (FMV), the Department used home market price, as defined in section 773 of the Tariff Act, when sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. When more than 90 percent of the sales of a particular model were determined to be sold below the cost of production, we used constructed value, as defined in section 773 of the Tariff Act. Constructed value includes materials, fabrication, general expenses, profit and packing. We used: (1) Actual general expenses, since these exceeded the statutory minimum requirement of ten percent of materials and fabrication, (2) the statutory eight percent for profit, because actual profit was less than the statutory minimum, and (3) the cost of U.S. packing. We made adjustments, as applicable, for inland freight, discounts and rebates, royalties, advertising, sales promotion, and, in ESP comparisons, indirect selling expenses not exceeding the amount of U.S. indirect selling expenses.

Parties to the proceeding may request disclosure within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held as early as convenient for the parties but not later than 44 days

after the date of publication of this notice, or the first workday thereafter. Interested parties may submit case briefs/written comments not later than 30 days after the date of publication. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than 7 days after submission of the case briefs. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

The Department shall determine, and the Customs Service will assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Preliminary Results of Review

As a result of our review, we preliminarily determine that the following margins exist:

Manufacturer	Review no.	Period of review	Margin (percent)
Fujitsu General	8		
	9		
	11	03/01/86–02/28/87	
		03/01/87–02/29/88	
		03/01/88–02/28/90	49.56
			49.56
			[1] 49.56

[1] No shipments during the period; rate from last period in which there were shipments.

Further, as provided for by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the most recent of the above margins will be required for the above firms. For any future entries of this merchandise from a new exporter not covered in this or in prior reviews, whose first shipments of the merchandise occurred after February 28, 1990, and who is unrelated to any reviewed firm or any previously reviewed firm, a cash deposit of 49.56 percent shall be required. These deposit requirements are effective for all shipments of Japanese television receivers, monochrome or color, entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of these administrative reviews.

These administrative reviews and this notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675 (a)(1)) and § 353.22 of the Department's regulations (19 CFR 353.22) (1989).

Dated: October 12, 1990.

Marjorie Chorlins,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Short-Supply Determination: Certain Continuous Cast Steel Slabs

AGENCY: Import Administration/ International Trade Administration, Commerce.

ACTION: Notice of short-supply determination on certain continuous cast steel slabs.

SHORT-SUPPLY REVIEW NUMBER: 22.

SUMMARY: The Secretary of Commerce ("Secretary") hereby grants a short-supply allowance for 125,000 net tons of certain continuous cast ("concast") steel slabs for the fourth quarter of 1990 under Article 8 of the U.S.-E.C. steel arrangement.

EFFECTIVE DATE: October 10, 1990.

FOR FURTHER INFORMATION CONTACT: Sally A. Craig or Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230 (202) 377-3510 or (202) 377-0159.

SUPPLEMENTARY INFORMATION: On September 12, 1990, the Secretary received an adequate short-supply petition from Tuscaloosa Steel Corp. ("TSC") requesting a short-supply allowance for 125,000 net tons of certain concast steel slabs for the fourth quarter of 1990 under Article 8 of the Arrangement Between the European Coal and Steel Community and the European Economic Community, and the Government of the United States of America Concerning Trade in Certain Steel Products. TSC is requesting short supply because domestic producers cannot meet its needs for the fourth quarter of 1990 and because it cannot obtain sufficient supplies with regular export licenses from its traditional offshore supplier. The Secretary conducted this short-supply review pursuant to section 4(b)(4)(A) of the Steel Trade Liberalization Program Implementation Act, Public Law No. 101-221, 103 Stat. 1886 (1989) ("the Act"), and § 357.102 of the Department of Commerce's Short-Supply Regulations (19 CFR 357.102).

The requested material meets the following specifications:

Dimensions:
- *Gauge: 8 inches to 10 inches*
- *Width: 60 inches to less than 84 inches*
- *Length: 240 inches to 384 inches*

Tolerances:
- *Thickness:* ±0.10 inch
- *Width:* +0.750 inch to 0.500 inch
- *Length:* +0.0% to 1.0%
- *Flatness:* ≤1.0% bow maximum

Camber: <0.2% length maximum
Weight: ±2.0% ordered weight with actual weight provided
Taper: Maximum 1.0 inch in 384 inches (slab must be dimensionally within ordered width including width tolerances)
Wedge: Maximum 0.187 inch
Chemical Composition:
C—0.08% to 0.13%
MN—0.80% to 1.10%
P—0.030% maximum
S—0.020% maximum
SI—0.15% to 0.30%
AL—0.030% to 0.065%
N2—0.010% maximum
Residuals 0.12% maximum
Certified chemical test reports are required per heat.
Quality:
Continuous cast process
Fully conditioned for rolling to hot-roll product
Hand conditioning is permissible
Torch cutting to length (¼ inch to ⅜ inch maximum dross allowable)
Identification:
Each slab must be identified with a heat number, slab number, and Tuscaloosa Steel order number (complete heat traceability is required).
Miscellaneous:
Supplier is required to provide a quality slab capable of meeting API, ASTM, or similar product specifications without further inspection or conditioning. Slab supplier will be expected to utilize statistical process control procedures to insure quality, and any non-conforming quality condition traceable to slab quality is considered for the account of the slab producer.

Action: On September 12, 1990, the Secretary established an official record on this short-supply request (Case Number 22) in the Central Records Unit, room B–099, Import Administration, U.S. Department of Commerce at the above address. On September 20, 1990, the Secretary published a notice in the Federal Register announcing a review of this request and soliciting comments from interested parties. Comments were required to be received no later than September 27, 1990, and interested parties were invited to file replies to any comments no later than five days after that date. In order to determine whether this product, or a viable alternative product, could be supplied in the U.S. market for the fourth quarter of 1990, the Secretary sent questionnaires to: McLouth Steel ("McLouth"), Gulf States Steel ("Gulf States"), Lukens Steel Company ("Lukens"), Weirton Steel Corp. ("Weirton"), Bethlehem Steel ("Bethlehem"), National Steel ("National"), Armco Inc. ("Armco"), LTV Steel Company ("LTV"), USX Wheeling-Pittsburgh Steel Corp. ("Wheeling"), Inland Steel ("Inland"), Citisteel USA, Inc. ("Citisteel"), Oregon Steel, Inc. ("Oregon"), and Geneva Steel Company ("Geneva"). The Secretary received ten written and two verbal questionnaire responses and no comments to the Federal Register notice.

Questionnaire Responses: Questionnaire responses indicate that there is no domestic availability of concast slabs to meet TSC's fourth quarter needs. McLouth, Gulf States, Lukens, and Weirton all state that they are unable to supply slabs completely meeting TSC's specifications. Bethlehem, LTV, National, USX, and Wheeling all state that they are unable to supply TSC because they have no available capacity for the fourth quarter of 1990. Armco states that it does not currently produce slabs meeting TSG's specifications, but that it does have the capability; however, it states that it is not willing to supply TSC. Inland states that it has the capability to produce these slabs in widths less than or equal to 76 inches but that it has no available casting time in the fourth quarter. Citisteel and Oregon did not respond to the questionnaires.

Geneva offers in its questionnaire response to supply TSC with 5,000 net tons of ingot-cast slabs for fourth-quarter delivery. Geneva maintains that TSC may have a legitimate need for concast slabs for the manufacture of some of its products, but that Geneva's slabs can satisfy a portion of, TSC's needs. Geneva attributes TSC's insistence on concast slabs to mill-efficiency considerations as opposed to customer requirements. Geneva further asserts that its products produced from ingot-cast slabs compete directly and extensively with TSC's products throughout Western and Gulf States markets and that Geneva and TSC have a number of common customers.

TSC replies by noting that Geneva did not oppose TSC's two previous short-supply requests for concast slabs (in 1988 and 1989) and that Geneva is in the process of building its own continuous caster. Furthermore, no other domestic producer has asserted that ingot-cast slabs can be substituted for concast slabs to meet TSC's needs. TSC's further states that "there is no reason to believe that any of the customers that Geneva claims to have in common with Tuscaloosa are purchasing the same products for the same applications from both companies." TSC maintains that its customers demand that their products be rolled from concast slabs and would not permit TSC to substitute ingot-rolled material.

Analysis: The issue in this review is the acceptability of ingot-rolled slabs in lieu of concast material to meet a portion of TSC's needs. The Department has maintained that ingot-rolled slabs and concast slabs can be used for a significant number of the same applications. However, there are numerous applications in which customers only will use concast material because of the quality of the slab. In the case of TSC, the need for concast material has been driven by customer demand rather than by mill efficiency as noted by Geneva. Customer letters provided by TSC to support its request specified the need for concast material. In fact, TSC has traditionally purchased only concast slabs to meet its internal needs and its customer requirements. Section 4(b) of the House Report of the Steel Trade Liberalization Program Implementation Act states "* * * if the petitioner has been purchasing the same steel product for the same end use, with the same requested specifications from all of its sources for a significant period of time, then such specifications should be considered reasonable." *See* H. Rep. No. 263, 101st Cong., 1st Sess. 14 (1989). The Secretary can only conclude that TSC's requirement for con-cast material is reasonable in light of these circumstances.

Conclusion: The Secretary determines that short supply does exist with respect to the requested concast steel slabs. The domestic industry is unable to supply TSC with material meeting its specifications for the fourth quarter of 1990. Pursuant to Section 4(b) (4) (A) of the Act, and § 357.102 of Commerce's Short-Supply Regulations, the Secretary hereby grants TSC's request for a short-supply allowance of 125,000 net tons of certain concast steel slabs for the fourth quarter of 1990.

Dated: October 10, 1990.

Marjorie A. Cherlins,

Acting Assistant Secretary for Import Administration.

The Johns Hopkins University, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301).

Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4204, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 90-016. *Applicant:* The Johns Hopkins University, Baltimore, MD 21218. *Instrument:* Electrode Recording System. *Manufacturer:* Philipps University, West Germany. *Intended Use:* See notice at 55 FR 6035, February 21, 1990.

Reasons: The foreign instrument consists of a specially designed drive for seven fiber-optic microelectrodes which can be individually placed for electrophysiological recordings in the cerebral cortex.

Docket Number: 90-028. *Applicant:* Beth Israel Medical Center, New York, NY 10003. *Instrument:* Rapid Karyotyping Analysis System, Model Cytoscan RK 1. *Manufacturer:* Image Recognition Systems Inc., United Kingdom. *Intended Use:* See notice at 55 FR 9347, March 13, 1990.

Reasons: The foreign instrument provides a spatial resolution of 768 × 575 pixels for imaging, digitizing and display.

Docket Number: 90-037. *Applicant:* Virginia Polytechnic Institute & State University, Blacksburg, VA 24061-0306. *Instrument:* High Speed Treadmill (for horses). *Manufacturer:* Kagra International, Inc., Switzerland. *Intended Use:* See notice at 55 FR 10461, March 21, 1990.

Reasons: The foreign instrument provides precise control of inclination (to 15°) and running speed (to 32 mph).

Docket Number: 90-045. *Applicant:* National Institute of Environmental Health Sciences, Research Triangle Park, NC 27709. *Instrument:* Variable Sinusoidal Oscillator for E2 of VG-ZAB-4F. *Manufacturer:* Mass Spectrometry Enterprises, United Kingdom. *Intended Use:* See notice at 55 FR 14335, April 17, 1990.

Reasons: The foreign article is a compatible accessory for a mass spectrometer which provides a 10 to 50 mV amplitude continuously variable over a modulated frequency from 15 Hz to 1 kHz.

Docket Number: 90-046. *Applicant:* St. Joseph's Hospital & Medical Center, Phoenix, AZ 85013. *Instrument:* 3D Motion Analyzer System, Model OPTOTRAK. *Manufacturer:* Northern Digital, Inc., Canada. *Intended Use:* See notice at 55 FR 14335, April 17, 1990.

Reasons: The foreign instrument provides three-dimensional digital analysis of motion with a repeatable accuracy to 0.014 inch and can be operated in a normally lighted room.

Docket Number: 90-060. *Applicant:* Children's Hospital of Pittsburgh, Pittsburgh, PA 15213-2583. *Instrument:* Cerebrograph Cortexplorer 16. *Manufacturer:* B. Simonson Medical, Denmark. *Intended Use:* See notice at 55 FR 19294, May 9, 1990.

Reasons: The foreign instrument provides 16 adjustable detectors for measurement of regional cerebral blood flow using xenon 133 as a tracer.

Docket Number: 90-070. *Applicant:* San Diego State University, San Diego, CA 92182-0749. *Instrument:* Dual Probe Evaporimeter. *Manufacturer:* Servo-Med, Sweden. *Intended Use:* See notice at 55 FR 19294, May 9, 1990.

Reasons: The foreign instrument can measure sweat rate directly and continously while a subject is exercising.

Docket Number: 90-072. *Applicant:* Scripps Clinic and Research Foundation, La Jolla, CA 92037. *Instrument:* Nuclear Magnetic Resonance Spectrometer, Model AC-E 250. *Manufacturer:* Bruker Instruments, West Germany. *Intended Use:* See notice at 55 FR 19294, May 9, 1990.

Reasons: The foreign instrument provides uniform execution of complex pulse sequences, magnetic isolation and shared data transfer formats with previously acquired NMR equipment for which duty-free entry was granted.

The National Institutes of Health advises in its memoranda dated July 26, 1990 that: (1) The capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 90-24814 Filed 10-19-90; 8:45 am]

BILLING CODE 3510-DS-M

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with subsections 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 4204, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 89-288R. *Applicant:* National Institute of Standards and Technology, Chemical Kinetics Division 222/A260, Gaithersburg, MD 20899. *Instrument:* Pulse Dye Laser. *Manufacturer:* Lambda Physik, Inc., United Kingdom. Original notice of this resubmitted application was published in the Federal Register on January 29, 1990.

Docket Number: 89-292R. *Applicant:* University of California, Santa Barbara, Department of Geological Sciences, Santa Barbara, CA 93106. *Instrument:* Mass Spectrometer, Model Prism Series II. *Manufacturer:* VG Isotech, United Kingdom. Original notice of this resubmitted application was published in the Federal Register on January 29, 1990.

Docket Number: 90-175. *Applicant:* Magee-Women's Hospital, Forbes and Halket Streets, Pittsburgh, PA 15213. *Instrument:* Specialized Computer Hardware and Software for Imaging. *Manufacturer:* Image Recognition Systems, United Kingdom. *Intended Use:* The instrument will be used in clinical diagnosis, using images of chromosomes prepared from peripheral blood, amniotic fluid or tissues from patients. *Application Received by Commissioner of Customs:* September 6, 1990.

Docket Number: 90-182. *Applicant:* University of Maine, Department of Geological Sciences, Sawyer Research Center, Orono, ME 04469. *Instrument:* Mass Spectrometer, Prism Series II. *Manufacturer:* VG Isotech Ltd., United Kingdom. *Intended Use:* The instrument will be used for studies of organic and inorganic carbonate natural surface and ground waters, terrestrial and marine organic matter, igneous rocks (e.g. massive sulfides), and metamorphic rocks. In addition, the instrument will be used to train students in the state-of-the-art techniques in the courses: Isotope Geology, Physical Mechanisms of

Climate Change and Stable Isotope Geology. *Application Received by Commissioner of Customs:* September 20, 1990.

Docket Number: 90-183. *Applicant:* National Institute of Standards and Technology, Route 270 and Quince Orchard Road, Gaithersburg, MD 20899. *Instrument:* Electron Probe X-ray Microanalyzer, Model JXA-8900/3. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* The instrument will be an integral part of ongoing programs which include particle characterization, quantitative compositional mapping, standard reference material certification and accurate x-ray intensity determinations. In addition, the instrument will be used for high accuracy quantitative analysis of materials being evaluated for certification as NIST Standard Reference Materials, and for the high-accuracy determination of k-ratios which are used to improve upon quantitative data reduction procedures. Numerous materials such as glasses, metal and ceramic alloys, biological specimens, and natural and synthetic minerals will be quantitatively and qualitatively analyzed with the instrument. *Application Received by Commissioner of Customs:* September 26, 1990.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

St. Barnabas Medical Center; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4204, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number 90-031. *Applicant:* St. Barnabas Medical Center, Livingston, NJ 07039. *Instrument:* Rapid Karyotyping Analysis System and Satellite Capture Station, Model Cytoscan RK and SC. *Manufacturer:* Image Recognition Systems Inc., United Kingdom. *Intended Use:* See notice at 55 FR 9347, March 13, 1990.

Comments: None received.

Decision: Denied. The instrument is not intended for research or science-related educational purposes.

Reasons: In its response to question 7(a), the applicant stated, "Not applicable, not to be used for research purposes"; to 7(b), "Not applicable, not to be used for science-related educational purposes"; and to 7(c), "For patient care, to be used for cytogenetic testing." The Departments' joint regulations provide as follows:

> In order for the Director to make a determination with respect to the "scientific equivalency" of the foreign and domestic instruments, the applicant's intended purposes must include either scientific research or science-related educational programs. Instruments used exclusively for nonscientific purposes have no scientific value, thereby precluding the requisite finding by the Director with respect to "whether an instrument or apparatus of equivalent scientific value to such article, for the purposes for which the article is intended to be used, is being manufactured in the United States." In such cases the Director *shall* deny the application for the reason that the instrument has no scientific value for the purposes for which it is intended to be used. Examples of nonscientific purposes would be the use of an instrument in routine diagnosis or patient care and therapy (as opposed to clinical research) . . . (15 CFR 301.5(d)(1)(iii); emphasis supplied).

Furthermore, 15 CFR 301.5(e)(7) provides, in part, as follows:

> Information provided in a resubmission that . . . contradicts or conflicts with information provided in a prior submission, shall not be considered in making the decision on an application that has been resubmitted. Accordingly, an applicant may elect to reinforce an original submission by elaborating in the resubmission on the description of the purposes contained in a prior submission and may supply additional examples, documentation and/or other clarifying detail, but the applicant shall not introduce new purposes or other material changes in the nature of the original application. (Emphasis supplied.)

Consequently, in view of the applicant's categorical statement, cited above, we conclude that affording the applicant an opportunity to resubmit its application cannot result in a statement of purposes both consonant with the regulations and permitting a finding by the Director as to scientific equivalency. The application is denied "for the reason that the instrument has no scientific value for the purposes for which it is intended to be used."

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

[P388A]

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, DOC.

ACTION: Application for scientific research permit.

Notice is hereby given that an applicant has applied in due form for a scientific research permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407) and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

1. *Applicant:*

Dr. James T. Harvey, Moss Landing Marine Laboratories, P.O. Box 450, Moss Landing, CA 95039-0450.

Dr. Daniel P. Costa, Long Marine Laboratory, Center for Marine Studies, University of California, Santa Cruz, CA 95064.

2. *Type of Permit:* Scientific Research.

3. *Number and Name of Marine Mammals:* 10 California sea lions (*Zalophus californianus*).

4. *Type of Take:* California sea lions would be obtained from any rehabilitation facility or aquarium and trained throughout the year at Long Marine Laboratory, Santa Cruz, CA. The applicants propose to use the trained California sea lions along the west coast of North America to film underwater activities of whales such as feeding, mating, resting, orientation, and communication. The trained seals would carry an underwater video camera in a mouth piece, or harness, follow individual whales in open water, and keep the whale within the camera's field of view.

In addition, the applicants propose to study sea lion diving physiology. A Scientific Research Permit is requested for four (4) years duration.

Concurrent with the publication of this notice in the Federal Register, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East West Highway, room 7330, Silver Spring, Maryland 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should

set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this application are summaries of the applicants and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East West Highway, room 7330, Silver Spring, Maryland 20910; and

Director, Southwest Region, National Marine Fisheries Service, NOAA, 300 South Ferry Street, Terminal Island, California 90731–7415.

Dated: October 11, 1990.

[redacted],

Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 90–24889 Filed 10–19–90; 8:45 am]

BILLING CODE 3510-22-M

[redacted]

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Issuance of Permit: Southwest Fisheries Science Center, National Marine Fisheries Service.

On August 6, 1990, notice was published in the **Federal Register** (55 FR 31872) that an application had been filed by the Southwest Fisheries Science Center, National Marine Fisheries Service, P.O. Box 271, La Jolla, California 92038, to conduct scientific research on Hawaiian monk seals (*Monachus schauinslandi*).

Notice is hereby given that on October 5, 1990, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), the National Marine Fisheries Service issued a Scientific Research Permit for the above taking, subject to certain conditions set forth therein.

Issuance of this Permit, as required by the Endangered Species Act of 1973, is based on the finding that such Permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of the Permit; and (3) will be consistent with the purposes and policies set forth in section 2 of the Act (16 U.S.C. 1532). The proposed research is consistent with the purposes and policies of the Marine Mammal Protection Act. The applicant has indicated that previous similar research has not harmed monk seals. No comments were received objecting to the proposed research. We are satisfied that the results of this research will directly benefit Hawaiian monk seal populations and that such research fulfills a critically important research need.

Interested persons may review the Permit and documents submitted in connection with the application by appointment at the following offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East West Highway, room 7324, Silver Spring, Maryland 20910 (301/427–2289);

Director, Southwest Region, National Marine Fisheries Service, NOAA, 300 South Ferry Street, Terminal Island, California 90731 (213/514–6196); and

Administrator, Pacific Area Office, National Marine Fisheries Service, 2570 Dole Street, room 106, Honolulu, HI 96822 (808/955–8831).

Dated: October 5, 1990.

Nancy Foster,

Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-M

National Telecommunications and Information Administration

Frequency Management Advisory Council; Meeting

AGENCY: National Telecommunications and Information Administration, Commerce.

ACTION: Notice of meeting of the CITEL VI Subcommittee of the Frequency Management Advisory Council.

SUMMARY: In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. 2 and the Department of Commerce Committee Management Handbook, a subcommittee of the Frequency Management Advisory Council was established on June 27, 1990 to assist United States in preparation for the VIth InterAmerican Telecommunications Conference (CITEL VI) to be held in mid-1991. Major goals of United States participation in this conference are to strengthen the interAmerican alliance, create additional market opportunities for U.S. industry in Latin America, and provide opportunities to further U.S. goals of privatization while assisting Latin American countries in improving their telecommunication infrastructures.

NOTICE OF MEETING: The FMAC Subcommittee on Preparations for CITEL VI will meet on October 24, 1990, from 9:30 a.m. to 12:00 noon in Room 1605 of the United States Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington, DC. Public entrance to the building is on 14th Street between Pennsylvania Avenue and Constitution Avenue.

AGENDA: The agenda for the third meeting of the Subcommittee on Preparations for CITEL VI will be:

I. Adoption of the Agenda.
II. Summary Minutes of the 2nd Meeting.
III. Outline of the Report of the Subcommittee
IV. Proposed Initiative for T1 to Increase their Visibility with the Other Countries of the Americas.
V. Background Paper on the Subcommittee's Activities for the U.S. Delegation to COM/CITEL.
VI. Consideration of Additional Items to be Included on the Agendas of Future Meetings of PTC–1, II, and III.
VII. Proposed Agenda for the Meeting of the VI–CITEL.
VIII. Ad Hoc Meeting of PTC–1.
IX. Update on the EXPOTEL 91 Exposition in Santiago, Chile, 13–17 May 1990.
X. Date of the Next Meeting.

PUBLIC PARTICIPATION: This meeting of the CITEL VI Preparation Subcommittee will be held in accordance with the Federal Advisory Committee Act and will be open to public observations. A period will be set aside for oral comments or questions by the public. More extensive questions or comments should be submitted in writing before October 19, 1990. Other public statements regarding CITEL VI Subcommittee activities may be submitted at any time before or after the meeting. Approximately 25 seats will be available for the public on a first-come, first-served basis. Copies of the minutes will be available on request 30 days after the meeting.

FOR FURTHER INFORMATION CONTACT: Inquiries or comments concerning the CITEL VI Subcommittee may be addressed to the Designated Federal Official, Mr. William Moran, National Telecommunications and Information Administration, Room 4701, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington, DC 20230, telephone (202) 377–1868.

Dated: October 4, 1990.

Michael W. Allen,

Executive Secretary, Frequency Management Advisory Council, National Telecommunications and Information Administration.

[FR Doc. 90-24878 Filed 10-19-90; 8:45 am]

BILLING CODE 3510-60-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Hungary

October 16, 1990.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: January 1, 1991.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566-5810. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Bilateral Wool Textile Agreement of February 15 and 25, 1983, as amended, between the Government of the United States and the Republic of Hungary establishes limits for the period January 1, 1991 through December 31, 1991. The limits for Categories 433, 434, 435 and 448 are being reduced for carryforward used in 1990.

A copy of the current bilateral textile agreement between the Governments of the United States and the Republic of Hungary is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647-1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Tariff Schedule of the United States (see **Federal Register** notice 54 FR 50797, published on December 11, 1989). Information regarding the 1991 CORRELATION will be published in the **Federal Register** at a later date.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

October 16, 1990.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 15 and 25, 1983, as amended, between the Governments of the United States and the Republic of Hungary; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1991, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Hungary and exported during the twelve-month period beginning on January 1, 1991 and extending through December 31, 1991, in excess of the following restraint limits:

Category	12-month restraint limit
300/301	1,350,589 kilograms.
313	13,194,895 square meters.
410	861,483 square meters.
433	7,777 dozen.
434	7,267 dozen.
435	13,354 dozen.
442	18,545 dozen.
443	87,151 numbers.
444	24,176 numbers.
445/446	42,561 dozen of which not more than 31,846 dozen shall be in Category 445 and not more than 31,846 dozen shall be in Category 446.
448	20,540 dozen.
604	910,354 kilograms.
645/646	107,310 dozen.
669-P [1]	662,553 kilograms.

[1] Category 669-P: only HTS numbers 6305.31.0010, 6305.31.0020 and 6305.39.0000.

Imports charged to these category limits for the period January 1, 1990 through December 31, 1990 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The levels set forth above are subject to adjustment in the future pursuant to the provisions of the current bilateral agreement between the Governments of the United States and the Republic of Hungary.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 90-24820 Filed 10-19-90; 8:45 am]

BILLING CODE 3510-DR-M

Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Taiwan

October 15, 1990.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: October 22, 1990.

FOR FURTHER INFORMATION CONTACT: Kim-Bang Nguyen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566-8791. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing, special shift and carryforward used during the previous agreement period.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 54 FR 50797.

BEST COPY AVAILABLE

published on December 11, 1989). Also see 54 FR 22504, published on December 26, 1989.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

October 15, 1990.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 20, 1989 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Taiwan and exported during the period which began on January 1, 1990 and extends through December 31, 1990.

Effective on October 22, 1990, the directive of December 20, 1989 is being amended further to adjust the limits for the following categories, as provided under the provisions of the bilateral agreement, effected by exchange of notes dated August 21, 1990 and September 28, 1990:

Category	Adjusted 12-Month Limit [1]
Subtotals in Group I:	
369	588,686 kilograms.
225/317/326	32,941,266 square meters.
314	24,310,086 square meters.
369	1,206,564 numbers.
604	212,777 kilograms.
611	2,675,000 square meters.
613/614/615/617	16,500,587 square meters.
619/620	9,571,189 square meters.
625/626/627/628/629	16,867,235 square meters.
Sublevels in Group II:	
331	511,745 dozen pairs.
336	119,494 dozen.
359/659	644,529 dozen.
340	1,221,809 dozen.
341	373,750 dozen.
342	257,947 dozen.
345	104,298 dozen.
347/348	1,233,726 dozen.
351	445,883 dozen.
359-H/659-H [2]	4,638,248 kilograms.
433	18,578 dozen.
435	39,087 dozen.
448	44,642 numbers.
445/446	136,830 dozen.
447/448	16,823 dozen.
631	4,160,288 dozen pairs.

Category	Adjusted 12-Month Limit [1]
633/634/635	1,813,487 dozen of which not more than 959,317 dozen shall be in Categories 633/634 and not more than 828,038 dozen shall be in Category 635.
636	332,005 dozen.
638/639	6,852,197 dozen.
640	2,085,291 dozen of which not more than 1,361,080 dozen shall be in Category 640-Y. [3]
641	692,033 dozen of which not more than 253,586 dozen shall be in Category 641-Y. [4]
642	769,057 dozen.
644	598,052 numbers.
647/648	5,834,323 dozen.
651	368,798 dozen.
659-S [5]	1,992,708 kilograms.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1989.

[2] Category 359-H: only HTS numbers 6505.90.1530 and 6505.90.2060; Category 659-H: only HTS numbers 6562.90.9030, 6504.00.9015, 6504.00.9060, 6506.90.5060, 6505.90.6060, 6505.90.7090 and 6505.90.8060.

[3] Category 640-Y: only HTS numbers 6205.30.2010, 6205.30.2020, 6205.30.2050, and 6205.30.2060.

[4] Category 641-Y: only HTS numbers 6204.23.0050, 6204.29.2060, 6206.40.3010 and 6206.40.3025.

[5] Category 659-S: only HTS numbers 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: DoD FAR Supplement, part 246, Quality Assurance; No Form; OMB Control Number 0704-0233.

Type of Request: Revision.

Average Burden Hours/Minutes per Response: 7.82 hours.

Responses per Respondent: One.

Number of Respondents: 4,112.

Annual Burden Hours: 32,160.

Annual Responses: 4,112.

Needs and Uses: This request concerns information collection requirements related quality assurance matters including certain special clauses utilized by the Defense Logistics Agency.

Affected Public: Businesses or other for profit institutions, non-profit institutions, and small businesses or organizations.

Frequency: Annually and on occasion.

Respondents Obligation: Voluntary.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written request for copies of the information collection proposal may be obtained from Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202-4302.

Dated: October 17, 1990.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Desert Shield Technology

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Desert Shield Technology will meet in closed session on 1–2 Nov, 7–8 Nov and 27–28 Nov 1990 at The Pentagon, Washington, DC.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will receive classified briefings on Operation Desert Shield which will include: Intelligence situation and threat, operations status, and technology options to improve operational capability.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. app. II (1982)), it has been determined that these DSB Task Force meetings concern matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

Dated: October 17, 1990.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

55 FR 38126 Sep. 17, 1990

The amended systems are not within the purview of subsection (r) of the Privacy Act, as amended, (5 U.S.C. 552a) which requires the submission of an altered system report. The specific changes to the records systems being amended are set forth below, followed by the systems notices, as amended, published in their entirety.

Dated: October 17, 1990.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

F090 AF A

System name:

F090 AF A—Visiting Officer Quarters-Transient Airman Quarters Reservation (50 FR 22476, May 29, 1985).

Changes:

* * * * *

System location:

Delete entire entry and replace with "All Air Force installations with Visiting Officer and/or Transient Airman Quarters. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices."

* * * * *

Authority for maintenance of the system:

Change "10 U.S.C. 8012" to read "10 U.S.C. 8013 and Executive Order 9397."

* * * * *

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system: Storage:

Add to end of sentence "and on computer and computer output products."

Retrievability:

Add to the end of entry and Social Security Number.

Safeguards:

Delete entire entry and replace with "Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties. Records are stored in locked cabinets or rooms."

System manager(s) and address:

Delete entire entry and replace with "Deputy Chief of Staff, Logistics and Engineering, Headquarters, United States Air Force, Washington, DC 20330–5130."

Notification procedure:

Delete entire entry and replace with "Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Deputy Chief of Staff, Logistics and Engineering, Headquarters, United States Air Force, Washington, DC 20330-5130.

Full name and Social Security Number required for inquiries."

Record access procedures:

Delete entire entry and replace with "Individuals seeking to access records about themselves contained in this system should address written requests to the Deputy Chief of Staff, Logistics and Engineering, Headquarters, United States Air Force, Washington, DC 20330-5130.

Full name and Social Security Number required for access."

Contesting record procedures:

Delete entire entry and replace with "The Department of the Air Force rules for accessing records and for contesting and appealing initial agency determinations by the individual concerned are published in Air Force Regulation 12-35; 32 CFR part 806b; or may be obtained from the system manager."

* * * * *

F090 AF A

SYSTEM NAME:

F090 AF A—Visiting Officer Quarters-Transient Airman Quarters Reservation.

SYSTEM LOCATION:

All Air Force installations with Visiting Officer and/or Transient Airman Quarters. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Personnel registering to obtain a room for the duration of visit.

CATEGORIES OF RECORDS IN THE SYSTEM:

Registration of transient personnel into quarters.

AUTHORITY FOR MAINTAINING THE SYSTEM:

10 U.S.C. 8013 and Executive Order 9397.

PURPOSE(S):

To register occupants of base transient quarters and charge for billeting.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The Department of the Air Force "Blanket Routine Uses" published at the beginning of the agency's compilation of record system notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in visible file binders/cabinets and on computer and compter output products.

RETRIEVABILITY:

Retrieved by name and Social Security Number.

SAFEGUARDS:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties. Records are stored in locked cabinets or rooms.

RETENTION AND DISPOSAL:

Retained in office files for three months after monthly cutoff, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Chief of Staff, Logistics and Engineering, Headquarters, United States Air Force, Washington, DC 20330-5130.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this record system should address written inquiries to the Deputy Chief of Staff, Logistics and Engineering, Headquarters, United States Air Force, Washington, DC 20330-5130.

Full name and Social Security Number are required for inquiries.

RECORD ACCESS PROCEDURES:

Individuals seeking to access records about themselves contained in this record system should address written requests to the Deputy Chief of Staff, Logistics and Engineering, Headquarters, United States Air Force, Washington, DC 20330-5130.

Full name and Social Security Number are required for access.

CONTESTING RECORD PROCEDURES:

The Department of the Air Force rules for accessing records and for contesting and appealing initial agency determinations by the individual concerned are published in Air Force Regulation 12-35; 32 CFR part 806b; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

From individual registering.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

F177 AF AFC A

SYSTEM NAME:

F177 AF AFC A—Accounts Receivable Records Maintained by Accounting and Finance (50 FR 22523, May 29, 1985).

CHANGES:

* * * * *

SYSTEM LOCATION:

Delete entire entry and replace with "Headquarters, Air Force Accounting and Finance Center (HQ AFAFC), Denver, CO 80279-5000; Denver Federal Archives and Record Center, Building 48, Denver Federal Center, Denver, CO 80225-5000; Accounting and Finance Offices at Air Force bases, Air National Guard activities and Air Force Reserve units. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices."

* * * * *

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Add to end of entry ". . . and Executive Order 9397."

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Delete entire entry and replace with "To the General Accounting Office and the Department of Justice for collection action for any delinquent account when circumstances warrant.

To a commercial credit reporting agency for the purpose of either adding to a credit history file or obtaining a credit history file for use in the administration of debt collection.

To a debt collection agency for the purpose of collection services to recover indebtedness owed to the U.S. Government.

To Veterans Administration for its administration of laws pertaining to veterans' benefits.

To any other Federal agency for the purpose of effecting salary offset procedures against a person employed by that agency when any Department of

Defense creditor agency has a claim against that person.

To any other Federal agency including, but not limited to, the Internal Revenue Service and Office of Personnel Management for the purpose of effecting an administrative offset of a debt.

To the Internal Revenue Service to obtain the mailing address of a taxpayer for the purpose of locating such taxpayer to collect or to compromise a Federal claim against the taxpayer.

Note: Redisclosure of a mailing address from the Internal Revenue Service may be only for the purpose of debt collection, including to a debt collection agency in order to facilitate the collection or compromise of a Federal claim under the Debt Collection Act of 1982, except that a mailing address to a consumer reporting agency is for the limited purpose of obtaining a commercial credit report on the particular taxpayer. Any such address information obtained from the Internal Revenue Service will not be used or shared for any other Department of Defense purpose or disclosed to another Federal, state or local agency which seeks to locate the same individual for its own debt collection purpose.

To any other Federal, state or local agency for the purpose of conducting an authorized computer matching program to identify and locate delinquent debtors for recoupment of debts owed the U.S. Government.

The Department of the Air Force "Blanket Routine Uses" published at the beginning of the agency's compilation of record systems apply to this system."

Add a new category to read:

"Disclosures to consumer reporting agencies: Disclosures pursuant to 5 U.S.C. 552a(b)(12) may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act of 1966 (15 U.S.C. 1681a(f)), or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)). The disclosure is limited to information necessary to establish the identify of the individual, including name, address, and taxpayer identification number (Social Security Number); the amount, status, and history of the claim; and the agency or program under which the claim arose for the sole purpose of allowing the consumer reporting agency to prepare a commercial credit report."

* * * * *

RETENTION AND DISPOSAL:

Delete entire entry and replace with "All cases will remain active until settled by full payment or waiver. Current year cases will be retained by the collection office through the calendar year. Prior year cases will be retained by the records custodian for another six years. Destruction is accomplished by tearing, shredding, pulping, macerating, burning or burying in a landfill."

SYSTEM MANAGER(S) AND ADDRESS:

Delete entire entry and replace with "Director, Air Force Accounting and Finance Center (HQ AFAFC), Denver, CO 80279–5000 and Accounting and Finance Officers at Air Force installations. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices."

NOTIFICATION PROCEDURE:

Delete entire entry and replace with "Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Director, HQ AFAFC, Denver, CO 80279–5000, or to the Accounting and Finance Office at the Air Force base of assignment. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

Requester should be able to provide sufficient proof of identity, such as name, Social Security Number, drivers license, civilian identification card, duty station or place of employment, or other information verifiable from the record itself."

RECORD ACCESS PROCEDURES:

Delete entire entry and replace with "Individuals seeking to access records about themselves contained in this system should address written inquiries to the Director, HQ AFAFC, Denver CO 80279–5000, or to the Accounting and Finance Office at the Air Force base of assignment. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

Requester should be able to provide sufficient proof of identity, such as name, Social Security Number, drivers license, civilian identification card, duty station or place of employment, or other information verifiable from the record itself.

CONTESTING RECORD PROCEDURE:

Delete entire entry and replace with "The Department of the Air Force rules for accessing records, and for contesting and appealing initial agency determinations by the individual concerned are published in Air Force Regulation 12–35; 32 CFR part 806b; or may be obtained from the system manager."

* * * * *

F177 AF AFC A

SYSTEM NAME:

F177 AF AFC A—Accounts Receivable Records Maintained by Accounting and Finance.

SYSTEM LOCATION:

Headquarters, Air Force Accounting and Finance Center, (HQ AFAFC), Denver, CO 80279–5000; Denver Federal Archives and Record Center, Building 48, Denver Federal Center, Denver, CO 80225–5000; Accounting and Finance Offices at Air Force bases, Air National Guard activities and Air Force Reserve units. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty and retired military personnel; Air Force civilian employees and former employees; Air Force Reserve and Air National Guard personnel; Union or Association management personnel; contracting officers and representatives; Air Force Academy cadets; dependents of military personnnel; Foreign Nationals residing in the United States; American Red Cross personnel; Peace Corps and State Department personnel; Exchange Officers, and other individuals who may be indebted to the Air Force.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records maintained in the system include, but are not limited to: Documentation pertaining to telephone bills; utility bills; check issue discrepancies; dishonored checks; postal fund losses; reports of survey; freight losses in shipments; involuntary collections; erroneous payments; property losses and damages; administratively ascertained indebtedness of airmen; withholding for subsistence and other supplies; losses of funds; government losses in shipments; unauthorized allotment payments; setoff of final pay, and retention of pay by reason of courts martial or forfeiture or fines documentation.

AUTHORITY FOR MAINTAINING THE SYSTEM:

5 U.S.C. 5512–5514, Withholding pay; 10 U.S.C. 856; Article 56 Uniform Code of Military Justice, Maximum levels; 10 U.S.C. 9832, Property accountability; Regulations; 10 U.S.C. 9837(b), Settlement of accounts: Deductions from pay; 10 U.S.C. 9840, Final settlement of officer's accounts; 31 U.S.C. 71, Public accounts to be settled in the General Accounting Office; 31 U.S.C. 82(a), Listing of persons receiving periodic

payments, vouchers; 31 U.S.C. 95, Settlement of accounts of Army officers; 31 U.S.C. 95, Settlement of accounts of Army officers; 31 U.S.C. 3711, Collection and Compromise; 37 U.S.C. 492(a)–(c), Disbursing Officers; 37 U.S.C. 1007(b), (c), (f), (g), Deductions from pay; 40 U.S.C. 15, Government Losses in Shipment; 49 U.S.C. 1 *et seq.*; Transportation, and Executive Order 9397.

PURPOSE(S):

Records are used to support customer billings and collections.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To the General Accounting office and the Department of Justice for collection action for any delinquent account when circumstances warrant.

To a commercial credit reporting agency for the purpose of either adding to a credit history file or obtaining a credit history file for use in the administraiton of debt collection.

To a debt collection agency for the purpose of collection services to recover indebtedness owed to the Air Force.

To Veterans Administration for its administration of laws pertaining to veterans' benefits.

To any other Federal agency for the purpose of effecting salary offset procedures against a person employed by that agency when the Air Force has a claim against that person.

To any other Federal agency including, but not limited to, the Internal Revenue Service and Office of Personnel Management for the purpose of effecting an administrative offset of a debt.

To the Internal Revenue Service to obtain the mailing address of a taxpayer for the purpose of locating such taxpayer to collect or to compromise a Federal claim against the taxpayer.

Note: Redisclosure of a mailing address from the Internal Revenue Service may be made only for the purpose of debt collection, including to a debt collection agency in order to facilitate the collection or compromise of a Federal claim under the Debt Collection Act of 1982, except that a mailing address to a consumer reporting agency is for the limited purpose of obtaining a commercial credit report on the particular taxpayer. Any such address information obtained from the Internal Revenue Service will not be used or shared for any other Department of Defense purpose or disclosed to another Federal, state or local agency which seeks to locate the same individual for its own debt collection purposes.

To any other Federal, state or local agency for the purpose of conducting an authorized computer matching program to identify and locate delinquent debtors for recoupment of debts owed the Air Force.

The Department of the Air Force "Blanket Routine Uses" published at the beginning of the agency's compilation of record systems apply to this system.

DISCLOSURES TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12) may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act of 1966 (15 U.S.C. 1681a(f)), or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)). The disclosure is limited to information necessary to establish the identity of the individual, including name, address, and taxpayer identification number (Social Security Number); the amount, status, and history of the claim; and the activity or program under which the claim arose for the sole purpose of allowing the consumer reporting agency to prepare a commercial credit report.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders, in note books/binders, in visible file binders/cabinets, in card files and on computer magnetic tapes.

RETRIEVABILITY:

Retrieved by name, Social Security Number, Military Service Number or Civilian Payroll Number.

SAFEGUARDS:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in security file containers/cabinets or locked cabinets or rooms, protected by guards, and controlled by personnel screening and by visitor registers.

RETENTION AND DISPOSAL:

All cases will remain active until settled by full payment or waiver. Current year cases will be retained by the collection office through the calendar year. Prior year cases will be retained by the records custodian for another six years. Destruction is accomplished by tearing, shredding, pulping, macerating, burning or burying in a landfill.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Air Force Accounting and Finance Center, (HQ AFAFC), Denver, CO 80279–5000. Accounting and Finance Officers at Air Force installations. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Director, HQ AFAFC, Denver, CO 80279–5000, or to the Accounting and Finance Office at the Air Force base of assignment. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

Requester should be able to provide sufficient proof of identity, such as name, Social Security Number, drivers license, civilian identification card, duty station or place of employment, or other information verifiable from the record itself.

RECORD ACCESS PROCEDURES:

Individuals seeking to access records about themselves contained in this system should address written inquiries to the Director, HQ AFAFC, Denver, CO 80279–5000, or to the Accounting and Finance Office at the Air Force base of assignment. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

Requester should be able to provide sufficient proof of identity, such as name, Social Security Number, drivers license, civilian identification card, duty station or place of employment, or other information verifiable from the record itself.

CONTESTING RECORD PROCEDURE:

The Department of the Air Force rules for accessing records, and for contesting and appealing initial agency determinations by the individual concerned are published in Air Force Regulation 12–35; 32 CFR part 806b; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information obtained from previous employers; financial, educational, and medical institutions; trade associations; police and investigating officers; the bureau of motor vehicles; state or local governments; international organizations; corporations; witnesses; source documents such as reports; charges and invoices from other Air Force and Department of Defense components at Headquarters, major command and base levels; Internal Revenue Service; Social Security Administration; and Veterans Administration.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

F010 AF A

SYSTEM NAME:

F010 AF A—Automated Orders Data System.

SYSTEM LOCATION:

Any location where temporary orders are published at all levels down to and including squadrons. Official mailing addresses are published as an appendix to the Air Force compilation of record system notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Air Force civilian employees and military members who perform temporary duty travel, including all Air Force reserve personnel who perform annual, school, special, and Military Personnel Appropriation (MPA) tours.

CATEGORIES OF RECORDS IN THE SYSTEM:

All temporary orders (temporary duty travel and reserve); identification data on individuals named in orders; accounting records for Personnel/Travel/Budgeting Accounting System (PBAS/TBAS); accounting records for man-days used, and orders log containing data found in administrative orders including name, Social Security Number, order number, and effective dates.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 8013, Secretary of the Air Force: Power and Duties; delegation by; as implemented by Joint Federal Travel Regulation, Vol I; Joint Travel Regulation, Vol II; Air Force Regulation 10–7, "Administrative Orders"; and Executive Order 9397.

PURPOSE(S):

Used to prepare temporary duty travel orders, including those ordering Air Force Reserve personnel to active duty for annual, school, special and MPA tours. Controls assignment of orders numbers and is a cross reference between orders, revocations, and amendments. Creates management reports.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The Department of the Air Force "Blanket Routine Uses" published at the beginning of the agency's compilation of record system notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on computer.

RETRIEVABILITY:

Retrieved by name and Social Security Number.

SAFEGUARDS:

Records are accessed by person(s) responsible for servicing the record system in performance of their official duties and are properly screened for need-to-know. Passwords are established for computer system entrance.

RETENTION AND DISPOSAL:

Identification data is maintained until the individual is reassigned. Orders are maintained for 1 to 50 years after the year in which they are published.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Information Management, Office of the Administrative Assistant to the Secretary of the Air Force, Washington, DC 20330–1000; Director of Information Management, Headquarters, Air Force Reserve, Robins AFB, GA 31098–6001; Deputy Chief of Staff, Comptroller, Headquarters U.S. Air Force, Washington, DC 20330–5000; and Base Directors or Chiefs of Information Management. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information on themselves should address inquiries to the Director of Information Management, Office of the Administrative Assistant to the Secretary of the Air Force, Washington, DC 20330–1000; Director of Information Management, Headquarters, Air Force Reserve, Robins AFB, GA 31098–6001; Deputy Chief of Staff, Comptroller, Headquarters U.S. Air Force, Washington, DC 20330–5000; and Base Directors or Chiefs of Information Management. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system should address requests to the Director of Information Management, Office of the Administrative Assistant to the Secretary of the Air Force, Washington, DC 20330–1000; Director of Information Management, Headquarters, Air Force Reserve, Robins AFB, GA 31098–6001; Deputy Chief of Staff, Comptroller, Headquarters U.S. Air Force, Washington, DC 20330–5000; and Base Directors or Chiefs of Information Management. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

A military or civilian identification card is required as proof of identity prior to disclosure.

CONTESTING RECORD PROCEDURES:

The Air Force rules for accessing records, and for contesting and appealing initial agency determinations by the individual concerned are published in Air Force Regulation 12–35; 32 CFR part 806b; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information is obtained from personnel records, automated system interfaces, individuals, and orders requests.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

F177 AF AFC F

F177 AF AFC F

SYSTEM NAME:

F177 AF AFC F—Civilian Pay Records.

SYSTEM LOCATION:

Accounting and Finance Offices at Air Force bases, Air Force Reserve Units and Air National Guard activities. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All DoD civilians paid by the Air Force.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual pay records; individual leave records; source documents for posting leave and attendance; individual retirement deduction records; source documents maintained in connection with retirement deduction records and control files thereon; wage and separation information files; health benefit records; income tax withholding records; allowance and differential eligibility files, such as, but not limited to, clothing allowances and night rate differentials; withholding and deduction authorization files, such as, but not limited to, federal income tax withholding, and insurance and retirement deductions; accounting document files; input data posting media, such as, but not limited to, time and attendance cards and reports and personnel actions affecting pay; accounting and statistical reports and computer edit listings; claims and waivers affecting pay; control logs and collection/disbursement vouchers; listings for administrative purposes, such as, but not limited to, health insurance, life insurance, bonds, locator files and checks to financial institutions; correspondence with the Civilian Personnel Office, dependents, attorneys, survivors, insurance companies, financial institutions; and other governmental agencies; leave and earnings statements; travel records; and separation documents; official correspondence; federal, state and tax reports and/or tapes; forms covering pay changes and deductions, and documentation pertaining to garnishment of wages.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. Chapters 53, 55 and 81, and Executive Order 9397.

PURPOSE(S):

The records are used to accurately compute individual employee's pay entitlements and to withhold required and authorized deductions and issue payroll checks for amounts due. Output products are forwarded as required to other subject matter areas to ensure accurate accounting and recording of pay to civilian employees. These records and related products are also used to verify and balance payroll and account data, and to provide information to recipients, Government and non-Government agencies.

Records are also used for extraction or compilation of data and reports for management studies and statistical analyses for use internally or externally as required by the Department of Defense or other government agencies.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records may be disclosed to banks which credit the employee's account if the employee has requested his/her check to be sent to the bank; financial organizations which credit the employee account if the employee has requested a savings allotment; other approved organizations which an employee has designated for an allotment; computer and accounting service centers upon request of financial organizations designated by individuals to receive monies due them; Federal Reserve banks under procedures specified in 31 CFR part 210 for health benefit carriers to ensure proper credit for the employee authorized health benefit deductions; employee organizations for which the employee has requested a dues deduction (reasons for non-deduction of dues will be benefit deductions); disclosed to officials of labor organizations recognized under Executive Orders 11636 and 11491, as

amended, when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices and matters affecting working conditions (including disclosure of reasons for non-deduction of dues, if applicable); the United States Treasury, which maintains cash accountability; the Internal Revenue Service for recording withholding and social security information; the Social Security Administration and Office of Personnel Management which credits the employee's account for Federal Insurance Contributions Act or Civil Service Retirement withheld; state revenue departments which credit employee's state tax withholding; state employment agencies which require wage information to determine eligibility for unemployment compensation benefits of former employees; city revenue departments of appropriate cities which credit employees for city tax withheld; any agency or component thereof that needs the information for proper accounting of funds, such as, but not limited to, for-others listings; Office of Personnel Management for assistance in resolving complaints, grievances, etc.

To the Office of Personnel Management for computation of Civil Service retirement annuity.

The Department of the Air Force "Blanket Routine Uses" published at the beginning of the agency's compilation of record system notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders, in notebooks/binders, in visible file binders/cabinets, in card files, on computer and on computer output products, on roll microfilm, or microfiche, and in microfilm jackets.

RETRIEVABILITY:

Retrieved by name, Social Security Number, civilian payroll number, vehicle registration or license number, or other identification number or system identifier.

SAFEGUARDS:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in locked cabinets or rooms, protected by guards, and controlled by personnel screening, visitor registers, and computer system software.

RETENTION AND DISPOSAL:

Records are retained for periods ranging up to 56 years.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Accounting and Finance, United States Air Force, and accounting and finance officers at Air Force installations. Official mailing addresses are published as an appendix to the Air Force's compilation of record system notices.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this record system contains information on themselves should address inquiries to HQ AFAFC/IMD, Denver, CO 80279-5000 or the accounting and finance office where assigned. Telephone (303) 320-7553.

Requester should be able to provide sufficient proof of identity, such as name, Social Security Number, drivers license, civilian identification card, duty station or place of employment, or other information verifiable from the record itself.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system should address inquiries to HQ AFAFC/IMD, Denver, CO 80279-5000 or the accounting and finance office where assigned. Telephone (303) 320-7553.

Requester should be able to provide sufficient proof of identity, such as name, Social Security Number, drivers license, civilian identification card, duty station or place of employment, or other information verifiable from the record itself.

CONTESTING RECORD PROCEDURE:

The Air Force rules for accessing records, and for contesting and appealing initial agency determinations by the individual concerned are published in Air Force Regulation 12-35; 32 CFR part 806b; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information obtained from previous employers; financial institutions; medical institutions; automated systems interfaces; state or local government agencies; source documents such as reports; Department of Defense components and other federal agencies such as, but not limited to, Social Security Administration; Internal Revenue Service; State revenue departments; and Departments of the Army, Navy or State. Correspondence from attorneys, dependents, survivors, guardians, and subject to the record may also furnish data for the system. Information is also obtained from the subject of the record.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 3910-01-M

Department of the Navy

CNO Executive Panel; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app. 2), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Space and Electronic Combat Standing Task Force will meet 7 November 1990 from 9 a.m. to 5 p.m., at 4401 Ford Avenue, Alexandria, Virginia. This session will be closed to the public.

The purpose of this meeting is to discuss the development of Space and Electronic Combat systems that can survive the Soviet challenge, and provide the minimal capabilities necessary to prevail in extended combat environments. The entire agenda for the meeting will consist of discussions of key issues regarding space exploration in support of U.S. national security, and related intelligence. These matters constitute classified information that is specifically authorized by Executive Order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive Order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact: Lelia V. Carnevale, Executive Secretary to the CNO Executive Panel, 4401 Ford Avenue, room 601, Alexandria, Virginia 22302-0268, Phone (703) 756-1205.

Dated: October 17, 1990.

Wayne T. Baucino,

Lieutenant, JAGC, USNR, Alternate Federal Register Liaison Officer.

[FR Doc. 90-24915 Filed 10-19-90; 8:45 am]

BILLING CODE 3810-AE-M

Naval Research Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is given that the Naval Research Advisory Committee Project Oxbow Follow-on Panel on Tactical Defense Suppression in the

Year 2000 will meet on November 2, 1990, at the Naval Air Station, Miramar, San Diego, California. Sessions of the meeting will commence at 8 a.m. and terminate at 4:30 p.m. All sessions of the meeting will be closed to the public. The purpose of the meeting is to review and participate in Project Oxbow, which are simulated wargames comparing various tactical defense suppression systems. The agenda will be comprised of briefings and discussions concerning the planned approach and overall project objectives, a review of test results, and analysis which emphasizes qualitative results in a tactical and operational context, and will include discussions on current and projected capabilities and requirements related to tactical defense suppression systems. These discussions will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive order. The classified and non-classified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

This notice is being published late because of administrative delays which constitutes an exceptional circumstance, not allowing Notice to be published in the **Federal Register** at least 15 days before the date of this meeting.

For further information concerning this meeting contact: Commander John Hrenko, U.S. Navy, Office of Naval Research, 800 North Quincy Street, Arlington, VA 22217–5000, Telephone Number: (703) 696–4488.

Dated: October 17, 1990.

Wayne T. Baucino,

LT, Jagc, USNR, Alternate Federal Register Liaison Officer.

[FR Doc. 90–24975 Filed 10–19–90; 8:45 am]

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Advisory Council on Education Statistics; Meeting

AGENCY: Advisory Council on Education Statistics, Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Advisory Council on Education Statistics. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES AND TIMES: December 13, 1990, 9 a.m.–4:45 p.m. and December 14, 1990, 9 a.m.–3:00 p.m.

ADDRESSES: 555 New Jersey Avenue, NW., Room 328, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Carrol B. Kindel, Executive Director, Advisory Council on Education Statistics, 555 New Jersey Avenue, Room 400e, Washington, DC 20208–5574, telephone: (202) 357–6329 before October 26, 1990 and (202) 219–1496 after October 26, 1990.

SUPPLEMENTARY INFORMATION: The Advisory Council on Education Statistics is established under Section 406(c)(1) of the Education Amendments of 1974, Public Law 93–380. The Council is established to review general policies for the operation of the National Center for Education Statistics (NCES) in the Office of Education Research and Improvement and is responsible for advising on standards to insure that statistics and analyses disseminated by NCES are of high quality and are not subject to political influence. The meeting of the Council is open to the public.

The proposed agenda includes the following:

- Orientation for New Council Members
- NCES Statistical Standards—the Standards Program and the Cooperative Education Data Collection and Reporting Standards
- Update on Resources for 1991 and Current Performance Indicators
- 1991 Dissemination Plans
- Update on National Goals Panel
- Work in Progress: NAEP and Confidentiality

Records are kept of all Council proceedings and are available for public inspection at the Office of the Executive Director, Advisory Council on Education Statistics, 555 New Jersey Avenue, NW., Room 400e, Washington, DC 20208–5574.

Dated: October 16, 1990.

Christopher T. Cross,

Assistant Secretary for Educational Research and Improvement.

[FR Doc. 90–24833 Filed 10–19–90; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Intent To Prepare a Programmatic Environmental Impact Statement on the Department of Energy's Proposed Integrated Environmental Restoration and Waste Management Program, and To Conduct Public Scoping Meetings

AGENCY: U.S. Department of Energy (DOE).

ACTION: Notice of intent (NOI) to prepare a programmatic environmental impact statement (PEIS).

SUMMARY: The Department of Energy announces its intent to prepare a PEIS pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, *et seq.*), as amended, and to conduct a series of public scoping meetings nationwide. The PEIS will assess the potential environmental consequences of alternatives for implementing an integrated environmental restoration and waste management program

The purpose of DOE's proposed integrated environmental restoration and waste management program is to provide a broad, systematic approach to addressing cleanup activities and waste management practices. The Department is committed to ensuring that potential risks to human health and the environment from the cleanup of contamination resulting from past operations and from future waste management activities are at safe levels. DOE is further committed to full compliance with environmental regulations and to a goal of completing environmental restoration by 2019.

INVITATION TO COMMENT: To ensure that the full range of issues related to this proposal are addressed, comments on the proposed scope of the PEIS are invited from all interested parties. Written comments to assist DOE in identifying significant environmental issues and defining the appropriate scope of the PEIS should be directed to Mr. Wisenbaker at the address indicated below. Agencies, organizations, and the general public also are invited to present oral comments pertinent to the preparation of the PEIS at the public scoping meetings to be held nationwide, as described below. Written and oral comments will be given equal weight.

Following the completion of the public scoping process, a PEIS Implementation Plan will be issued for public comment. The Implementation Plan will record the results of the scoping process and define the alternatives and issues to be evaluated in the PEIS. DOE intends to

complete the draft PEIS in early 1992. Its availability will be announced in the Federal Register, and public comments again will be solicited. Comments on the draft PEIS will be considered in preparing the final PEIS, scheduled for 1993.

DATES: The public scoping period will continue until February 19, 1991. Written comments should be postmarked by February 19, 1991 to assure consideration. Comments received after that date will be considered to the extent practicable. The public scoping meetings will begin in December 1990. The dates and locations of the meetings will be announced in a subsequent Federal Register notice and in local public notices in advance of the planned meetings.

ADDRESSES AND FURTHER INFORMATION: Written comments on the scope of the PEIS, questions concerning the program, and requests for copies of the draft PEIS should be directed to: Mr. W. E. Wisenbaker, Acting Director, Division of Program Support, Office of Environmental Restoration (EM-40), U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 353-2969.

For further information on the DOE NEPA process please contact: Ms. Carol M. Borgstrom, Director, Office of NEPA Oversight (EH-25), U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-4600.

PUBLIC SCOPING MEETINGS: Public scoping meetings will be held in the following cities beginning in December 1990. The dates and locations of these meetings will be published in a subsequent Federal Register notice. This information will also be announced in local public notices before the planned meetings.

Oakland, California
Denver, Colorado
Washington, DC
Tampa, Florida
Atlanta, Georgia
Boise, Idaho
Idaho Falls, Idaho
Chicago, Illinois
Paducah, Kentucky
St. Louis, Missouri
Las Vegas, Nevada
Princeton, New Jersey
Albuquerque, New Mexico
Newburgh, New York
Cincinnati, Ohio
Columbus, Ohio
Portland, Oregon
Columbia, South Carolina
Oak Ridge, Tennessee
Amarillo, Texas
Richland, Washington
Seattle, Washington
Spokane, Washington

SUPPLEMENTARY INFORMATION:

Background. In November 1989, the Secretary of Energy established the DOE Office of Environmental Restoration and Waste Management (EM) for the purpose of consolidating the Department's environmental restoration and waste management activities. In January 1990, the Secretary determined that DOE will prepare an Environmental Impact Statement on a newly proposed integrated environmental restoration and waste management program.

Some of the waste management practices that DOE and its predecessor agencies once considered safe and prudent under then existing requirements and guidelines have resulted in the need for remediation under applicable current Federal and state requirements and guidelines. DOE's environmental restoration activities include the assessment and physical cleanup of contamination at DOE installations and other properties. Environmental restoration activities also include the decontamination and decommissioning (D&D) of DOE's surplus facilities. These facilities and properties may have contamination from radioactive, hazardous, or mixed (radioactive and hazardous) waste. As decisions are made for the handling of contamination at various sites and facilities, new wastes will be generated that will require management.

DOE's waste management operations include the treatment, storage, transportation, and disposal of wastes generated by ongoing nuclear energy, energy research, and defense activities; by environmental restoration activities; and by other sources. These wastes include: high-level radioactive waste (HLW); low-level radioactive waste (LLW); transuranic waste (TRU); mixed waste (MW); greater-than-Class C waste (GTCC) waste; and hazardous waste.

The Affected Installations. DOE's environmental restoration and waste management activities occur throughout the U.S. The largest number of facilities that require environmental restoration or that generate or store the largest volumes of radioactive, hazardous, and mixed waste are located at these installations: Hanford Reservation (Washington); Savannah River Site (South Carolina); Oak Ridge Reservation (Tennessee); Rocky Flats Plant (Colorado); Feed Materials Production Center, Mound Plant and Portsmouth Gaseous Diffusion Plant (Ohio); Idaho National Engineering Laboratory (Idaho); Lawrence Livermore National Laboratory (California); Argonne National Laboratory (Illinois); Paducah Gaseous Diffusion Plant (Kentucky); Nevada Test Site (Nevada); Los Alamos National Laboratory and Sandia National Laboratory (New Mexico); and Pantex Plant (Texas). The Appendix contains a listing of DOE locations where current environmental restoration and waste management activities occur that DOE believes are within the scope of this PEIS. Additional sites may be added in the course of the development of the PEIS.

The Regulatory Framework. Federal laws of major importance to DOE's environmental restoration and waste management activities include, among others, the Atomic Energy Act of 1954 (42 U.S.C. 2011, *et seq.*), as amended; the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) (42 U.S.C. 9601, *et seq.*), as amended; and the Resource Conservation and Recovery Act (RCRA) (42 U.S.C. 6901, *et seq.*), as amended. The Atomic Energy Act requires the management, processing, and utilization of radioactive materials in a manner that protects the public health and the environment. CERCLA requires responses to releases or threatened releases of hazardous substances into the environment and establishes a process to clean up abandoned or uncontrolled hazardous waste sites which may endanger public health or the environment. RCRA requires management of waste currently being generated, including the treatment, storage, transportation, and disposal of hazardous waste, and cleanup of hazardous waste releases from past and present operations that pose a threat to human health and the environment. It is DOE's policy to apply NEPA to its waste management and cleanup activities. To minimize delay and duplication of effort in meeting these responsibilities, DOE is supplementing, where necessary, and integrating the procedural documentation and public participation requirements for CERCLA and RCRA to facilitate compliance with NEPA requirements (DOE Order 5400.4, Comprehensive Environmental Response, Compensation, and Liability Act Requirements).

DOE environmental restoration and waste management activities are subject to other applicable Federal and state requirements and to enforceable agreements. Additionally, certain Federal statutes require DOE to undertake specific environmental restoration and waste management activities. For example, under Title I of the Uranium Mill Tailings Radiation Control Act, DOE must remediate inactive uranium milling sites in accordance with Environmental

Protection Agency standards (40 CFR part 192) established for that purpose.

Wastes are categorized in accordance with Federal statutes and regulations and DOE Orders. High-level waste is defined in the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101(12)). Low-level, transuranic, and radioactive mixed wastes are defined in DOE Order 5820.2A (Radioactive Waste Management). Hazardous wastes are those wastes that are defined as hazardous by U.S. Environmental Protection Agency regulations implementing RCRA (40 CFR Part 261) and by applicable state regulations.

Current Practices for Waste Management. To date, DOE's waste management operations have focused on site-by-site treatment, storage, transportation, and disposal of waste. Transuranic, low-level, hazardous, and radioactive mixed waste are generated at many DOE installations; only a few installations generate high-level waste.

DOE generates or stores high-level waste at four installations: the Savannah River Site, the Hanford Reservation, the Idaho National Engineering Laboratory, and the West Valley Demonstration Project. To date, high-level waste has undergone only limited treatment. DOE intends to immobilize the waste in a stable, solid form acceptable for disposal in a geologic repository. Under current law, only one potential repository site (at Yucca Mountain, Nevada) for this waste is currently being characterized.

Most TRU waste has been generated at DOE's Rocky Flats Plant in Golden, Colorado. Transuranic waste is currently stored at several facilities including the Rocky Flats Plant, the Idaho National Engineering Laboratory, the Hanford Reservation, the Oak Ridge Reservation, the Nevada Test Site, Los Alamos National Laboratory, and the Savannah River Site. The Idaho National Engineering Laboratory has the largest management program for this waste. The Department is currently evaluating the Waste Isolation Pilot Plant in Carlsbad, New Mexico, as a potential disposal site for TRU waste.

Low-level waste requires relatively minimal treatment. Although in some instances other methods may be used, DOE currently disposes of the majority of its LLW in near-surface facilities, including installations at the Savannah River Site, the Oak Ridge Reservation, the Nevada Test Site, the Hanford Reservation, Los Alamos National Laboratory, and the Idaho National Engineering Laboratory.

DOE Order 5820.2A (Radioactive Waste Management) requires that the DOE waste equivalent to commercially generated Greater-than-Class C (GTCC) waste be handled as a special case by each site. The Department is also responsible for disposal of commercially generated GTCC waste. DOE has developed a three-part strategy for managing this waste. The first phase would provide a storage facility for those generators that cannot continue to store the waste. The second phase would provide a central storage facility for all commercially generated GTCC waste.

The final phase would transfer the stored waste to a high-level waste repository or provide for the development of a separate GTCC disposal facility.

For hazardous waste, DOE's near-term objective is to treat the waste as it is generated, thereby minimizing the need for storage capacity. DOE disposes of treated hazardous waste in permitted DOE or commercial facilities.

Mixed wastes are generated at many DOE installations. Mixed waste may include high-level waste, transuranic waste, and low-level waste. DOE stores these wastes until they can be treated and disposed of in permitted facilities. The Department currently treats a small amount of MW by thermal destruction to eliminate some hazardous components. In addition, DOE treats some low-level MW by solidification.

The PEIS will address these practices and any reasonable alternatives that are amenable to environmental analysis. (See Scope of PEIS, below)

Current Practices for Environmental Restoration. DOE will continue to seek, to the extent possible, to negotiate a comprehensive Federal Facilities Agreement with the Environmental Protection Agency (EPA) and the involved state to cover its remediation activities at an installation. Such agreements establish technical requirements and schedules for characterization, feasibility assessment and cleanup at each of the affected sites, and delineate the roles and responsibilities of each party to the agreement, to comply with the requirements of Section 120 of CERCLA. DOE is in the early stages of site assessment and characterization at many facilities. These initial activities are being reviewed in compliance with NEPA. DOE has determined that these early remediation activities are normally categorically excluded under its NEPA guidelines (55 FR 37174, September 7, 1990).

Decontamination and decommissioning activities have several objectives: (1) To maintain facilities awaiting additional D&D activities in a manner that protects workers, the public, and the environment; (2) to decontaminate facilities intended for reuse; and (3) decommission other facilities in accordance with requirements set forth in an approved environmental compliance plan. Currently, D&D activities are planned and executed on a site-by-site basis.

The PEIS will address these practices and any reasonable alternatives amenable to environmental analysis.

Need for an Integrated Environmental Restoration and Waste Management Program. The fundamental goal of DOE's Office of Environmental Restoration and Waste Management is to ensure that potential risks to human health and to the environment posed by wastes under its jurisdiction are at safe levels. To help achieve this goal, DOE proposes to conduct an integrated environmental restoration and waste management program.

Historically, DOE environmental restoration and waste management operations have been conducted on a site-by-site basis. This practice has led to differing approaches to cleanup and waste management among DOE sites. DOE's recent consolidation of waste program responsibilities (environmental restoration and waste management) provides the opportunity to establish a systematic approach to programmatic requirements and practices.

Remediation and D & D activities result in large amounts of waste that will require management, in addition to the wastes generated from production, research, and other activities. Because environmental restoration activities will be a significant source of waste, cleanup and waste management activities are closely related. The resolution of certain key issues, such as future land-usability objectives, will determine the amount, type, and timing of environmental restoration waste being introduced into the waste management part of the system. Land-usability policy relates to cleanup standards and the degree of reliance on institutional controls for long-term health and environmental protection.

PROGRAMMATIC ENVIRONMENTAL IMPACT STATEMENT: On January 12, 1990, the Secretary of Energy determined that a PEIS should be prepared for DOE's newly proposed integrated environmental restoration and waste management program. The Secretary stated that preparation of this PEIS will ensure that a comprehensive and cumulative environmental analysis of waste management proposals and alternatives will be available to DOE decisionmakers and the public.

The PEIS will assess broad programmatic issues and integrated approaches to DOE's environmental restoration and waste management activities. DOE aims, to the extent this is feasible, for the PEIS to provide the primary environmental basis for selecting waste management methods and technologies and the locations at which they would be implemented. However, DOE does not intend the PEIS to assess impacts related to alternative choices of locations within a site. Such detailed decisions would be based on site-specific NEPA documents tiered to this PEIS.

PRELIMINARY DESCRIPTION OF ALTERNATIVES: *Scope of PEIS.* DOE solicits public input on all aspects of the proposed program described in this notice. DOE plans to structure this PEIS in two sections to facilitate public review and comments. One section of the PEIS will focus on key environmental restoration issues. The second section will analyze reasonably foreseeable potential impacts associated with various waste management alternatives within the integrated program.

As discussed previously, current environmental restoration and waste management practices for which reasonable alternatives that are amenable to environmental analysis can be identified are within the scope of the PEIS. Under the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101, *et seq.*), as amended, DOE currently plans to dispose of high-level waste resulting from Departmental activities in a repository to be developed for spent fuel from commercial nuclear utilities. In addition, under section 213(a) of the Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1980 (42 U.S.C. 7272, *et seq.*), as amended, the Department plans to demonstrate the disposal of defense transuranic waste at the Waste Isolation Pilot Plant in Carlsbad, New Mexico. These decisions will not be revisited in the programmatic EIS. In addition, there is a national program, under Congressional direction, to address the management of commercial nuclear reactor spent fuel. The activities associated with that program will be considered in separate NEPA documentation and not in this PEIS. Commercial LLW is not the Department's responsibility and therefore is outside the scope of the PEIS. Uranium Mill Tailings Remedial Action Program (UMTRAP) tailings cleanup and disposal activities are within DOE's purview, but are expected to be close to completion prior to the issuance of the Record of Decision and will not be considered in the PEIS. The groundwater remediation activities associated with UMTRAP are just beginning, however, and therefore are within the scope of this PEIS.

Proposed action. The proposed action is to formulate and implement an integrated Environmental Restoration and Waste Management Program in a safe and environmentally sound manner, and in compliance with applicable laws, regulations and standards. Alternative approaches are discussed below.

Environmental Restoration Analysis: NEPA requires DOE to analyze reasonable alternatives to its proposed actions. DOE realizes that in the current environmental restoration decisionmaking framework for remediation activities there are statutory and regulatory requirements that must be fulfilled. DOE will continue to follow established processes in conducting ongoing environmental restoration activities.

For example, the framework Congress established under CERCLA for remedial actions imposes a strong preference for permanent remedies that comply with all applicable and appropriate requirements established under environmental laws. Consequently, DOE's overall environmental restoration efforts have focused on cleaning up sites adequately for unrestricted future use. The framework also requires that cleanup requirements and remedies be selected site-specifically. This produces final decisions made both discretely and diversely.

DOE believes, however, that there are important national issues that it should analyze in carrying out its responsibilities. These issues include, but are not limited to, (1) the degree to which DOE should rely on proven technologies in contrast to making strong resource commitments to developing innovative technologies; (2) the manner in which DOE should manage wastes until adequate treatment and disposal capacity is available; (3) whether DOE's installations should invariably be cleaned up for unrestricted use; and (4) the environmental basis for deciding cleanup priorities.

DOE seeks to develop and analyze programmatic alternatives that bear on these issues. DOE believes that important information on the costs and benefits of alternative program management strategies could thereby be obtained. DOE is especially interested in receiving public comments on these issues.

Decontamination and decommissioning activities are not subject to the decisionmaking framework that governs remediation activities. DOE proposes, therefore, to approach all D&D activities in an integrated, systematic fashion.

Waste Management Analysis: Waste treatment, storage, transportation, and disposal alternatives primarily depend on the waste category (such as radioactive, hazardous, or radioactive mixed waste). Alternatives will reflect centralized, regional, or installation-specific strategies. The analysis would provide environmental information for deciding which waste management capabilities should be established centrally, regionally, or at each site. Transportation of waste and the potential associated impacts will also be evaluated.

No Action. This alternative would continue present practices. DOE would not adopt and integrated environmental restoration and waste management program. DOE would continue to operate its environmental restoration activities and its waste operations as discrete site-specific actions. If site requirements dictate the need for offsite or new facilities, management decisions would be made on a project specific basis.

DOE would maintain existing facilities for waste management operations. New waste management activities, projects, and technological development would be considered case-by-case.

IDENTIFICATION OF ENVIRONMENTAL ISSUES: The following environmental issues have been identified for analysis in the PEIS. This list is presented to facilitate discussion on the scope of the PEIS and is not intended to be all-inclusive or to predetermine the scope. Therefore, DOE invites comments on these and additional issues relevant to this PEIS.

(1) The potential impacts (both beneficial and adverse) to worker health, public health, and the environment under various alternatives for environmental restoration and waste management.

(2) The potential impacts to workers, public health, and the environment under various alternatives from routine transportation of wastes and potential transportation accidents.

(3) The development of needed technologies and methods for environmental restoration and waste management and the potential impacts (both beneficial and adverse) from their implementation.

(4) Any obstacles to achieving full compliance with all applicable federal, state, and local environmental statutes, regulations, and requirements.

(5) The socioeconomic impacts of alternatives for dispersed, regional, and centralized waste management.

(6) The potential impacts of applying various land-usability strategies to the cleanup of DOE installations and sites.

RELATIONSHIP TO OTHER ACTIONS: *Five-Year Plan.* DOE issued a Five-Year Plan for Environmental Restoration and Waste Management (DOE/S–0070) in August 1989 that was subsequently revised, updated, and reissued (DOE/S-0078P) in June 1990. The Plan summarizes current DOE practices and identifies short- and long-term goals. The activities described are for the near-term (e.g., remediation of seepage basins at the Savannah River Site, and radioactive storage upgrades at the Kansas City Plant). Only general objectives, criteria, and guidance, in addition to those set in applicable environmental regulations and statutes, are specified for implementing environmental restoration and waste management activities on a long-term basis. For example, the Plan states that the majority of solid low-level waste generally will continue to be disposed of using shallow land burial, but recognizes that this may not be suitable for all locations. The Plan also states DOE's general intent that facilities and sites be returned to a condition suitable for unrestricted use, but recognizes that in-place remedies may sometimes be preferred.

The Five-Year Plan is not a proposal within the context of NEPA. Rather, it is preliminary to the Environmental Restoration and Waste Management PEIS in which DOE will evaluate integrating its long-term environmental restoration and waste management activities. The PEIS will specifically address the long-term goals and issues generally summarized in the Five-Year Plan.

As the Plan states, completion of the PEIS process may result in changes in specific programs, which would be reflected in future editions of the Plan.

Environmental Restoration and Waste Management Configuration Study. The Environmental Restoration and Waste Management Configuration Study is a strategic planning study for the long-term (the next 25 years). The study will support the definition of waste system configuration alternatives in this PEIS. DOE intends to issue the draft configuration study concurrently with the draft PEIS for public information and use in reviewing the draft PEIS.

Many factors influence the configuration and updating of DOE's waste management operations, including: (1) Increasingly strict environmental, safety, and health standards and requirements; (2) facilities dating from the late 1940s to the middle 1960s becoming obsolete; (3) increasing costs to maintain and upgrade these facilities; (4) difficulties in managing widely dispersed waste storage facilities in different environmental settings; (5) potential changes in the locations, volumes, and types of waste to be managed, after consideration of a PEIS on reconfiguring (modernizing) the nuclear weapons complex; (6) availability of improved technologies; (7) population growth near once-remote facilities such as areas near Rocky Flats, Colorado, Fernald, Ohio, Oak Ridge, Tennessee, and Livermore, California, which has led to local demands for restricting DOE operations; and (8) transition from waste accumulation and storage to waste treatment and disposal.

PEIS for the Nuclear Weapons Complex (NWC). In concert with the decision to prepare this PEIS, the Secretary decided that a separate PEIS on DOE's proposal to modernize (reconfigure) the nuclear weapons complex will also be prepared. The reconfiguration of the nuclear weapons complex would affect DOE's program for environmental restoration and waste management because it would change the locations, volumes, and types of waste to be managed. The environmental restoration and waste management PEIS, therefore, will take into account, to the extent practical, the materials generated in the preparation of the NWC PEIS. Separate statements are being prepared, however, because the programs are driven by distinct missions, requirements, and schedules. If the PEIS on the NWC is not issued first, DOE will prepare a supplement to the Environmental Restoration and waste management PEIS, if appropriate.

PUBLIC SCOPING MEETINGS AND INVITATION TO COMMENT: DOE is committed to providing opportunities for the involvement of interested individuals and groups in this and other DOE planning activities.

DOE will conduct a series of public scoping meetings nationwide and invites all interested people to attend and to present oral comments concerning: (1) the scope of the PEIS, (2) the issues that should be addressed, and (3) the alternative integrated approaches to be analyzed in the PEIS. DOE also invites written comments.

Oral and written comments will be given equal consideration. Instructions for submitting written comments are given above. People desiring to speak at the public scoping meetings should submit their requests to do so to the contact persons to be designated in a subsequent **Federal Register** notice. Oral presentation requests for each meeting should be received by DOE at least two days before the meeting.

The meetings will be chaired by a presiding officer. They will not be conducted as evidentiary hearings. Speakers will not be cross-examined, although the DOE representatives present may ask them clarifying questions.

To ensure everyone an adequate opportunity to speak, five minutes will be allotted for each speaker. Depending on the number of persons requesting to speak, the presiding officer may allow more time for speakers representing multiple parties or organizations. Persons wishing to speak on behalf of organizations should identify the organization in their request. Persons who have not submitted a timely request to speak may register at the meetings, and will be called on to speak if time permits. Written comments also will be accepted at the meetings, and speakers are encouraged to provide written versions of their oral comments for the record.

The public scoping meetings will begin in December 1990. Detailed information on the meetings will be provided in a subsequent **Federal Register** notice. This information will also be announced in local public notices before the planned meetings.

DOE will make a transcript of each meeting. Copies will be made available for inspection at the DOE Freedom of Information Reading Room (Room 1E-190), Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, during business hours, Monday through Friday and in local DOE reading rooms. Locations of local reading rooms will be provided in the subsequent **Federal Register** notice regarding the scoping meetings.

RELATED NEPA DOCUMENTATION: DOE expects to prepare additional NEPA documents for implementing programmatic and facility-specific decisions based upon this PEIS. These generally site-specific documents will analyze future technology and siting alternatives for implementing DOE's environmetnal restoration and waste management activities. Their analyses will address such local concerns as floodplains and wetlands, historic and archaeological sites, land use, and threatened and endangered species. The PEIS will examine these issues only to the degree necessary for selection of an integrated program.

Interim Actions. DOE may need to conduct many diverse and discrete site-

specific environmental restoration and waste management activities while the PEIS is being prepared. Many of these activities are required by Federal and state regulatory agencies under environmental compliance agreements and some are required by court decrees. DOE will have to determine case-by-case whether site-specific actions may proceed before the PEIS is completed. This will be done in accordance with all applicable requirements, including the test for interim actions found in Council on Environmental Quality's NEPA Regulations (40 CFR 1506.1(c)).

Other. DOE has prepared, or is currently preparing, NEPA documents for many of DOE's site-specific actions. Examples of some major relevant waste management NEPA documents are listed below:

1. Final Environmental Impact Statement, Disposal of Hanford Defense High-level, Transuranic and Tank Wastes, Hanford Site, Richland, Washington. DOE/EIS-0113, December 1987. U.S. Department of Energy, Washington, DC.

2. Final Environmental Impact Statement, Waste Management Activities for Groundwater Protection, Savannah River Plant, Aiken, South Carolina. DOE/EIS-0120, December 1987. U.S. Department of Energy, Washington, DC.

3. Final Supplemental Environmental Impact Statement, Waste Isolation Pilot Plant. DOE/EIS-0026-FS, January 1990. U.S. Department of Energy, Washington, DC.

4. Draft Environmental Impact Statement, Decommissioning of Eight Surplus Production Reactors at the Hanford Site, Richland, Washington. DOE/EIS-0119d, March 1988. U.S. Department of Energy, Washington, DC.

These documents, the Five-Year Plan (DOE/S-0078P), transcripts from the public scoping meetings (when they become available), and other related documents will be available for inspection at DOE Freedom of Information Reading Rooms.

Issued in Washington, DC, this 15th day of October 1990.

Peter N. Brush,

Acting Assistant Secretary, Environment, Safety and Health.

Appendix: Locations of Activities Embraced by the PEIS

Name	Location
Amchitka Island	Amchitka Island, AK.
Lawrence Berkeley Laboratory	Berkeley, CA.
University of California	Berkeley, CA.
Atomics International	Canoga Park, CA.
Laboratory for Energy-Related Health Research	Davis, CA.
Sandia National Laboratory-Livermore	Livermore, CA.
Lawrence Livermore Laboratory	Livermore, CA.
Bayo Canyon	Los Alamos, CA.
Stanford Linear Accelerator Center	Palo Alto, CA.
General Atomics	San Diego, CA.
Energy Technology Engineering Center	Santa Susana, CA.

Bonneville Power Administration

Intent To Prepare an Environmental Impact Statement for a Proposed Long-Term Sale of 1400 Megawatts of Capacity to the Pacific Power and Light Company; and Public Scoping Meeting

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of intent to prepare an Environmental Impact Statement (EIS) and conduct a public meeting.

SUMMARY: BPA intends to prepare and consider an EIS on a proposed 20-year sale of electrical capacity to the Pacific Power and Light Company (PP&L) for service to its Northwest loads. BPA has 2600 megawatts of surplus electrical capacity available on its system, i.e., capacity which it projects will not be required to meet its obligations incurred pursuant to subsections 5(b), 5(c), and 5(d) of the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act) and previously committed capacity contracts. PP&L currently has a Power Sales Contract with BPA providing for the purchase of 1127.3 MW of capacity. This contract expires at midnight on August 31, 1991. A proposed contract to replace the expiring PP&L capacity contract, which is to be the subject of the EIS, has been negotiated. A rate-setting process for

capacity sales to be made under the proposed contract has been conducted in accordance with subsection 7(i) of the Northwest Power Act.

Those persons who wish more detailed information on the proposed contract or a copy of it should contact one of the information sources listed below.

INVITATION TO COMMENT

To ensure that the full range of issues related to this proposal is addressed, comments on the proposed scope of the EIS are invited from all interested parties. Written comments or suggestions to assist BPA in identifying significant environmental issues and the appropriate scope of the EIS should be sent to the address below and received by November 21, 1990. Later comments will be considered to the extent practicable. Meetings held in conformance with BPA's Fish and Wildlife Consultation procedures, adopted May 22, 1985, to discuss the PP&L capacity sale took place on May 21, 1990, and July 19, 1990. Comments made at those meetings or submitted subsequently in writing will be taken into account in scoping the draft EIS. Agencies, organizations, and the general public are also invited to present oral comments or suggestions pertinent to preparation of this EIS at the public scoping meeting as indicated below. Written and oral comments will be given equal weight in the scoping process. Comments and suggestions received during the scoping process will be considered in preparing the draft EIS. The draft EIS is expected to be completed in 1991, at which time its availability will be announced in the Federal Register, and public comments will again be solicited. Comments on the draft EIS will be considered in preparing the final EIS.

DATE AND LOCATION: The scoping meeting will be held in Portland, Oregon, on November 6, 1990, from 1 to 5 p.m. in the Third Floor Conference Room of the Federal Building East, 1002 NE. Holladay St., Portland, Oregon.

ADDRESSES: Written comments should be sent to arrive by November 21, 1990, and should be addressed to: Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, OR 97212.

FOR FURTHER INFORMATION CONTACT: Mr. Roy B. Fox, Coordination and Review Manager—PG, Bonneville Power Administration, P.O. Box 3621, Portland, OR 97208; telephone (503) 230-4261.

INFORMATION MAY ALSO BE OBTAINED FROM: Ms. Jo Ann Scott, Public Involvement Manager—ALP, Bonneville Power Administration, P.O. Box 12999, Portland, OR 97212; telephone (503) 230-3478; toll-free 800-452-8429 (in Oregon); 800-547-6048 (in other Western States).

SUPPLEMENTARY INFORMATION: When a customer purchases capacity service from BPA, it is purchasing the flexibility of the Federal hydroelectric system. BPA delivers capacity (peaking energy) to the purchasing utility during the utility's peak hours (heavy load hours), usually daytime, weekday hours, and the utility returns that energy (peaking replacement energy) to BPA during the utility's offpeak or light load hours, at night or on weekends. Capacity service may be requested by utilities that lack adequate resources to meet their peak loads. A utility may decide, for economic reasons, to purchase capacity service from BPA rather than build and operate its own peaking resources. This is PP&L's position.

Benefits to BPA from a capacity sale include enhanced revenue and revenue stability over the contract period. Capacity sales yield revenues that exceed the foregone revenues that BPA might have received by making use of BPA's operational flexibility for a purpose other than production of capacity. Revenue stability is enhanced by applying capacity charges to a fixed contract demand and escalating these charges by a formula based on BPA's costs. Although BPA could receive revenues from short-term, spot market sales made in lieu of long-term capacity sales, the amount of such revenue would likely be lower and would be more variable and less certain given the unpredictability of spot market conditions.

Capacity sales also benefit BPA's customers. Any additional revenue that BPA receives from a more efficient use of the hydroelectric system is revenue that BPA does not have to recover from its firm power customer classes. Currently, the cost of BPA's unsold surplus capacity is shared by BPA's preference and direct-service industrial customers. As more suprius capacity is sold under long-term contracts, BPA's customers. As more surplus capacity is of generating resources can be spread over a larger number of users. Rates will stay lower and be more predictable.

When BPA delivers peaking energy to utility customers, it drafts reservoirs, lowering the water levels in them, and increases generation on the Columbia River hydrosystem. Flows and river water levels increase downstream of dams. Conversely, when a utility customer returns peaking replacement energy during offpeak hours, when BPA's own loads are also low, BPA reduces generation on its system. Less water is released through the turbines (although specified minimum flows are maintained, through spill if necessary), water levels in the reservoirs increase through inflow, and flows and river levels below the reservoirs decrease. These daily and weekly shifts between increasing generation to supply peaking energy, and decreasing generation when peaking replacement energy is being delivered to BPA result in the potential for environmental impacts. The nature and amount of these impacts are not well understood at this time.

PP&L, in relying on the former regional Hydro-Thermal Power Program, incorporated the purchase of firm capacity from BPA into its long-term resource planning decisions. They invested heavily in coal-fired generation and are deficient in capacity on their own system. Therefore, PP&L desires to continue to purchase surplus firm capacity from BPA in order to meet their Pacific Northwest firm load obligations. Other options available to PP&L to meet their need for capacity, for example purchase of combustion turbine resources, are less attractive, either economically or operationally, than continued purchase of surplus capacity from BPA. Selling capacity to PP&L is consistent with BPA's overall power marketing program and will provide levelized revenues in the amount of about $72,000,000 (1991 dollars) per year.

Deliveries of capacity under the proposed new PP&L capacity sale contract are intended to begin upon expiration of the existing PP&L contract, at midnight on August 31, 1991. (In the event the Final EIS and a Record of Decision are not complete prior to the expiration date of the current contract, BPA intends to enter into a short-term capacity sale with PP&L to meet their needs until a decision on a long-term contract has been reached.) The term of the proposed contract is 20 years. The sale (i.e., the contract demand) would be of 1100 MW of capacity initially, until September 30, 1992. The sale would then increase by 100 MW of contract demand and would increase in additional 100 MW increments each subsequent September 30th until it reaches its maximum amount of 1400 MW on September 30, 1994. Capacity and associated peaking energy are provided for up to 10 hours per day for up to 80 hours per week. Returns of replacement peaking energy are to be made by PP&L within 7 days. The proposed contract includes various operational provisions which permit BPA to limit hourly rates of return of replacement peaking energy in the months of March through October.

Deliveries are to be prescheduled each workday for each hour of the following day or days until the next regular workday. However, PP&L would have a right to change these schedules on 30 minutes notice for up to 6 heavy load hours, and also have a right to increase deliveries from BPA during light load hours. The proposed price for the capacity is $4.92 kilowatt-month of Contract Demand. This price is to be escalated upwards to reflect changes in BPA's average system cost as determined in each successive BPA general rate case after September 1, 1991. BPA has a 5-year right to terminate or reduce contract demand to meet statutory obligations to preference customers, or to meet prior contractual obligations, including exchange obligations, or to meet capacity/exchange obligations which are incurred subsequent to this contract if, at the time of incurring such obligation, BPA had projected (for the term of this contract) at least 300 MW of firm capacity in excess of the aggregate of the new obligations.

In the draft EIS, BPA is considering analyzing the proposed action, perhaps some minor variations thereof relating to the amount of capacity sold and the contract rights for BPA to decrease contract demand, and the no-action alternative. The no-action alternative is envisioned as some combination of short-term transactions and use of system flexibility which would be expected to take place absent the sale of capacity to PP&L. Sales of capacity on a long-term basis to other Northwest entities are not planned at this time to be analyzed as alternatives since there are no negotiations ongoing or proposals for such sales. Firm Displacement sales to Northwest utilities currently under consideration as part of joint ventures to provide power to the Southwest and potential sales directly to Southwest entities are addressed in BPA's Final Intertie Development and Use EIS and are not alternatives to the proposed capacity sale to PP&L since they do not exhaust the capacity surplus. Alternative terms beyond the minor variations mentioned above for the PP&L sale may be analyzed if preliminary analysis demonstrates that environmental problems would be expected as a consequence of specific terms of the proposed sale or environmental benefits could be achieved by altering the proposed terms. Such changes would require further negotiation with PP&L. BPA requests input through the scoping process regarding the alternatives which should be addressed in the EIS process, including the definition of the no-action alternative.

There may be potential effects on resident and anadromous fish and wildlife as a consequence of the proposed sale, resulting from fluctuations in flows and water levels in reservoirs and rivers. Pending threatened and endangered species determinations for the upper Snake River sockeye salmon, lower Columbia River coho salmon, and Snake River spring, summer, and fall chinook salmon could complicate the issue.

Specifically, the following issues are of concern to fish and wildlife interests and are expected to be addressed in the environmental document.

1. Elevations (flows) at Vernita Bar.
2. Effects on weekend flows both during and outside the Water Budget period.
3. Delays in adult migration in the Snake because of reduced or zero night-time flows and during periods of high sustained flow.
4. Effects of flow fluctuations on juvenile passage.
5. Effects of flow fluctuations on adult passage.
6. Effects on resident fish and fishing in the Flathead, Lower Columbia, and Kootenai Rivers resulting from flow fluctuations.
7. Effects on resident fish in reservoirs from elevation fluctuations.
8. Effects on predator fish distributions.
9. Effects of flow fluctuations on wildlife including stranding, increase predation, etc. at nesting islands.
10. Changes in the volume and underlying percentages of spill.

Some of these issues were raised or reiterated at Fish and Wildlife consultation meetings on May 21, 1990, and July 19, 1990. BPA is seeking additional comments relating to how capacity sales might affect fish and wildlife, suggestions as to how daily and weekly fluctuations in flow and elevation can or should be quantitatively or qualitatively related to fish and wildlife impacts so as to be able to determine their significance, and any data useful in this analysis.

Impacts on recreational uses of the hydrosystem are also a concern. Since fishing is a major recreational use of the hyrdosystem, recreation impacts are not totally separate from those fish and wildlife issues listed above. However, changes in flows and downstream water levels can affect the quality of the fishing experience also. BPA is aware of some impacts changing flows have on sturgeon fishing downstream of Bonneville Dam, and other problems changes in flows pose for fishing downstream of Libby Dam and Dworshak. Other types of recreation can also be affected. Recreational boating (and commercial navigation as well) can be affected by changes in reservoir and river levels which can affect boating access and facilities (*e.g.*, by altering the availability for use of boat launching ramps and docks) and expose navigation hazards. Swimming facilities at the reservoirs may also be affected by changing water levels. The quality of other recreational activities such as camping and simply viewing scenery can also be deteriorated by lower water levels. The aesthetic quality of the reservoirs declines when the water is lower exposing mud flats and so forth. BPA is also seeking comments relating to how capacity sales might affect recreation, suggestions as to how daily and weekly fluctuations in flow and elevation can or should be quantitatively or qualitatively related to recreation impacts so as to be able to determine their significance, and any data useful in this analysis.

Bank stability is also affected by fluctuations in reservoir and river levels. More frequent or more severe fluctuations would tend to increase erosion of reservoir and river banks. This is a notable problem downstream of Grand Coulee Dam.

Irrigation may also be affected. Irrigators who pump directly out of rivers and reservoirs may have to move their water intakes more frequently to compensate for increased fluctuation in water level.

The preceding is not intended to be an exhaustive list of the potential impacts that the operation of the hydrosystem to produce capacity may have on the environment. BPA seeks comment on additional types of impacts which may occur, and means to analyze them.

Other BPA National Environmental Policy Act (NEPA) Processes

In addition to this EIS, BPA proposes to prepare three other EIS's related to power marketing and resource decisions over the next several years.

The first such EIS concerns BPA's Resource Program. BPA's Resource Program is prepared biennially to meet the Administrator's obligation to serve loads placed on BPA. The Resource Program articulates the plan BPA will use in meeting its load obligations and explains the analytic basis for that plan and the reasons it is preferred over alternative resource plans. The Resource Program also provides the basis for energy resource program budgets and explains how they are derived. The

Resource Program EIS will evaluate environmental effects associated with the various types of resources considered and will examine the environmental effects of altenative resource plans that could be proposed. Environmental tradeoffs among the various resources and among alternative resource plans will also be covered in the Resource Program EIS.

A second EIS currently contemplated addresses the System Operation Review (SOR). This process could lead to decisions affecting regional hydropower capability or operating flexibility, thereby altering the amount of capacity the hydrosystem could generate. Because of the dominance of hydropower in the existing Federal System, these decisions could affect BPA's Resource Programs. The Resource Program EIS will be scoped to accommodate potential changes in hydrosystem operation.

The third EIS will address non-Federal participation in the Third AC (alternating current) Intertie. This EIS will focus on extraregional marketing and the potential environmental and economic tradeoffs between Federal export marketing and export marketing by non-Federal entities, and the extent to which restrictions on export marketing may effectively mitigate potentially adverse environmental effects. Although the PP&L sale would need to be taken into account for analytic purposes for this EIS, the sale is not directly relevant to the action this EIS is being prepared to address.

Since the EIS on the proposed sale of surplus capacity to PP&L deals with a sale of surplus capacity resources and the Contract Demand can be reduced in order to meet other BPA firm obligations, there is no need to delay consideration of the PP&L sale for analysis in either the Resource Program EIS or the SOR EIS or vice versa. Further, BPA does not currently foresee any other long-term marketing actions beyond the sale to PP&L, other than potential export sales already addressed by the Intertie Development and Use EIS. Analysis of future long-term marketing actions subsequent to PP&L would include cumulative effects of the PP&L sale as well as other existing or reasonably foreseeable long-term marketing actions and would be presented in appropriate NEPA documents.

Issued in Portland, Oregon on October 3, 1990.

Jack Robertson,

Deputy Administrator.

[FR Doc. 90-24976 Filed 10-17-90; 4:51 pm]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. QF90-85-001, et al.]

Hadson Power 13—Hopewell, et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

October 18, 1990.

Take notice that the following filings have been made with the Commission:

1. Hadson Power 13—Hopewell

[Docket No. QF90-85-001]

On October 1, 1990, Hadson Power 13—Hopewell (Applicant), of 16845 Von Karman Avenue, Irvine, California 92714, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Hopewell, Virginia. The facility consists of two coal-fired boilers and a single automatic extraction/condensing steam turbine generator. Thermal energy recovered from the facility is used by Firestone Fibers & Textile in the manufacturing of synthetic fiber. The net electric power production capacity of the facility is 80.147 MW.

The certification of the original application was issued on April 29, 1988 (43 FERC ¶ 62,023 (1988)). The instant recertification is requested due to the transfer of ownership from Ultra Cogen Systems, Incorporated, the previous owner, to the Applicant. Applicant is not an electric utility, electric utility holding company or any combination thereof.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

2. Hadson Power 11—Southampton

[Docket No. QF90-84-001]

On October 1, 1990, Hadson Power 11—Southampton (Applicant), of 16845 Von Karman Avenue, Irvine, California 92714, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility is located in Franklin, Southampton County, Virginia. The facility consists of two coal-fired boilers and a single automatic extraction/condensing steam turbine generator. Thermal energy recovered from the facility is used by Hercules, Incorporated in the manufacturing of resins, paper chemicals and organic peroxides. The net electric power production capacity of the facility is 80.872 MW.

The certification of the original application was issued on April 8, 1988 (43 FERC ¶ 62,103 (1988)). The instant recertification is requested due to the transfer of ownership from Ultra Cogen Systems, Incorporated, the previous owner, to the Applicant. Applicant is not an electric utility, electric utility holding company or any combination thereof.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

3. Hadson Power 12—Altavista

[Docket No. QF90-86-001]

On October 1, 1990, Hadson Power 12—Altavista (Applicant), of 16845 Von Karman Avenue, Irvine, California 92714, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility is located in Altavista, Virginia. The facility consists of two coal-fired boilers and a single automatic extraction/condensing steam turbine generator. Thermal energy recovered from the facility is used by Lane Company, Inc. in the manufacturing of furniture. The net electric power production capacity is 80.577 MW.

The certification of the original application was issued on April 28,1988 (43 FERC ¶ 62,072 (1988)). The instant recertification is requested due to the transfer of ownership from Ultra Cogen systems, Incorporated, the previous owner, to the Applicant. Applicant is not an electric utility, electric utility holding company or any combination thereof.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

4. Hadson Power 14—Buena Vista

[Docket No. QF90-87-001]

On October 1, 1990, Hadson Power 14—Buena Vista (Applicant), of 16845 Von Karman Avenue, Irvine, California 92714, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility is located in Buena Vista, Virginia. The facility consists of two coal-fired boilers and a single automatic extraction/condensing steam turbine generator. Thermal energy recovered from the facility is used by Georgia Bonded Fibers, Inc. for manufacturing of fiber boards. The net electric power production capacity of the facility is 62.4 MW.

The certification of the original application was issued on April 8, 1988 (43 FERC ¶ 62,024 (1988)). The instant recertification is requested due to the transfer of ownership from Ultra Cogen Systems, Incorporated, the previous owner, to the Applicant. Applicant is not an electric utility, electric utility holding company or any combination thereof.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become aparty must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24854 Filed 10-19-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP91-39-000, et al.]

Northern Natural Gas Co., et al.; Natural Gas Certificate Filings

October 12, 1990.

Take notice that the following filings have been made with the Commission:

1. Northern Natural Gas Co.

[Docket No. CP91-39-000]

Take notice that on October 10, 1990, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, Houston, Texas 77251, filed in Docket No. CP90-66-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas under its blanket authorization issued in Docket No. CP86-435-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern proposes to transport natural gas on an interruptible basis for Meadco Properties. Northern explains that the service commenced September 1, 1990, under the self-implementing authorization of § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-4715. Northern proposes to transport on a peak day up to 15,000 MMBtu; on an average day up to 11,250 MMBtu; and on an annual basis up to 5,475,000 MMBtu. Northern proposes to receive and deliver the gas at various points in Texas. It is stated that existing facilities would be used to effect the transportation service and that no construction of additional facilities would be required.

Comment date: November 26, 1990, in accordance with Standard Paragraph G at the end of this notice.

2. Texas Eastern Transmission Corp.

[Docket No. CP91-104-000]

Take notice that on October 10, 1990, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77251, filed in Docket No. CP91-104-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas under its blanket authorization issued in Docket No. CP88-136-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Eastern proposes to transport natural gas on an interruptible basis for Marathon Oil Company (Marathon), a producer of natural gas, pursuant to an interruptible transportation service agreement. Texas Eastern proposes to transport on a peak day up to 48,000 MMBtu per day; on an average day up to 48,000 MMBtu; and on an annual basis 17,250,000 MMBtu of natural gas for Marathon. Texas Eastern proposes to receive the gas for Marathon. Texas Eastern proposes to receive the gas for Marathon's account at receipt points located onshore and offshore Louisiana, Alabama, Arkansas, Illinois, Indiana, Kentucky, Missouri, Mississippi, New Jersey, New York, Ohio, Pennsylvania, Texas, Tennessee and West Virginia. Texas Eastern would redeliver the gas at existing delivery points located on Texas Eastern's system.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Natural commenced such self-implementing service on March 1, 1989, as reported in Docket No. ST89-3356-000.

Comment date: November 26, 1990, in accordance with Standard Paragraph G at the end of this notice.

3. Stingray Pipeline Co., Florida Gas Transmission Co., Florida Gas Transmission Co., Superior Offshore Pipeline Co., Superior Offshore Pipeline Co., Northern Natural Gas Co., Tennessee Gas Pipeline Co.

[Docket No. CP91-49-000, Docket No. CP91-66-000, Docket No. CP91-67-000, Docket No. CP91-68-000, Docket No. CP91-69-000, Docket No. CP91-77-000, Docket No. CP91-78-000]

Take notice that the above referenced companies (Applicants) filed in respective dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under blanket certificates issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection.[1]

Information applicable to each transaction including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day, and annual volumes, and the docket numbers and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations has been provided by the Applicants and is included in the attached appendix.

The Applicants also state that each would provide the service for each shipper under an executed transportation agreement, and that the Applicants would charge rates and abide by the terms and conditions of the referenced transportation rate schedules.

Comment date: November 26, 1990, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraph

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Panhandle Eastern Pipe Line Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Panhandle Eastern Pipe Line Co.

[Docket No. CP91-113-000]

October 12, 1990.

Take notice that the above referenced company (Applicant) filed in Docket No. CP91-113-000 a prior notice request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of a shipper under its blanket certificate issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice request which is on file with the Commission and open to public inspection.

Information applicable to the transaction including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day, and annual volumes, and the docket number and initiation date of the 120-day transaction under § 284.223 of the Commission's Regulations has been provided by the Applicant and is included in the attached appendix.

The Applicant also states that it would provide the service for the shipper under an executed transportation agreement, and that the Applicant would charge rates and abide by the terms and conditions of the referenced transportation rate schedule.

Comment date: November 26, 1990, in accordance with Standard Paragraph G at the end of this notice.

[Docket No. EF91-1011-000]

Alaska Power Administration—Eklutna Project Power Rates; Filing

October 15, 1990.

Take notice that on October 2, 1990, the Deputy Secretary of Energy, on behalf of the Alaska Power Administration (Alaska), tendered for filing the Department of Energy Rate Order No. APA-10 which places proposed rates in effect on an interim basis for a period of 12 months beginning October 1, 1990, subject to the Federal Energy Regulatory Commission's confirmation and approval or rejection.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 30, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. RP91-7-000]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

October 15, 1990.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on October 11, 1990, tendered for filing proposed changes in its FERC Gas Tariff, Second Revised Volume No. 1, as set forth in the revised tariff sheets:

Proposed to be effective August 2, 1990

Third Revised Sheet No. 367
First Revised Sheet No. 385A

Algonquin states that the Commission issued an interim rule on August 2, 1990 in Docket No. RM90-13-000 which revised the interpretation of the "on behalf of" standard in section 311 of the Natural Gas Policy Act of 1978 for transportation services by interstate pipelines under § 284.102 of the Commission's regulations. The revised definition requires that the "on behalf of" entity in such transactions (i) Have physical custody of and transport the natural gas at some point during the transaction, or (ii) hold title to the natural gas at some point during the transaction for a purpose related to its status and functions as an intrastate pipeline or local distribution company, as applicable.

Algonquin states that in order to reflect the interim rule in Docket No. RM90-13-000 interpretation in Algonquin's Rate Schedules AFT-1 and AIT-1, the tariff sheets listed above incorporate the Commission's revised standard into Algonquin's Rate Schedules AFT-1 and AIT-1. Such tariff sheets are proposed to be effective August 2, 1990.

Algonquin notes that copies of this filing were served upon each affected party and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate actions to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TM91-1-51-001]

Bayou Interstate Pipeline System; Proposed Change in Rates

October 15, 1990.

Take notice that on October 10, 1990, Bayou Interstate Pipeline System (Bayou) tendered as part of its FERC Gas Tariff, Original Volume No. 1, (Tariff) Twentieth Revised Sheet No. 4 to be effective November 1, 1990.

The proposed tariff sheet is filed pursuant to the Purchased Gas Cost Adjustment provisions contained in section 15 of Bayou's tariff. Bayou states that a copy of this filing was mailed to Bayou's jurisdictional customer and interested state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

[FR Doc. 90-24808 Filed 10-19-90; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. TM91-1-32-001]

Colorado Interstate Gas Co.; Filing

October 15, 1990.

Take notice on October 10, 1990, Colorado Interstate Gas Company (CIG) submitted for filing six copies of affected tariff sheets from Original Volume No. 1, Original Volume No. 2, and Original Volume No. 3 of its FERC Gas Tariff, increasing by 0.03 cent/Mcf the presently effective ACA rate from 0.19 cent/Mcf to 0.22 cent/Mcf effective November 1, 1990.

CIG notes that it sought to place a new ACA rate of 0.19 cent/Mcf in effect on October 1, 1990 in its "initial" 1990 ACA filing on August 30, 1990. This was approved by Commission order issued on September 26, 1990 in Docket No. RM87-3-000 and Docket Nos. TM91-1-20 et al. In the "initial" ACA filing, CIG did not consider as a part of the 0.19 cent/Mcf ACA rate the additional billings it had received and paid related to the Commission's under-recovery of its 1989 fiscal year ACA program costs. CIG notes, however, that it requested permission to revise its ACA charge should the Commission approve recovery of the 1989 fiscal year under-recovery amount. In paragraph D of its September 26, 1990 order, the Commission did approve a 0.03 cent/Mcf upward adjustment in the ACA rate to correct for the 1989 fiscal year under-recovery for any pipeline filing a revised ACA charge of 0.22 cent/Mcf within 15 days of the Commission's order. The revised 0.22 cent/Mcf charge is effective on November 1, 1990. The Commission also permits the filing pipeline to adjust its November, 1990 bill for the ACA under-recovery at the 0.19 cent/Mcf rate approved for October, 1990.

According, CIG submitted for filing the following tariff sheets incorporating the "revised" 0.22 cent/Mcf ACA billing rate to become effective on November 1, 1990:

Original Volume No. 1 Tariff

Fourth Revised Second Substitute First Revised Sheet No. 7.1
Fourth Revised Second Substitute First Revised Sheet No. 7.2
Fourth Revised Second Substitute First Revised Sheet No. 8.1
Fourth Revised Second Substitute First Revised Sheet No. 8.2

Second Revised Second Substitute Fifth Revised Sheet No. 1335
Second Revised Substitute Sixth Revised Sheet No. 1347
Second Revised Substitute Sixth Revised Sheet No. 1370

Original Volume No. 2 Tariff

Second Revised Sheet No. 4

CIG states that copies of this filing have been served upon CIG's jurisdictional customers and public bodies, and are otherwise available for public inspection at CIG's offices in Colorado Springs, Colorado.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM91-1-15-001]

Mid Louisiana Gas Co.; Proposed Change of Rates

October 15, 1990.

Take notice that Mid Louisiana Gas Company (Mid Louisiana) on October 9, 1990, tendered for filing as part of First Revised Volume No. 1 of its FERC Gas Tariff the following Tariff Sheets to become effective November 1, 1990:

	Superseding
Substitute Seventy-Sixth Sheet No. 3a.	Seventy-Sixth Revised Sheet No. 3a.1.
Substitute Eight Revised Sheet No. 3a.1.	Eighth Revised Sheet No. 3a.1.

Mid Louisiana states that the purpose of the filing of Revised Sheets is to reflect an upward revision to the unit rates for the collection of the Annual Charges imposed by section 382 of the Commission's Regulations.

Mid Louisiana states that this filing is being made in accordance with Section 22 of Mid Louisiana's FERC Gas Tariff. Mid Louisiana further states that copies of this filing have been mailed to Mid Louisiana's jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TM91-1-73-003]

Ozark Gas Transmission System; Proposed Changes in FERC Gas Tariff

October 15, 1990.

Take notice that Ozark Gas Transmission System ("Ozark") on October 10, 1990, tendered for filing the following revised tariff sheet in its FERC Gas Tariff, Original Volume No. 1:

Substitute Sixth Revised Sheet No. 6

The proposed effective date is November 1, 1990.

Ozark states that it is amending its transportation rate schedule to reflect its Commission-authorized Annual Charge Adjustment ("ACA") unit charge of $.0022. Ozark states that this filing is submitted in compliance with section 154.36(d)(6)(iii) of the Commission's Regulations.

Ozark states that copies of the filing were served upon Ozark's jurisdictional customers.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this

[Docket No. TM91-1-68-001]

Kentucky West Virginia Gas Co.; Proposed Change in FERC Gas Tariff

October 15, 1990.

Take notice that Kentucky West Virginia Gas Company (Kentucky West) on October 10, 1990, tendered for filing with the Federal Energy Regulatory Commission (Commission) Fourth Revised Sheet No. 45 to its FERC Gas Tariff, Second Revised Volume No. 1, to become effective November 1, 1990.

Kentucky West states the revised tariff sheet amends its Annual Charge Adjustment (ACA) charge to place in effect the recalculated ACA funding unit of $.0022 per MCF.

Kentucky West states that a copy of its filing has been served upon each of its jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket Nos. TM91-2-28-001 TM91-3-28-001]

Panhandle Eastern Pipe Line Co.; Change in FERC Gas Tariff

October 15, 1990.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on October 10, 1990, tendered for filing the following proposed changes to its FERC Gas Tariff, Original Volume No. 1:

Docket No. TM91-2-28-000

Sub Second Revised Sheet No. 3-C.4
Sub Second Revised Sheet No. 3-C.5
Sub Second Revised Sheet No. 3-C.6

Docket No. TM91-3-28-000

Sub Second Revised Sheet No. 3-C.7
Sub Second Revised Sheet No. 3-C.8
Sub Second Revised Sheet No. 3-C.9

The proposed effective date of these revised tariff sheets is October 1, 1990.

Panhandle states that revised tariff sheets were filed on August 31, 1990 in Docket Nos. TM91-2-28-000 and TM91-3-28-000, which reflected the second annual reconciliation filings and second annual adjustments to carrying charges and monthly TOP Fixed Surcharges in accordance with Sections 23 and 24 of Panhandle's FERC Gas Tariff, Original Volume No. 1.

Panhandle further states that it is submitting these revised tariff sheets and materials in compliance with the requirements of the Commission's Letter Orders dated September 28, 1990 in Docket No. TM91-2-28-000 and Docket No. TM91-3-28-000, by reflecting the actual customers' payments for the months of August and September 1990 and the actual payments made by Michigan Consolidated Gas Company [MichCon].

Panhandle states that copies of this letter and enclosures are being served on all affected jurisdictional sales customers, appropriate state regulatory agencies, and parties to these proceedings.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM91-1-72-001]

Pelican Interstate Gas System; Proposed Change in FERC Gas Tariff

October 15, 1990.

Take notice that on October 10, 1990, Pelican Interstate Gas System (Pelican) tendered for filing Fourth Revised Sheet No. 2A and Third Revised Sheet No. 2B to be a part of its FERC Gas Tariff.

The proposed tariff sheet provides a revised Annual Charges Adjustment (ACA) that the Federal Energy Regulatory Commission ("Commission") assesses Pelican under part 382.103 of the Commission's Regulations.

Pelican states that a copy of this filing was mailed to Pelican's jurisdictional customers and interested state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM91-1-55-002]

Questar Pipeline Co.; Tariff Filing

October 15, 1990.

Take notice that on October 10, 1990, pursuant to 18 CFR 2.104 and 154.38(d)(6) Questar Pipeline Company submitted for filing and acceptance the following revised tariff sheets to Original Volume Nos. 1, 1-A and 3 of its FERC Gas Tariff:

Original Volume No. 1

Ninth Revised Sheet No. 12
Second Revised Sheet No. 12-A

Original Volume No. 1-A

Third Revised Sheet No. 5

Original Volume No. 3

Third Revised Sheet No. 6

Questar Pipeline states that this filing reflects in its FERC Gas Tariff the revised annual charge adjustment rate implemented by the Commission in its September 26, 1990, order to Algonquin Gas Transmission Co., *et al.*

Questar Pipeline requests an effective date of November 1, 1990, for the tendered tariff sheets and states that copies of the filing were served upon its customers and interested public service commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Sreet, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket Nos. TQ91-1-7-002, TM91-1-7-001 and TF91-1-7-001]

Southern Natural Gas Co.; Proposed Changes to FERC Gas Tariff

October 15, 1990.

Take notice that on October 10, 1990, Southern Natural Gas Company (Southern) tendered for filing the following revised sheets to its FERC Gas Tariff, Sixth Revised Volume No. 1:

First Substitute Second Revised Ninety-seventh Revised Sheet No. 4A
First Substitute Third Revised Ninety-seventh Revised Sheet No. 4A
First Substitute Third Revised Sixteenth Revised Sheet No. 4J
First Substitute First Revised Fifth Revised Sheet No. 45M

First Substitute Second Revised Ninety-seventh Revised Sheet No. 4A has been submitted by Southern to comply with the Commission's September 27, 1990 order in Docket Nos. TQ91-1-7-000, *et al.*, and is to be superseded by First Substitute Third Revised Ninety-seventh Revised Sheet No. 4A, which reflects the reduction in Southern's stated commodity cost of gas proposed by Southern to become effective October 1, 1990, in Docket No. TF91-1-7-000. First Substitute Third Revised Sixteenth Revised Sheet No. 4J and First Substitute First Revised Fifth Revised Sheet No. 45M are also proposed to be effective October 1, 1990. The foregoing sheets implement the Commission's revised ACA unit charge of .22¢ per Mcf at 1,000 Btu or .21¢ per MMBtu effective October 1, 1990.

Southern states that copies of Southern's filing were served upon all of Southern's jurisdictional purchasers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24861 Filed 10-19-90; 8:45 am]

BILLING CODE 6717-10-M

[Docket No. TM91-1-42-001]

Transwestern Pipeline Co.; Proposed Changes in FERC Gas Tariff

October 15, 1990.

Take notice that Transwestern Pipeline Company ("Transwestern") on October 10, 1990 tendered for filing, as part of it FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Effective October 1, 1990

Substitute 77th Revised Sheet No. 5
Substitute 42nd Revised Sheet No. 6
Substitute 9th Revised Sheet No. 37

Effective November 1, 1990

79th Revised Sheet No. 5
44th Revised Sheet No. 6
11th Revised Sheet No. 37

Reason For Filing

On August 31, 1990 Transwestern filed the above referenced tariff sheets to adjust its Annual Charge Adjustment (ACA) pursuant to the Commission's Order No. 472 and section 23 of the General Terms and Conditions of Transwestern's FERC Gas Tariff, Second Revised Volume No. 1. In its filing, Transwestern requested that its tariff sheets reflect the ACA Unit Surcharge of $0.0019/dth as determined by the Commission on July 18, 1990 in Order No. 472. Transwestern requested that the revised ACA Surcharge become effective October 1, 1990.

On September 26, 1990 the Commission issued an order in Transwestern's Docket No. TM91-1-42-000. Pursuant to Ordering Paragraph (G) of the Commission's September 26, 1990 Order, Transwestern was instructed to refile the associated tariff sheets in this docket to correct pagination errors. Such pagination errors have been corrected as reflected in this filing. Transwestern respectfully requested that the revised tariff sheets become effective October 1, 1990.

Pursuant to the September 26, 1990 Order in Docket No. RM87-3-000 *et al.*, Ordering Paragraph (D) afforded pipelines, which submitted tariff sheets reflecting an ACA Surcharge amount of less than $0.0022/dth, the opportunity to file revised tariff sheets reflecting a $0.0022/dth ACA Surcharge, to become effective November 1, 1990. Therefore, Transwestern is also filing tariff sheets to reflect the revised ACA Unit Surcharge of $0.0022/dth, to become effective November 1, 1990.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24862 Filed 10-19-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM91-1-52-001]

Valero Interstate Transmission Co.; Proposed Changes in FERC Gas Tariff

October 15, 1990.

Take notice that Valero Interstate Transmission Company ("Vitco"), on October 10, 1990 tendered for filing the following tariff sheets containing changes to the ACA unit rate in each applicable rate schedule:

FERC Gas Tariff, Original Volume No. 1

20th Revised Sheet No. 14
21st Revised Sheet No. 14.2
8th Revised Sheet No. 21.12
4th Revised Sheet No. 29.8

FERC Gas Tariff, Original Volume No. 2

20th Revised Sheet No. 6
4th Revised Sheet No. 29.9

The proposed effective date of the above filing is November 1, 1990. Vitco requests a waiver of any Commission order or regulations which would prohibit implementation by November 1, 1990.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 C.F.R. 385.214, 385.211 (1990)). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24871 Filed 10-19-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TQ91-1-53-001 TM91-1-53-001]

Western Gas Interstate Co.; Proposed Changes in FERC Gas Tariff

October 15, 1990.

Take notice that on October 10, 1990, Western Gas Interstate Company ("Western"), pursuant to Section 4 of the Natural Gas Act, the Commission's Regulations thereunder and Western's FERC Gas Tariff, tendered for filing proposed changes to its FERC Gas Tariff, First Revised Volume No. 1. The

proposed effective date for the tariff sheet is November 1, 1990.

Western states that on October 1, 1990, it filed certain changes to its cost of purchased gas and annual charge components of its rates in accordance with the terms of the Purchase Gas Adjustment Clause and Annual Charge Adjustment Clause ("ACA") of its FERC Gas Tariff.

Subsequent to such filing, Western determined that its ACA charge did not reflect the changes to such charge as are permitted by the Commission in its Order issued in Annual Charges Under the Omnibus Budget Reconciliation Act of 1986, et al. 52 FERC Paragraph 61,337 (1990), which found that the allowable ACA charge for 1990 is $0.0022/MCf.

Western states that the instant filing reflects the new ACA as set forth in the Commission's Order under Western's Rate Schedules G-N and G-S.

Western has requested that the Commission grant all waivers of Commission Regulations so that the rates reflected in the instant filing will become effective November 1, 1990.

Finally, Western states that copies of the amended filing were served upon Western's transmission system customers and interested state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 22, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

FEDERAL MARITIME COMMISSION

[Docket No. 90-28]

Holt Cargo Systems, Inc., et al.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Holt Cargo Systems, Inc. ("Complainant") against Philadelphia Regional Port Authority ("Philadelphia"), American Transport Lines, Inc. ("Amtrans") and Delaware River Stevedors, Inc. ("DRS") (collectively designated "Respondents") was served October 16, 1990. Complainant alleges that Respondents have violated sections 10(d)(3), (b)(11), (b)(12), (d)(1) and (d)(2) of the Shipping Act of 1984, 46 U.S.C. app. 1709(d)(3), (b)(11), (b)(12), (d)(1) and (d)(2), by Philadelphia granting, in an agreement with Amtrans, favorable provisions to users of the Tioga Marine Terminal at Philadelphia and imposing conditions on Complainant at its Packer Avenue Marine Terminal that are not imposed on users of the Tioga Terminal; by Philadelphia agreeing to provisions in its agreement with Amtrans that are non-compensatory; by Philadelphia refusing to negotiate in good faith to modify its agreement with Complainant; by Philadelphia requiring as a condition of restricting other marine terminal operators from using the Tioga Terminal that Complainant cease handling any container business at its Gloucester City, New Jersey Terminal, by Amtrans passing through to DRS the rates contained in the Philadelphia-Amtrans agreement, by DRS soliciting common carriers, including customers of Complainant, and offering them the untariffed, substantially lower rates contained in the Philadelphia-Amtrans agreement and permitting its cargo to be cumulated with Amtrans cargo to qualify for volume discounts under the Philadelphia-Amtrans agreement; by Amtrans and DRS participating in and agreeing to the alleged violations of Respondent Philadelphia; and by DRS participating in and agreeing to the alleged violations of Respondent Amtrans.

This proceeding has been assigned to Administrative Law Judge Charles E. Morgan ("Presiding Officer"). Hearing in

this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by October 16, 1991, and the final decision of the Commission shall be issued by February 13, 1992.

Joseph C. Polking,
Secretary.

BILLING CODE 6720-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

Reckitt & Colman plc; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order allows, among other things, a London, England corporation to acquire the Boyle-Midway Division of American Home Products Corp., but requires respondent to divest its own rug-cleaning products business to a Commission-approved acquirer, within eight months, and to comply with all terms of the Hold Separate Agreement. In addition, for ten years, respondent is required to obtain prior Commission approval before acquiring any interest in any company that manufactures or sells rug cleaning products in the U.S.

DATES: Complaint and Order issued September 20, 1990.[1]

FOR FURTHER INFORMATION CONTACT: Robert W. Doyle, Jr., FTC/S-2308, Washington, DC 20580. (202) 326-2682.

SUPPLEMENTARY INFORMATION: On Thursday, July 5, 1990, there was published in the Federal Register, 55 FR 27686, a proposed consent agreement with analysis In the Matter of Reckitt & Colman plc, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

No comments having been filed, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

Authority: Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 90E-0338]

Establishment of a Public Docket for Generic Drug Speeches and Policy and Procedure Guides

AGENCY: Food and Drug Administration, NNS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that it is establishing a public docket for policy statements that the agency issues and speeches that agency staff give to trade associations regarding human generic drugs. The docket will also contain the policy and procedure guides (also called guidances) that are issued by the Center for Drug Evaluation and Research (CDER) and its Office of Generic Drugs regarding human generic drugs. This action will ensure that this information is equally available to all interested persons on a timely basis.

ADDRESSES: The docket is available under the docket number found in brackets in the heading of this notice and is located in the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and may be reviewed between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Lola E Batson, Center for Drug Evaluation and Research (HFD-360), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8038.

SUPPLEMENTARY INFORMATION: FDA employees, in the discharge of their usual responsibilities and in response to requests from consumer groups and trade associations, attend meetings of such organizations to deliver speeches and to answer questions regarding FDA activities. In this connection, FDA employees in CDER are regularly invited to speak and to answer questions regarding human generic drugs at meetings of the Generic Pharmaceutical Industry Association (GPIA), the National Association of Pharmaceutical Manufacturers (NAPM), the Pharmaceutical Manufacturers Association (PMA), and other trade associations. The presentations by CDER employees usually cover historical and current information regarding regulatory requirements and policies relating to human generic drug products.

To help make information regarding human generic drugs provided to industry at trade association meetings available to all firms that produce human generic drug products, including those firms that are not represented at such meetings, FDA has developed a mechanism for providing public access to speeches delivered by FDA officials at meetings of generic drug trade associations. Specifically, FDA is establishing a public docket where copies of speeches regarding human generic drug products given by FDA employees to GPIA, NAPM, PMA, and other trade associations will be maintained.

On an as needed basis, FDA also disseminates to its employees and other interested parties relevant information regarding human generic drug products. This information is often in the form of policy and procedure guides (or guidances). These guides are designed for Office of Generic Drugs staff and are subject to change without public notice. Many of these guides describe new policies and procedures designed to ensure fair and even-handed dealings with all applicants. The guides are available to the public and, along with copies of the speeches, will be maintained in the public docket regarding human generic drugs to make the information equally accessible to all interested persons.

To ensure that the information in the docket is kept current the agency plans to remove information from the docket that is more than 3 years old. FDA will review the docket each year to determine usage. If FDA determines that the docket is not being used, the agency will discontinue maintaining it.

The docket is available for public review in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Dated: October 12, 1990.

James S. Benson,

Acting Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

Statement of Organization, Functions, and Delegations of Authority

Part H, chapter HF (Food and Drug Administration) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (35 FR 3685, February 25, 1970, as amended most recently in pertinent part at 53 FR 8979, March 18, 1988) is amended to reflect the transfer of functions and the transfer of a staff within the Food and Drug Administration (FDA).

FDA is proposing to transfer the AIDS Coordination Staff within the Office of the Center Director, Center for Biologics Evaluation and Research, to the Immediate Office of the Commissioner. The transfer of this Staff will give FDA's AIDS programs the highest visibility and attention possible. Coordination of FDA's AIDS programs will be directly under the Commissioner's control to ensure that all components of the Agency are working together when necessary and appropriate. This is especially important as more Agency components, both in Headquarters and the field, become involved in the fight against AIDS.

Section HF-B Organization and Functions is amended as follows:

1. Add a new subparagraph (a-7) AIDS Coordination Staff (HFA-A) reading as follows:

(a-7) AIDS Coordination Staff (HFA-A). Coordinates the Agency's Acquired Immune Deficiency Syndrome (AIDS) program.

Serves as the focal point to provide leadership and direction for all Agency activities on AIDS. Represents the Agency on the PHS Executive Task Force and the Intragovernmental Task Force on AIDS Health Care Delivery.

Consels and supports all FDA components on AIDS and AIDS-related activities.

Develops Agency policy and guidelines related to AIDS and AIDS related issues.

Promulgates, plans, administers, coordinates, and evaluates overall Agency scientific, management, and regulatory programs on AIDS and AIDS-related activities.

2. Delete subparagraph (p-1) Office of the Center Director (HFB1), Center for Biologics Evaluation and Research, in its entirety and insert a new subparagraph (p-1) reading as follows:

(p-1) *Office of the Center Director (HFB1).* Promulgates, plans, administers, coordinates, and evaluates overall Center scientific, management, and regulatory programs, plans and policies.

Provides leadership and direction for all Center activities.

Coordinates and directs the Center management, planning, and evaluation systems to assure optimum utilization of Center manpower, financial resources, and facilities.

Dated: October 1, 1990.

James S. Benson,

Acting Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

HEALTH CARE FINANCING ADMINISTRATION

Hearing: Reconsideration of Disapproval of Wisconsin State Plan Amendments (SPAs)

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on November 20, 1990 in the 15th floor Conference room, 105 West Adams, Chicago, Illinois to reconsider our decision to partially disapprove Wisconsin State Plan Amendments 88-35, 88-36 and 88-37.

CLOSING DATE: Requests to participate in the hearing as a party must be received by the Docket Clerk on or before November 8, 1990.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, HCFA Hearing Staff, Suite 110, Security Office Park, 7000 Security Boulevard, Baltimore, Maryland 21207. Telephone: (301) 967-3015.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to partially disapprove Wisconsin State Plan amendments (SPAs) number 88-35, 88-36 and 88-37.

Section 1116 of the Social Security Act (the Act) and 42 CFR part 430 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid Agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues that will be considered at the hearing, we will also publish that notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained at 42 CFR 430.76(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained at 42 CFR 430.76(c).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

Wisconsin SPAs 88-35, 88-36 and 88-37 include income and resource policies which the State believes are more liberal than those required under section 1902(a)(10) of the Social Security Act (the Act). The State is seeking protection for the policies in SPA 88-35 from

adverse action by the Secretary under the moratorium imposed by section 2373(c) of the Deficit Reduction Act (DRA) of 1984. States were permitted to use more liberal income and resource policies during the moratorium period. The State is also seeking approval under the authority of section 1902(r)(2) of the Act for the more liberal income and resource policies described in SPAs 88-36 and 88-37.

The issues in this matter are whether: (1) SPA 88-35 is eligible for protection under the moratorium provision in section 2373(c) of the Deficit Reduction Act of 1984; (2) SPAs 88-36 and 88-37 can be approved under the authority of section 1902(r)(2) of the Act; (3) SPAs 88-35 and 88-37 violate the comparability provisions of sections 1902(a)(10) and 1902(a)(17) of the Act as they apply to eligibility groups under section 1902(r)(2) and the moratorium; (4) SPAs 88-35 and 88-36 violate section 1902(a) (4) and (19) of the Act, and; (5) whether SPAs 88-35 and 88-37 violate sections 1902(a)(18) and 1917(b) of the Act.

Under the moratorium, the Secretary is prohibited from taking certain adverse actions against States for using more liberal income and resource methods and standards than are used to determine eligibility for Aid to Families with Dependent Children (AFDC) and Supplemental Security Income (SSI) in Medicaid eligibility determinations for the medically needy and limited categorically needy groups. The moratorium covers the period October 1, 1981 through February 17, 1989, (or, the entire month of February when a State provides full month Medicaid coverage).

The moratorium provision in section 2373(c) of the Deficit Reduction Act of 1984 (DRA) did not change the Medicaid law to permit States to use more liberal income and resource methodologies than required under section 1902(a)(10). The moratorium simply prohibited the Secretary from taking adverse action during the moratorium period against any State for using methods that the Secretary interpreted as being more liberal than the methods used under the cash assistance programs. Section 1902(r)(2) permits States to actually amend their plans to include more liberal policies.

Moratorium protection and approval under the authority of section 1902(r)(2) apply only to income and resource eligibility policies required under section 1902(a)(10). They do not exempt States from meeting other requirements of law, even though other statutory provisions may serve to limit a State's flexibility to adopt more liberal income and resource policies under section 1902(r)(2), or to be granted protection during the moratorium. HCFA recommended denial of a number of the policies proposed by the State, and denial of moratorium protection for those same policies, because of other statutory provisions.

HCFA also denied protection for certain policies because HCFA believes that they include methods that are more restrictive, rather than more liberal, than the cash assistance programs.

Post-Eligibility Policies—Supplement 5, Items A. 1. and 2. of SPA 88-35 and Supplement 11, Items A. 1. and 2. of SPA 88-36

• The State proposed a deduction in the post-eligibility process for a home maintenance allowance for married individuals who were institutionalized for the period 1982 through March 1987.

HCFA believes this policy is not eligible for moratorium protection, or approvable under section 1902(r)(2) because it is not an eligibility policy under section 1902(a)(10), but a post-eligibility policy governed by sections 1902(q) and 1902(a)(17).

Although the proposed policy is not eligible for moratorium protection, or plan approval, the policy was applied correctly for the period 1982 to March 1987. Medicaid Quality Control staff have been advised of this fact so that they may determine whether the Health Care Financing Administration (HCFA) has taken any inappropriate action in regard to the State's application of this policy for the period it was correctly applied.

• The State proposed, for the period 1977 through February 1986, a post-eligibility personal needs allowance that included a $65 and ½ earned income deduction for employed individuals.

HCFA believes the policy is not eligible for moratorium protection, or approval under section 1902(r)(2) because it is not an eligibility policy under section 1902(a)(10), but a post-eligibility policy governed by sections 1902(q) and 1902(a)(17). The State argues that the policy was applied as an income policy during the moratorium period. The State further argues that because it is an approvable post-eligibility policy, it should be provided moratorium protection.

The eligibility process and the post-eligibility process are two separate and distinct calculations governed by different statutory provisions regulations. Consequently, HCFA believes there is no legal authority for the Secretary to grant moratorium protection, or approval of the post-eligibility policy as a section 1902(r)(2) policy.

Income Policies—Supplement 5, Items B.1. through 4. and C. of SPA 88-35 and Supplement 11, Items B.1. through 4. and C. of SPA 88-36

The State proposed more liberal income policies than those required under section 1902(a)(10). However, the State would not include language in the plans that Federal financial participation (FFP) limits were not exceeded (in the case of the moratorium policies) and will not be exceeded (in the case of section 1902(r)(2) policies).

While the State's special income eligibility levels for institutionalized persons is at the FFP limit, the State's medically needy eligibility income levels are not at the FFP limit. Had the State included in the plan a qualifier that the total amount of the more liberal income disregards in any medically needy case would not exceed the dollar difference in the eligibility standard and the FFP limit, HCFA believes moratorium protection and section 1902(r)(2) approval could have been granted. It should be noted that HCFA's disapproval applies to all groups that the State has attempted to include under SPAs 88-35 and 88-36, except those groups of individuals who are eligible for assistance, but are not receiving it, or who would be eligible to receive assistance if they were not in a medical institution. These groups are exempt from the FFP cap under section 1903(f)(4)(B).

Because FFP limits under section 1903(f) remain unchanged, the FFP limits may be impermissibly exceeded. Compliance can be assured in two ways: HCFA can permit States to define more liberal policies in such a manner than such limits cannot be exceeded; or it can permit States to define more liberal policies which will result in certain persons having income which exceeds the prescribed limits. If the latter option were elected, States would be required to develop an audit system to screen out claims for services provided to persons who have income which exceeds the prescribed limits. This "audit" approach would place a costly administrative burden on States and the Federal Government. HCFA believes Congress intended that recipients benefit from the moratorium and section 1902(r)(2) provisions, rather than having program dollars diverted to excessive administrative expenditures. For these reasons, HCFA has elected to disapprove plan policies which may result in the FFP limits of section 1903(f) being exceeded.

Disapproval authority is found under section 1902(a) (4) and (19). Under

section 1902(a)(4). States must provide such methods of administration as are found by the Secretary to be necessary for the proper and efficient operation of the plan. HCFA believes the decision not to approve policies which may result in FFP limits being exceeded is consistent with this requirement as it is the most efficient manner of handling the interface between the eligibility requirements and FFP limits.

Under section 1902(a)(19), the plan must provide such safeguards as may be necessary to assure that eligibility for care and services under the plan will be determined, and such care and services will be provided, in a manner consistent with simplicity of administration and the best interests of the recipients. HCFA believes that its decision to disapprove policies, rather than implement costly audits, is consistent with this provision of law.

More Liberal Resource Policies—Supplement 5, Items A.1. and 3. and B.5. of SPA 88–35 and Supplement 12, Items A.1. and 3. and B.5. of SPA 88–37

• Protected Asset Policies—The State proposed two policies which allow persons with excess resources to be Medicaid eligible under the plan provided the recipient agrees to pay the agency, in the form of a refund, the amount of the excess resources. HCFA believes the State's policy violates section 1902(a)(18). This provision requires that a State's plan comply with the provisions of section 1917(b) with respect to adjustments and recoveries of medical assistance that has been correctly paid. Section 1917(b) is not covered by either the moratorium or section 1902(r)(2). Section 1917, which provides the conditions under which State may make recoveries from recipients, is violated because the State's policy would require repayment of assistance correctly paid on behalf of the recipient. Recoveries of correct payments are very limited and may only be made under the circumstances described in the law. These include recoveries from estates of certain institutionalized persons or from the sale of property that was subject to lien.

It is not clear whether the State's proposed policies, in this regard, always operated as a "refund" (that is, as repayment of medical care provided, or expected to be provided by Medicaid) or, instead, as a "fee." If the latter was the case, such fees were prohibited under sections 1902(a)(14) and 1916 of the Act.

• Prepaid Care Accounts of Wisconsin Veteran's Home (WVH) Residents—The State proposed to exclude as a resource, prepaid accounts of WVH residents, but makes no provision for excluding prepaid accounts of residents in other institutions. Therefore, HCFA believes the policy violates the comparability provisions of sections 1902(a)(10) and 1902(a)(17) as they apply to eligibility groups under section 1902(r)(2) and the moratorium. It is HCFA's interpretation of these provisions that the policies must be comparable for all persons in each category of recipients within the eligibility group(s) to whom the more liberal policies apply.

• Jointly Held Resources—The State proposed a policy which calls for attributing equal shares to all joint owners in property. HCFA believes that this policy may be more restrictive than the comparable SSI policy. The SSI policy provides that, under a joint tenancy, a person's actual ownership interest is the value of the countable asset (or, resource). When the actual ownership interest is less than an equal share, the State's policy is more restrictive. Thus, HCFA believes that the State's policy is not eligible for moratorium protection or approval under section 1902(r)(2).

The notice to Wisconsin announcing an administrative hearing to reconsider the disapproval of its State plan amendment reads as follows:

October 11, 1990.

Ms. Patricia A. Goodrich
Secretary
Department of Health and Social Services, 1 West Wilson Street, Madison, Wisconsin 53702.

Dear Ms. Goodrich: I am responding to your request for reconsideration of the decision to partially disapprove Wisconsin State Plan Amendments (SPAs) 88–35, 88–36 and 88–37.

The issues in this matter are whether: (1) SPA 88–35 is eligible for protection under the moratorium provision in section 2373(c) of the Deficit Reduction Act of 1984; (2) SPAs 88–36 and 88–37 can be approved under the authority of section 1902(r)(2) of the Act; (3) SPAs 88–35 and 88–37 violate the comparability provisions of sections 1902(a)(10) and 1902(a)(17) of the Act as they apply to eligibility groups under section 1902(r)(2) and the moratorium; (4) SPAs 88–35 and 88–36 violate sections 1902(a)(4) and (19) of the Act, and; (5) SPA 88–35 and 88–37 violate sections 1902(a)(18) and 1917(b) of the Act.

I am scheduling a hearing on your request to be held on November 20, 1990, at 10 a.m. in the 15th floor conference room, 105 West Adams, Chicago, Illinois. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties. The hearing will be governed by the procedures prescribed at 42 CFR part 430.

I am designating Mr. Stanley Katz as the presiding officer. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (304) 957–3015.

Sincerely,

Gail R. Wilensky, Ph.D.
Administrator.

Authority: Section 1116 of the Social Security Act (42 U.S.C. 1316); 42 CFR 430.18.

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program)

Dated: October 11, 1990.

Gail R. Wilensky,
Administrator, Health Care Financing Administration.

BILLING CODE 4120–03–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–050–91–4340–09]

Availability of the Draft Environmental Impact Statement on the Clark County Regional Flood Control District Master Plan; Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of the Draft Environmental Impact Statement (DEIS) on the Clark County Regional Flood Control District Master Plan.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, notice is given that the Bureau of Land Management Las Vegas District has prepared, by a third party contractor, a Draft Environmental Impact Statement (DEIS) on the Clark County Regional Flood Control District Master Plan in southern Nevada, and has made copies of the document available for public review.

DATES: Written comments on the DEIS must be postmarked by December 14, 1990. A public hearing for oral and written testimony will be held on November 28, 1990, from 7 p.m. to 9 p.m. at the Bureau of Land Management, Las Vegas District Office, 4765 Vegas Drive, Las Vegas, Nevada 89108.

ADDRESSES: A copy of the DEIS can be obtained from: District Manager, Bureau of Land Management, P.O. Box 26569, Las Vegas, NV 89126. In addition to the Bureau of Land Management District Office in Las Vegas, the DEIS is also available for inspection at the following locations: Bureau of Land Management, Nevada State Office, Reno, Nevada; Clark County Regional Flood Control

District, Las Vegas, Nevada; Clark County Library, Las Vegas, Nevada; Las Vegas Library, Las Vegas, Nevada; North Las Vegas Library, North Las Vegas, Nevada; Sunrise Library, Las Vegas, Nevada; University of Nevada-Las Vegas, James R. Dickinson Library, Las Vegas, Nevada; West Las Vegas Library, Las Vegas, Nevada; Spring Valley Library, Las Vegas, Nevada; Rainbow Library, Las Vegas, Nevada; State of Nevada Library, Carson City, Nevada; Green Valley Library, Henderson, Nevada; Charleston Heights Library, Las Vegas, Nevada; and the U.S. Department of the Interior, Natural Resources Library, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Donn Siebert or Jerry Wickstrom, Bureau of Land Management, P.O. Box 26569, Las Vegas, NV 89126, or telephone (702) 647-5000.

SUPPLEMENTARY INFORMATION: This DEIS focuses on an area of about 984 square miles in southern Nevada, including portions of Las Vegas, North Las Vegas, Boulder City, Henderson and unincorporated portions of Clark County.

In recent years Clark County has become one of the fastest growing urban centers in the United States. This growth, estimated at 4,000 new residents per month, has resulted in increased loss of life and property during flash flood events, as development has taken place in historical flood plains and alluvial fans. Increased loss of life and property is expected to continue unless efforts are made to control flood flows.

Historically, individual communities and development interests have prepared their own flood control plans and financed the cost of construction through local bond issues or costs passed on by developers as part of new construction costs. As a result, planning efforts to control flood flows were fragmented and without reference to a single comprehensive plan.

Because the historical process of piecemeal installation of flood control facilities to protect individual developments has not been effective in controlling flooding problems, the Nevada Legislative passed AB 188 in 1985 establishing the Clark County Regional Flood Control District to implement a regional flood control planning effort.

The principal objective of the master plan is to provide for the long-term improvement in public safety and property damage protection from flooding events by guiding the siting, design and installation of flood control facilities to promote the effective function of the entire system.

This document analyzes the potential environmental impacts associated with the long-term flood control master plan on a programmatic basis, and includes a project specific analysis of facilities proposed in the Flood Control District's 10-year construction plan. A procedure for accomplishing project-specific reviews of future changes in the 10-year plan and subsequent proposals is also included.

A copy of the DEIS will be sent to all individuals, agencies and groups who have expressed interest in the Clark County Regional Flood Control District Environmental Impact Statement process, and a limited number of copies are available upon request from the District Manager at the above address.

Dated: October 16, 1990.

Fred Wolf,

Acting State Director, Nevada.

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contacting the Service's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Service Clearance Officer and the Office of Management and Budget, Paperwork Reduction Project (1018-FWS2), Washington, DC 20503, telephone 202-395-7340.

Title: Recreational Motorboat Fuel Use Study.

OMB Approval Number: 1018-FWS02.

Abstract: In Public Law 100-448 (The Coast Guard Authorization Act of 1988) Congress directed the Secretaries of Transportation and Interior, to conduct a study to estimate the amount of fuel consumed by recreational boating activities to determine the proper percentage of the Federal Fuel Excise Tax to be applied toward the Aquatic Resources Trust Fund. State-level estimates will provide Congress with additional information on consumption and provide states with the fuel consumption information they require to allocate state excise taxes.

Service Form Number: N/A.

Frequency: Quarterly.

Description of Respondents: Individuals or households.

Estimated Completion Time: The reporting burden is estimated to average thirty one minutes per response. 61,528.5 respondents will average about 4 responses annually.

Annual Responses: 246,114.

Annual Burden Hours: 76,034.

Service Clearance Officer: James E. Pinkerton, 703-358-1943 (Commercial); FTS 921-1943, Mail Stop 224 Arlington Square, U.S. Fish and Wildlife Service, Washington, DC 20240.

Dated: October 9, 1990.

BILLING CODE 4310-55-M

National Park Service

Sleeping Bear Dunes National Lakeshore, MI; Land Lease for Church Parking Lot

AGENCY: Department of the Interior, National Park Service.

ACTION: Notice of lease of real property.

SUMMARY: This notice publishes the intent of the National Park Service to accept bids for the lease of lands within the boundary of Sleeping Bear Dunes National Lakeshore, Leelanau County, Michigan. Both the environmental assessment and archeological survey, which were completed on this tract

during the summer of 1990, and are on file at Lakeshore Headquarters, determined no significant impact to park resources for this lease.

DATES: The solicitation will be issued on or about November 15, 1990, with sealed bids due on or about December 1, 1990. (Copy of lease available at Sleeping Bear Dunes National Lakeshore.)

ADDRESSES: Superintendent, Sleeping Bear Dunes National Lakeshore, P.O. Box 277, Empire, Michigan 49630.

FOR FURTHER INFORMATION CONTACT: Ray Kimpel, Management Assistant, Sleeping Bear Dunes National Lakeshore, P.O. Box 277, Empire, Michigan 49630; Telephone (616) 326–5134.

SUPPLEMENTARY INFORMATION: The following additional information is provided regarding the proposed lease:

Legal Description of this Property

Lands available for this lease are located adjacent to St. Paul's Lutheran Church, on Tracts 38–167 and 38–168, Sleeping Bear Dunes National Lakeshore. A detailed map of the real property is available at Lakeshore Headquarters, Empire, Michigan.

Justification

The issuance of this solicitation for bids is prompted by the request of St. Paul's Lutheran Church to own an interest in this land so that it may improve the church parking facilities. The land has been used by the congregation for in excess of 100 years under a verbal agreement with the former owners. The former owners, the Kropp family, donated adjacent land to the church for its cemetery and church building. The need to deed the land used for parking to the church was overlooked. The National Park Service purchased the property in 1977.

Use

The use to be authorized by the lease shall be limited to a parking lot facility to provide safe, off-the-highway parking. Design and construction shall be approved by the National Park Service to insure that it fits with the purpose of the area. Conveyance procedures, requirements, and time schedules are covered in the lease.

Issuance of Lease

The term of the lease will be 50 years, beginning December 1, 1990, and ending November 30, 2039.

Lease rental amount shall be paid in advance on December 1 annually.*

A copy of the standard lease language is available by contracting Sleeping Bear Dunes National Lakeshore. The former owner is a member of the congregation and is aware of this lease.

Regulations

Leases of non-historic properties are to be advertised, executed, and conducted in accordance with 36 CFR part 17.

*Note: Total bid cannot be less than the Government approved appraisal amount of $600 per annum. (Appraisal available for review at Superintendent's Office, Sleeping Bear Dunes National Lakeshore, Empire, Michigan.) Highest bidder will receive lease.

Dated: October 12, 1990.

William W. Schenk,

Acting Regional Director, Midwest Regional Office.

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. MC–111 (Sub-No. 1); MC–179]

Transfer Rules and Purchase, Merger, and Control of Motor Passenger and Water Carriers

AGENCY: Interstate Commerce Commission.

ACTION: Interim policy and notice of proposed policy.

SUMMARY: The Commission is reopening these proceedings and proposing to revise its policy governing the transfer of operating authority, and purchase, merger, and control of regulated carriers to make it consistent with the safety policy as recently revised in Rules Governing Applications for Operating Authority, 6 I.C.C.2d 266 (1989). That policy provides that applicants that have not been assigned safety ratings by the Department of Transportation (DOT) may receive only 1-year limited term authority. Extension of this authority is conditioned upon such carriers obtaining a "satisfactory" safety fitness rating from DOT.

The Commission is proposing to impose 1-year limited term conditions on finance transactions (*i.e.*, transfer applications under 49 U.S.C. 10926, purchase, acquisition, control, or merger proceedings under 49 U.S.C. 11343–11344, and exemption petitions filed under 49 U.S.C. 11343(e)) involving an unrated acquiring or surviving carrier. Further, to expedite coordination of the finance and licensing dockets, the proposed extension of the unrated carrier policy to finance proceedings will be implemented on an interim basis pending receipt of public comment on this matter and adoption of a final policy.

DATES: Comments are due November 21, 1990.

ADDRESSES: Send comments (an original and 10 copies) referring to Ex Parte No. MC–111 (Sub–No. 1) and Ex Parte No. MC–179 to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Suzanne Higgins O'Malley, (202) 275–7292, or Richard B. Felder, (202) 275–7691, [TDD for hearing impaired: (202) 275–1721]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To obtain a copy of the full decision, write to, call, or pick up in person from: Office of the Secretary, room 2215, Interstate Commerce Commisson, Washington, DC 20423. Telephone: (202) 275–7428. [Assistance for the hearing impaired is available through TDD service (202) 275–1721.]

Environmental and Energy Considerations

We preliminarily conclude that the proposed action will not significantly affect either the quality of the human environment or the conservation of energy resources. However, we specifically invite parties to comment on these.

Initial Regulatory Flexibility Analysis

Pursuant to 5 U.S.C. 603, the Commission is required to examine specifically the impact of a proposed action on small business and small organizations. We preliminarily conclude that this proposal will not have a significant impact on such entities.

Extension of the unrated carrier safety licensing policy to the finance docket merely ensures equitable treatment of all entities that desire to obtain operating authority under the Commission's regulatory review procedures whether it be through a licensing application or a finance transaction. In either instance, applicants that have not yet been assigned a DOT safety rating merely are alerted through the policy announced here on the importance of complying with Federal motor carrier safety regulations and obtaining a satisfactory safety rating from DOT during the first year of operations. Their policy is not expected to impede or protract finance applications filed by small, or indeed, any entities. To the limited extent that this policy may be expected to have any impact on small entities, the anticipated effect will be predominantly a positive one by ensuring observance of Federal

safety standards by acquiring and surviving carriers in finance transactions. In this regard, the policy merely reinforces through the Commission's finance docket a preexisting obligation of all licensed motor carriers.

Decided: October 4, 1990.

By the Commission, Chairman Phillips, Vice Chairman Philips, Commissioners Simmons, Lamboley, and Emmett. Commissioner Lamboley did not participate in the disposition of this proceeding.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Controlled Substances; Proposed Aggregate Production Quotas for 1991

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of proposed aggregate production quotas for 1991.

SUMMARY: This notice proposes initial 1991 aggregate production quotas for substances in Schedules I and II of the Controlled Substances Act.

DATES: Comments or objections should be received on or before November 21, 1990.

ADDRESSES: Send comments or objections to the Acting Administrator, Drug Enforcement Administration, Washington, DC 20537, Attn.: DEA Federal Register Representative. (CCR)

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, DC 20537, (202) 307-7183.

SUPPLEMENTARY INFORMATION: Section 306 of the Controlled Substances Act (21 U.S. Code, section 826) requires that the Attorney General establish aggregate production quotas for all controlled substances listed in Schedules I and II. This responsibility has been delegated to the Acting Administrator of the Drug Enforcement Administration by § 0.100 of title 28 of the Code of Federal Regulations.

The quotas are to provide adequate supplies of each substance for: (1) The estimated medical, scientific, research, and industrial needs of the United States; (2) lawful export requirements; and (3) the establishment and maintenance of reserve stocks.

In determining the below listed proposed 1991 aggregate production quotas, the Acting Administrator considered the following factors: (1) Total actual 1989 and estimated 1990 and 1991 net disposals of each substance by all manufacturers; (2) estimates of inventories of each substance and of any substance manufactured from it and trends in accumulation of such inventories; and (3) projected demand as indicated by procurement quota applications filed pursuant to § 1303.12 of title 21 of the Code of Federal Regulations.

Pursuant to § 1303.23(c) of title 21 of the Code of Federal Regulations, the Acting Administrator of the Drug Enforcement Administration will in early 1991 adjust individual manufacturing quotas allocated for the year based upon 1990 year-end inventory and actual 1990 disposition data supplied by quota recipients for each basic class of Schedule I or II controlled substance.

Based upon consideration of the above factors, the Acting Administrator of the Drug Enforcement Administration hereby proposes that aggregate production quotas for 1991 for the following controlled substances, expressed in grams of anhydrous acid or base, be established as follows:

Basic class	Proposed 1991 aggregate production quota
Schedule I	
Lysergic Acid Diethylamide	11
3,4-Methylenedioxyamphetamine	7
3,4-Methylenedioxymethamphetamine	12
Tetrahydrocannabinols	12,000
Psilocyn	5
Psilocybin	5
4-Methylaminorex	5
Methaqualone	2
N-Hydroxy-3,4-Methylenedioxyamphetamine	2
N-Ethylamphetamine	5
Schedule II	
Alfentanil	5,300
Amobarbital	395,000
Amphetamine	88,000
Cocaine	663,000
Codeine (for sale)	58,907,000
Codeine (for conversion)	6,055,000
Dexoxyephedrine	1,269,000
1,284,000 grams of levodexoxyephedrine for use in a noncontrolled, nonprescription product and 5,000 grams for methamphetamine	
Dextropropoxyphene	85,267,000
Dihydrocodeine	941,000
Diphenoxylate	707,000
Ecgonine (for conversion)	850,000
Fentanyl	50,500
Hydrocodone	3,871,000
Hydromorphone	223,000
Levorphanol	10,300
Meperidine	10,452,000
Methadone	1,575,000
Methadone Intermediate (4-Cyano-2-dimethyl-amino-4,4-diphenylbutane	2,344,000
Methamphetamine (for conversion)	965,000
Methylphenidate	1,878,000
Mixed Alkaloids of Opium	5,000
Morphine (for sale)	4,008,000
Morphine (for conversion)	57,226,000
Opium (tinctures, extracts, etc. expressed in terms of USP powdered opium)	1,184,000
Oxycodone (for sale)	2,854,000
Oxycodone (for conversion)	6,300
Oxymorphone	2,000
Pentobarbital	13,432,000
Phencyclidine	15
Phenylacetone (for conversion)	486,000
Secobarbital	782,000
Sufentanil	420
Thebaine	7,330,000

All interested persons are invited to submit their comments and objections in writing regarding this proposal. A person may object to or comment on one of the above-mentioned substances without filing comments or objections regarding the others. Comments and objections should be submitted to the Acting Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attn.: DEA Federal Representative (CCR) and must be received by November 21, 1990. If a person believes that one or more issues warrant a hearing, a statement to that effect with a summary of reasons for such belief should be submitted.

In the event that comments or objections to this proposal raise one or more issues which the Acting Administrator finds warrant a hearing, the Acting Administrator shall cause such hearing to be convened pursuant to the provisions of title 21 of the Code of Federal Regulations, § 1308.31(a).

Pursuant to section 3(c)(3) and 3(e)(2)(C) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this matter does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The Acting Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning of and intent of the Regulatory Flexibility Act, 5 U.S. Code,

section 601, *et seq.* The establishment of annual aggregate production quotas for Schedules I and II controlled substances is mandated by law and by international commitments of the United States. Such quotas impact predominately upon major manufacturers of the affected controlled substances.

Dated: August 10, 1990.

Terrence M. Burke,

Acting Administrator, Drug Enforcement Administration.

Intent To Grant an Exclusive Patent License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of intent to grant a patent license.

SUMMARY: NASA hereby gives notice of intent to grant Sundstrand Corporation, of Rockford, Illinois, an exclusive, royalty-bearing, revocable license to practice the invention described in U.S. Patent no. 4,917,332 entitled, "Wingtip Vortex Turbine," which issued to the United States of America, as represented by the Administrator of the National Aeronautics and Space Administration, in April 17, 1990. The proposed patent license will be for a limited number of years and will contain appropriate terms, limitations and conditions to be negotiated in accordance with the NASA Patent Licensing Regulations, 14 CFR part 1245.200 *et seq.* NASA will negotiate the final terms and conditions and grant the exclusive license, unless within 60 days of the Date of this Notice, the Director of Patent Licensing receives written objections to the grant, together with any supporting documentation. The Director of Patent Licensing will review all written objections to the grant and then recommend to the Associate General Counsel (Intellectual Property) whether to grant the license.

DATES: Comments to this notice must be received by December 21, 1990.

ADDRESSES: National Aeronautics and Space Administration, Code GP, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Lupuloff, (202) 453-2430.

Dated: October 12, 1990.

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Federal Council on the Arts and the Humanities Arts and Artifacts Indemnity Panel Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463 as amended) notice is hereby given that a meeting of the Arts and Artifacts Indemnity Panel of the Federal Council on the Arts and the Humanities will be held at 1100 Pennsylvania Avenue, NW., Washington, DC 20506, in Room 714, from 9 a.m. to 5 p.m. on Tuesday, November 20, 1990.

The purpose of the meeting is to review applications for Certificates of Indemnity submitted to the Federal Council on the Arts and the Humanities for exhibitions beginning after January 1, 1991.

Because the proposed meeting will consider financial and commercial data and because it is important to keep values of objects, methods of transportation and security measures confidential, pursuant to the authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated April 16, 1978, I have determined that the meeting would fall within exemptions (4) and (9) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of views and to avoid interference with the operations of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Stephen J. McCleary, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, or call 202/786-0322.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7537-01-M

Humanities National Council: Meeting

October 16, 1990.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended) notice is hereby given that a meeting of the National Council on the Humanities will be held in Washington, DC on November 8-9, 1990.

The purpose of the meeting is to advise the Chairman of the National Endowment for the Humanities with respect to policies, programs, and procedures for carrying out her functions, and to review applications for financial support and gifts offered to the Endowment and to make recommendations thereon to the Chairman.

The meeting will be held in the Old Post Office Building, 1100 Pennsylvania Avenue, NW., Washington, DC. A portion of the morning and afternoon sessions on November 8-9, 1990, will not be open to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of title 5, United States Code because the Council will consider information that may disclose: Trade secrets and commercial or financial information obtained from a person and privileged or confidential; information of a personal nature the disclosure of which will constitute a clearly unwarranted invasion of personal privacy; and information the disclosure of which would significantly frustrate implementation of proposed agency action. I have made this determination under the authority granted me by the Chairman's Delegation of Authority dated January 15, 1978.

The agenda for the sessions on November 8, 1990, will be as follows:

Committee Meetings

8:30-9 a.m.: Coffee for Council Members—Room 526, (Open to the Public)

9-10 a.m.:

Committee Meetings—Policy Discussion
Education Programs—room M-14
Fellowships Programs—room 316-2
Public Programs—room 415
Research Programs/Preservation Grants—room 315
State Programs/Challenge Grants—room M-07

10 a.m. until Adjourned: (Closed to the public for the reasons stated above)—Consideration of specific applications

TBA: Reception for Frankel, Prize Recipients

The morning session on November 9, 1990, will convene at 9 a.m., in the 1st Floor Council Room, M-09, and will be open to the public. The agenda for the morning session will be as follows:

(Coffee for Council members from 8:30-9 a.m.)

Administration of Oath of Office for New Council Members
Minutes of the Previous Meeting
Reports
A. Introductory Remarks
B. Introduction of New Staff
C. Contracts Awarded in the Previous Quarter
D. Conflict of Interest Resolution
E. Legislation
F. Fiscal Fiscal Year Reports: Applications; Matching and Obligations
G. Fiscal Year 1991 Appropriations
H. Committee Reports on Policy and General Matters
I. Education Programs
J. Fellowships Programs
3. Public Programs
4. Research Programs
5. Preservation Grants
6. State Programs
7. Challenge Grants

The remainder of the proposed meeting will be given to the consideration of future budget requests and specific applications (closed to the public for the reasons stated above).

Further information about this meeting can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, Washington, DC 20506, or call area code (202) 786-0322.

Stephen J. McCleary,
Advisory Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

Claiborne Enrichment Center, Project M-45; Louisiana Energy Services, LP. Receipt of Antitrust Information and Opportunity for Public Comment

On July 12, 1990, pursuant to section 105 of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.33e, Louisiana Energy Services, LP. (LES) furnished antitrust information in conjunction with its anticipated application for licenses for a uranium enrichment facility. The proposed facility, the "Claiborne Enrichment Center," will be located in Claiborne Parish, Louisiana, approximately 50 miles northeast of Shreveport, Louisiana.

The Claiborne Enrichment Center will use gas centrifuge technology to enrich uranium, one of several steps necessary to prepare uranium for use as a fuel in commercial nuclear power plants. LES is a limited partnership comprised of the following general partners: Urenco Investments, Inc., a wholly-owned subsidiary of Urenco, Ltd.; Claiborne Energy Services, Inc., a wholly-owned subsidiary of Duke Power Company; Claiborne Fuels L.P., a wholly-owned subsidiary of Fluor Daniel, Inc.; and Graystone Corporation, a wholly-owned subsidiary of Northern States Power Corporation.

Any person who wishes to express views on the antitrust aspects of the proposed facility should submit such views to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Chief, Policy Development and Technical Support Branch, Program Management, Policy Development and Analysis Staff, Office of Nuclear Reactor Regulation within 60 days of the initial publication of this notice in the Federal Register. A copy of the antitrust information is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland, this 12th day of October, 1990.

Anthony T. Gody,
Chief, Policy Development and Technical Support Branch, Program Management, Policy Development and Analysis Staff, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-28532; File No. SR-CSE-90-03]

Self-Regulatory Organizations; Cincinnati Stock Exchange; Order Approving Proposed Rule Change Relating to the Arbitration Process and the Use of Predispute Arbitration Clauses

I. Introduction

On January 22, 1990, the Cincinnati Stock Exchange ("Exchange" or "CSE") filed with the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] a proposed rule change that replaces the Exchange's existing Chapter IX rules with new rules that govern the administration of its arbitration forum. The proposed rule change is designed to address several issues regarding the fairness and efficiency of the arbitration process administered by the CSE, as well as institute new fees applicable to customer disputes and new requirements applicable to the use by Exchange members of predispute arbitration clauses in agreements with customers. Amendment No. 1, submitted on September 6, 1990, makes several technical and conforming changes to the Exchange's arbitration rules under its original rule filing.[3]

The CSE's filing is substantially identical to rule filings of the New York Stock Exchange ("NYSE"), National Association of Securities Dealers ("NASD"), and American Stock Exchange ("Amex") that were approved by the Commission on May 10, 1989.[4] Similar rule filings submitted by the Chicago Board Options Exchange ("CBOE"), Midwest Stock Exchange ("MSE"), and Pacific Stock Exchange ("PSE") also were approved by the Commission on August 2, 1989, August 25, 1989, and July 5, 1990, respectively.[5]

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b-4 (1989).

[3] In all relevant and material aspects, Amendment No. 1's changes conform the CSE's proposed rule change to either the Exchange's current arbitration rules or the current Uniform Code of Arbitration as developed through the auspices of the Securities Industry Conference on Arbitration.

[4] Securities Exchange Act Release No. 26805 (May 10, 1989), 54 FR 21144 (May 16, 1989) (order approving File Nos. SR-NYSE-88-48, SR-NYSE-88-29, SR-NASD-88-29, SR-NASD-88-51, SR-NASD-89-19, and SR-AMEX-88-29) ["May 10, 1989 Order"].

[5] Securities Exchange Act Release No. 27083 (August 2, 1989), 54 FR 33731 (August 9, 1989) (order

Continued

Notice of filing of the CSE's proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No. 27940, April 24, 1990), and by publication in the Federal Register (55 FR 18204, May 1, 1990). The Commission received no comments on the proposed rule change. This order approves the proposed rule change, as amended.

II. Description of the Proposal[6]

A. Proposed Amendments

(1) Service of Pleadings

The CSE proposes to modify the procedures for service of pleadings contained in CSE chapter IX, Rules 9.2 and 9.13. Currently, the arbitration department of the CSE serves all pleadings on the parties. As the number of arbitrations have increased, using the arbitration department as an intermediary for the service of pleadings has added unnecessarily to delays in processing arbitration hearings and to the cost of operating the arbitration system. The CSE proposes to serve only the initial pleading in a case, the "claim"—and to require that parties serve all subsequent pleadings directly upon one another. This approach is intended to save administrative time and costs while continuing to ensure that respondents receive adequate notice of the institution of arbitration proceedings.

Under amended CSE Rule 9.13, parties also will be required to supply the department of arbitration with sufficient additional copies of the pleadings for the arbitration department staff and each of the arbitrators. Additionally, the proposal specifies that service by first-class postage prepaid or by overnight mail service is considered to be made on the date of mailing and service by other means is considered to be made on the date of delivery.[7]

(2) Classification of Arbitrators

The arbitration panels at the SROs for cases involving public customers have historically been composed of a majority of "public arbitrators" and a minority of "industry arbitrators." However, there have not been *clear* requirements or specifications *for* who may serve as a public arbitrator. Under the Exchange's proposal, amended CSE Rule 9.8 would specify who may not serve as a public arbitrator and who may serve as an industry arbitrator.

The CSE's proposal addresses the potential for real or apparent bias on the part of public arbitrators who may have some professional or personal association with the securities industry. CSE Rule 9.8 defines as an industry arbitrator one who is associated with a member of a self-regulatory organization ("SRO"), or a broker, dealer, government securities broker, government securities dealer, municipal securities dealer, or registered investment adviser. CSE Rule 9.8 also deals with the appropriate role in the arbitration system of professionals such as attorneys or accountants who provide services to securities industry clients. The rule would classify as industry arbitrators, rather than public arbitrators, attorneys, accountants and other professionals who devoted twenty percent or more of their professional work effort to securities industry clients within the last two years. In addition, the rule excludes from service as a public arbitrator persons who are spouses or other members of the household of a person associated with a registered broker-dealer, municipal securities dealer, government securities dealer or investment adviser.

CSE Rule 9.8 permits an individual who had been associated with the securities industry to become a public arbitrator after three years, if the individual has gone on to other work. Also, under the rule, industry retirees will no longer be permitted to serve as public arbitrators, although they may continue to serve as industry arbitrators.

The CSE is also proposing disclosure provisions designed to assist parties in assuring that the panel assigned to each case is appropriately balanced. Under proposed CSE Rule 9.9, the employment histories of the arbitrators for the past ten years, as well as the information provided by arbitrators pursuant to separate disclosure obligations contained in proposed CSE Rule 9.11, also will be disclosed.[8]

The amendments regarding the classification of arbitrators are designed to promote impartial and knowledgeable decisions in the arbitration of disputes between investors and broker-dealers. The reclassification of securities industry retirees to the industry arbitrator pool and the establishment of a three year period before a former securities industry employee may serve as a public arbitrator should relieve any doubts that investors may have had regarding the impartiality of the public arbitrator pool. Similarly, the judgment to exclude from the public arbitrator pool lawyers, accountants and other professionals who regularly service the securities industry makes clearer the distinctions between the two arbitrator pools.

(3) Arbitrator Disclosure and Background Information to be Supplied to the Parties

The CSE also is proposing changes to its rules with regard to what disclosures arbitrators must make and how that disclosure is supplied to the parties. Under the current rules, parties have been provided only with the names and current business affiliations of the arbitrators proposed for their cases. Moreover, parties have had to request specifically any other information from the arbitration department within very short time frames. The Exchange's proposed Rule 9.11 would provide to the parties all of the information disclosed by arbitrators pursuant to the amended disclosure rules at the time when the parties are first given the arbitrators' names. This change would provide full disclosure of arbitrators' backgrounds to parties at the earliest possible stage in the process, and should therefore avoid unnecessary postponements of hearings and promote knowledgeable use of challenges. Additionally, the Exchange's proposed rule change also would provide necessary guidance to arbitrators about the types of relationships that may create conflicts of interest.

Accordingly, proposed CSE Rule 9.11(a) establishes specific disclosure obligations of arbitrators. The rule requires that arbitrators disclose any existing or past financial, business, professional, family or social relationships that are likely to affect impartiality or might reasonably create an appearance of partiality or bias. These disclosures extend to any relationships the arbitrators may have with any party, or its counsel, or with any individual whom they have been advised will be a witness. The rule also requires arbitrators to disclose any such relationship involving members of their families or their current employers, partners or business associates.

---

approving File No. SR-CBOE-89-06); Securities Exchange Act Release No. 27167 (August 25, 1989), 54 FR 36928 (September 5, 1989) (order approving File No. SR-MSE-89-11); and Securities Exchange Act Release No. 28185 (July 5, 1990), 55 FR 28704 (July 12, 1990) (order approving File No. SR-PSE-89-19).

[6] The entire text of the proposed rule change, as amended, is available for inspection at the Office of the Secretary, CSE, and at the Commission's Public Reference Section.

[7] These Rule 9.13 service procedures would apply both to arbitration proceedings conducted pursuant to the simplified procedures for small claims under CSE Rule 9.2 and regular cases initiated pursuant to CSE Rule 9.13.

[8] The disclosure rules are proposed rule changes discussed in subsection (3) of this order. The rules would require arbitrators to make extensive disclosures to the parties.

BEST COPY AVAILABLE

CSE Rule 9.11(b) requires prospective arbitrators to make a reasonable effort to inform themselves of any interests or relationships described in Rule 9.11(a). CSE Rule 9.11(c) specifically advises arbitrators that the duty to disclose under Rule 9.11(a) is an ongoing duty, and that any person who serves as an arbitrator must disclose at any stage of the arbitration proceeding any such interests, relationships, or circumstances that arise, or that are recalled or discovered. Also, under CSE Rule 9.11(d), the Exchange has clarified that prior to the first session, the Director of Arbitration may remove an arbitrator based on information disclosed pursuant to the rule. Parties are to be informed of any information disclosed pursuant to the rule, if the arbitrator has not been removed.[9]

As discussed above, CSE Rule 9.9 provides that parties will be informed of the names and business affiliations of the arbitrators for the past ten years, as well as any information disclosed pursuant to Rule 9.11 at least eight days prior to the date fixed for the initial hearing session. Under CSE Rule 9.9, parties may also make further inquiry through the department of arbitration concerning the arbitrators' background.

(4) Appointment of Replacement Arbitrators on a Panel

The CSE also is proposing two changes with respect to its ability to appoint a replacement arbitrator on a panel when a vacancy occurs. The first of these changes concerns the ability of the Director of Arbitration to replace an arbitrator who becomes unavailable to serve less than eight days prior to the first hearing session. Under the proposed amendment, if after appointment and prior to the first hearing session an arbitrator resigns, dies, withdraws, is disqualified or otherwise is unable to perform as an arbitrator, CSE Rule 9.9 authorizes the Director of Arbitration to appoint a replacement arbitrator. The rule permits the appointment of replacement arbitrators closer than eight days to the hearing. The rule also explicitly provides that parties are entitled to receive the same disclosure regarding the background of the replacement arbitrator as they received for the initial arbitrator(s), and have the same right to request more information, and to challenge the arbitrator as provided in the rules, although within a shorter time frame.

The second change concerning the ability to appoint replacement arbitrators addresses situations where an arbitrator resigns, dies, withdraws, is disqualified or otherwise is unable to perform as an arbitrator after the commencement of the first hearing session. Under the CSE's existing rules, if a vacancy occurs after the hearings have begun, both parties must consent either to the appointment of a replacement arbitrator to hear the rest of the case, or to continuing with the remaining arbitrator(s). Otherwise, if that consent cannot be obtained, the case must be reheard from the beginning with a full panel.

Proposed CSE Rule 9.12 permits the remaining arbitrators to continue with the hearing and determination of the controversy. However, under the proposal, if a party objects, a replacement arbitrator would be appointed by the Director of Arbitration under the same procedures as for the replacement of an arbitrator prior to the first hearing. The rule is designed to permit parties in particular cases to make the decision that makes the most sense for their case. For example, in cases where only peripheral issues have been dealt with and relatively little progress has been made, it may make sense for parties to request a replacement arbitrator. Conversely, where the hearings have progressed significantly, or are in fact substantially completed, it would make less sense for parties to request a replacement arbitrator, who then would have to learn all that had occurred in his absence.

In the event that parties do request a replacement arbitrator, the arbitrators will have the authority to require the rehearing of part or all of the case, or to withdraw from the case, effectively requiring the appointment of another panel, as is appropriate in their judgment. With this rule change, however, a party may no longer delay the resolution of the dispute by insisting on a rehearing whenever an arbitrator unexpectedly is unable to continue in his hearing of a case.

(5) Availability of Small Claims Procedures and the Number of Arbitrators Required to Hear a Claim

The CSE proposes to amend Rule 9.2(a) to increase to $10,000 from $2,500 the monetary claim limit for cases to be heard under the simplified procedures developed in the Uniform Code. Under these expedited procedures, a single arbitrator decides a case based upon the papers submitted by the parties. No oral hearing is held unless requested by the investor, or ordered by the arbitrator. This change is designed to decrease the costs of arbitration.[10]

CSE Rule 9.8(a) (1) would change the number of arbitrators generally used for large cases from five to three. The rule currently provides for the appointment of five arbitrators in cases brought by public customers in which the claim exceeds $100,000. In order to alleviate administrative delays and costs frequently encountered in such cases, the proposed rule would eliminate the requirement of five-member panels, allowing the director of arbitration to exercise discretion in appointing panels of no fewer than three and no more than five arbitrators in cases not heard under the CSE's simplified arbitration procedures.

The CSE also proposed a technical amendment, in Rule 9.2(f), regarding the single arbitrators used in cases administered under the simplified procedures. The amendment codifies the industry's existing practice of appointing a public arbitrator as the single arbitrator in the case.

(6) Discovery

The CSE is proposing significant changes to its arbitration discovery rules, which should assist in the early resolution of discovery disputes and encourage the efficient resolution of cases on their merits. Under current Exchange rules, parties have been expected to exchange documents informally and voluntarily. Parties may also request documents pursuant to subpoena under the existing rules, but these do not have to be produced until the day of the hearing.

Proposed CSE Rule 9.20 expands party access to prehearing discovery and provides specific time frames for parties to request information from parties and for responding to such an information request. The rule also establishes a mechanism for prehearing conferences and for arbitrator involvement in prehearing matters where needed. Under the CSE's proposed rule change, arbitrators may also order depositions when appropriate.

Proposed Rule 9.20(a) continues the policy established under existing rules for parties to cooperate to the fullest

---

[9] Once the arbitration panel is sworn, it controls all of the procedural aspects of the hearing. Accordingly, under the Uniform Code and the CSE's Chapter IX arbitration rules, the Director of Arbitration may not remove an arbitrator after the hearings have begun. An arbitrator should be alert to the guidelines set out in the American Bar Association/American Arbitration Code of Ethics for Arbitrators in Commercial Disputes ("ABA/AAA Code") and the applicable law with respect to arbitrator bias, and remove himself from the panel when conflicts arise after hearings have begun. *See* Canon II, E.(2) of the ABA/AAA Code.

[10] CSE Rule 9.2(c) would establish filing fees ranging from $15 to $200 in cases where the amount in controversy varies from $1,000 or less to $10,000.

extent possible in the voluntary exchange of documents and information. In the event that voluntary exchanges are not sufficient, however, the rule establishes a clear framework for document production and information requests.

Proposed Rule 9.20(b) provides that a party may serve a written request for information or documents 20 days after service of the claim or upon the filing of the answer, whichever is earlier. All parties are to receive copies of the request, and parties are required to endeavor to work out disputes regarding the request between themselves before an objection to the request is filed. Unless the requesting party allows more time, information requests must either be satisfied or objected to within 30 calendar days from the date of service. The party who made an information request has 10 days from receipt of the objection to respond to the objection.

Under the proposal, a party whose information request has not been satisfied may request in writing that the Director of Arbitration refer the matter to a prehearing conference. Parties may also find that there are other matters in addition to unresolved information requests that require the assistance of a prehearing conference. Rule 9.20(d) provides that the Director of Arbitration may appoint someone to preside over the prehearing conference. The prehearing conferences could be held either in person or by telephone conference call, and are designed to help the parties to reach agreement on such matters as the exchange of information, exchange or production of documents, identification of witnesses, identification and exchange of hearing documents, stipulations of fact, identification and briefing of contested issues, and any other matter which will expedite the arbitration proceedings.

When a prehearing conference is unable to resolve any of these issues, Rule 9.20(e) provides for the Director of Arbitration to appoint a single arbitrator to decide the issues outstanding. The rule allows the arbitrator to issue subpoenas, direct appearances of witnesses, direct the production of documents and depositions, and set deadlines and issue any other ruling which will expedite the hearing and permit any party to develop fully its case. Rule 9.20(e) provides that the single arbitrator appointed to decide prehearing matters would be a public arbitrator in those cases where public customers have requested a majority of public arbitrators for their panel.

Other amendments to the prehearing provisions require parties to serve on one another, at least 10 days prior to the first hearing, copies of documents in their possession that they intend to present at the hearing and identify witnesses they intend to present at the hearing. Under proposed Rule 9.20(c), arbitrators may exclude from the arbitration documents not exchanged or witnesses not identified at that time. The provision does not extend to documents or witnesses that parties may use for cross-examination or rebuttal. In addition, the CSE is proposing to amend its rules regarding subpoenas. In CSE Rule 9.20(f), the Exchange proposes to require parties to serve copies of all subpoenas on all parties in addition to complying with any applicable local, state or federal laws governing subpoenas.

(7) Preservation of a Record

The Case is amending its arbitration rules to assure that adequate records of arbitration proceedings are made and preserved. These records are necessary for court use in conjunction with any judicial review of arbitration proceedings. In this regard, CSE Rule 9.24 would codify a requirement that a verbatim record by stenographic reporter or tape recording be maintained. The rule further provides that, if a party to a proceeding elects to have the record transcribed, the cost of such transcription shall be borne by that party, unless the arbitrator(s) directs otherwise. If a record is transcribed at the request of a party, the rule requires that a copy shall be provided to the arbitrators.

(8) Content and Public Availability of Arbitration Awards

The CSE's proposed rule for arbitration awards expands both the content and public availability of arbitration awards. Prior to the Commission's May 10, 1989 approval of the amended arbitration rules of the Amex, NASD and NYSE, the only information generally available to the public regarding SRO arbitration cases was the percentage of investors that received some portion of the amount they claimed against their broker-dealer. No data had been previously available with respect to particular arbitrators' awards. The CSE's proposal affords substantially more public access to the results of this process of dispute resolution.

Proposed CSE Rule 9.28(e) provides that awards shall contain the names of the parties, a summary of the issues in controversy, the damages and/or other relief requested, the damages and/or other relief awarded, a statement of any other issues resolved, the dates the claim was filed and the award rendered, the number and dates of hearing sessions, the location of the hearing(s), the names of the arbitrators and the signatures of the arbitrators concurring in the award. The awards, including any written opinion voluntarily prepared by the arbitrators, are to be made public, except that the names of customer parties to the arbitration will be excluded pursuant to proposed Rule 9.28(f), if the customer parties request in writing that their names not be included in the public version of the award.

(9) Arbitration Fees

Under proposed CSE Rule 9.30 of chapter IX, the fees that may be assessed by the arbitrators for particular cases have been increased in order to defray the CSE's costs of administering its arbitration program. Proposed CSE Rule 9.30(d) would raise to $200 from $100 the minimum deposit for cases where no money damages are claimed. Proposed CSE Rule 9.30(h) sets a fee for prehearing sessions with an arbitrator of 75% of hearing session fees.

Proposed CSE Rule 9.30(c) also clarifies that arbitrators may assess the costs of conducting a hearing against the parties as they deem appropriate. These costs include not only the fees for each session, but all other costs of conducting the hearing contemplated under the rules, such as the costs of transcribing a record, or producing witnesses or documents, and any other costs contemplated by the agreement between the parties or permitted by applicable law. Further, proposed Rule 9.30(c) provides that arbitrators may assess forum fees on a per hearing basis, the aggregate of which may equal (but may not exceed) the largest initial hearing deposit deposited by a party.

CSE Rule 9.30(e) grants the Exchange the authority not to refund filing fees where a case is settled or withdrawn five business days after the party receives notification that the hearing date has been set. This change is based on the increased expenses associated with arbitration empanelment and hearing arrangements. The refund requirement does not apply to cases heard under the Exchange's expedited arbitration procedures for small claims.

Finally, the CSE is proposing to codify its definition of a "hearing session." Under Rule 9.30(b), a "hearing session" would be a meeting between the parties and arbitrators that lasts four hours or less.

(10) Predispute Arbitration Clauses

The CSE also proposes changes designed through the auspices of the Securities Industry Conference on

Arbitration ("SICA") to improve disclosure to customers in account opening agreements and to restrict the content of the arbitration clauses. Under the proposed rule change, Rule 9.31 of CSE chapter IX would require broker-dealers that employ predispute arbitration clauses to place immediately before the clause introductory language that would inform customers that they are waiving their right to seek remedies in court, that arbitration is final, that discovery is generally more limited than in court proceedings, that the award is not required to contain factual findings and legal reasoning, and that the arbitration panel typically will include a minority of arbitrators associated with the securities industry.

Proposed CSE Rule 9.31 would require that the disclosure language be highlighted four ways. First, large or otherwise distinguishable type must be used. Second, the disclosure language must be set out in outline form so as to be noticeable to readers. Third, a statement, also highlighted, that provides that the agreement contains a predispute arbitration clause, and indicates where that clause is located in the contract, must be inserted into the agreement immediately preceding the signature line. Fourth, a copy of the agreement containing a predispute arbitration clause must be given to the customer, who is to acknowledge receipt of the agreement, either in the agreement itself or in a separate document.

Additionally, CSE Rule 9.31 prohibits SRO members from having agreements with customers that limit or contradict the rules of any SRO, or limit the ability of a party to file any claim in arbitration or limit the ability of the arbitrators to make any award.

(11) Miscellaneous

The Exchange's proposed rule change also amends several other of its chapter IX rules that govern the administration of its arbitration forum. First, in arbitrations involving multiple claimants, respondents, and/or third-party respondents, proposed CSE Rule 9.10 provides the claimants, respondents, and third-party respondents with one peremptory challenge each of a proposed arbitrator, and with unlimited challenges for cause. Second, for adjournments granted after arbitrators have been appointed, proposed CSE Rule 9.16(b) establishes a waivable adjournment fee equal to the deposit of costs, but not more than $100." Third, proposed CSE Rule 9.26 provides for amendments to pleadings; however, after an arbitration panel has been appointed, amended pleadings other than responsive pleadings may not be filed unless the panel consents to the amendment.

Finally, in addition to the rules discussed above, the Exchange's proposal adopts other rules that substantially replicate their current counterparts.[12] Except for technical and conforming changes, these proposed rules do not differ materially from the current rules upon which they are modeled.

(8) Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act,[13] which requires that national securities exchanges have rules designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade provide for an equitable allocation of fees, and, in general, protect investors and the public interest.

III. Discussion and Conclusion

The Commission has considered carefully the Exchange's proposed rule change, and finds, for the following reasons, that the proposed rule change is consistent with the requirements of Section 6 of the Act [14] and the rules and regulations thereunder applicable to a national securities exchange. In particular, the Commission finds that the proposed rule change is consistent with the requirements of Sections 6(b) (4) and (5) of the Act, [15] which require that national securities exchanges have rules designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, provide for an equitable allocation of fees, and, in general, protect investors and the public interest. The Commission believes the proposed rule change significantly advances the public interest in Exchange arbitrations and should improve the speed and efficiency of arbitration, while maintaining the traditional qualities of arbitration.

The CSE developed these changes to its arbitration rules through the auspices of the SICA. The securities industry's SROs have worked together over the past twelve years to develop uniform arbitration rules through SICA, which is comprised of a representative from each SRO that administers an arbitration program,[16] a representative of the securities industry, and four representatives of the public.

On September 10, 1987, after a review of securities industry-sponsored arbitration, the Commission sent to SICA a letter that set out its views regarding the need for changes to the Uniform Code of Arbitration ("Uniform Code").[17] The Commission also sent letters to the SROs on July 8, 1988 requesting that the SROs review the issues raised by the current use of mandatory predispute arbitration agreements by their member firms.[18] Since September 1987, SICA and its subcommittees have met regularly to develop proposals in response to the Commission's letters.

The majority of the proposals to amend the CSE's rules were based on changes in the Uniform Code made by SICA largely in response to the September 1987 and July 1988 Commission letters.[19] The other proposals included in this order were developed to meet concerns that have arisen through the administration of the Exchange's arbitration forum.

As stated above, substantially similar rule filings submitted by the NYSE, Amex and NASD were approved by the Commission on May 10, 1989, and comparable rule filings of the CBOE, MSE and PSE were subsequently approved by the Commission on August 2, 1989, August 25, 1989, and July 5, 1990, respectively. The NYSE's, NASD's and Amex's versions of the CSE's rules were published for public comment in the

[15] 15 U.S.C. 78f(b) (4) and (5) (1988).

[16] The SROs that administer an arbitration program are the CSE, NYSE, NASD, Amex, CBOE, MSE, PSE, Municipal Securities Rulemaking Board ("MSRB"), Boston Stock Exchange, and Philadelphia Stock Exchange.

[17] *See* letter from Richard G. Ketchum, Director, Division of Market Regulation, SEC, to James E. Buck, Senior Vice President, NYSE, dated September 10, 1987. This letter was also addressed separately to each of the other members of SICA.

[18] *See* letter from David S. Ruder, former Chairman, SEC, to John J. Phelan, Jr., Chairman, NYSE, dated July 8, 1988. This letter was also addressed to the senior executive officers of all other SROs that administer arbitration facilities.

[19] The Exchange's rules developed in response to the Commission's letters are Rules 9.8, 9.9, 9.11, 9.20, 9.24, 9.28, 9.30(b) and 9.31 of its Chapter IX arbitration rules.

Federal Register, providing both the public and broker-dealer community with ample opportunity to comment on the proposed changes that are the subject of this order. All public comments directed at the other SROs' arbitration filings were considered in the context of the review undertaken for the Commission's May 10, 1989 approval order,[20] wherein the Commission addressed fully the significant public dialogue and comment that preceded its action. In light of the Commission's thorough consideration of all comments directed at the SRO arbitration filings that were the subject of the Commission's May 10, 1989 approval order, the substantially identical nature of the CSE's arbitration proposal, and the benefits that will accrue to investors from the availability of these improved arbitration procedures, the Commission finds that approval of the CSE's proposed rule change is consistent with the requirements of section 6 of the Act.[21]

The Commission believes that the CSE's proposed arbitration rules improve the procedures for administering arbitration proceedings and create clear obligations regarding the use by SRO members of predispute arbitration clauses. The Commission further believes the proposed rule change appropriately balances the need to strengthen investor confidence in the arbitration systems at the SROs with the need to maintain arbitration as a form of dispute resolution that provides for the equitable and efficient administration of justice. More specifically, the Commission finds that the rule changes affecting the classification of arbitrators, arbitrator disclosure, discovery, the preservation of a record, the form and public availability of awards, and guidelines for the use of predispute arbitration clauses significantly advance the public interest in SRO arbitration.[22]

Likewise, the Commission believes that the CSE's initiatives with respect to the handling of pleadings, appointment of replacement arbitrators, the use of small claims procedures, and the number of arbitrators should improve the efficiency and speed of arbitration. Because these rules will aid in the just resolution of disputes between investors and broker-dealers, the Commission concludes that these rules are designed to prevent fraudulent and manipulative practices, promote just and equitable principles of trade and, in general, protect investors and the public interest consistent with section 6(b) (5) of the Act.[23] The Commission also finds that the fee increases represented by these changes appear to be reasonable and should provide for an equitable allocation of fees among SRO members and investors using the CSE's arbitration facilities consistent with section 6(b) (4) of the Act.[24]

It is therefore ordered, pursuant to section 19 (b) (2) of the Act,[25] that the above-referenced proposed rule change (File No. SR–CSE–90–03) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[26]

Dated: October 11, 1990.

Margaret H. McFarland

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34-28534; File No. SR-NASD-90-45]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to Amendments to the Uniform Application for Securities Industry Registration or Transfer, Form U–4

The National Association of Securities Dealers, Inc. ("NASD") submitted on August 1, 1990, a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] to allow a previously registered person to certify as to the completeness and accuracy of his disciplinary record in the Central Registration Depository ("CRD") system and alleviate the need to resubmit full details of all reportable items upon transfer of his registration to a new broker-dealer.

Notice of the proposal, together with the substance of the terms of the proposed rule change, was given by the issuance of a Commission release (Securities Exchange Act Release No. 28392, August 29, 1990) and by publication in the Federal Register (55 FR 36922, September 7, 1990). No comments were received on the proposal.

This rule change will amend the Form U–4 to provide for a previously registered person, who is transferring his registration to another broker-dealer, to certify that he has reviewed a copy of his disclosure information taken from the CRD system, and that the information is accurate, complete and in Disclosure Reporting Page ("DRP") format. If the certification is utilized, only the appropriate "yes" answers on page 3 of Form U–4 need to be answered to correspond with the disclosed information, but no DRPs are required.

There are three certification alternatives available to the individual. The first alternative simply states that there is no new information to add to the disclosure file. The second alternative allows the individual to certify to the completeness of all previously provided information and to report something new. Only the new DRP need be provided. The third alternative allows the agent to certify to previously provided information, but further allows him to update a specific matter. Again, only the updated information need be disclosed. The individual would indicate in the certification the occurrence to which the updated information belongs, and the updated information would be posted accordingly. No details relating to other matters are required.

The NASD believes the proposed rule change will eliminate the time-consuming and burdensome requirement of a person resubmitting to CRD items previously disclosed on Form U–4 each time such person transfers his registration to a new broker-dealer.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of section 15A [2] and the rules and regulations thereunder. Also, this proposed rule change is consistent with the NASD's authority to adopt appropriate qualification and registration requirements for persons associated

---

[20] In addition, the CSE proposal is substantially identical to the CBOE, MSE and PSE rule filings that were subsequently approved by the Commission. *See* note —, *supra*.

[21] 15 U.S.C. § 78f (1982). Moreover, the Commission finds that approval of the CSE's proposed rule change is consistent with its May 10, 1989 approval order, and the Commission herein incorporates by reference the relevant portions of its discussions from that order.

[22] The Commission's approval of CSE Chapter IX, Rule 9.31, and the comparable rules of the NYSE, NASD, Amex, CBOE, MSE, MSRB, and PSE is consistent with the conclusion of the Court of Appeals for the Sixth Circuit in *Roney v. Goren*, 875 F.2d 1218 (6th Cir. 1989) that the Commission has the authority to assure customer choice among SRO arbitration forums.

BILLING CODE 8010-01-M

[Release No. 34-28636; File No. SR-NYSE-90-50]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Temporary Approval of Proposed Rule Change by New York Stock Exchange, Inc. Relating to Revised Odd-Lot Order Pricing Procedures in Expanded Pilot

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 9, 1990, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of an extension of the pilot program eliminating differentials and floor brokerage charges that may be charged on certain odd-lot orders as provided in Exchange Rule 124 for member firms participating in the pilot.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The NYSE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

The purpose of the proposed rule change is to extend and expand the pilot program now in place, which eliminates all differentials and floor brokerage charges for odd-lot orders executed through the Exchange's automated system.[1] The pilot, as approved earlier this year,[2] was intended to allow the Exchange to begin the process of eliminating odd-lot differentials and floor brokerage charges in a controlled environment to assess concerns associated with such elimination. These concerns include the potential abuse by traders entering odd-lot orders to capture the spread (*i.e.*, buying on the bid and selling on the offer), the alteration of historical order flow patterns that are a mix of odd-lot market and limit orders heavily favoring market orders, and the question of whether eliminating odd-lot differentials would require extensive rule and system enhancements which could prove to be cumbersome in their operation and surveillance. The pilot included three firms representing a cross-section of member organizations with an active retail business: a large national full-line broker-dealer, a regional firm and a discount broker-dealer, and was to run until October 15, 1990.

During the operation of the pilot, the Exchange has gathered valuable experience concerning the impact of eliminating odd-lot charges. For example, the mix of odd-lot market versus limit orders has remained near historical levels. There have been no significant system problems during the pilot, and surveillance of the trading patterns of customers has not revealed any abusive practices. The Exchange believes, however, that additional experience under the pilot's conditions is necessary and appropriate to assure that the favorable results can be sustained as more firms are added.

The Exchange proposes to add three member organizations to the pilot and extend its operation until January 31, 1991.[3] The Exchange believes this three month expansion will present an enhanced test of execution and surveillance capabilities. In addition, the data available to assess the mix of odd-lot orders between market and limit will be augmented. The three firms to be added will consist of a national full-line broker-dealer, a regional firm, and a discount broker-dealer as in the first phase of the pilot.

The Exchange shares the Commission's concerns regarding the availability of the pilot's pricing benefits to the pilot participants only, and believes the proposed extension for an additional three months will enable more customers to participate in the pilot while allowing the Exchange a better opportunity to assess the pilot's impact. The Exchange intends to submit a permanent rule change extending the pricing procedures used in the pilot to all member organizations prior to January 15, 1991, or the pilot will be terminated.

(b) Statutory Basis

The basis under the Act for this proposed rule change is the requirement under section 6(b)(5) that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

---

[1] The Exchange currently does not permit imposition of a differential or floor brokerage charges on standard odd-lot market orders. Such charges may be imposed, however, on virtually all other odd-lot orders.

[2] See Release No. 34-28040 (May 22, 1990), 55 FR 21989, approving File No. SR-NYSE-90-22.

[3] The Exchange originally proposed extending the pilot until January 15, 1991. The Exchange subsequently requested Commission approval to extend the pilot until January 31, 1991. *See* letter from Daniel Parker Odell, Assistant Secretary, NYSE, to Mary N. Revell, Branch Chief, Division of Market Regulation, Commission, dated October 10, 1990.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to File No. SR-NYSE-90-50 and should be submitted by [insert date 21 days from date of publication].

IV. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, with the requirements of section 6(b)(5) of the Act.[4] The Commission believes that the proposal's goal, which is to eliminate odd-lot differentials and floor brokerage charges on systematized odd-lot orders, will increase the quality of execution of customer odd-lot limit orders. As a result of the proposal, the price charged for the execution of all odd-lot orders will reflect the market's price without additional transaction charges.

The Commission also believes that the pilot program proposal should help the Exchange to design odd-lot pricing rules that will facilitate the execution of odd-lot orders. Although the Commission had concerns about limiting the program that is now in place to only three firms,[5] and continues to have concerns about limiting the extended pilot to only six firms, the Commission recognizes that the Exchange prefers a small, controlled pilot in case the order flow of the odd-lot system is drastically altered by the proposed rule change. Moreover, the six firm, three month extension of the pilot program will permit the Exchange to examine odd-lot order flow and trading patterns with a cross-section of member firms. In addition, though limited to the six firms, the pilot program also should provide a significant number of investors with the benefit of the early implementation of the rule. Finally, the Exchange has stated that the pilot program will terminate on January 15, 1991 unless the NYSE submits a proposal to extend the pilot to all member organizations prior to that date.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. The pilot is designed to test new procedures for providing improved odd-lot pricing. If the pilot program is successful, acceleration of approval of this proposed rule change will permit the Exchange to extend improved odd-lot pricing to all investors at an earlier date. In addition, the substance of this proposal was published in the Federal Register for the full statutory period and no comments were received.[6] Finally, accelerated approval will allow the Exchange to extend the pilot without interruption.

It is therefore ordered, pursuant to section 19(b)(2)[7] of the Act, that the proposed rule change is approved for a period ending on January 31, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Dated: October 15, 1990.

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF STATE

[Public Notice 1275]

Shipping Coordinating Committee IMO Council and Associated Bodies; Meeting

The Shipping Coordinating Committee, (SHC), will conduct an open meeting at 10:00 AM on October 30, 1990, in Room 2415 at U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593. The purpose of the meeting is to finalize preparations for the 65th Session of Council and associated bodies of the International Maritime Organization, (IMO), which is scheduled for November 5-9, 1990 at the IMO Headquarters in London. The purpose of the meeting is to discuss the papers received and the draft U.S. positions for the Council.

Among other things, the items of particular interest are:

—Reports of Legal and Technical Cooperation Committees
—Report on meeting of parties to the London Dumping Convention
—Report on preparations for the International Conference on Oil Pollution Preparedness and Response
—Financial and Personnel Matters

Members of the public may attend these meetings up to the seating capacity of the room. Interested persons may seek information by writing: Mr. Gene F. Hammel, U.S. Coast Guard (G-CI), Room 2114, 2100 Second Street SW., Washington, DC 20593 or by calling: (202) 267-2280.

Dated: September 28, 1990.

Joseph P. Richardson

Executive Secretary Shipping Coordinating Committee.

DEPARTMENT OF TRANSPORTATION

Aviation Proceedings; Agreements Filed During the Week Ended October 12, 1990

The following Agreements were filed with the Department of Transportation under the provisions of 49 U.S.C 412 and 414. Answers may he filed within 21 days of date of filing.

Docket Number: 47201
Date filed: October 9, 1990
Parties: Members of the International Air Transport Association
Subject: Technical Correction to Docket 47139
Proposed Effective Date: October 1, 1990

Docket Number: 47202
Date filed: October 9, 1990
Parties: Members of the International Air Transport Association
Subject: Technical Correction to Docket 46666

Docket Number: 47203
Date filed: October 9, 1990
Parties: Members of the International Air Transport Association
Subject: TC3 Expedited Resolutions
Proposed Effective Date: November 1,

1990

Docket Number: 47208
Date filed: October 11, 1990
Parties: Members of the International Air Transport Association
Subject: Fare levels from Scandinavia (Reso 024f)
Proposed Effective Date: Government Approval

Docket Number: 47209
Date filed: October 11, 1990
Parties: Members of the International Air Transport Association
Subject: South Atlantic-Europe Resolutions
Proposed Effective Date: January 1, 1991

BILLING CODE 4910-62-M

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended October 12, 1990

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each Application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a Show-Cause Order, a Tentative Order, or in appropriate cases a Final Order without further proceedings.

Docket Number: 47210
Date filed: October 12, 1990
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 16, 1990
Description: Application of Eva Airways Corporation, pursuant to section 402 of the Act and subpart Q of the Regulations, applies for a foreign air carrier permit to engage in the scheduled foreign air transportation of persons, property and mail between the coterminal points, Taipei and Kaohsiung, Republic of China, via intermediate points in the Pacific, and the coterminal points Guam, Honolulu, Hawaii, Seattle, Washington, San Francisco and Los Angeles, California, Dallas, Texas and New York, New York, United States of America, and beyond to Rome, Italy.

Docket Number: 47213
Date filed: October 12, 1990
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: November 9, 1990
Description: Application of Air Foyle Limited, pursuant to section 402 of the Act and subpart Q of the Regulations applies for a foreign air carrier permit which would authorize Air Foyle to provide foreign charter air transportation of property between points in the United States, on the one hand, and points in the United Kingdom, on the other hand, and for charter authority pursuant to part 212 of the Regulations.

Phyllis T. Kaylor,
Chief, Documentary Services Division.

BILLING CODE 4910-62-M

Federal Highway Administration

[FHWA Docket No. 88-23]

Additional Interchanges to the Interstate System

AGENCY: Federal Highway Administration (FHWA), DOT.
ACTION: Notice of policy statement.

SUMMARY: This document issues a statement of FHWA policy and guidance for the justification and documentation needed for requests to add access (interchanges and ramps) to the existing Interstate System. Due to the numerous requests by States for additional access to the Interstate System, the FHWA is clarifying its policy and emphasizing the need for justification in areas such as safety, traffic operations and coordination with land use.

EFFECTIVE DATES: The effective date of this policy is October 22, 1990.

FOR FURTHER INFORMATION CONTACT: Seppo I. Sillan, Office of Engineering, (202) 366-0312, or Michael J. Laska, Office of the Chief Counsel, (202) 366-1383. Office hours are from 7:30 a.m. to 4 p.m. et., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION:

Background

Section 111 of title 23, U.S.C., provides that all agreements between the Secretary and the State highway department for the construction or projects on the Interstate System shall contain a clause providing that the State will not add any points of access to, or exit from, the project in addition to those approved by the Secretary in the plans for such project, without the prior approval of the Secretary. This agreement provision is contained in 23 CFR part 630, subpart C, appendix A. The Secretary has delegated the authority to administer 23 U.S.C. 111 to the Federal Highway Administrator pursuant to 49 CFR 1.48(b)(10).

It has always been the policy of FHWA to maintain adequate control of access to the Interstate System to ensure safe and efficien traffic operations. The guidance for justifying and documenting the need for additional access to existing sections of the Interstate System has traditionally been included in the Interstate Cost Estimate (ICE) manuals that are periodically issued by FHWA pursuant to 23 U.S.C. 104(b)(5) and available to the public. The guidance generally required the documentation of public benefits or needs before additional interchanges or ramps could be added to the Interstate System. In July of 1967, the FHWA, by memorandum to Regional Federal Highway Administrators, restated and emphasized the justification criteria contained in the ICE manual.

Discussion of Comments

In response to the notice of proposed policy statement published at 54 FR 47161 on November 9, 1989, the FHWA received 33 comments: 24 from State transportation agencies (representing 20 different states), 5 metropolitan or regionan planning agencies, 2 non-profit interest groups, and 2 private individuals. The majority of comments supported the policy. Specific suggestions varied from recommending more detailed instruction and guidance, including specific design criteria, to recommendations for even more flexibility than is being proposed. A section-by-section discussion of the comments follows. *Regional Traffic Needs (Section 1.)* Comments on this section were relatively few and ranged from suggested editorial changes and clarifications to adding provisions to indicate whether area-wide or corridor analysis is expected.

The intent of this section is to require the States to demonstrate that an access point is needed for regional traffic needs and not only to solve local system needs or problems. The interstate facility should not be allowed to become part of the local circulation system but should be maintained as the main regional and interstate highway it was intended to be. The analysis that is required should extend to the highways in the corridor and appropriate nearby highways and streets only, not the entire "urban area" as was interpreted by one commenter.

This section has been slightly in order to clarify its intent.

Some suggestions were made to require a benefit/cost analysis in determining acceptability of a new or revised access proposal. Such analysis can be a valuable input to the decision-making process and would assist the State Highway Agencies in determining priorities. However, such analysis should not be the sole, or even a major, determinant in justifying an access request or a proposed design configuration (especially for single or isolated ramps and partial interchanges versus full interchanges). Therefore, a benefit/cost analysis will not be required. *Reasonable Alternative (Section 2).* Comments on this section expressed concern that the term "all feasible" is too broad and would cause difficulties in interpretation. Several comments addressed the need for examples to clarify the intent of this policy section. One commenter interpreted the requirement as asking for the detailed design to be completed at the access request time.

This section has been revised to more clearly state that the intent of this requirement is to assure that all reasonable alternatives, including improvements to existing local roads and streets in lieu of new access, have been fully considered. No detailed design is expected in most instances, especially in rural areas. Generally, sufficient information on recommended configuration of the interchange necessary for an operational analysis, including expected number of lanes and weaving distances, is all the design detail that is needed. However, in some cases, especially in urban areas, it may be necessary to provide more detailed design information in order to assure that the Interstate facility with the new access point will work as intended. *Operational Analysis (Section 3.)* Comments on this section suggested that a specific time period for analysis be stated; that only significant impacts be considered; and that mainline Interstate beyond the adjacent interchanges be analyzed.

The purpose of this section is to assure that sufficient operational analyses are made to determine the impact of the added access on the Interstate operation. It is anticipated that the 1985 Transportation Research Board (TRB), Special Report 209, "Highway Capacity Manual" (HCM) analysis procedures will normally be used. This document is listed in 23 CFR 625.5 as a guide and a reference. Regardless of the analysis method used in the proposal, the FHWA will use the HCM in its review and therefore the data submitted must be sufficient for and compatible with those procedures. At a minimum, the operational impact on the mainline Interstate between the proposed new access and the adjacent existing interchanges on either side should be analyzed. Preferably, the analysis should be extended as far along the mainline and include as many existing interchanges as is necessary to establish the extent and scope of the impacts. This could be critical in urban areas with many relatively closely spaced interchanges.

Sufficient analysis of the crossroad and even some of the parallel facilities, as appropriate, must be made to assure that if the new access is approved, the local roads are adequate to handle the new traffic loads. A twenty-year design period should be used.

This section has been revised to clearly indicate that significant impacts should be the focus of analysis. Language has been added or revised to indicate that an analysis of the adjacent sections of the Interstate shall extend at least to the next interchange in each direction and beyond, if necessary.

Because it is included in other sections, the part of this section dealing with required analysis of crossroads and other local facilities to handle the traffic in lieu of a new interchange has been eliminated. That analysis however, is still required, and is part of the justification of need required in section 1 and the alternatives analysis required by section 2 of this policy.

Suggestions were made to specify in the policy the required design period. For Interstate projects, a twenty-year design period is already required by section 109(b) of title 23, U.S.C., and is incorporated in the American Association of State Highway and Transportation Officials (AASHTO) publication, "A Policy on Design Standards—Interstate System." This document is incorporated at 23 CFR 625.4(a)(2). Therefore, there is no need to include that, or any other specific design criteria in this policy statement.

Access Connections and Design (Section 4.) Most of the comments on this section dealt with the requirement that all new access points must provide for all movements; partial interchanges will not be allowed. The FHWA intent is that, except in the most extreme circumstances, all interchanges should provide for all movements. However, it is recognized that circumstances may exist when initial construction of only part of an interchange might be appropriate. Where such circumstances exist, commitments, possibly even purchase of necessary right-of-way during the initial project stage for future completion, must be made. Special purpose access for HOV's, for transit vehicles, or into park and ride lots should be treated as special cases and the movements to be provided decided on a case-by-case basis.

Other comments dealt with design standards. Concern was expressed that, as written, the requirement to meet current standards would require full construction plans at the time of access point request and that exceptions could not be granted. There is no intent to require any more design work than is necessary to determine the impacts and appropriateness of the proposed interchange (see discussion for section 2). The design exception process provided by 23 CFR 625.3(f) is still available and not negated or in any way modified by this policy.

Several other commenters suggested that specific design criteria be included, especially for spacing. Spacing guidelines such as contained in the ICE manuals and in the AASHTO publication, "A Policy on Geometric Design of Highways and Streets" (Green Book), should be considered as good guidance and followed to the maximum extent possible. However, since design features, such as ramp braiding or collector distributor roads, can be used to minimize the adverse operational impacts of close spacing, the policy will not specify any design details or spacing requirements.

Also, no specific design criteria need to be included in this policy statement because they are contained in the AASHTO Interstate Standards and the Green Book. Both documents are incorporated by reference at 23 CFR 625.4(a) as policy for Federal-aid projects and, in the case of the Interstate Standards, as a standard for design of all projects on the Interstate System regardless of the funding source.

Transportation and Land Use Plans (Section 5.) Most of the comments on this section were the result of confusion and non-comprehension because of some missing words in the published draft policy. This has been corrected. Other comments dealt with the role of Metropolitan Planning Organizations (MPO's) and the scope of studies required, i.e., system wide or corridor studies.

The intent of this requirement is to cause sufficient review and coordination so as not to have piece-meal consideration of added access and to avoid as much as possible future conflict with other, possibly more needed, access. The request should include

discussion as to how the current proposal fits into the overall plans for the area, and if it is an addition to the current plans, how it fits in and affects the current plans. Added access requests do not have to be included in official transportation plans or approved by MPO's or similar organizations prior to submittal. All such coordination may be completed after access approval and as part of the normal project development process. The expectation here is that any proposal is considered in view of currently known plans for transportation facilities and/or land use planning. This is especially important when several new interchanges are anticipated.

Request Coordination (Section 6.) Commenters on this section expressed concern as to States' ability to have any control over developers or to be able to phase or stage the transportation improvement with the private development. The intent of this requirement is not to try to control developers and their plans through the State Highway Agencies, which have no such direct powers. However, it is incumbent upon the State Highway Agencies to assure that the highway facilities are developed in an orderly and coordinated manner to serve the public. Therefore, where private development is clearly the driving force behind the need for added access, it is only reasonable that the State Highway Agency and the developer work closely together in order to develop the access to achieve mutual benefits with minimal adverse impact on the Interstate travelers. Stage construction could be used where extensive private development is not expected to be completed for several years. The developer might be required to have certain parts of the local circulation system ready before ramps can be constructed or opened to traffic. In some heavily congested areas the developer might be required to provide ride-sharing incentives or even assist in providing transit facilities. The intent is to accomplish any coordination that might be possible, even if it is only to know what each is doing and when.

Coordination or cooperation would be very appropriate where a developer has agreed to fund or perhaps even construct access at the same time the State is either planning or is already in the process of improving that particular section of the Interstate route. It is only reasonable that the two activities be coordinated and compatibility assured. Much of this would probably be accomplished under section 5 requirements. However, this separate policy section is being kept in order to emphasize this particular issue since more and more private involvement in transportation improvements will be happening in the future.

Implementation

One of the main concerns of commenters in reference to implementation was that if the contents and format of justification documents and supporting data are not specified by the FHWA Washington office, inconsistency will occur. Other comments expressed concern over possible conflicts of opinion in deciding whether all feasible alternatives are considered, whether rural or urban conditions prevail, and whether local roads can or cannot be improved. Also, questions were raised in regard to timing of the requests in regards to the environmental and public participation process and the application of the policy to ongoing projects.

The purpose of having the States and local Division offices jointly develop the detailed implementation procedures is to provide the maximum amount of flexibility to meet local conditions and procedures. By not imposing detailed national guidelines beyond the overall policy statement, existing available data, reports and procedures can be used. The FHWA does recognize that without nationally imposed specific guidelines and requirements for format, content and methods of analysis, some differences may occur. However, non-uniformity between the States will most likely be a minor problem in comparison with the problems that would be created by rigid rules applicable nationwide under all circumstances and conditions. Therefore, the FHWA is not proposing to change the method of implementation proposed in the November 9, 1989, Notice of proposed policy.

In response to the comments on: (1) Timing of access requests in relation to environmental and public participation procedures; and (2) Application of the policy to revised or deleted access points, a new section on APPLICATION has been added to the policy statement.

The revised policy statement is as follows:

Policy

It is in the national interest to maintain the Interstate System to provide the highest level of service in terms of safety and mobility. Adequate control of access is critical to providing such service. Therefore, new or revised access points to the existing Interstate System will be considered for approval only if:

1. It is demonstrated that the existing interchanges and/or local roads and streets in the corridor can neither provide the necessary access nor be improved to satisfactorily accommodate the design-year traffic demands while at the same time providing the access intended by the proposal.

2. All reasonable alternatives for design options, location and transportation system management type improvements (such as ramp metering, mass transit, and HOV facilities) have been assessed and provided for if currently justified, or provisions are included for accommodating such facilities if a future need is identified.

3. The proposed access point does not have a significant adverse impact on the safety and operation of the Interstate facility based on an analysis of current and future traffic. The operational analysis for existing conditions shall, particularly in urbanized areas, include an analysis of sections of Interstate to and including at least the first adjacent existing or proposed interchange on either side. Crossroads and other roads and streets shall be included in the analysis to the extent necessary to assure their ability to collect and distribute traffic to and from the interchange with new or revised access point.

4. The proposed access connects to a public road only and will provide for all traffic movements. Less than "full interchanges" for special purpose access for transit vehicles, for HOV's, or into park and ride lots may be considered on a case-by-case basis. The proposed access will be designed to meet or exceed current standards for Federal-aid projects on the Interstate System.

5. The proposal considers and is consistent with local and regional land use and transportation plans. In areas where the potential exists for future multiple interchange additions, all requests for new or revised access are supported by a comprehensive Interstate network study with recommendations that address all proposed and desired access within the context of a long-term plan.

6. The request for a new or revised access generated by new or expanded development demonstrates appropriate coordination between the development and related or otherwise required transportation system improvements.

Application

This policy is applicable to new or revised access points to existing Interstate facilities regardless of the funding of the original construction or regardless of the funding for the new

access points. This includes routes incorporated under the provisions of 23 U.S.C. 139(a) or 139(b). It does not include toll roads incorporated into the Interstate System under the provisions of 23 U.S.C. 129(b), except sections on which Federal funds have been expended.

For the purpose of applying this policy, each entrance or exit point, including "locked gate" access, to the mainline is considered to be an access point. For example, a diamond interchange configuration has four access points.

Generally, revised access is considered to be a change in the interchange configuration even though the number of actual points of access may not change; for example, replacing one of the direct ramps of a diamond interchange with a loop, or changing a cloverleaf interchange into a fully directional interchange is considered as revised access for the purpose of applying this policy.

All FHWA approvals for added or revised access is conditioned upon the State complying with all applicable Federal rules and regulations. The FHWA approval constitutes a Federal action, and as such, requires that National Environmental Policy Act (NEPA) procedures are followed. The NEPA procedures will be accomplished as part of the normal project development process and as a condition of the access approval. Compliance with the NEPA procedures need not precede the determination of engineering acceptability and feasibility as prescribed by this policy statement. This policy in no way alters the current NEPA implementing procedures as contained in 23 CFR 771.

Although the justification and documentation procedures described in this policy can be applied to access requests for non-Interstate freeways or other access controlled highways, it is not required. However, applicable Federal rules and regulations, including NEPA procedures, must be followed.

Implementation

The FHWA Division Office will ensure that all requests for new or revised access submitted by the State Highway Agency for FHWA consideration contain sufficient information to allow the FHWA to independently evaluate the request and ensure that all pertinent factors and alternatives have been appropriately considered. The extent and format of the required justification and documentation should be developed jointly by the State Highway Agency and the FHWA to accommodate the operations of both the State and the FHWA, including a reasonable transition period. The extent and format of justification should also be consistent with the complexity and expected impact of the proposals; for example, information in support of isolated rural interchanges may not need to be as extensive as for a complex or potentially controversial interchange in an urban area. No specific documentation format or content is prescribed by this policy.

Policy Statement Impact

The FHWA has determined that this document does not contain a major rule under Executive Order 12291 or a significant action under the Department of Transportation's regulatory policies and procedures. Interested parties were given an opportunity to comment on the proposal because of the interest in maintaining the highest level of service in terms of safety and mobility in the Interstate System.

The policy statement summarizes and clarifies FHWA policy and guidance for the justification and documentation needed for requests to add or revise access to the existing Interstate System. Specifically, the policy statement emphasizes the need for clear and convincing justification based on adequate information in areas such as safety and traffic operations. The policy statement will not impose any additional reporting or recordkeeping requirements on the States. To assure that adequate information and analysis is provided with each request for additional access, the extent and contents of the currently required documentation may need to be modified. These modifications can simply be incorporated into the States' existing additional interchange request policy. Therefore, a full regulatory evaluation is not required. For the above reasons, and under the criteria of the Regulatory Flexibility Act, the FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this policy statement does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Vol. 55, No. 204
Monday, October 22, 1990

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

October 17, 1990.

The following notice of meeting is published pursuant to section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-49), U.S.C. 552B:

AGENCY HOLDING MEETING: Federal Energy Regulatory Commission.

DATE AND TIME: October 24, 1990, 10:00 a.m.

PLACE: 825 North Capital Street N.E., Room 9306, Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

*Note—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Secretary, Telephone (202) 208-0400.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Reference and Information Center.

Consent Agenda—Hydro

925th Meeting—October 24, 1990

Regular Meeting (10:00 a.m.)

CAH-1.
Project No. 10638-002, City of Fredericksburg, Virginia

CAH-2.
Project No. 2516-015, Potomac Edison Company

CAH-3.
Project No. 10068-001, Inter-West, Ltd.

CAH-4.
Project No. 6423-004, Liberty County, Montana, *et al.*
Project No. 7022-002, Malta Irrigation District, *et al.*
Project No. 7099-001, City of Gillette, Wyoming
Project No. 3574-001, Continental Hydro Corporation
Project No. 4423-000, Central Montana Electric Generation and Transmission Cooperative, Inc.

CAH-5.
Omitted

CAH-6.
Project No. 6901-009, City of Martinsville, West Virginia

CAH-7.
Project No. 5906-002, North Canal Waterworks Docket No. RM83-60-000, Small Power Production and Cogeneration Facilities Rates and Exemptions

CAH-8.
Project No. 3671-031, Allegheny Hydro Partners, Ltd.
Project No. 3494-031, Allegheny No. 6 Hydro Partners

CAH-9.
Omitted

CAH-10.
Project No. 10472-001, Hanalei Power Company

CAH-11.
Docket No. UL89-36-001, Spartanburg Water System

CAH-12.
Docket No. UL86-2-002, Manistique Papers, Inc.

CAH-13.
Project No. 10068-000, Mid-Atlantic Energy Engineers, Ltd.

Consent Agenda—Electric

CAH-1.
Docket No. ER90-560-000, Upper Peninsula Power Company

CAE-2.
Docket No. ER90-563-000, American Electric Power Service Corporation

CAE-3.
Docket No. ER90-374-001, Northeast Utilities Service Company
Docket Nos. ER90-373-002 and ER90-390-002, Northeast Utilities Service Company

CAE-4.
Docket No. ER79-150-015, Southern California Edison Company

CAE-5.
Docket No. ER89-672-003, PSI Energy, Inc.

CAE-6.
Docket Nos. ER90-373-001 and ER90-390-001, Northeast Utilities Service Company

CAE-7.
Docket Nos. ER90-389-001 and ER90-390-001, Northeast Utilities Service Company
Docket No. EL90-39-001, Connecticut Light and Power Company and Western Massachusetts Electric Company

CAE-8.
Docket No. FA87-82-001, Boston Edison Company

CAE-9.
Docket No. QF90-186-000, Northeast Maryland Waste Disposal Authority

CAE-10.
Docket No. RM90-6-000, Amendments to FERC Forms Nos. 1 and 1F Annual Charges and Fuel Cost and Purchased Economic Power Adjustment Clauses

CAE-11.
Docket No. ER90-297-000, Michigan Power Company

CAE-12.
Docket Nos. EL88-5-000, 002, 003, EL88-7-000, 002 and 003, Boston Edison Company

Consent Agenda—Gas and Oil

CAG-1.
Docket No. RP90-186-000, Williston Basin Interstate Pipeline Company

CAG-2.
Docket No. RP91-1-000, Florida Gas Transmission Company

CAG-3.
Docket No. RP91-4-000, Texas Eastern Transmission Corporation

CAG-4.
Docket No. RP-192-000, Texas Gas Transmission Corporation

CAG-5.
Docket No. RP90-191-000, Transwestern Pipe Line Company

CAG-6.
Docket No. RP90-148-003, Williston Basin Interstate Pipeline Company

CAG-7.
Docket Nos. RP89-50-000, 005, CP64-249-000, 001, CP65-384-000, 001, CP65-383-000, 007, CP68-179-006, 012, 013, 015, 017, CP74-182-009, 011, 012, 013, CP86-704-000, 001, 002, 003, 004, CP89-555-000, CP89-556-000, 003, G-9282-004, 005, G-18615-000 and 001, Florida Gas Transmission Company

CAG-8.
Docket No. RP90-190-000, Columbia Gas Transmission Corporation

CAG-9.
Docket No. RP91-5-000, Natural Gas Pipe Line Company of America

CAG-10.
Docket No. RP91-3-000, Granite State Gas Transmission, Inc.

CAG-11.
Docket Nos. TA91-1-11-000 and 001, United Gas Pipe Line Company

CAG-12.
Docket No. TA91-1-41-000, Paiute Pipeline Company

CAG–13.
Docket No. TA91–1–45–000, Inter-City Minnesota Pipelines, Ltd., Inc.
CAG–14.
Docket No. TA91–1–23–000, Eastern Shore Natural Gas Company
CAG–15.
Docket No. TA91–1–52–000, Viking Gas Transmission Company
CAG–16.
Docket Nos. TA91–1–38–000 and 001, Ringwood Gathering Company
CAG–17.
Docket No. TQ91–2–4–000, Granite State Gas Transmission, Inc.
CAG–18.
Docket Nos. TQ91–1–63–000 and TM91–1–63–001, Carnegie Natural Gas Company
CAG–19.
Docket Nos. TM91–2–16–000 and 001, National Fuel Gas Supply Corporation
CAG–20.
Docket No. TM91–2–21–000, Columbia Gas Transmission Corporation
CAG–21.
Docket Nos. TA90–1–17–000 and 001, Texas Eastern Transmission Corporation
CAG–22.
Docket No. RP72–121–011, Paiute Pipeline Company
CAG–23.
Docket Nos. RP90–122–013, RP88–191–023 and RP85–178–070, Tennessee Gas Pipeline Company
CAG–24.
Docket No. RP90–152–001, CNG Transmission Corporation
CAG–25.
Docket No. RP90–158–001, Trunkline Gas Company
CAG–26.
Docket Nos. TA90–1–22–003 and RP86–141–001, CNG Transmission Corporation
CAG–27.
Docket Nos. TA90–1–44–004 and RP90–162–002, Equitrans, Inc.
CAG–28.
Docket No. TA90–1–42–001, Transwestern Pipeline Company
CAG–29.
Omitted
CAG–30.
Docket Nos. TA84–2–37–004 and FA84–9–000, Northwest Pipeline Corporation
CAG–31.
Docket Nos. RP87–62–003 and RP86–148–005, Pacific Gas Transmission Company
CAG–32.
Docket Nos. CP86–578–031, CP89–1740–005 and RP90–147–001, Northwest Pipeline Corporation
CAG–33.
Docket No. RP85–39–000, Wyoming Interstate Company, Ltd.
CAG–34.
Docket No. RP85–60–000, Overthrust Pipeline Company
CAG–35.
Docket Nos. RP89–37–000, RP89–82–000, CP90–406–000 and CP75–104–055, High Island Offshore System
CAG–36.
Docket Nos. RP89–38–000, RP89–99–000, CP90–1874–000 and CP76–118–000, U–T Offshore System
CAG–37.
Docket Nos. RP88–136–000, RP89–49–010, RP90–14–000 and CP89–1582–002, National Fuel Gas Supply Corporation
CAG–38.
Docket Nos. RP88–45–000 and RP88–46–000, Arkla Energy Resources, A Division of Arkla, Inc.
CAG–39.
Omitted
CAG–40.
Docket No. TA91–1–21–001, Columbia Gas Transmission Corporation
Docket No. CI64–26–023, Chevron U.S.A., Inc.
CAG–41.
Docket No. RI88–30–001, Phillips 66 Natural Gas Company
CAG–42.
Docket No. RM87–7–003, Compression Allowances and Protest Procedures Under NGPA Section 110
CAG–43.
Omitted
CAG–44.
Docket No. CP89–578–002, Northern Border Pipeline Company
CAG–45.
Docket No. CP88–682–001, Panhandle Eastern Pipe Line Company

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:05 p.m. on Tuesday, October 16, 1990, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following matters:

Matters relating to the probable failure of certain insured banks.

A recommendation concerning an administrative enforcement proceeding.

Recommendations regarding the liquidation of a depository institution's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 47,610
American Diversified Savings Bank, Costa Mesa, California
Case No. 47,611
Silverado Banking, Savings and Loan Association, Denver, Colorado

Reports of the Office of Inspector General:
Audit Report re:
Inventory Closing Procedures, Denver Consolidated Office (Memo dated September 12, 1990)
Audit Report re:
Inventory Closing Procedures, Knoxville Consolidated Office (Memo dated September 11, 1990)
Audit Report re:
Inventory Closing Procedures, Midland Consolidated Office (Memo dated August 30, 1990)
Audit Report re:
Knoxville Consolidated Office, Cost Center—503 (Memo dated September 11, 1990)
Audit Report re:
Audit of Contractors' Monitoring of Southwest Plan Assistance Agreements Coopers & Lybrand at Southwest Savings Association, Dallas, Texas (Memo dated September 14, 1990)
Audit Report re:
Audit of Contractors' Monitoring of Southwest Plan Assistance Agreements Kenneth Leventhal & Co. at Guaranty Federal Savings Bank, Dallas, Texas (Memo dated August 21, 1990)
Audit Report re:
Follow-up Audit of the Estimated Cash Recovery System (Memo dated September 4, 1990)
Audit Report re:
Audit of FIS/GL (Memo dated September 13, 1990)
Audit Report re:
Audit of Sealed Bid Procedures, Orlando Consolidated Office (Memo dated September 13, 1990)
Audit Report re:
Audit of the T&A Collection System (Memo dated September 13, 1990)

Memorandum re: Authorization of expenditure for outside instructional services in a Modified Real Estate Appraisal School.

Application for waiver of cross-guarantee provisions of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

Recommendation regarding the Corporation's corporate activities.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Vice Chairperson Andrew C. Hove, Jr., Director T. Timothy Ryan, Jr. (Office of Thrift Supervision), and Chairman L. William Seidman, that Corporation business required its consideration of the matters of less than seven days' notice to the public; that no earlier notice of the meeting was practicable;

that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Dated: October 17, 1990.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Part II

Department of Justice

Bureau of Prisons

28 CFR Part 545

Control, Custody, Care, Treatment and Instruction of Inmates; Inmate Financial Responsibility Program; Proposed Rule

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 545

Control, Custody, Care, Treatment and Instruction of Inmates; Inmate Financial Responsibility Program

AGENCY: Bureau of Prisons, Justice.

ACTION: Proposed rule.

SUMMARY: In this document the Bureau of Prisons is proposing to amend its rule on the Inmate Financial Responsibility Program. This program permits inmates to make contributions toward their legitimate financial obligations. This proposed amendment revises the provisions relating to monitoring of the program in order to clarify the effects of non-participation by the inmate. The intended effect of this amendment is to encourage participation in the program.

DATES: Comments due by December 6, 1990.

ADDRESSES: Office of General Counsel, Bureau of Prisons, HOLC room 760, 320 First Street, NW., Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Office of General Counsel, Bureau of Prisons, phone (202) 307–3062.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is proposing to amend its rule on the Inmate Financial Responsibility Program. A final rule on this subject was published in the Federal Register April 1, 1987 (52 FR 10529 *et seq.*), and was amended in the Federal Register December 1, 1989 (54 FR 49944 *et seq.*). In this proposed rule, the provisions on monitoring inmate participation contained in § 545.11(c) are revised in order to clarify the effects of non-participation. Existing 28 CFR 545.11(c) provides that an inmate's participation in the financial responsibility plan will be reviewed each time staff assess the inmate's demonstrated level of responsible behavior, including, but not limited to, when determining security/custody classification level, eligibility for community activities, good time status, housing assignments, and work assignments. Section 545.11(c) also specifies that progress on the financial responsibility plan will be reported to the United States Parole Commission, and that an inmate who fails to demonstrate financial responsibility may neither secure a UNICOR work assignment, nor receive performance pay above the maintenance pay level. An inmate already in a UNICOR work assignment or receiving performance pay who fails to make adequate progress on the financial plan will be considered for removal from UNICOR, or reduction to the maintenance pay level of performance pay.

Proposed new 28 CFR 545.11(c) specifies that participation and/or progress in the Inmate Financial Responsibility Program will be reviewed each time staff assess an inmate's demonstrated level of responsible behavior. Proposed new § 545.11(d), which clarifies the effects of non-participation, specifies that refusal by an inmate to participate in the financial responsibility program or to comply with the provisions of his financial plan shall ordinarily result in the following: Where applicable, the Parole Commission will be notified of the inmate's failure to participate; the inmate will not receive any furlough (other than possibly an emergency furlough); the inmate will not receive performance pay above the maintenance pay level, or bonus pay, or vacation pay; the inmate will not be assigned to any work detail outside the secure perimeter of the facility; the inmate will not be placed in UNICOR (any inmate assigned to UNICOR who fails to make adequate progress on his/her financial plan will be removed from UNICOR, and once removed, may not be placed on a UNICOR waiting list for six months; any exceptions to this require approval of the Warden); the inmate will not be permitted to purchase any items in excess of the monthly spending limitation, including special purchase items like sports equipment, hobby crafts, etc.; the inmate will be quartered in the lowest housing status (dormitory, double bunking, etc.); the inmate will not be placed in a community-based program; and the inmate will not receive a release gratuity unless approved by the Warden. The proposed provisions on the effects of non-participation regarding monthly spending limitations and release gratuities are new; the other proposed provisions are revised to express more specifically existing Bureau policy.

Interested persons may participate in this proposed rulemaking by submitting data, views, or arguments in writing to the Bureau of Prisons, HOLC room 760, 320 First Street, NW., Washington, DC 20534. Comments received are available for inspection at this same address. Comments received during the comment period will be considered before final action is taken. The proposed rule may be changed in light of the comments received. No oral hearings are contemplated.

The Bureau of Prisons has determined that this rule is not a major rule for the purpose of E.O. 12291. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 545

Prisoners.

Wade B. Houk,

Acting Director, Bureau of Prisons.

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(q), subchapter C of 28 CFR chapter V is proposed to be amended as set forth below.

Subchapter C—Institutional Management

PART 545—WORK AND COMPENSATION

1. The authority citation for 28 CFR 545 is revised to read as follows, and all other authority citations in the part are removed:

Authority: 5 U.S.C. 301; 18 U.S.C. 3013, 3621, 3622, 3624, 4001, 4042, 4081, 4082 (Repealed as to conduct occurring on or after November 1, 1987), 4126, 5006–5024 (Repealed October 12, 1984 as to conduct occurring after that date), 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

2. In 28 CFR part 545, § 545.11 is amended by revising paragraph (c) and by adding new paragraph (d) to read as follows:

§ 545.11 Procedures.

* * * * *

(c) *Monitoring.* Participation and/or progress in the Inmate Financial Responsibility Program will be reviewed each time staff assess an inmate's demonstrated level of responsible behavior.

(d) *Effects of non-participation.* Refusal by an inmate to participate in the financial responsibility program or to comply with the provisions of his financial plan shall ordinarily result in the following:

(1) Where applicable, the Parole Commission will be notified of the inmate's failure to participate;

(2) The inmate will not receive any furlough (other than possibly an emergency furlough);

(3) The inmate will not receive performance pay above the maintenance pay level, or bonus pay, or vacation pay;

(4) The inmate will not be assigned to any work detail outside the secure perimeter of the facility;

(5) The inmate will not be placed in UNICOR. Any inmate assigned to UNICOR who fails to make adequate progress on his/her financial plan will be removed from UNICOR, and once removed, may not be placed on a UNICOR waiting list for six

months. Any exceptions to this require approval of the Warden;

(6) The inmate will not be permitted to purchase any items in excess of the monthly spending limitation, including special purchase items like sports equipment, hobby crafts, etc.;

(7) The inmate will be quartered in the lowest housing status (dormitory, double bunking, etc.);

(8) The inmate will not be placed in a community-based program;

(9) The inmate will not receive a release gratuity unless approved by the Warden.

[Federal Acquisition Circular 90-1]

RIN 9000-AD88 and 9000-AD91

Federal Acquisition Regulation (FAR); Consultants—Conflict of Interest; Optional Form 333, Procurement Integrity Certification for Procurement Officials

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule with request for comments.

SUMMARY: Federal Acquisition Circular (FAC) 90-1 amends the Federal Acquisition Regulation (FAR) to implement the policies contained in Office of Procurement Policy Letter 89-1, Conflict of Interest Policies Applicable to Consultants, dated December 8, 1989. The amendments implement policy relating to conflict of interest for persons who provide consulting services to the Government and its contractors and will provide procedures to promote compliance with the new policy. The regulation provides for remedies available to the Government in the case of a false certification or failure to provide a certification.

In FAC 84-60, Optional Form (OF) 333, Procurement Integrity Certification for Procurement Officials, was promulgated. FAC 90-1 provides that the OF 333 must be accompanied by the Privacy Act notice and request for disclosure of an individual's social security number which is located at 53.202-333, to permit the filing of a completed OF 333 in an individual officer or employee's Official Personnel File.

DATES: *Effective Date:* October 22, 1990.

Comment Date: Comments should be submitted to the FAR Secretariat at the address shown below on or before December 21, 1990, to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to:

General Services Administration, FAR Secretariat (VRS), 18th & F Streets, NW., Room 4041, Washington, DC 20405.

Please cite FAC 90-1 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill, Office of Federal Acquisition Policy, Room 4041, GS Building, Washington, DC 20405, (202) 501-3856. Please cite FAC 90-1.

SUPPLEMENTARY INFORMATION:

A. Determination to Issue an Interim Rule

FAC 90-1, Item I. A determination has been made under authority of the Secretary of Defense (DoD), the Administrator of General Services (GSA), and the Administrator of the National Aeronautics and Space Administration (NASA) to issue the regulations in FAC 90-1 as an interim rule. This action is necessary because section 8141 of the 1989 Department of Defense Appropriation Act, Pub. L. 100-653, requires that Governmentwide regulations regarding Consultants—Conflict of Interest, be issued within 180 days of the issuance of Office of Federal Procurement Policy Letter 89-1 which established policy relating to the same subject. Policy Letter 89-1 was issued on December 8, 1989. However, pursuant to Public Law 98-577 and FAR 1.501, public comments received in response to this interim rule will be considered in formulating a final rule.

B. Background

FAC 90-1, Item I. The FAR revisions included in this interim rule implement section 8141 of the 1989 Department of Defense Appropriation Act and section 6 of the Office of Federal Procurement Policy Act and are applicable to all Executive Agencies. Under the regulation, apparent successful offerors on all advisory and assistance contracts over $200,000, who employ marketing consultants, must provide a certification that provides in part—

(1) A description of the nature of the services rendered by, or to be rendered by, the marketing consultant; and

(2) If any marketing consultant is rendering or, has rendered services respecting the same subject matter of the instant solicitation, or directly relating to such subject matter, to the Government or any other client, the name, and a description of the nature of the services rendered to such client(s).

Additionally, a certification is also required from all apparent successful offerors on any contract for advisory and assistance services over $25,000. The certificate must contain in part the following:

(1) If, services were rendered to the Government or any other client respecting the same subject matter of the instant solicitation, or directly relating to such subject matter, the name of the client or client(s) and a description of the services rendered to the previous client(s).

(2) A statement that the person who signs the certificate has made inquiry and that, to the best of his or her knowledge and belief, no actual or potential conflict of interest or unfair competitive advantage exists with respect to the advisory or assistance services to be provided in connection with the instant contract, or that any actual or potential conflict of interest or unfair competitive advantage that does or may exists with respect to the contract in question has been communicated in writing to the contracting officer.

The interim regulation provides for remedies available to the Government in the case of a false certification or failure to provide a certification.

B. Public Comments

FAC 90-1, Item I. Public comment is requested on the fact that this interim rule does not make the marketing consultant certificate requirement in the provision at 52.209-7 of the proposed coverage applicable to the acquisitions using sealed bidding procedures.

Sealed bidding is used only when the award is to be made on the basis of price and other price related factors and it is not necessary to conduct discussions with the responding offerors about their bids.

The rigorous structure, built-in safeguards, and limited Government discretion in the sealed bid method of acquisition make it difficult for a marketing consultant to obtain from the Government information that would provide a competitor an unfair competitive advantage.

Also, no one in the Government knows the bid prices of the competitors prior to the public bid opening and, since award is made to the low responsive, responsible bidder in sealed bidding the opportunity for a marketing consultant to exert improper influence on a Government official is slight.

In addition, there are implementation problems if the policy applies to sealed bidding. Requiring submission after the successful bidder is identified creates problems with the firm bid rule. Alternatively, requiring the certification from all bidders with submission of sealed bids, would create an unacceptable reporting burden on the public. Similarly, submission of the certificate after award and resort to default and dispute remedies for failure to certify is considered unwieldy and administratively burdensome.

Given the conduct that is involved, the burdens to the Government and the

BEST COPY AVAILABLE

public, and the fact that sealed bids account for only 7 percent of the procurement dollars expended Governmentwide, a determination has been made to exempt sealed bidding from the certification requirement and invite comment with respect to that determination.

D. Regulatory Flexibility Act

FAC 90–1, Item I. This interim rule may have a significant economic impact on a substantial number of small entities. The actual impact is not known. Publication of this rule will afford the public the opportunity to comment on its economic impact on small entities and such comments will be considered in the formulation of the final rule. An Initial Regulatory Flexibility Analysis (IRFA) has been prepared and will be submitted to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the FAR Secretariat. Comments are invited. Comments from small entities concerning the affected FAR subparts will also be considered. Such comments must be submitted separately and cite FAR Case 90–610 (FAC 84–61) in correspondence.

FAC 90–1, Item II. The requirements of the Regulatory Flexibility Act were addressed in FAC 84–60 (55 FR 36782, September 6, 1990).

E. Paperwork Reduction Act

FAC 90–1, Item I. The information collection requirements in this interim rule are being submitted for approval under OMB Control Number 9000–00XX. Annual reporting burden: The annual reporting burden is estimated as follows: Respondents, 4000; responses per respondent, 1.5; total annual responses, 6000; preparation hours per response, 2; and total response burden hours, 12,000. Annual recordkeeping burden: The annual recordkeeping burden is estimated as follows: Recordkeeping, 10,000; hours per recordkeeper, 2.5; and total recordkeeping burden hours, 25,000. Any public comments concerning the information collection requirements should be submitted to the Office of Management and Budget (OMB), Mr. Stephen Holden, FAR Desk Officer (OIRA), Room 3235, NEOB, Washington, DC 20503.

FAC 90–1, Item II. The requirements of the Paperwork Reduction Act were addressed in FAC 84–60 (55 FR 36782, September 6, 1990).

List of Subjects in 48 CFR Parts 9, 52, and 53

Government procurement.

Dated: October 16, 1990.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Federal Acquisition Circular

[Number 90–1]

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 90–1 is effective October 22, 1990.

Eleanor Spector,

Deputy Assistant Secretary of Defense for Procurement.

A. E. Reskovich,

Acting Associate Administrator for Acquisition Policy.

S. J. Evans,

Assistant Administrator for Procurement, NASA.

Federal Acquisition Circular (FAC) 90–1 amends the Federal Acquisition Regulation as specified below:

Item I—Consultants-Conflict of Interest

The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are implementing the policies of OFPP Policy Letter 89–1, Conflict of Interest Policies Applicable to Consultants, dated December 6, 1989. The revision provides policy relating to conflict of interest for persons who provide consulting services to the Government and its contractors and provides procedures to promote compliance with the new policy.

Item II—Optional Form 333, Procurement Integrity Certification for Procurement Officials

FAC 84–60 (55 FR 36782, September 6, 1990) implemented the Procurement Integrity requirements of the Office of Federal Procurement Act of 1988, as amended by section 814 of Pub. L. 101–189, and replaced the coverage previously promulgated in FAC 84–47 (54 FR 20488, May 11, 1989).

One of the significant changes in Pub. L. 101–189 was an amendment to the procurement official certification provisions of the Act. The amendment requires agencies to obtain new certifications from individuals who will be performing procurement official activities on or after December 1, 1990.

FAC 84–60 provided Optional Form (OF) 333, Procurement Integrity Certification for Procurement Officials. However, in order to permit the filing of a completed OF 333 in an individual officer or employee's Official Personnel File (OPF), the Privacy Act notice and request for disclosure of an individual's social security number included in this FAC must accompany the OF 333.

Therefore, 48 CFR parts 9 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 9, 52, and 53 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 3479(c).

PART 9—CONTRACT QUALIFICATIONS

2. Subpart 9.5 is amended by revising the title to read as follows:

Subpart 9.5—Organizational and Consultant Conflicts of Interest

3. Section 9.500 is revised to read as follows:

9.500 Scope of subpart.

This subpart:

(a) Prescribes responsibilities, general rules, and procedures for identifying, evaluating, and resolving organizational conflicts of interest;

(b) Provides examples to assist contracting officers in applying these rules and procedures to individual contracting situations; and

(c) Implements section 8141 of the 1989 Department of Defense Appropriation Act, Pub. L. 100–463, 102 Stat. 2270–47 (1988) and Office of Federal Procurement Policy (OFPP) Letter 89–1, Conflict of Interest Policies Applicable to Consultants.

4. Section 9.501 is revised to read as follows:

9.501 Definitions.

Marketing consultant means any independent contractor who furnishes advice, information, direction, or assistance to an offeror or any other contractor in support of the preparation or submission of an offer for a Government contract by that offeror. An independent contractor is not a marketing consultant when rendering—

(a) Services excluded in subpart 37.2;

(b) Routine engineering and technical services (such as installation, operation, or maintenance of systems, equipment, software, components, or facilities);

(c) Routine legal, actuarial, auditing, and accounting services; and

(d) Training services.

Organizational conflict of interest means that because of other activities or relationships with other persons, a person is unable or potentially unable to render impartial assistance or advice to the Government, or the person's objectivity in performing the contract work is or might be otherwise impaired, or a person has an unfair competitive advantage.

5. Section 9.502 is amended by adding paragraphs (c) and (d) to read as follows:

9.502 Applicability.

* * * * *

(c) An organizational conflict of interest may result when factors create an actual or potential conflict of interest on an instant contract, or when the nature of the work to be performed on the instant contract creates an actual or potential conflict of interest on a future acquisition. In the latter case, some restrictions on future activities of the contractor may be required.

(d) In addition to the exclusions in subpart 37.2, the following types of acquisitions are excluded from the requirements of this subpart:

(1) Routine engineering and technical services (such as installation, operation, or maintenance of systems, equipment, software, components, or facilities);

(2) Routine legal, actuarial, auditing, and accounting services.

(3) Training services.

(4) Services rendered in connection with intelligence activities as defined in section 3.4(e) of Executive Order 12333 or a comparable definitional section in any successor order, or in connection with special access programs.

(5) Acquisition subject to unique agency organizational conflict of interest statutes.

6. Section 9.504 is amended in paragraphs (b) and (c) by removing the words "(see 9.506)" and "(see 9.507)" respectively and adding in each place "(see 9.506)"; and by adding paragraph (e) to read as follows:

9.504 Contracting officer responsibilities.

* * * * *

(e) The contracting officer shall award the contract to the apparent successful offeror unless a conflict of interest is determined to exist that cannot be avoided or mitigated. Before determining to withhold award based on conflict of interest considerations, the contracting officer shall notify the contractor and provide the contractor a reasonable opportunity to respond. If the contracting officer finds that it is in the best interest of the United States to award the contract notwithstanding a conflict of interest, a request for waiver shall be submitted in accordance with 9.503. The waiver request and decision shall be included in the contract file.

7. Section 9.505 is amended in the second and third sentences of the introductory text by removing the reference "9.508" and inserting in each place "9.506"; and by revising paragraph (b) to read as follows:

9.505 General rules.

* * * * *

(b) Preventing unfair competitive advantage. In addition to the other situations described in this subpart, an unfair competitive advantage exists where a contractor competing for award for any Federal contract possesses—

(1) Proprietary information that was obtained from a government official without proper authorization; or

(2) Source selection information that is relevant to the contract but is not available to all competitors, and such information would assist that contractor in obtainng the contract.

8. Section 9.505–3 is amended by revising the second sentence to read as follows:

9.505–3 Providing technical evaluation or advisory and assistance services.

* * * In this connection consult, OMB Circular No. A–120, Guidelines for the Use of Advisory and Assistance Services, OFPP Policy Letter 89–1, Conflict of Interest Policies Applicable to Consultants, and implementing agency regulations.

9. Section 9.505–4 is amended by redesignating existing paragraph (a) as (b); by redesignating existing paragraph (b) as (a); by revising the first sentence of new paragraph (b); and adding paragraph (c) to read as follows:

9.505–4 Obtaining access to proprietary information.

* * * * *

(b) A contractor that gains access to proprietary information of other companies in performing advisory and assistance services for the Government must agree with the other companies to protect their information from unauthorized use or disclosure for as long as it remains proprietary and refrain from using the information for any purpose other than that for which it was furnished.

* * * * *

(c) Contractors also obtain proprietary and source selection information by acquiring the services of marketing consultants which, if used in connection with an acquisition, may give the contractor an unfair competitive advantage. Contractors should make inquiries of marketing consultants to ensure that the marketing consultant has provided no unfair competitive advantage. See the certification required for contractors and marketing consultants in the provision at 52.209–7.

10. Sections 9.506 and 9.507 are revised; and sections 9.507–1 and 9.507–2 are added to read as follows:

9.506 Procedures.

(a) If information concerning prospective contractors is necessary to identify and evaluate potential organizational conflicts of interest or to develop recommended actions, and no organizational conflicts of interest certificates have been filed contracting officers should first seek the information from within the Government or from other readily available sources. Government sources include the files and the knowledge of personnel within the contracting office, other contracting offices, the cognizant contract administration and audit activities and offices concerned with contract financing. Non-Government sources include publications and commercial services, such as credit rating services, trade and financial journals, and business directories and registers.

(b) If the contracting officer decides that a particular acquisition involves a significant potential organizational conflict of interest, the contracting officer shall, before issuing the solicitation, submit for approval to the chief of the contracting office (unless a higher level official is designated by the agency)—

(1) A written analysis, including a recommended course of action for avoiding, neutralizing, or mitigating the conflict, based on the general rules in 9.505 or on another basis not expressly stated in that section;

(2) A draft solicitation provision (see 9.507–1); and

(3) If appropriate, a proposed contract clause (see 9.507–2).

(c) The approving official shall—

(1) Review the contracting officer's analysis and recommended course of action, including the draft provision and any proposed clause;

(2) Consider the benefits and detriments to the Government and prospective contractors; and

(3) Approve, modify, or reject the recommendations in writing.

(d) The contracting officer shall—

(1) Include the approved provision(s) and any approved clause(s) in the solicitation or the contract, or both;

(2) Consider additional information provided by prospective contractors in response to the solicitation or during negotiations; and

(3) Before awarding the contract, resolve the conflict or the potential conflict in a manner consistent with the approval or other direction by the head of the contracting activity; and,

(4) Retain all certificates submitted in accordance with the provisions at 52.209–7 and 52.209–8 in the contract file.

(e) If, during the effective period of any restriction (see 9.507), a contracting office transfers acquisition responsibility for the item or system involved, it shall notify the successor contracting office of the restriction, and send a copy of the contract under which the restriction was imposed.

9.507 Solicitation provisions and contract clause.

9.507-1 Solicitation provisions.

(a) As indicated in the general rules in 9.505, significant potential organizational conflicts of interest are normally resolved by imposing some restraint, appropriate to the nature of the conflict, upon the contractor's eligibility for future contracts or subcontracts. Therefore, affected solicitations shall contain a provision that—

(1) Invites offerors' attention to this subpart;

(2) States the nature of the potential conflict as seen by the contracting officer;

(3) States the nature of the proposed restraint upon future contractor activities; and

(4) Depending on the nature of the acquisition, states whether or not the terms of any proposed clause and the application of this subpart to the contract are subject to negotiation.

(b) The contracting officer shall insert the provision at 52.209-7, Organizational Conflicts of Interest Certificate—Marketing Consultants, in solicitations, other than sealed bids, if the contract amount is expected to exceed $200,000.

(c) The contracting officer shall insert the provision at 52.209-8, Organizational Conflicts of Interest Certificate—Advisory and Assistance Services, in solicitations for advisory and assistance services if the contract amount is expected to exceed $25,000.

9.507-2 Contract clause.

(a) If, as a condition of award, the contractor's eligibility for future prime contract or subcontract awards will be restricted or the contractor must agree to some other restraint, the solicitation shall contain a proposed clause that specifies both the nature and duration of the proposed restraint. The contracting officer shall include the clause in the contract, first negotiating the clause's final terms with the successful offeror, if it is appropriate to do so (see 9.508-1(d) of this subsection).

(b) The restraint imposed by a clause shall be limited to a fixed term of reasonable duration, sufficient to avoid the circumstance of unfair competitive advantage or potential bias. This period varies. It might end, for example, when the first production contract using the contractor's specifications or work statement is awarded, or it might extend through the entire life of a system for which the contractor has performed systems engineering and technical direction. In every case, the restriction shall specify termination by a specific date or upon the occurrence of an identifiable event.

9.508, 9.508-1 and 9.508-2 [Removed]

11. Sections 9.508, 9.508-1, and 9.508-2 are removed.

9.509 [Redesignated as 9.508]

12. Section 9.509 is redesignated as 9.508.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

13. Section 52.209-7 is added to read as follows:

52.209-7 Organizational Conflicts of Interest Certificate—Marketing Consultants.

As prescribed in 9.507-1(b), insert the following provision:

Organizational Conflicts of Interest Certificate—Marketing Consultants (OCT 1990)

(a) Definitions.

(1) *Marketing consultant* means any independent contractor who furnishes advice, information, direction, or assistance to an offeror or any other contractor in support of the preparation or submission of an offer for a government contract by that offeror. An independent Contractor is not a marketing consultant when rendering—

(i) Services excluded in subpart 37.2;

(ii) Routine engineering and technical services (such as installation, operation, or maintenance of systems, equipment, software, components, or facilities);

(iii) Routine legal, actuarial, auditing, and accounting services; or

(iv) Training services.

(2) *Organizational conflict of interest* means that because of other activities or relationships with other persons, a person is unable or potentially unable to render impartial assistance or advice to the Government, or the person's objectivity in performing the contract work is or might be otherwise impaired, or a person has an unfair competitive advantage.

(b) In order to comply with the Office of Federal Procurement Policy Letter 89-1, Conflict of Interest Policies Applicable to Consultants, an individual or firm that employs, retains, or engages contractually, one or more marketing consultants in connection with a contract shall submit to the contracting officer, with respect to each marketing consultant, the certificates described below, if the individual or firm is notified that it is the apparent successful offeror.

(c) The certificate must contain the following:

(1) The name of the agency and the number of the solicitation in question.

(2) The name, address, telephone number, and federal taxpayer identification number of the marketing consultant.

(3) The name, address and telephone number of a responsible officer or employee of the marketing consultant who has personal knowledge of the marketing consultants involvement in the contract.

(4) A description of the nature of the services rendered by or to be rendered by the marketing consultant.

(5) The name, address, and telephone number of the client or clients, and the name of a responsible officer or employee of the marketing consultant who is knowledgeable about the services provided to such client(s), and a description of the nature of the services rendered to such client(s), if, based on information provided to the Contractor by the marketing consultant, any marketing consultant is rendering or, in the 12* months preceding the date of the certificate, has rendered services respecting the same subject matter of the instant solicitation, or directly relating to such subject matter, to the Government or any other client (including any foreign government or person).

(6) A statement that the person who signs the certificate for the prime Contractor has informed the marketing consultant of the existence of subpart 9.5 and Office of Federal Procurement Policy Letter 89-1.

(7) The signature, name, title, employer's name, address, and telephone number of the persons who signed the certificates for both the apparent successful offeror and the marketing consultant.

(d) In addition, the apparent successful offeror shall forward to the Contracting Officer a certificate signed by the marketing consultant that the marketing consultant has been told of the existence of subpart 9.5 and Office of Federal Procurement Policy Letter 89-1, and the marketing consultant has made inquiry, and to the best of the consultant's knowledge and belief, the consultant has provided no unfair competitive advantage to the prime Contractor with respect to the services rendered or to be rendered in connection with the solicitation, or that any unfair competitive advantage that, to the best of the consultant's knowledge and belief, does or may exist, has been disclosed to the offeror.

(e) Persons required to certify but who fail to do so may be determined to be nonresponsible. Misrepresentation of any fact may result in suspension or debarment, as well as penalties associated with false certifications or such other provisions provided for by law or regulation.

(End of provision)

* If approved by the head of the contracting activity, this period may be increased up to 36 months.

14. Section 52.209-8 is added to read as follows:

52.209-6 Organizational Conflicts of Interest Certificate—Advisory and Assistance Services.

As prescribed in 9.507–1(c), insert the following provision:

Organizational Conflicts of Interest Certificate—*Advisory and Assistance Services* (OCT 1990)

(a) *Organizational conflict of interest* means that because of other activities or relationships with other persons, a person is unable or potentially unable to render impartial assistance or advice to the Government, or the person's objectivity in performing the contract work is or might be otherwise impaired, or a person has an unfair competitive advantage.

(b) In order to comply with the Office of Federal Procurement Policy Letter 89–1, Conflict of Interest Policies Applicable to Consultants, an offeror notified that it is the apparent successful offeror, shall provide the certificate described in paragraph (c) of this provision.

(c) The certificate must contain the following:

(1) Name of the agency and the number of the solicitation in question.

(2) The name, address, telephone number, and federal taxpayer identification number of the apparent successful offeror.

(3) A description of the nature of the services rendered by or to be rendered on the instant contract.

(4) The name, address, telephone number of the client or client(s), a description of the services rendered to the previous client(s), and the name of a responsible officer or employee of the offeror who is knowledgeable about the services rendered to each client, if, in the 12* months preceding the date of the certification, services were rendered to the Government or any other client (including a foreign government or person) respecting the same subject matter of the instant solicitation, or directly relating to such subject matter. The agency and contract number under which the services were rendered must also be included, if applicable.

(5) A statement that the person who signs the certificate has made inquiry and that, to the best of his or her knowledge and belief, no actual or potential conflict of interest or unfair competitive advantage exists with respect to the advisory and assistance services to be provided in connection with the instant contract, or that any actual or potential conflict of interest or unfair competitive advantage that does or may exist with respect to the contract in question has been communicated in writing to the Contracting Officer or his or her representatives.

(6) The signature, name, employer's name, address, and telephone number of the person who signed the certificate.

(d) Persons required to certify but who fail to do so may be determined to be nonresponsible. Misrepresentation of any fact may result in suspension or debarment, as well as penalties associated with false certifications or such other provisions provided for by law or regulation.

(End of provision)

* If approved by the head of the contracting activity, this period may be increased up to 36 months.

PART 53—FORMS

15. Section 53.302–333 is revised to read as follows:

BILLING CODE 6820-34-M

53.302-353 Procurement Integrity Certification for Procurement Officials.

PROCUREMENT INTEGRITY CERTIFICATION FOR PROCUREMENT OFFICIALS

As a condition of serving as a procurement official, I _____
(typed or printed name)
_____ hereby certify that I am familiar with the provisions of subsections 27(b), (c), and (d) of the Office of Federal Procurement Policy Act (41 USC 423) as amended by section 814 of Public Law 101-189. I further certify that I will not engage in any conduct prohibited by such subsections and will report immediately to the contracting officer any information concerning a violation or possible violation of subsections 27(a), (b), (d), or (f) of the Act and applicable implementing regulations. A written explanation of subsections 27(a) through (f) has been made available to me. I understand that, should I leave the Government during the conduct of a procurement for which I have served as a procurement official, I have a continuing obligation under section 27 not to disclose proprietary or source selection information relating to that procurement and a requirement to so certify.

SIGNATURE OF PROCUREMENT OFFICIAL	DATE
DEPARTMENT OR AGENCY	OFFICE TELEPHONE NUMBER

This form is authorized for use and local reproduction through December 31, 1990.

OPTIONAL FORM 333 (9-90)
Prescribed by GSA - FAR (48 CFR) 53.203(h)

Name of Procurement Official _____ Social Security Number _____

PRIVACY ACT NOTICE TO EMPLOYEES AND OFFICIALS

In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the following notice is provided:

AUTHORITY FOR COLLECTION OF INFORMATION; 41 U.S.C. 423 and Executive Order 9397.

Your signature on the Optional Form 333, Procurement Integrity Certification for Procurement Officials, and disclosure of your Social Security Number on this page, are voluntary, but possible effects upon you if the certification is not signed and the Social Security Number is not provided include the following:

Disqualification from particular work or duty assignments, or from the position for which you have applied or which you currently hold, or other appropriate action, or administrative delay in processing your certification.

Principal purpose for collection of this information:

To obtain and maintain a completed certification from any person designated as a "Procurement official," as defined by 41 U.S.C. 423 and applicable procurement regulations.

Routine uses which may be made of the collected information:

Transfers to Federal, state, local, or foreign agencies when relevant to civil, criminal, administrative, or regulatory investigations or proceedings, including transfer to the Office of Government Ethics in connection with its program oversight responsibilities, or pursuant to a request by any appropriate Federal agency in connection with hiring, retention, or grievance of an employee or applicant, the issuance of a security clearance, the award or administration of a contract, the issuance of a license, grant, or other benefit, to committees of the Congress, or any other use specified by the Office of Personnel Management (OPM) in the system of records entitled "OPM/GOVT-1, General Personnel Records," as published in the Federal Register periodically by OPM.

Title 3—

The President

Proclamation 6208 of October 18, 1990

Crime Prevention Month, 1990

By the President of the United States of America

A Proclamation

During the past 5 years, the United States has made welcome progress in its efforts to combat crime. Nevertheless, even though we have stemmed rising crime rates, we know that the incidence of criminal activity in this country is still much too high. Last year, at least one member of every four families in America was a victim of crime.

More and more Americans are beginning to recognize that, when it comes to preventing crime and apprehending its perpetrators, neither law enforcement agencies nor government can do the job alone—we must all work together. Today many concerned Americans across the country are joining with their neighbors in concerted efforts to fight crime and to improve the quality of life in their communities. These Americans are working with local law enforcement agencies to establish Neighborhood Watch Programs in which citizens remain vigilant against crime and report suspicious activity to police; they are cleaning up vacant lots and other places that seem to attract illicit activity; and they are participating in voluntary home security surveys designed to help residents reduce the opportunity for crime through such simple measures as window locks, improved lighting, and the pruning of shrubbery where criminals might otherwise be able to move about unnoticed. By working together, these Americans are demonstrating the moral resolve and personal commitment necessary to put drug traffickers and other criminals out of business.

Successful crime prevention involves more than vigilance and caution, however; it also requires vision and creativity. For example, by working as partners to prevent illicit drug use, local government officials and concerned citizens can help to avert other related forms of criminal activity and violence. We can also help to prevent crime by promoting positive alternatives to delinquency and drug use among young people and encouraging youths to recognize their personal stake in the quality of their schools and communities. Successful crime prevention thus begins in each and every American home, school, and neighborhood.

For more than a decade, the Crime Prevention Coalition, an association of more than 100 Federal, State, and local agencies and national organizations, has been working to enlist parents, educators, business and community groups, elected officials, and law enforcement personnel in a united effort to fight crime. During October 1990 the Coalition will commemorate the 10th anniversary of McGruff the Crime Dog, the symbol of the National Citizens' Crime Prevention Campaign. This innovative nationwide campaign includes public service advertising and other activities designed to encourage all Americans to help "take a bite out of crime."

In recognition of the National Citizens' Crime Prevention Campaign, the Congress, by Senate Joint Resolution 309, has designated the month of October 1990 as "Crime Prevention Month" and has authorized and requested the President to issue a proclamation in observance of this month.

VOL

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the month of October 1990 as Crime Prevention Month. I call upon all Americans to observe this month with appropriate programs, ceremonies, and activities designed to encourage greater public involvement in crime prevention efforts.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

George Bush

LIST OF PUBLIC LAWS

Last List October 15, 1990

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 523-6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 671/Pub. L. 101-435

Telephone Operator Consumer Services Improvement Act of 1990. (Oct. 17, 1990; 104 Stat. 986; 7 pages) Price: $1.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1989. The CFR volume issued January 1, 1987, should be retained.

[3] No amendments to this volume were promulgated during the period Apr. 1, 1989 to Mar. 30, 1990. The CFR volume issued April 1, 1989, should be retained.

[4] No amendments to this volume were promulgated during the period July 1, 1989 to June 28, 1990. The CFR volume issued July 1, 1989, should be retained.

[5] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[6] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

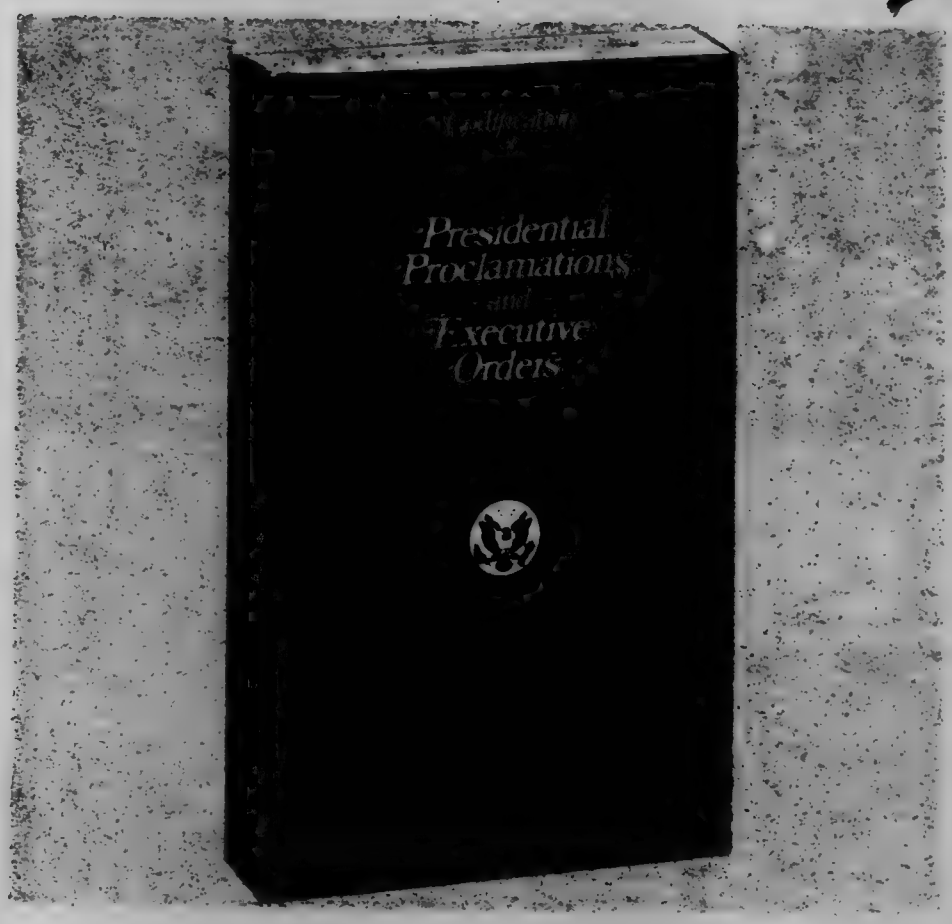
New edition .... Order now !



For those of you who must keep informed about **Presidential Proclamations and Executive Orders**, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Order from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402–9325

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1990

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402–9325.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 55 FR 12345.

Title 3—

The President

Proclamation 6200 of October 19, 1990

National Radon Action Week, 1990

By the President of the United States of America

A Proclamation

Radon is a naturally occurring element that is present in most soils and rocks. When enough radon gas enters a home or other building through cracks and openings commonly found in the foundations of such structures, it may become a health hazard.

High levels of radon in the home are believed to increase residents' risk of developing certain health problems, such as lung cancer. Smokers, former smokers, and children may be especially sensitive to radon exposure.

It is estimated that some level of radon gas can be found in one out of ten homes across the country. Fortunately, however, it is relatively easy to protect families from potentially harmful radon exposure. Radon home test kits are widely available, and factors that allow homes to develop high radon levels can be corrected at moderate costs.

The Environmental Protection Agency and a number of State governments—as well as the American Lung Association, the Advertising Council, and the American Medical Association—have initiated programs to educate the public about radon. Many other concerned agencies and organizations are supporting local efforts to test homes and schools. I join with them in urging Americans to test their homes for radon and to make any necessary modifications to reduce excessive levels of the gas. Radon is a health concern that we can readily address.

The Congress, by Senate Joint Resolution 317, has designated the week of October 14 through October 20, 1990, as "National Radon Action Week" and has authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week of October 14 through October 20, 1990, as National Radon Action Week. I encourage the people of the United States, as well as government officials, to observe this week with appropriate programs and activities designed to enhance public awareness of the risks of excessive radon exposure and ways we can reduce them.

IN WITNESS WHEREOF, I have hereunto set my hand this nineteenth day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

George Bush

Rules and Regulations

Federal Register
Vol. 55, No. 206
Tuesday, October 23, 1990

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 315 and 316

Noncompetitive Appointment of Certain Former Overseas Employees

AGENCY: Office of Personnel Management.

ACTION: Interim regulations with comments requested.

SUMMARY: In order to enhance the well-being of families of U.S. Government military and civilian employees assigned abroad, the U.S. Office of Personnel Management proposes to issue regulations to reduce the length of Federal service (to 12 months) that working family members of U.S. civilian and military personnel assigned overseas must complete in order to qualify for subsequent appointment to career positions when they return to the United States. The regulations also permit eligible individuals to qualify for Stateside appointments until January 1, 1994, or within 3 years of returning to the United States.

DATES: Effective Date: October 23, 1990. Comments must be received on or before December 24, 1990.

ADDRESSES: Send or deliver written comments to Chief, Staffing Policy Division; room 6504; Career Entry and Employee Development Group; Office of Personnel Management; 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Ellen Russell, (202) 606–0960.

SUPPLEMENTARY INFORMATION: A special U.S. Government interest in promoting employment opportunities for family members of United States civilian and military employees assigned overseas was first established by Executive Order 12362 of May 12, 1982. This order allowed family members of U.S. Government military and civilian personnel assigned overseas to qualify for noncompetitive appointment to career civil service positions upon return to the United States, provided they had worked for at least 24 months in overseas local hire positions and met certain other requirements. The service requirement was reduced to 18 months by Executive Order 12585 of March 3, 1987. Executive Order 12721, of July 30, 1990, provides that the Office of Personnel Management may establish requirements under which family members may qualify for this benefit, including determination of the specific amount of overseas employment service family members must complete.

The access to career positions in the United States provided by these authorities has enhanced the well-being of families of U.S. Government military and civilian employees who are assigned to overseas positions. An estimated 20,000 family members have earned career civil service employment through this program in the eight years it has been authorized.

In the last few years, however, developments in overseas areas where U.S. military and civilian employees are assigned have made it increasingly difficult for the family members who accompany them to qualify for the employment benefit provided by this program. Increasingly, in many overseas areas there are simply not enough employment opportunities for all the family members who seek them, and family members are not able to occupy positions long enough to qualify. In a number of countries, political unrest, threats to the U.S. community, and other factors have required that family members be relocated from diplomatic and military posts to the United States or other countries overseas. When this has occurred, family members who had begun working in overseas jobs lost the opportunity to continue their employment and qualify for career appointment in the United States. Agencies which found their employees in this situation have asked the Office of Personnel Management to waive the amount of service required to deal with each of these situations.

Rather than provide individual waivers, OPM is reducing the amount of service required on an across-the-board basis. This will increase the likelihood that family members can benefit from the program and at the same time meet future contingencies without further adjustment. The regulations also permit any family members who have worked at least 12 months at overseas locations in the past, and met other program requirements, to qualify for noncompetitive appointment as long as they are hired before January 1, 1994. This retroactive feature is designed primarily to benefit family members who in recent years have been relocated to the United States before they completed the service required for noncompetitive appointment eligibility.

Waiver of Notice of Proposed Rulemaking

To allow candidates for employment to obtain the benefits of the Executive order in the quickest manner possible, I find that good cause exists to waive the general notice of proposed rulemaking and to make this amendment effective in less than 30 days.

E.O. 12291 Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it only affects Federal employees.

List of Subjects in 5 CFR Parts 315 and 316

U.S. Office of Personnel Management.
Constance Berry Newman,
Director.

Accordingly, OPM is amending parts 315 and 316 of title 5, Code of Federal Regulations, as follows:

PART 315—CAREER AND CAREER-CONDITIONAL EMPLOYMENT

1. The authority citation for part 315 is revised to read as follows:

Authority: 5 U.S.C. 1302, 3301, and 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218; §§ 315.601 and 315.609 also issued under 22 U.S.C. 3651 and 3652; §§ 315.602 and 315.604 also issued under 5 U.S.C. 1104, Pub. L. 95–454, sec. 3(5); § 315.603 also issued under 5 U.S.C. 8151, Pub. L. 99–416; § 315.605 also issued under E.O. 12034, 43 FR 1917, Jan. 13, 1978; § 315.605 also issued under E.O. 11219, 3

CFR 1984–1988 Comp., p. 306; § 315.607 also issued under 22 U.S.C. 2506, 93 Stat. 371, E.O. 12137, 22 U.S.C. 2506, 94 Stat. 2158; § 315.608 also issued under E.O. 12721; § 315.610 also issued under 5 U.S.C. 3304(d), Pub. L. 99–566; § 315.710 also issued under E.O. 12596, 52 FR 17337; Subpart I also issued under 5 U.S.C. 3321, E.O. 12107.

2. In § 315.608, paragraph (a) introductory text and paragraphs (a)(1), (a)(3), and (a)(6) are revised to read as follows:

§ 315.608 Noncompetitive appointment of certain former overseas employees.

(a) Under the authority of Executive Order 12721, an agency in the executive branch may appoint, noncompetitively to a competitive service position within the United States, an individual who is a citizen of or owes permanent allegiance to the United States and who—

(1) Has accumulated 12 months of creditable overseas service in an appropriated fund position(s) under a local hire appointment(s) within any 10-year period beginning after January 1, 1980;

* * * * *

(3) Was a family member of a civilian employee, a nonappropriated fund employee, or a member of a uniformed service (the sponsor) who was officially assigned to the overseas area and was in this status during the period of creditable overseas service required in paragraph (a)(1) of this section;

* * * * *

(6) Is appointed before January 1, 1994, or within 3 years after returning to the United States from the overseas tour of duty (during which he or she acquired eligibility by meeting the requirements of paragraphs (a)(1) through (4) of this section), or as otherwise authorized under the provisions of paragraph (f) of this section.

* * * * *

PART 316—TEMPORARY AND TERM EMPLOYMENT

4. The authority citation for part 316 is revised to read as follows:

Authority: 5 U.S.C. 3301 and 3302, and E.O. 10577 (3 CFR 1954–1958 Comp., p. 218); § 316.302 also issued under 5 U.S.C 3304(c), 38 U.S.C. 2014, and E.O. 12362, as revised by E.O. 12585; § 316.402 also issued under 5 U.S.C. 3304(c) and 3312, 22 U.S.C. 2506 (93 Stat. 371), E.O. 12137, 38 U.S.C. 2014, and E.O. 12362, as revised by E.O. 12585, and E.O. 12721.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 90-209]

RIN 0579-AA29

Citrus Canker

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule; correction.

SUMMARY: We are correcting an error that appeared in a final rule published September 11, 1990 [55 FR 37442–37453, Docket No. 90–114] and effective on September 18, 1990. The final rule removed all of the State of Florida from quarantine because of citrus canker except for a portion of Manatee County. The description of the quarantined area in § 301.75–4(a) contains a typographical error. On page 37451, first column, line 2, change "Township 23" to read "Township 33".

FOR FURTHER INFORMATION CONTACT: Eddie W. Elder, Chief Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, room 661, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 436–6365.

Done in Washington, DC, this 17 day of October 1990.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 90-24912 Filed 10-22-90; 8:45 am]

BILLING CODE 3410-34-M

7 CFR Part 301

[Docket No. 90-207]

Mexican Fruit Fly

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the Mexican fruit fly regulations by removing a portion of San Diego County, near El Cajon, California, from the list of areas regulated because of the Mexican fruit fly. We have determined that the Mexican fruit fly has been eradicated from this area, and that restrictions are no longer needed to prevent the spread of the Mexican fruit fly into noninfested areas of the United States. The action relieves unnecessary restrictions on the interstate movement of regulated articles from the previously regulated area.

DATES: Interim rule effective October 18, 1990. Consideration will be given only to comments received on or before December 24, 1990.

ADDRESSES: To help ensure that your comments are considered, send an original and three copies of written comments to Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket Number 90–207. Comments received may be inspected at USDA, room 1141, South Building, 14th and Independence Avenue SW., Washington, DC, between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Milton C. Holmes, Senior Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, room 642, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8247.

SUPPLEMENTARY INFORMATION:

Background

The Mexican fruit fly, *Anastrepha ludens* (Loew), is an extremely destructive pest of certain fruits and vegetables. The Mexican fruit fly can cause serious economic losses. The short life cycle of this pest allows the rapid development of serious outbreaks.

The Mexican fruit fly regulations contained in 7 CFR 301.64 *et seq.* (referred to below as the regulations) impose restrictions on the interstate movement of regulated articles from regulated areas in quarantined States in order to prevent the artificial spread of the Mexican fruit fly to noninfested areas. Regulated articles include citrus fruit, avocados, apples, peaches, pears, lemons, limes, plums, prunes, and pomegranates.

Until recently, Texas was the only State quarantined because of the Mexican fruit fly. Then, in a document effective June 28, 1990, and published in the **Federal Register** on July 2, 1990 (55 FR 27180–27182, Docket Number 90–085), we added California to the list of States quarantined because of the Mexican fruit fly and designated as regulated areas in California a portion of Los Angeles County, near Compton, and a portion of San Diego County, near El Cajon.

Based on insect trapping surveys by inspectors of California State and county agencies and by inspectors of Plant Protection and Quarantine, a unit within the Animal and Plant Health Inspection Service, United States

Department of Agriculture, we have determined that the Mexican fruit fly has been eradicated from a portion of San Diego County, near El Cajon. The last finding of Mexican fruit fly in this area was made on May 5, 1990.

Since then, no evidence of Mexican fruit fly infestations has been found in this area. We have determined that Mexican fruit fly no longer exists in this area, and we are therefore removing it from the list of areas in § 301.64–3(c) regulated because of the Mexican fruit fly.

In California, a portion of Los Angeles County, near Compton, remains infested with the Mexican fruit fly.

Emergency Action

James W. Glosser, Administrator of the Animal and Plant Health Inspection Service, has determined that there is good cause for publishing this rule without prior opportunity for public comment. The area in California affected by this document was regulated due to the possibility that the Mexican fruit fly could be spread to noninfested areas of the United States. Since this situation no longer exists, and the continued regulated status of this area would impose unnecessary restrictions on the public, we are taking immediate action to remove the restrictions.

Since prior notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest under these conditions, there is good cause under 5 U.S.C. 553 to make this rule effective upon signature. We will consider comments received within 60 days of publication of this interim rule in Federal Register. After the comment period closes, we will publish another document in the Federal Register, including a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Basied on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived the review process required by Executive Order 12291.

This regulation affects the interstate movement of regulated articles from a portion of San Diego County in California. Within this area there are approximately 121 entities that could be affected, including 70 fruit/produce markets, 30 nurseries, 5 wholesale distributors, and 16 commercial growers of mainly avocados and citrus on approximately 350 acres. These entities comprise less than 1 percent of the total number of similar enterprises operating in the State of California.

The effect of this rule on these entities could be insignificant since most of these small entities handle regulated articles primarily for local intrastate movement, not interstate movement, and the distribution of these articles was not affected by the regulatory provisions we are removing.

Many of these entities also handle other items in addition to the previously regulated articles so that the effect, if any, of this regulation on these entities is minimal. Further, the conditions in the Mexican fruit fly regulations and treatments in the Plant Protection and Quarantine Treatment Manual, incorporated by reference in the regulations, allowed interstate movement of most articles without significant added costs.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rule containes no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (*See* 7 CFR 3015, subpart V).

List of Subjects in 7 CFR Part 301

Agricultural commodities, Incorporation by reference, Mexican fruit fly, Plant diseases, Plant pests, Plants (Agriculture), Quarantine, Transportation.

Accordingly, 7 CFR part 301 is amended as follows:

PART 301—DOMESTIC QUARANTINE NOTICES

1. The authority citation for 7 CFR part 301 continues to read as follows:

Authority: U.S.C. 150bb, 150dd, 150ee, 150ff; 161, 162, and 164–167; 7 CFR 2.17, 2.51, and 371.2(c).

§ 301.64–3 [Amended]

2. In § 301.64–3, paragraph (c) is amended by removing the second paragraph under "California" that begins, "*San Diego County*. That portion of the county, in the El Cajon area * * *".

Done in Washington, DC, this 18 day of October 1990.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 90-24998 Filed 10-22-90; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 37

[Docket No. RM90-15-000]

Generic Determination of Rate of Return on Common Equity for Public Utilities

October 15, 1990.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of benchmark rate of return on common equity for public utilities.

SUMMARY: In accordance with § 37.5 of its regulations, the Federal Energy Regulatory Commission, by its designee, the Director of the Office of Economic Policy, issues the update to the benchmark rate of return on common equity applicable to rate filings made during the period November 1, 1990 through January 31, 1991. This benchmark rate is set at 12.29 percent.

EFFECTIVE DATE: November 1, 1990.

FOR FURTHER INFORMATION CONTACT: Marvin Rosenberg, Office of Economic Policy, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 208–1283.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the Federal Register, the

Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in Room 3308 at the Commission's Headquarters, 941 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no change to the user and may be accessed using a personal computer with a modem by dialing (202) 208–1397. To access CIPs, set your communications software to use 300, 1200, or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this notice will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 3308, 941 North Capitol Street, NE., Washington, DC 20426.

Notice of Benchmark Rate of Return on Common Equity for Public Utilities

Issued October 15, 1990.

On December 28, 1989, the Federal Energy Regulatory Commission (Commission) issued a final rule (Order No. 517) concerning the generic determination of the rate of return on common equity for public utilities.[1] In several earlier rulemaking proceedings, the Commission established a discounted cash flow (DCF) formula to determine the average cost of common equity and a quarterly indexing procedure to calculate benchmark rates of return on common equity for public utilities and codified the formula and procedure at § 37.9 of its regulations.[2] In Order No. 517, the Commission determined that 4.3 percent is an appropriate expected annual dividend growth rate for use in the quarterly indexing procedure during the 12 months beginning February 1, 1990 and that 0.02 percent is an appropriate flotation cost adjustment factor for that period.

The Commission, by its designee, the Director of the Office of Economic Policy, uses the quarterly indexing procedure to determine that the benchmark rate of return on common equity applicable to rate filings made during the period November 1, 1990 through January 31, 1991 is 12.29 percent.

Section 37.9 of the Commission's regulations requires that the quarterly benchmark rate of return be set equal to the average cost of common equity for the jurisdictional operations of public utilities. This average cost is based on the average of the median dividend yields for the two most recent calendar quarters for a sample of 98 utilities. The average yield is used in the following formula with fixed adjustment factors (determined in the most recent annual proceeding) to determine the cost rate:

$k_t = 1.02\ Y_t + 4.32$

where k_t is the average cost of common equity and Y_t is the average dividend yield.

The attached appendix provides the supporting data for this update. The median dividend yields for the sample of utilities for the second and third quarters of 1990 are 7.60 percent and 7.93, respectively. The average yield for those two quarters is 7.81 percent. Use of the average dividend yield in the above formula produces an average cost of common equity of 12.29 percent.

This notice supplements the generic rate of return rule announced in Order No. 517, issued December 28, 1989 and effective on February 1, 1990.

List of Subjects in 18 CFR Part 37

Electric power rates, Electric utilities, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends part 37, chapter I, title 18 of the *Code of Federal Regulations*, as set forth below, effective November 1, 1990.

Richard P. O'Neill,
Director, Office of Economic Policy.

PART 37—GENERIC DETERMINATION OF RATE OF RETURN ON COMMON EQUITY FOR PUBLIC UTILITIES

1. The authority citation for part 37 is revised to read as follows:

Authority: 16 U.S.C. 791a–825r; 42 U.S.C. 7101–7352.

2. In § 37.9, paragraph (d) is revised to read as follows:

§ 37.9 Quarterly indexing procedure.

* * * * *

(d) *Table of Quarterly Benchmark Rates of Return.*

The following table presents the quarterly benchmark rates of return on common equity:

Benchmark applicability period	Dividend increase adjustment factor (a)	Expected growth adjustment factor (b)	Current dividend yield (Y_t)	Cost of common equity (k_t)	Benchmark rate of return
Feb. 1, 1986 to Apr. 30, 1986	1.02	4.54	9.03	13.75	13.75
May 1, 1986 to July 31, 1986	1.02	4.54	8.37	13.06	13.25
Aug. 1, 1986 to Oct. 31, 1986	1.02	4.54	7.49	12.16	12.75
Nov. 1, 1986 to Jan. 31, 1987	1.02	4.54	6.75	11.43	12.25
Feb. 1, 1987 to Apr. 30, 1987	1.02	4.63	6.44	11.20	11.20
May 1, 1987 to July 31, 1987	1.02	4.63	6.54	11.30	11.30
Aug. 1, 1987 to Oct. 31, 1987	1.02	4.63	5.97	11.74	11.74
Nov. 1, 1987 to Jan. 31, 1988	1.02	4.62	7.49	12.27	12.27
Feb. 1, 1988 to Apr. 30, 1988	1.02	4.36	7.90	12.42	12.42
May 1, 1988 to July 31, 1988	1.02	4.36	7.99	12.51	12.51
Aug. 1, 1988 to Oct. 31, 1988	1.02	4.36	7.84	12.36	12.36
Nov. 1, 1988 to Jan. 31, 1989	1.02	4.36	7.92	12.44	12.44
Feb. 1, 1989 to Apr. 30, 1989	1.02	4.33	7.89	12.36	12.36
May 1, 1989 to July 31, 1989	1.02	4.33	7.95	12.44	12.44
Aug. 1, 1989 to Oct. 31, 1989	1.02	4.33	7.94	12.43	12.43
Nov. 1, 1989 to Jan. 31, 1990	1.02	4.33	7.56	12.04	12.04
Feb. 1, 1990 to Apr. 30, 1990	1.02	4.32	7.28	11.75	11.75
May 1, 1990 to July 31, 1990	1.02	4.32	7.38	11.85	11.85
Aug. 1, 1990 to Oct. 31, 1990	1.02	4.32	7.59	12.06	12.06
Nov. 1, 1990 to Jan. 31, 1991	1.02	4.32	7.81	12.29	12.29

[1] Generic Determination of Rate of Return on Common Equity for Public Utilities, Order No. 517, 55 FR 140 (Jan. 3, 1990, FERC Stats. and Regs. ¶ 30,571 (Dec. 28, 1989).

[2] 18 CFR 37.9 (1990). The most recent adoption of the DCF formula and quarterly indexing procedure came in Order No. 489, 53 FR 3342 (Feb. 5, 1988).

Note: The Appendix will not be published in *Code of Federal Regulations.*

Appendix

Exhibit No. and Title

1—Initial sample of utilities
2—Utilities excluded from the sample for the indicated quarter due to either zero dividends or a reduction in dividends for this quarter or the prior three quarters
3—Annualized dividend yields for the indicated quarter for utilities retained in the sample

Source of Data: Standard and Poor's Compustat Services, Inc., COMPUSTAT PC UTILITY II Data Base.

BILLING CODE 8717-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 14

Standing Advisory Committees; Editorial Amendments

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is making editorial amendments to certain of its regulations on standing advisory committees to improve the accuracy of the regulations.

EFFECTIVE DATE: October 23, 1990.

FOR FURTHER INFORMATION CONTACT: Robin F. Thomas, Office of Regulatory Affairs (HFC-222), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2904.

SUPPLEMENTARY INFORMATION: FDA is amending certain of its regulations on standing advisory committees to improve the accuracy of the regulations.

21 CFR 14.31(e) is amended to state that FDA may draw consultants from other agencies of the Department of Health and Human Services as well as from other agencies. Section 14.40(b) is amended to clarify that the 15-day notice in the **Federal Register** does not apply to notices of advisory committee charter renewals. Section 14.100 is amended by revising paragraphs (d)(1)(i)(B) through (d)(1)(xvi)(B) to indicate that the panels review and evaluate data on the safety and effectiveness of marketed and investigational devices and make recommendations for their regulation.

The amendments in 21 CFR part 14 are editorial in nature. For this reason, FDA finds for good cause that notice and public procedure are unnecessary (5 U.S.C. 553 (b)(B) and (d)).

List of Subjects in 21 CFR Part 14

Administrative practice and procedure, Advisory committees, Color additives, Drugs, Radiation protection.

Therefore, under the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, and the Freedom of Information Act, and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 14 is amended as follows:

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

1. The authority citation for 21 CFR part 14 continues to read as follows:

Authority: Secs. 201-903 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321-393); 21 U.S.C. 41-50, 141-149, 467f, 679, 821, 1034; secs. 2, 351, 354-360F, 361 of the Public Health Service Act (42 U.S.C. 201, 262, 263b-263n, 264); secs. 2-12 of the Fair Packaging and Labeling Act (15 U.S.C. 1451-1461); 5 U.S.C. App. 2; 28 U.S.C. 2112.

§ 14.31 [Amended]

2. Section 14.31 *Consultation by an advisory committee with other persons* is amended in paragraph (e) by removing "Department of Health and Human Services" and replacing it with "Food and Drug Administration".

3. Section 14.40 is amended by removing the last sentence in paragraph (b) and adding two new sentences to read as follows:

§ 14.40 Establishment and renewal of advisory committees.

* * * * *

(b) * * * A notice of establishment will be published at least 15 days before the filing of the advisory committee charter under paragraph (c) of this section. A notice of renewal does not require the 15-day notice.

* * * * *

§ 14.100 [Amended]

4. Section 14.100 *List of standing advisory committees* is amended by removing the phrase "devices currently in use" each time it appears and replacing it with "marketed and investigational devices" in paragraphs (d)(1)(i)(B), (d)(1)(ii)(B), (d)(1)(iii)(B), (d)(1)(iv)(B), (d)(1)(v)(B), (d)(1)(vi)(B), (d)(1)(vii)(B), (d)(1)(viii)(B), (d)(1)(ix)(B), (d)(1)(x)(B), (d)(1)(xi)(B), (d)(1)(xii)(B), (d)(1)(xiii)(B), (d)(1)(xiv)(B), (d)(1)(xv)(B), and (d)(1)(xvi)(B).

Dated: October 17, 1990.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 90-25042 Filed 10-22-90; 8:45 am]

BILLING CODE 4160-01-M

21 CFR Part 558

New Animals Drugs for Use in Animal Feeds; Monensin

AGENCY: Food and Drug Administration HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to correct an omission made at the time of approval of a supplemental new animal drug application (NADA) filed by Elanco Products Co. (March 26, 1990; 55 FR 11012). The supplemental NADA provides for continuous feeding Type C medicated feed containing monensin to growing turkeys. The approval should have provided for the use of a 60 gram-per-pound Type A medicated article in addition to the use of a 45 gram-per-pound Type A medicated article.

EFFECTIVE DATE: March 26, 1990.

FOR FURTHER INFORMATION CONTACT: Dianne T. McRae, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6213.

SUPPLEMENTARY INFORMATION: In the Federal Register of March 28, 1990 (55 FR 11012), FDA published the approval of supplemental NADA 130-736 filed by Elanco Products Co., a division of Eli Lilly and Co., Lilly Corporate Center, Indianapolis, IN 46285. The supplement provides for the continuous feeding of monensin for treatment of coccidiosis in turkeys. The approval regulation provided for the use of 45 gram-per-pound monensin Type A medicated article for manufacture of the Type C medicated feed. Following publication, the firm pointed out that NADA 130-736 incorporated information from NADA 38-878 which also provided for the use of a 60 gram-per-pound monensin Type A medicated article and therefore, the published approval should have also provided for use of the 60-gram-per-pound Type A medicated article. Upon further review, the agency agrees, and therefore is publishing a correction.

The freedom of information summary and the environmental assessment which were made available at the time of the approval of the supplemental apply to both concentrations of the medicated article. Similarly, the 3 years of exclusive marketing which was granted effective March 28, 1990, applies to both concentrations of the medicated article.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: Secs. 512, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b, 371).

2. Section 558.355 is amended by revising paragraphs (b)(4), (b)(5), (b)(6), (b)(7), (b)(8), (b)(9), (b)(11), and (b)(12) to read as follows:

§ 558.355 Monensin.

* * * * *

(b) * * *

(4) To 000986: 45 and 60 grams per pound, as monensin sodium, paragraph (f)(2) of this section.

(5) To 000007: 45 and 60 grams per pound, as monensin sodium provided by No. 000986, paragraphs (f)(1)(xiii), (f)(1)(xx), and (f)(1)(xxi) of this section.

(6) To 000986: 45 and 60 grams per pound, as monensin sodium, paragraph (f)(5) of this section.

(7) To 000986: 20, 30, 45 and 60 grams per pound, as monensin sodium, paragraph (f)(3) of this section.

(8) To 010042: 45 and 60 grams per pound, as monensin sodium provided by No. 000986, paragraph (f)(1)(xiv) of this section.

(9) To 011716: 45 and 60 grams per pound, as monensin sodium provided by No. 000986, paragraphs (f)(1)(xv), (xvi), and (xvii) of this section.

* * * * *

(11) To 046573: 45 and 60 grams per pound, as monensin sodium provided by No. 000986, paragraphs (f)(1)(xviii), (xix), (xxiii), and (xxiv) of this section.

(12) To 000069: 45 and 60 grams per pound, as monensin sodium provided by No. 000986, paragraph (f)(1)(xxii) of this section.

* * * * *

Dated: October 3, 1990.

Robert C. Livingston,

Director, Office of New Animal Drug Evaluation Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8317]

RIN 1545-AP12

Minimum Funding Requirements—Plan Restoration

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations that add a new § 1.412(c)(1)-3T to the regulations governing the minimum funding requirements for qualified plans under section 412 of the Internal Revenue Code. The temporary regulation supplements the existing regulations by providing rules for the treatment of plans that are being or have been terminated pursuant to section 4041(c) or 4042 of and are restored to their sponsoring employers by order of the Pension Benefit Guaranty Corporation ("PBGC") pursuant to section 4047 of the Employee Retirement Income Security Act of 1974 ("ERISA"). The temporary regulation was developed simultaneously with a new regulation issued by the Pension Benefit Guaranty Corporation under section 4047 of ERISA.

These rules are needed because plan restoration raises unique issues under section 412 but the existing regulations do not provide guidance for the treatment of the funding standard account of a restored plan. The funding standard account of a plan that has been restored must be reestablished because the funding standard account of the plan will have been closed out at the time of termination and there will generally be a hiatus during which no contributions will have been made to the plan.

The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking published in the proposed rules portion of this issue of the Federal Register. These regulations will provide the public with guidance necessary to comply with the law. They will affect sponsors of and participants in tax-qualified retirement plans.

EFFECTIVE DATE: The regulations are effective October 23, 1990, and thus apply for the plan valuation for the first plan year beginning on or after the later of October 23, 1990, or the date of a PBGC restoration order applicable to the plan.

FOR FURTHER INFORMATION CONTACT: Michael J. Roach at telephone 202-566-6260 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document adds new § 1.412(c)(1)-3T to part 1 of title 26 of the Code of Federal Regulations. The document addresses the relationship between the funding requirements of section 412 of the Internal Revenue Code and the restoration provisions of section 4047 of the Employee Retirement Income Security Act of 1974 ("ERISA"). The relationship between the minimum funding requirements of section 412 and the restoration provisions of section 4047 of the Employee Retirement Income Security Act of 1974 ("ERISA") is one aspect of a long history of statutory interrelationship and coordination that has characterized the development of pension law in this area since the enactment of ERISA. The plan termination insurance program administered by the Pension Benefit Guaranty Corporation ("PBGC") for the protection of participants in defined benefit plans is one of the cornerstones of the congressional policy underlying ERISA. See H.R. Rep. No. 93-807, 93d Cong., 2d Sess., 13. The establishment of

a program of plan termination insurance is predicated on the existence of adequate minimum funding requirements to assure that employers will, in general, fund their pension obligations in a timely manner. During the legislative development of ERISA, Congress reviewed the minimum funding requirements of pre-ERISA law and found them inadequate because, *inter alia*, they did not require the sponsor of a qualified defined benefit plan to contribute sufficient amounts to amortize the principal amount of the unfunded past service liabilities of the plan. H.R. Rep. No. 93–807, 93d Cong., 2d Sess., 73–74.

Accordingly, as part of the overall reform of the pension laws in ERISA, Congress raised the minimum funding standards applicable to qualified plans and required plans to establish and maintain a funding standard account to protect plan participants and the plan termination insurance program. The charges and credits to the funding standard account are prescribed in section 412(b) of the Internal Revenue Code. Additional minimum funding provisions requiring employers to make deficit reduction contributions were added with the enactment of section 412(l) of the Internal Revenue Code as part of the Omnibus Budget Reconciliation Act of 1987 ("OBRA 1987"), Public Law No. 100–203. This additional funding requirement was adopted in substantial part to protect the plan termination insurance system administered by the PBGC from large claims resulting from the termination of underfunded plans. H.R. Rep. No. 100–391 (Vol. II), 100th Cong., 1st Sess., 984.

Section 4047 of ERISA authorizes the PBGC to restore a terminated pension plan to its sponsoring employer whenever the PBGC determines that this action is appropriate and consistent with its duties under title IV of ERISA. In any case in which the PBGC determines that a plan that is being terminated should be restored, it is authorized under section 4047 "to cease any activities undertaken to terminate the plan, and to take whatever action is necessary and within its power to restore the plan to its status prior to the determination that the plan was to be terminated." Similarly, in the case of a plan that has been terminated, the PBGC is authorized in any case in which it determines this action to be appropriate and consistent with its duties under title IV, "to take such action as may be necessary to restore the plan to its pretermination status, including, but not limited to, the transfer to the employer or a plan administrator of control of part or all of the remaining assets and liabilities of the plan."

The legislative history of section 4047 of ERISA demonstrates that Congress intended to confer broad authority on the PBGC to control the details of plan restorations. The purpose of section 4047 is explained as follows in the conference report to ERISA (H.R. Conf. Rep. No. 93–1280, 93d Cong., 2d Sess. 378–379:

Restoration of plans

Neither the House bill nor the Senate amendment had any specific provision that procedures against a plan in the termination phase might be abandoned by the corporation if the employer and plan enjoyed a favorable reversal of business trends, or if some other factor made termination no longer advisable.

Under the conference substitute, the corporation may cease any termination activities and do what it can to restore the plan to its former status. As a result, a terminated plan being operated by a trustee as a wasting trust may be restored if, during the period of its operation by the trustee, experience gains or increased funding make it sufficiently solvent. The corporation may, when appropriate, transfer to the employer or plan administrator part or all of the remaining assets and liabilities.

The United States Supreme Court recently upheld the broad authority of the PBGC to restore a pension plan in *PBGC* v. *LTV Corp.*, 110 S.Ct. 2668 [1990].

The restoration of a pension plan presents unique problems with respect to the application of the minimum funding standards of section 412 of the Internal Revenue Code because a restored plan is being or has been terminated and administered as a terminated plan during the time from the date of termination of the plan to the date of the restoration (or its implementation). During this interval, the funding standard account will have ceased to apply to the plan beginning with the plan year subsequent to the year in which the termination occurred. See Rev. Rule 79–237, 1979–2 C.B. 190. In addition, during the period between the dates of termination and restoration (or its implementation), Schedules B of Form 5500 will not have been completed by the plan actuary, nor will contributions have been made to the plan. When the PBGC acts to restore the plan, the funding standard account must be reestablished and thereafter the funding standard account must be maintained.

The restoration of the plan under section 4047 of ERISA has the effect of retroactively reinstating benefit accruals under the plan because the statute provides for restoration of the plan to its pre-termination status. Because the plan will have been underfunded upon plan termination and because the plan sponsor will ordinarily not have made any contributions to the plan while it was being administered as a terminated plan, the plan is likely to be even more underfunded on restoration. This underfunding will be significantly increased if the plan has been administered as a terminated plan for an extended period of time.

Congress has recognized that, in certain limited cases, the Secretary may by regulation adapt the standards of section 412 to the extent necessary to provide rules for a special group of plans. Thus, for example, Congress expressed its intent to provide flexibility in computing funding requirements for a collectively bargained plan if the collective bargaining agreement under which the plan was funded required the employers contributing to the plan to pay a fixed amount per unit of service or production and if the employers complied with their obligations under the agreement. H.R. Rep. No. 93–1280, 93d Cong., 2d Sess., 295. In order to provide a mechanism for computing the minimum funding requirements based on estimated units of service or production in the case of collectively bargained plans, the Secretary promulgated the shortfall method in § 1.412(c)(1)–2 of the Treasury Regulations. T.D. 7733, 1981–1 C.B. 234.

The rules in these temporary regulations apply to a plan that is being or has been terminated and restored by the PBGC and they provide a restoration method for funding the unfunded liability of the plan that is attributable to plan years prior to the later of the restoration or its implementation. Under this method, the required funding level for these liabilities is established by the PBGC in a restoration payment schedule order for a period that may be as long as 30 years after the beginning of the plan year in which the initial post-restoration valuation date falls.

Establishment of the restoration payment schedule by the PBGC is appropriate because the PBGC will normally have detailed knowledge of the financial condition of the plan sponsor (and its controlled group) of a restored plan, because the PBGC is directly at risk if restoration is ultimately unsuccessful and a restored plan must be re-terminated. It is also appropriate and essential to the effective administration of section 412 that the Secretary prescribe certain limits with respect to the restoration funding schedule in order to ensure that the schedule is consistent with and in

furtherance of the congressional purposes underlying section 412.

Explanation of Provisions

Appropriate provisions for the amortization of the large unfunded liability arising, in part, as a result of the lapse of time between the termination of a plan and the resumption of contributions to it are necessary to implement the PBGC's restoration authority. These regulations provide parameters within which the PBGC shall establish a restoration payment schedule consistent with the orderly restoration of the plan.

The regulations create a special funding method, known as the restoration method, which method adapts the underlying funding method used by the plan to the special circumstances that exist when a plan is restored. The restoration method is applicable only to plans that are being or have been terminated and are then restored by the PBGC. When the PBGC establishes a restoration payment schedule, the Executive Director of the PBGC must certify to the Corporation's Board of Directors, and to the Internal Revenue Service, that the Corporation has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of the deferrals permitted under the temporary regulations), and any other factor that the Corporation deems relevant, and, based on that review, determines that it is in the best interests of participants and beneficiaries of the plan and the pension insurance program that the restored plan not be reterminated.

A plan that is being or has been terminated and restored, must use the restoration method until the initial restoration amortization base has been fully amortized. Use of the restoration method is permitted without securing prior approval from the Commissioner.

For purposes of applying the restoration method, § 1.412(c)(1)–3T(b) of the regulations creates a special amortization base, known as the initial restoration amortization base, consisting of the unfunded liability of the plan as of the valuation for the plan year in which the initial post restoration valuation date falls, based upon the assets and liabilities restored by the PBGC. This initial restoration amortization base must be amortized over not more than 30 years. During this period, the plan sponsor and any controlled group members must contribute an amount sufficient to satisfy the requirements of section 412 taking into account the plan restoration provisions of this regulation § 1.412(c)(1)–3T. At the end of the period established by the restoration payment schedule, the plan is required to comply with the minimum funding requirements of section 412 of the Internal Revenue Code in the same manner as a plan that had never been terminated and restored.

The PBGC must issue a restoration payment schedule order using the initial restoration amortization base. The factors that the PBGC may consider in prescribing a restoration payment schedule to amortize the initial restoration amortization base include but are not limited to the following: (1) The need for the plan to make an orderly transition from terminated status to ongoing status as a restored plan, and (2) the need for the plan sponsor and its controlled group members to have sufficient time to fund the accrued liabilities of the plan arising from prerestoration service, (3) the interests of plan participants and beneficiaries, (4) the financial condition of the plan, (5) the financial condition of the plan sponsor and its controlled group members, (6) changes in the law affecting the funding requirements applicable to the restored plan, (7) the length of time between the date the plan was terminated and the date of a PBGC restoration order, its implementation, or the restoration payment schedule order, (8) the grounds for the restoration, (9) the risk to the PBGC's plan termination insurance program, and (10) the pre-termination funding history of the plan.

The restoration payment schedule must provide that at the end of no more than 30 years, the entire amount of the initial restoration amortization base will have been amortized. Unlike the amortization bases described in section 412(b) of the Internal Revenue Code, however, the amortization charges need not be in level annual amounts. Nevertheless, at all times the present value of the future amortization charges under the restoration payment schedule must equal the outstanding balance of the initial restoration amortization base and the schedule must provide that at the end of no more than 30 years the entire amount of the initial restoration amortization base will have been fully amortized.

In addition, any restoration payment schedule established pursuant to these regulations must meet certain minimum annual payments and must satisfy certain interim amortization requirements. Under these regulations, the restoration payment schedule must provide for sufficient periodic charges so that the outstanding balance of the initial restoration amortization base at the end of the tenth plan year and at the end of the twentieth plan year of the restoration payment period will not be larger than the outstanding balances that would have remained at the end of the tenth plan year and at the end of the twentieth plan year, respectively, if the initial restoration amortization base had been amortized in level amounts over the restoration payment period. In addition, during each 10-year interval, the restoration payment schedule must require payments that are sufficient to prevent the outstanding balance of the initial restoration amortization base from exceeding the balance at the beginning of the interval.

As is the case with other bases used to amortize unfunded costs of a plan, the charges required under the restoration payment schedule prescribed by the PBGC are charged to the funding standard account of the plan in the year each payment is due. In the event that the plan sponsor or its controlled group members makes contributions in excess of those required, the resulting credit balances will be available to satisfy the charges in subsequent plan years.

The outstanding balance of the initial restoration amortization base must be calculated each year in conformity with the usual actuarial practice applicable to other amortization bases established under section 412(b) of the Internal Revenue Code. In determining the outstanding balance of this base, however, the calculation must be based upon the charges under the restoration payment schedule. Under the regulations, the Pension Benefit Guaranty Corporation may grant a deferral of the payment required under the restoration payment schedule for a particular year, under the conditions and in the manner provided in the regulations.

The normal operation of the funding standard account, and the other provisions of section 412 and the regulations thereunder, are unchanged except as provided in this plan restoration regulation § 1.412(c)(1)–3T. If the actuarial assumptions and methods used in calculating the assets and liabilities of the plan are changed consistent with requirements of section 412(c)(3), and if the change results in a net change to the scheduled payments required to amortize the outstanding balance of the initial restoration amortization base over the remaining years of the restoration payment schedule, the plan must notify the PBGC of the changes so that the PBGC can make any necessary changes to the restoration payment schedule.

When a plan is under the restoration method, the deficit reduction

contribution under section 412(l)(2) of the Internal Revenue Code is composed of the unfunded section 412(l) restoration liability amount plus the unfunded new liability amount. The unfunded section 412(l) restoration liability amount is the amount necessary to amortize the section 412(l) restoration liability in annual installments, not necessarily level, as prescribed by the PBGC over a period of not more than 30 years. During the first 10 years after the initial postrestoration valuation date, the computation of the unfunded section 412(l) restoration liability amount must be made at the valuation interest rate, if that rate is lower than the current liability interest rate determined under section 412(b)(5)(B).

The difference between the unfunded section 412(l) restoration liability amount computed at the current liability rate and the unfunded section 412(l) restoration liability amount computed at the valuation rate must be accumulated during the first 10 years with interest at the current liability rate. This accumulated balance must be charged to the funding standard account of the plan at the end of the tenth plan year, but the PBGC may spread the charging of this amount over the eleventh through the fifteenth plan years, by an appropriate order. This rule is designed to give the PBGC a sufficient amount of flexibility in developing an amortization payment schedule under section 412(l) to enable the employer to meet its funding obligations to the restored plan during the years immediately after the restoration. The unfunded new liability amount is the applicable percentage, as determined under section 412(l)(4)(C), of the difference between the unfunded current liability of the plan and the outstanding balance of the section 412(l) restoration liability of the plan. The section 412(b) restoration payment for each year shall be offset against the deficit reduction contribution for that year, along with any other applicable offset amounts, as provided in section 412 (l)(1)(A)(ii).

When the plan uses a funding method that does not maintain an unfunded liability, *e.g.* the aggregate method, the plan must change to a method that does maintain an unfunded liability. A plan may adopt any acceptable method, i.e. any method that maintains an unfunded liability, subject to the procedures established in Rev. Proc. 85–29, 1985–1 C.B. 561, as extended by Notice 90–63 (October 22, 1990), I.R.B. 43.

The PBGC retains the authority to modify the restoration payment schedule at any time during the period of up to 30 years that the schedule is effective. Any modification must, however, comply with the requirements of the regulation, including the minimum payment requirements and the requirement that the 30-year period not be extended. In addition, the PBGC may conduct a funding review of the plan at any time it deems appropriate. The purpose of a funding review is to determine the progress that the plan is making toward the establishment of an adequate level of funding, to make appropriate adjustments in the restoration payment schedule, and to assure an orderly transition when the restoration method ceases to apply. As part of the annual funding review, the Executive Director of the PBGC must certify to the Corporation's Board of Directors, and to the Internal Revenue Service, that the Corporation has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of the deferrals allowed under the temporary regulations), and any other factor that the Corporation deems relevant, and, based on that review, determines that it is in the best interests of participants and beneficiaries of the plan and the pension insurance program that the restored plan not be terminated.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impractical to issue this Treasury decision with notice and public procedure under subsection (b) or section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Effect on Other Laws

Pursuant to the Reorganization Plan No. 4 of 1978, satisfaction of the restoration method requirements set forth in these regulations will be treated as satisfaction of the minimum funding requirements under section 302 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (ERISA). Failure to make a required payment under the restoration method may be treated by the Secretary of Labor as a failure to meet the minimum funding standard under ERISA section 302 for purposes of the notice required under ERISA section 101(d).

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and therefore, a Regulatory Flexibility Analysis is not required.

Drafting Information

The principal author of these temporary regulations is Michael J. Roach of the Office of Assistant Chief Counsel (Employee Benefits and Exempt Organizations), Internal Revenue Service. However, other personnel from the Service and the Treasury Department participated in developing the regulations, on matters of both substance and style.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority citation for part 1 continues to read, in part, as follows:

Authority: 26 U.S.C. 7805, * * *.

Par. 2. The following new section is added to part 1 in the appropriate place to read as follows:

§ 1.412(c)(1)–3T. Applying the minimum funding requirements to restored plans (Temporary).

(a) *In general*—(1) *Restoration method.* The restoration method is a funding method that adapts the underlying funding method of section 412 in the case of certain plans that are or have been terminated and are later restored by the Pension Benefit Guaranty Corporation. The normal operation of the funding standard account, and all other provisions of section 412 and the regulations thereunder, are unchanged except as provided in this § 1.412(c)(1)–3T. Under the restoration method, the Pension Benefit Guaranty Corporation shall determine a restoration payment schedule, extending over no more than 30 years, that replaces all charges and credits to the funding standard account attributable to pre-restoration amortization bases. The restoration payment schedule is determined on the basis of an actuarial valuation of the accrued liability of the plan on the initial post-restoration valuation date less the actuarial value of the plan assets on that date. The initial post-restoration valuation date is the date of the first valuation that falls in the first plan year beginning on or after the later

BEST COPY AVAILABLE

of October 23, 1990, or the date of the restoration order.

(2) *Applicability of restoration method.* A plan must use the restoration method if, and only if:

(i) The plan is being or has been terminated pursuant to section 4041(c) or section 4042 of the Employee Retirement Income Security Act of 1974 [ERISA], and

(ii) The plan has been restored by the Pension Benefit Guaranty Corporation pursuant to its authority under section 4047 of ERISA.

(b) *Computation and effect of the initial restoration amortization base*—(1) *In general.* The initial restoration amortization base is determined under the underlying funding method used by the plan. When the plan uses a spread gain funding method that does not maintain an unfunded liability, the plan must change either to an immediate gain method that directly calculates an accrued liability or to a spread gain method that maintains an unfunded liability. A plan may adopt any cost method that satisfies this requirement and that is acceptable under section 412 and the regulations thereunder, provided that the plan follows the procedures established by the Commissioner for changes in funding methods. The initial restoration amortization base is determined using the valuation for the plan year in which the initial post-restoration valuation date falls. The initial restoration amortization base equals the accrued liability with respect to plan benefit liabilities returned by the Pension Benefit Guaranty Corporation less the value of the plan assets returned by the Pension Benefit Guaranty Corporation. The initial restoration amortization base replaces all prior amortization bases including those under subparagraphs (B), (C), and (D) of section 412(b)(2) and under subparagraph (B) of section 412(b)(3). Any base resulting from a change in funding method is treated as a prior amortization base within the meaning of this paragraph (b). Any accumulated funding deficiency or credit balance in the funding standard account is set equal to zero when the initial restoration amortization base is established.

(2) *Example.* A pension plan uses the calendar year as its plan year, makes its annual periodic valuation as of January 1, and uses the unit credit actuarial cost method for funding purposes. The plan is in the process of being terminated. By order of the Pension Benefit Guaranty Corporation the plan is restored as of July 1, 1991, and a restoration payment schedule order issued on October 31, 1992. The initial post-restoration valuation date is January 1, 1993. If, as of that date, the accrued liability of the plan is $1,000,000 and the value of the plan assets is $200,000, the initial restoration amortization base is $800,000.

(c) *Establishment of a restoration payment schedule*—(1) *Certification requirement.* When the PBGC establishes a restoration payment schedule, the Executive Director of the PBGC must certify to the Corporation's Board of Directors, and to the Internal Revenue Service, that the Corporation has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of deferrals authorized under paragraph (c)(4) of this section), and any other factor that the Corporation deems relevant, and, based on that review, determines that it is in the best interests of participants and beneficiaries of the plan and the pension insurance program that the restored plan not be reterminated.

(2) *Requirements for restoration payment schedule*—(i) *Amortization of base over period of no more than 30 years.* The restoration payment schedule must be prescribed in an order requiring the employer to make stated contributions to the plan sufficient to amortize the initial restoration amortization base over a period extending not more than 30 years after the initial post-restoration valuation date (the restoration payment period). The restoration payment schedule must be sufficient to amortize the entire amount of the initial restoration amortization base by the end of the restoration payment period. The scheduled charges need not be in level amounts, but the present value of the prescribed charges on the initial post-restoration valuation date, computed with interest at the valuation rate, must equal the initial restoration amortization base.

(ii) *Minimum annual charge.* The restoration payment schedule must require annual charges that are sufficient to prevent the outstanding balance of the initial restoration amortization base from exceeding whichever of the following amounts is applicable:

(A) During the first 10 plan years on the restoration payment schedule, the amount of the initial restoration amortization base on the date the base was established, or

(B) During plan years 11 through 20 on the restoration payment schedule, the maximum permitted outstanding balance of the initial restoration amortization base at the end of the tenth plan year, as calculated under paragraph (c)(2)(iii) below, or

(C) During plan years 21 through the end of the restoration payment schedule, the maximum permitted outstanding balance of the initial restoration amortization base at the end of the twentieth plan year, as calculated under paragraph (c)(2)(iii) below.

(iii) *Interim amortization requirements.* The restoration payment schedule must provide for sufficient periodic charges so that the outstanding balance of the initial restoration amortization base at the end of the tenth plan year and at the end of the twentieth plan year of the restoration payment period will not be larger than the outstanding balance that would have remained at the end of the tenth plan year and at the end of the twentieth plan year, respectively, if the initial restoration amortization base had been amortized in level amounts over the restoration payment period at the valuation rate.

(3) *Amendments to the restoration payment schedule.* The order establishing the restoration payment schedule may be amended by the Pension Benefit Guaranty Corporation from time to time with respect to any remaining payments, provided that no amendment may extend the restoration payment period beyond 30 years from the initial post-restoration valuation date, and provided further that the restoration payment schedule, as amended, satisfies the requirements of paragraph (c)(2) of this section.

(4) *Deferral of minimum scheduled annual payment amounts*—(i) *Authority to grant deferral.* Not later than 2½ months following the end of the plan year, the Pension Benefit Guaranty Corporation may grant a deferral of the charges required in the restoration payment schedule for that plan year if the requirements in paragraph (c)(4)(ii) of this section are satisfied. The Pension Benefit Guaranty Corporation may require the plan sponsor and its controlled group members to provide security to the plan as a condition to granting a deferral.

(ii) *Determination of business hardship.* Before granting a deferral under this paragraph (c)(4), the Pension Benefit Guaranty Corporation must make a determination that the granting of the deferral is in the best interests of plan participants and the plan termination insurance system, and that the plan sponsor and its controlled group members are unable to make the scheduled restoration payments without experiencing temporary substantial business hardship. In making these

BEST COPY AVAILABLE

determinations, the factors the Pension Benefit Guaranty Corporation shall consider, include, but are not limited to, the following:

(A) Whether the plan sponsor and its controlled group members are operating at an economic loss,

(B) Whether there is substantial unemployment or underemployment in the trades or businesses of the plan sponsor and its controlled group members,

(C) Whether the sales and profits of the industry or industries are depressed or declining, and

(D) Whether it is reasonable to expect that the plan termination insurance system will suffer a greater loss if the plan is terminated than if it is continued as a restored plan.

(iii) *Amount of deferral.* The amount of the deferral for any particular plan year may not exceed the lesser of the amount that would have been required to be contributed under the restoration payment schedule for that year or interest on the outstanding balance of the initial restoration amortization base for that year. An amortization payment for a deferral granted for a prior plan year may not be deferred. No deferral may extend the overall restoration payment period beyond 30 years.

(iv) *Modification of payment schedule.* The restoration payment schedule must be adjusted to reflect any deferral granted for a plan year in the manner prescribed in this paragraph (c). The charge otherwise specified in the schedule is reduced by the amount of any deferral. The charges under the restoration payment schedule for the subsequent plan years are increased by the amounts in paragraph (c)(4)(v) of this section.

(v) *Amortization of deferred amount.* The amount of any deferral granted by the Pension Benefit Guaranty Corporation for any plan year must be amortized in level amounts over five years or such shorter period as may be prescribed by the Pension Benefit Guaranty Corporation, at the valuation rate, beginning with the plan year following the year of the deferral.

(vi) *Number of deferrals permitted.* The Pension Benefit Guaranty Corporation may not grant more than five deferrals of the minimum scheduled payments as required by this section during the restoration payment period and no more than three of these deferrals may be granted during the first ten years of that period.

(d) *Charging the scheduled restoration charges to the funding standard account.* In addition to any other charges and credits prescribed in the normal operation of the funding standard account under section 412, the amount of each charge specified in the restoration payment schedule shall be charged against the funding standard account of the plan for the plan year to which that payment is attributed in the restoration payment schedule.

(e) *Changes in actuarial assumptions.* If changes in actuarial assumptions increase or decrease the charges that would be required to amortize the outstanding balance of the initial restoration amortization base over the remaining years of the restoration payment schedule, the plan must notify the Pension Benefit Guaranty Corporation of the changes so that it may make appropriate changes to the restoration payment schedule.

(f) *Change to restoration method.* A plan that has been restored must use the restoration method until the initial restoration amortization base has been fully amortized. The use of this method does not require prior approval from the Commissioner. A plan using the restoration method must compute the charges and credits to the initial restoration amortization base in accordance with the order of the Pension Benefit Guaranty Corporation and in accordance with this section.

(g) *Deficit reduction contribution*—(1) *Calculation of deficit reduction contribution.* For any plan using the restoration method, the deficit reduction contribution under section 412(l)(2) is equal to the sum of—

(i) the unfunded section 412(l) restoration liability amount, plus

(ii) the unfunded new liability amount.

(2) *Unfunded section 412(l) restoration liability amount.* The unfunded section 412(l) restoration liability amount is the amount necessary to amortize fully the unfunded section 412(l) restoration liability in installments, as prescribed by the Pension Benefit Guaranty Corporation, over not more than 30 years. The annual amount need not be level, but at all times the present value of the future amortization charges under the restoration payment schedule, at the current liability interest rate, must equal the outstanding balance of the unfunded section 412(l) restoration liability and the schedule must provide that at the end of no more than 30 years the entire amount of the unfunded section 412(l) restoration liability base will have been fully amortized. The schedule prescribed for amortization of the unfunded section 412(l) restoration liability must comply with the requirements imposed in paragraph (c) of this section on the restoration payment schedule, except as provided in paragraph (g)(7) of this section and except that the maximum permitted outstanding balance of the unfunded section 412(l) restoration liability at the end of the tenth plan year must not be greater than the outstanding balance of the section 412(l) restoration liability that would have remained at the end of the tenth plan year if the unfunded section 412(l) restoration liability had been amortized in level amounts over the restoration payment period at the current liability interest rate, increased by the current liability interest rate differential as defined under paragraph (g)(7) of this section. The Pension Benefit Guaranty Corporation may amend the amortization schedule for the unfunded section 412(l) restoration liability subject to the limits on amendments to the amortization schedule prescribed for the initial restoration amortization base.

(3) *Establishment of unfunded section 412(l) restoration liability.* In the plan year in which the initial post-restoration valuation date falls, the unfunded section 412(l) restoration liability is equal to the unfunded current liability of the plan.

(4) *Unfunded new liability amount.* In the case of a plan using the restoration method, the unfunded new liability amount is the applicable percentage, as defined in section 412(l)(4)(C), of the unfunded new liability determined under paragraph (g)(5) of this section.

(5) *Unfunded new liability.* The unfunded new liability of a plan using the restoration method is the unfunded current liability of the plan for the plan year less the outstanding balance of the unfunded section 412(l) restoration liability determined under paragraph (g)(3) of this section and less any unpredictable contingent event benefit liabilities (without regard to whether or not the event has occurred).

(6) *Offset of amortization charges.* The charges specified in the restoration payment schedule to amortize the initial restoration amortization base, must be offset against the deficit reduction contribution in paragraph (g)(1) of this section along with any other applicable amounts provided in section 412(l)(1)(A)(ii).

(7) *Interest rate differential.* During the first 10 plan years after the initial post-restoration valuation date, the unfunded section 412(l) restoration liability amount for the plan as determined for purposes of this section must be sufficient to prevent the outstanding balance of the unfunded section 412(l) restoration liability from exceeding the initial amount of the unfunded section 412(l) restoration liability increased by the current liability interest rate differential. The current liability interest rate differential

at any point during the first ten years of the restoration payment period is the excess if any of the accumulated interest on the unfunded section 412(l) restoration liability amount computed at the current liability interest rate over the accumulated interest on the unfunded section 412(l) restoration liability amount computed at the current liability interest rate for the plan year in which the initial post restoration valuation date falls. The current liability interest rate differential is charged to the funding standard account at the end of the tenth plan year, but the Pension Benefit Guaranty Corporation may, as part of the restoration payment schedule order, or a modification to that order, direct that the charging of this amount must be spread over not more than 5 years, beginning with the eleventh plan year.

(h) *Election of the alternative minimum funding standard.* A plan using the restoration method may not elect the alternative minimum funding standard under section 412(g).

(i) *Funding review by the Pension Benefit Guaranty Corporation.* The Pension Benefit Guaranty Corporation must review the funding of any plan using the restoration method at least once in each plan year. As a result of a funding review, the Pension Benefit Guaranty Corporation may amend the restoration payment schedule as provided in paragraph (c)(3) of this section. As part of the funding review, the Executive Director of the PBGC must certify to the Corporation's Board of Directors, and to the Internal Revenue Service, that the Corporation has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of deferrals authorized under paragraph (c)(4) of this section), and any other factor that the Corporation deems relevant, and, based on that review, determines that it is in the best interests of participants and beneficiaries of the plan and the pension insurance program that the restored plan not be terminated.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

Approved: October 15, 1990.

Kenneth W. Gideon,
Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 4

[T.D. ATF-298; Ref.: Notice No. 699]

Standards of Fill for Wine; New 500 Milliliter Size (90F-324F)

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Final rule; Treasury decision.

SUMMARY: ATF is amending the "standards of fill" regulations to authorize a new bottle size for wine. This will permit wine to be bottled, removed from bond or customs custody, and entered into interstate commerce in containers of 500 milliliters (ml). Formerly, ATF regulations allowed the 500 ml size only for exports and intrastate commerce, but not for interstate commerce. Authorization of this size in interstate commerce will enable the wine industry to respond to consumer demand for an intermediate size between 375 ml and 750 ml.

EFFECTIVE DATE: February 28, 1991.

FOR FURTHER INFORMATION CONTACT: Mr. Steve Simon, Revenue Programs Division, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue NW., Washington, DC 20226; (202) 566-7531.

SUPPLEMENTARY INFORMATION:

Background

ATF regulations in 27 CFR 4.73 provide metric standards of fill for wine. Including the new 500 ml size, the following standards of fill will be provided: 50 ml, 100 ml, 187 ml, 375 ml, 500 ml, 750 ml, 1 liter, 1.5 liters, and 3 liters. Sizes larger than 3 liters are permitted if they are in even-liter quantities (4 liters, 5 liters, 6 liters, etc.). Containers of 18 liters or more are not subject to the standards of fill, but the net contents of such containers must be stated in accordance with 27 CFR 4.37. The standards of fill apply to imported and domestic wine in interstate commerce, but they do not apply to exported wine, or to wine for sale only within a single State (intrastate commerce) pursuant to a certificate of exemption.

Metric standards of fill for wine were first prescribed by Treasury Decision (T.D.) ATF-12 (39 FR 45210, Dec. 31, 1974; corrected at 40 FR 1240, Jan. 7, 1975). The metric standards became mandatory on January 1, 1979. Previous regulations had prescribed 16 different sizes for domestic products (including the 15/16 quart size for aperitif wines) and had exempted imports from all size restrictions. In consequence, there was an excessive proliferation of sizes. This was found to be confusing to consumers. One of the purposes of T.D. ATF-12 was to alleviate this confusion.

In accordance with that purpose, ATF has generally denied requests to add new standards of fill, except where there was a strong showing of need. Several previous requests to add a 500 ml wine size were denied. Nevertheless, on two occasions, the standards of fill for wine were amended to allow additional sizes. T.D. ATF-40 (43 FR 19340, May 9, 1978) allowed even-liter sizes larger than 3 liters and exempted containers of 18 liters or more from the standards of fill. T.D. ATF-76 (46 FR 1725, Jan. 7, 1981) added the 50 ml miniature size, which is used primarily for single servings of dessert wine.

Petition for 500-ml Wine Bottle

Under 27 CFR 71.41(c), any interested person may petition ATF for the issuance, amendment, or repeal of a regulation. The petition must give cogent reasons for the proposed action.

On March 27, 1989, a petition was received from Mr. George Vierra, general partner of Merlion Winery, requesting the establishment of a new 500 ml standard of fill for wine. With the petition, there were supporting statements from 52 wineries and 14 distributors. Subsequently, Mr. Vierra submitted 20 additional supporting statements from persons representing 10 wineries and at least 4 distributors.

Further support for Mr. Vierra's proposal was forthcoming from other sources. About 40 persons—mostly consumers—wrote on their own to express support, and several newspapers and magazines published articles in favor of the proposal.

This demonstration of support indicated that there was significant interest in the use of a 500 ml wine bottle. Therefore, on April 4, 1990, ATF published a notice of proposed rulemaking in the Federal Register (Notice No. 699, 55 FR 12522), which proposed the addition of a 500 ml standard of fill.

Public Comments

Notice No. 699 requested comments from all interested persons concerning the proposed amendment. In response, 280 comments were filed during the comment period. Of this total, only three were opposed to the proposal. The rest were in favor. After the close of the comment period, but not too late for consideration, seven more comments

were received, of which six were in favor and one was opposed.

Those commenters favoring the proposal consisted of 229 consumers, 38 wineries and vineyards, 9 retailers and wholesalers, and 7 others (including 1 bottle manufacturer). The great majority of the comments favoring the proposal were "form letters," sent from many parts of the U.S., reading as follows:

> This letter gives full support to approval of Notice No. 699. The ATF regulation 27 CFR 4.73 should be changed to allow a 500-ml bottle be permitted (sic) in interstate commerce by the BATF. Please expedite this final rule change.

A substantial minority (more than 60) of the comments stated specific reasons, written by the commenters, to explain their support for the proposal. The most common reason (stated by 14 consumers, 7 wineries, 3 U.S. distributors, and 1 foreign exporter) was that a 500 ml bottle would be more appropriate than any currently authorized size for two people to enjoy with a meal. Some of these commenters (eight consumers, one winery, one retailer, and one importer) specifically mentioned the appropriateness of this size in a restaurant setting. A related reason, emphasized by 13 consumers, 6 wineries, 4 distributors, and the foreign exporter, was that the 500 ml size would promote moderation and hence reduce the hazard of "driving while intoxicated." An article by Dan Berger of the Los Angeles Times, submitted by one of the commenters, is instructive in this regard. Mr. Berger wrote:

> California law states that if you are found to have a blood alcohol level of .08 percent, you are considered legally drunk. And the state says if you consume three four-ounce glasses of wine in an hour (length of a standard dinner), you will exceed .08 blood level.

Considering that a 750 ml bottle contains 25.4 ounces, Mr. Berger concluded that drinking half of a 750 ml bottle of wine with dinner "may cause some people to be considered 'legally' drunk."

Another important rationale, advocated by seven consumers, four wineries, an importer, a columnist, and a bottle manufacturer, was that consumers and producers should have freedom of choice to market or purchase the 500 ml size as an additional option. One consumer pressed this argument to the extreme, advocating the elimination of all standards of fill. However, the comments received by ATF in response to Notice No. 683 (52 FR 23665) demonstrate that the overwhelming majority of wine consumers want specific standards of fill. Therefore, in Notice No. 699 (55 FR 3980) the option of eliminating standards of fill was rejected.

Numerous other reasons were cited by commenters in favor of the 500 ml bottle. These included:

—U.S. exporters' markets would be enhanced.
—Limited-production wines could be distributed to 50% more consumers (as compared with the 750 ml bottle).
—Very expensive wines could be offered in a more affordable size.
—Distinctive marketing and bottle appearance would prevent confusion with other sizes.
—The 500 ml size would be appropriate for Americans (who drink less wine than Europeans), and especially for some younger consumers, who are thought to "drink less and drink better."
—Faster aging in the 500 ml bottle than in the 750 ml means that some wines would be ready for consumption sooner.
—Less contact with air would give wines in 500 ml bottles better aging potential, as compared with the 375 ml size.
—For consumers, wine in 375 ml bottles is very expensive on a per-ounce basis.
—For retailers, a smaller investment per case (versus the 750 ml size) would mean more profits and the ability to offer more variety.
—In restaurants, a party of four could buy one 500 ml bottle to share with the appetizer and another, containing a different wine, to enhance the main course.
—Some rare European wines are produced only in the 500 ml size; the new standard of fill would give American consumer access to these wines.

Comments in Opposition

During the comment period, three wine producers submitted comments in opposition to the proposal. They were Joseph E. Seagram & Sons, Inc., Heublein, Inc., and the Clos du Val Wine Company Ltd. They pointed out certain negative impacts of the proposal for producers, distributors, consumers, and the Government. For producers, the main concern was the added expense needed to establish new bottling lines and to handle, warehouse, account for, and advertise the new size. For distributors, the negative impacts foreseen included confusion (as to which size to order or recommend to customers), lack of storage and display space, and advertising expenses. For consumers, the anticipated problems included confusion, lack of demand for a new size, and price increases, resulting in loss of confidence and a bad image for the wine industry. Negative impacts expected for the Government would be the need to spend additional time auditing inventory records, and declining tax revenues if total wine sales should diminish.

After considering these comments, ATF feels that the reasons in favor of the 500 ml size outweigh those adduced against it. ATF has determined that the disadvantages to the Government will be slight or nonexistent. Further, the disadvantages to distributors and consumers, which the opposition commenters anticipated, do not seem to be of great concern to persons actually in those categories, to judge from the comments received in support of the proposal. Finally, the disadvantages to producers did not deter a large number of other wineries from supporting the proposal. Those other wineries apparently felt that the advantages of the proposal would sufficiently offset any disadvantages. ATF notes that the use of the 500 ml bottle size will be at the election of the proprietor.

After the close of the comment period, another comment opposing the proposal was received. This comment, from a wine importer, urged ATF to reject the proposal for the reasons we had cited in our earlier decisions eliminating the 500 ml distilled spirits size and rejecting previous petitions for a 500 ml wine size.

However, as noted in Notice No. 699, there are differences between wine and distilled spirits that support different regulatory treatment. Wine deteriorates more rapidly in an opened bottle, which means that consumers have a greater need to be able to purchase a size that exactly meets their requirements for immediate consumption. Further, distilled spirits bottles come in a greater variety of shapes, which increases the potential for confusion between similar sizes. By contrast, wine bottles generally appear in just a few standard shapes, thus facilitating size comparison. One of the comments supporting the new size included a photograph of a 500 ml wine bottle flanked by a 375 ml bottle and a 750 ml bottle. Each size is readily distinguishable. Therefore, ATF has determined that the reasons for eliminating the 500 ml distilled spirits size are not applicable to wine.

In the denials of previous requests for a 500 ml wine bottle, five reasons were cited, which were: (1) There was no apparent need for this size, since it is fairly close to the authorized 375 ml size. (2) There seemed to be a possibility of consumer deception, due to similarity

with the 375 ml bottle. (3) The standards of fill for wine are generally based on the 750 ml size (most other sizes are even fractions or multiples of this basic size to facilitate easy comparison); a 500 ml size would not fit into this pattern. (4) There was no evidence of significant demand for a 500 ml size. (5) ATF opposed any tendency to return to the "size proliferation" that preceded the establishment of metric standards of fill.

After carefully reviewing the evidence submitted in this rulemaking process, ATF has concluded that these reasons should not be followed. With respect to the first reason, evidence was received concerning the deterioration of wine in opened bottles, the dining habits of couples who consume wine with a meal, and the alcohol level required for legal intoxication. This evidence indicates that there is, in fact, a need for the 500 ml wine bottle. The premise of the second reason (that a 500 ml bottle could be easily confused with other authorized sizes) was denied by the majority of those who addressed this issue. ATF is now persuaded that, in the context of the wine industry, there is no significant danger of consumer confusion. With respect to the third reason, although the 500 ml size is not a multiple of 750 ml, it is exactly half the size of the 1 liter bottle and is also an even multiple or fraction of the 50 ml, 100 ml, 1.5 liter, and 3 liter sizes. As for the fourth reason, the large volume of comments favoring the proposal indicates that there is consumer demand for the 500 ml size. Finally, while ATF remains opposed to "size proliferation," the addition of merely one size will not greatly alter the present situation, and there are many good reasons for allowing this limited expansion.

In conclusion, there appears to be significant demand for a 500 ml size, and the arguments against it have been sufficiently rebutted. Therefore, ATF is prescribing this new size.

Effective Date

The Jordan Winery, while supporting the 500 ml size, requested that the effective date of the change be delayed by one year, so that the American wine industry would have adequate time to prepare. The commenter stated, "European producers already have access to the 500 ml glass bottles and could jump into the U.S. market ahead of our own wine producers if we are not protected by a delayed date of activation."

ATF acknowledges that an adequate lead-in time is appropriate. On the other hand, we question whether a full year is needed for this. No other winery raised this issue, and 2K Packaging Enterprises, Inc., (a wine bottle supplier) stated in its comment: "Such a move (i.e. authorizing the 500 ml bottle) would not pose any particular difficulties from a packaging point of view.

Wineries now bottling the 375 ml and 750 ml bottles would not be confronted with any technical problems should they decide to add the 500 ml bottle to (their) program."

Further, other interests besides those of the wineries must be taken into account. American consumers, importers, and retailers would likely favor an immediate effective date. The form letter submitted by so many consumers stated, "Please expedite this rule change."

In T.D. ATF-146 (48 FR 43319), which authorized the 100 ml and 375 ml sizes for distilled spirits, a delay of approximately 3½ months was provided to "permit industry to make the necessary preparations to bottle and market the new sizes." That delay appears to have been adequate. Accordingly, this Treasury decision will become effective 120 days after the date of publication in the **Federal Register**. The effective date is February 20, 1991.

This effective date means that wine bottled in the 500 ml size shall not be entered into interstate commerce until February 20, 1991. However, this will not preclude an American bottler from bottling wine in the 500 ml size for storage on the premises of the bottling facility, prior to February 20, 1991. Further, any American importer may order shipments in this size and hold them in a Customs bonded warehouse until February 20, 1991. Of course, under 27 CFR 4.50, American bottlers must have certificates of label approval prior to bottling. Although certificates of label approval may be issued for 500 ml containers before February 20, 1991, such bottles shall not be removed from the bottling facility or from customs custody prior to that date. Importers and American bottlers are reminded that previously approved labels may be used on 500 ml bottles without resubmission if the only change is in the net contents.

Effect on Other Sizes

In Notice No. 694, AFT specifically requested comments on the impact of the 500 ml bottle on other authorized sizes. Few comments were received on this issue. One winery (Sutter Home) stated that they anticipated no effect on the 187 ml size. Jordan Winery indicated that 750 ml will remain the most important size, but that the 500 ml size will probably replace the 375 ml size, at least for many products. Jos. E. Seagram & Sons, however, noted that the 375 ml size is "well accepted and appreciated by consumers" and requested that neither this size nor the 187 ml size be eliminated. Accordingly, ATF has no plans at this time to consider eliminating any approved wine bottle sizes.

Other Suggestions

Some commenters included suggestions for additional regulatory changes. One proposed that the 500 ml size be allowed only for wines (such as Hungarian Tokay) that have traditionally been sold only in this size. However, this suggestion would not be fair to producers of other kinds of wine who might want to begin using the 500 ml size. Another commenter proposed that ATF allow the 500 ml size only in returnable bottles. However, ATF does not have legal authority to impose such a requirement.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory analysis (5 U.S.C. 603, 604) are not applicable to this final rule, because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this final rule will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291 of February 17, 1981, ATF has determined that this final rule is not a major rule since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Public Law 96-511, 44 U.S.C. chapter 35, and its implementing regulations, 5 CFR part

1320, do not apply to this final rule because no requirement to collect information is imposed.

Drafting Information

The principal author of this document is Steve Simon of the Revenue Programs Division, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 4

Advertising, Consumer protection, Customs duties and inspection, Imports, Labeling, Packaging and containers, Wine.

Issuance

Accordingly, 27 CFR part 4 is amended as follows:

PART 4—LABELING AND ADVERTISING OF WINE

Paragraph A. The authority citation for part 4 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. B. Section 4.37(b)(1) is revised to read as follows:

§ 4.37 Net contents.

* * * * *

(b) * * *

(1) For the metric standards of fill: 3 liters (101 fl. oz.); 1.5 liters (50.7 fl. oz.); 1 liter (33.8 fl. oz.); 750 ml (25.4 fl. oz.); 500 ml (16.9 fl. oz.); 375 ml (12.7 fl. oz.); 187 ml (6.3 fl. oz.); 100 ml (3.4 fl. oz.); and 50 ml (1.7 fl. oz.).

BILLING CODE 4810-31-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2625

Restoration of Terminating and Terminated Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: The Pension Benefit Guaranty Corporation ("PBGC") is hereby adding a new part 2625 to its regulations relating to certain aspects of section 4047 of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Under ERISA section 4047, the PBGC has authority to restore to ongoing status plans that are being or have been terminated, in any case where PBGC determines that such action is appropriate and consistent with its duties under title IV of ERISA. When PBGC restores a plan, certain incidental legal obligations arise, including various obligations under title IV of ERISA. Title IV is silent, however, as to the interaction of section 4047 and these other provisions. This regulation describes those legal obligations, and provides procedures necessary for the orderly and effective operation of title IV with respect to a restored plan.

EFFECTIVE DATE: October 22, 1990.

FOR FURTHER INFORMATION CONTACT: Ronald Goldstein, Senior Counsel, Office of the General Counsel (Code 22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; telephone 202-778-8850. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

Background

This document adds to the Pension Benefit Guaranty Corporation's regulations (29 CFR, chapter XXVI) a new part 2625 dealing with certain matters incidental to plan restoration pursuant to section 4047 of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Section 4047 of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to restore a terminated pension plan whenever the PBGC determines that this action is appropriate and consistent with its duties under title IV of ERISA. In any case in which the PBGC determines that a plan that is being terminated should be restored, it is authorized under section 4047 "to cease any activities undertaken to terminate the plan, and to take whatever action is necessary and within its power to restore the plan to its status prior to the determination that the plan was to be terminated." Similarly, in the case of a plan that has been terminated, PBGC is authorized in any case in which it determines this action to be appropriate and consistent with its duties under title IV, "to take such action as may be necessary to restore the plan to its pretermination status, including, but not limited to, the transfer to the employer or a plan administrator of control of part or all of the remaining assets and liabilities of the plan."

The legislative history of section 4047 of ERISA demonstrates that Congress intended to confer broad authority on the PBGC to control the details of plan restorations. The purpose of section 4047 is explained as follows in the conference report to ERISA (H.R. Conf. Rep. No. 93-1280, 93d Cong., 2d Sess. 378-379:

Restoration of plans

Neither the House bill nor the Senate amendment had any specific provision that procedures against a plan in the termination phase might be abandoned by the corporation if the employer and plan enjoyed a favorable reversal of business trends, or if some other factor made termination no longer advisable.

Under the conference substitute, the corporation may cease any termination activities and do what it can to restore the plan to its former status. As a result, a terminated plan being operated by a trustee as a wasting trust may be restored if, during the period of its operation by the trustee, experience gains or increased funding make it sufficiently solvent. The corporation may, when appropriate, transfer to the employer or plan administrator part or all of the remaining assets and liabilities.

The United States Supreme Court recently upheld the broad authority of the PBGC to restore a pension plan in *PBGC v. LTV Corp.* 110 S.Ct. 2668 (1990).

The restoration of a pension plan presents unique problems with respect to the application of certain provisions of title IV of ERISA. For example, all plans covered by the PBGC insurance programs are required to pay annual premiums to PBGC, in accordance with ERISA sections 4006 and 4007. Under section 4007(a) of ERISA, PBGC premiums cease to accrue upon the appointment of a trustee for an underfunded plan being terminated under ERISA sections 4041(c) or 4042. Because a plan that is restored under section 4047 is restored to its pretermination status, upon restoration of a plan, PBGC premiums are owed for the period from the date of trusteeship through restoration (or its implementation). Under the PBGC's premium regulation (29 CFR part 2610), which prescribes the rules for determining and paying the premiums, premiums for a plan year are due and

payable within that year. Neither the statute nor the regulation addresses the application of the premium rules in the restoration context.

The PBGC's statutory obligation to pay guaranteed benefits pursuant to ERISA section 4022 arises upon the termination of an underfunded plan. Typically, PBGC itself becomes trustee of the terminated plan and takes control of the plan's assets. As a matter of agency policy established by the PBGC's Board of Directors early in the agency's history, the PBGC pays guaranteed benefits from both plan assets and PBGC's funds (premium payments and other amounts held by the PBGC in the revolving funds established under ERISA section 4005(a)). The PBGC has determined that, consistent with the provisions of title IV of ERISA, when a plan is restored it is not entitled to retain the amounts paid from PBGC's funds pursuant to its guarantee obligation. However, title IV contains no provisions addressing the repayment of these amounts.

The restoration of a pension plan also presents unique problems with respect to the application of the minimum funding standards of section 412 of the Internal Revenue Code ("IRC"). The relationship between the minimum funding requirements of section 412 and the restoration provisions of section 4047 of ERISA is one aspect of a long history of statutory interrelationship and coordination that has characterized the development of pension law in this area since the enactment of ERISA.

The plan termination insurance program administered by the PBGC for the protection of participants in single-employer defined benefit plans is one of the cornerstones of the congressional policy underlying ERISA. See H.R. Rep. No. 93–807, 93d Cong., 2d Sess., 13. The establishment of a program of plan termination insurance is predicated on the existence of adequate minimum funding requirements to assure that employers will, in general, fund their pension obligations in a timely manner. During the legislative development of ERISA, Congress reviewed the minimum funding requirements of pre-ERISA law and found them inadequate because, *inter alia*, they did not require the sponsor of a qualified defined benefit plan to contribute sufficient amounts to amortize the principal amount of the unfunded past service liabilities of the plan. H.R. Rep. No. 93–807, 93d Cong., 2d Sess., 73–74.

Accordingly, as part of the overall reform of the pension laws in ERISA, Congress raised the minimum funding standards applicable to qualified plans and required plans to establish and maintain a funding standard account to protect plan participants and the plan termination insurance program. The charges and credits to the funding standard account are prescribed in IRC section 412(b). Additional minimum funding provisions requiring employers to make deficit reduction contributions were added with the enactment of IRC section 412(1) as part of the Omnibus Budget Reconciliation Act of 1987 ("OBRA 1987"), Public Law 100–203, 101 Stat. 1330–333. This additional funding requirement was adopted in substantial part to protect the plan termination insurance system administered by the PBGC from large claims resulting from the termination of underfunded plans. H.R. Rep. No. 100–391 (Vol. II), 100th Cong., 1st Sess., 994.

Because a restored plan was being or had been terminated and administered as a terminated plan during the time from the date of termination of the plan to the date of the restoration (or its implementation), the funding standard account will have ceased to apply to the plan beginning with the plan year subsequent to the year in which the termination occurred. See Rev. Rul. 79–237, 1979–2 C.B. 190. During the period between the dates of termination and restoration (or its implementation), Schedules B of Form 5500 will not have been completed by the plan actuary, nor will contributions have been made to the plan. When the PBGC acts to restore the plan, the funding standard account must be reestablished and thereafter the funding standard account must be maintained.

The restoration of the plan under section 4047 of ERISA has the effect of reinstating benefit accruals under the plan as of the termination date, because section 4047 provides for restoration of the plan to its pre-termination status. Because the plan will have been underfunded upon plan termination and because the plan sponsor will ordinarily not have made any contributions to the plan while it was being administered as a terminated plan, the plan is likely to be even more underfunded on restoration. This underfunding will be significantly increased if the plan has been administered as a terminated plan for an extended period of time.

Appropriate provisions for the amortization of the large unfunded liability arising, in part, as a result of the lapse of time between the termination of a plan and the resumption of contributions to it are necessary to implement the PBGC's restoration authority. This regulation was developed with new regulations issued by the Internal Revenue Service ("IRS") and the Department of the Treasury under IRC section 412. Both documents address the relationship between the funding requirements of IRC section 412 and the plan restoration provisions of ERISA section 4047. The IRS regulations create a special funding method, known as the restoration method, which adapts the underlying funding method used by the plan to the special circumstances that exist when a plan is restored. A plan that is being or has been terminated and restored must use the restoration method until the initial restoration amortization base, described below, has been fully amortized. The IRS regulations and this regulation provide parameters within which the PBGC shall establish a restoration payment schedule, under the restoration method, consistent with the orderly restoration of the plan.

Briefly, § 1.412(c)(1)–3T(b) of the IRS regulations creates a special amortization base, known as the initial restoration amortization base. This amortization base consists of the unfunded liability of the plan at the valuation for the plan year in which the initial post-restoration valuation date falls, based upon the assets and liabilities returned by the PBGC, and replaces all other amortization bases that previously existed for the plan. This initial restoration amortization base must be amortized over not more than 30 years, pursuant to the restoration payment schedule order issued by PBGC. The restoration payment schedule must provide that at the end of not more than 30 years, the entire amount of the initial restoration amortization base will have been fully amortized. Unlike the amortization bases described in IRC section 412(b), however, the charges to amortize the initial restoration amortization base need not be made in level annual amounts. However, any restoration payment schedule must satisfy certain requirements set forth in the IRS regulations.

The PBGC retains the authority to modify the restoration payment schedule at any time during the period of up to 30 years that the schedule is effective. Any modification must, however, comply with the requirements of the IRS regulations, including the requirement that the 30-year period not be extended. In addition, the PBGC must conduct a funding review of the plan at least once in each plan year and may, as a result of the funding review, amend the restoration payment schedule, subject to the requirements of the IRS regulations.

The establishment of the restoration payment schedule by the PBGC is

appropriate because the PBGC will normally have detailed knowledge of the financial condition of the plan sponsor (and its controlled group) of a restored plan and because the PBGC is directly at risk if the restored plan must be reterminated. New Part 2625 of PBGC's regulations describes generally the procedures for issuance of a restoration payment schedule order under the IRS regulations. Part 2625 also addresses certain other obligations that arise incidental to a plan restoration order by the PBGC, *i.e.*, payment of PBGC premiums, and repayment of amounts expended from PBGC's revolving funds during the period prior to the restoration, and establishes the rules for the prospective satisfaction of these obligations.

The Regulation

Section 2625.2 of this regulation deals with the restoration payment schedule. Pursuant to paragraph (b), whenever the PBGC has restored a plan, it shall issue a restoration payment schedule order establishing the schedule of payments needed to amortize the initial restoration amortization base established in the IRS regulations. Pursuant to the IRS regulations, the schedule must require payments at least annually. PBGC may, however, require more frequent payments.

Concurrent with issuance of the restoration payment schedule order, the PBGC's Executive Director will also certify to the PBGC's Board of Directors and to the IRS that PBGC has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of deferrals as permitted under the IRS regulations), and any other factor that the PBGC deems relevant, and, based on that review, determines that it is in the best interests of the plan's participants and beneficiaries and of the single-employer insurance program that the restored plan not be reterminated (§ 2625.2(c)).

In establishing the restoration payment schedule, the PBGC will consider such factors as: (1) The need for the plan to make an orderly transition from terminated status to ongoing status as a restored plan, (2) the need for the plan sponsor and its controlled group members to have sufficient time to fund the accrued liabilities of the plan arising from pre-restoration service, (3) the interests of plan participants and beneficiaries, (4) the financial condition of the plan, (5) the financial condition of the plan sponsor and its controlled group members, (6) changes in the law affecting the funding requirements applicable to the restored plan, (7) the length of time between the date the plan was terminated and the date of a PBGC restoration order, its implementation, or the restoration payment schedule order, (8) the grounds for the restoration, (9) the risk to the PBGC's plan termination insurance program, and (10) the pre-termination funding history of the plan.

Section 2625.3 prescribes rules for paying PBGC premiums for the period commencing with trusteeship pursuant to the plan's termination through the plan year of restoration (or its implementation). In general, the outstanding premiums shall be computed and paid in accordance with the PBGC's Payment of Premiums regulation (29 CFR part 2610) (and the forms and instructions issued pursuant thereto) as in effect for the plan years for which the premiums are outstanding (§ 2625.3(a)). Pursuant to § 2625.3(b), PBGC will notify the plan administrator of the plan years for which premiums must be paid and provide the plan administrator with the appropriate premium payment forms.

Section 2625.4 of the regulation provides the rules for repayment to the PBGC by the restored plan of amounts paid from the PBGC's revolving fund for guaranteed benefits under the plan while the plan was terminated. Pursuant to paragraph (b) of this section, PBGC shall prescribe reasonable terms and conditions for the payment of this debt. PBGC will establish payment terms thereunder that are protective of the single-employer insurance program while also furthering the goal of plan continuation.

E.O. 12291 and the Regulatory Flexibility Act

The PBGC has determined that this regulation is not a "major rule" for the purpose of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This rule merely describes certain legal obligations that arise incidental to plan restoration under ERISA section 4047, and prescribes procedures relating thereto.

This rule provides the public with needed guidance on the PBGC's interpretation, in the context of other provisions of title IV of ERISA, of section 4047 and certain legal obligations arising incidental to plan restorations under that section. It also establishes procedures to ensure the fair and equitable application of those provisions to plans that have been restored under section 4047 in a manner that is consistent with the overall goals and purposes of title IV of ERISA. The PBGC has therefore determined that the advance notice and public procedure requirements of 5 U.S.C. 553(b) do not apply. In addition, because of the need to provide immediate guidance to the public, and because this regulation does not require any action by members of the public, the PBGC finds that good cause exists for making this rule effective immediately, 5 U.S.C. 553(d)(3).

Because no general notice of proposed rulemaking is required for this regulation, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

List of Subjects in 29 CFR Part 2625

Employee Pension Plans, Pension Insurance and Pensions.

In consideration of the foregoing, subchapter C of chapter XXVI of title 29, Code of Federal Regulations, is hereby amended to add a new part 2625 as follows:

PART 2625—RESTORATION OF TERMINATING AND TERMINATED PLANS

Sec.
2625.1 Purpose and scope.
2625.2 Funding of restored plan.
2625.3 Payment of premiums.
2625.4 Repayment of PBGC payments of guaranteed benefits.

Authority: 29 U.S.C. 1302(b)(3) and 1347.

§ 2625.1 Purpose and scope.

(a) *Purpose.* Section 4047 of the Employee Retirement Income Security Act of 1974, as amended, gives the Pension Benefit Guaranty Corporation broad authority to take any necessary actions in furtherance of a plan restoration order issued pursuant to section 4047. This part (along with Treasury regulation 26 CFR 1.412(c)(1)–3T) describes certain legal obligations that arise incidental to a plan restoration under section 4047. This part also establishes procedures with respect to these obligations that are intended to facilitate the orderly transition of a restored plan from terminated (or terminating) status to ongong status, and to help ensure that the restored plan will continue to be ongoing consistent with the best interests of the plan's participants and beneficiaries and the single-employer insurance program.

(b) *Scope.* This part applies to terminated and terminating single-employer plans (except for plans terminated and terminating under ERISA section 4041(b)) with respect to which the PBGC has issued or is issuing a plan restoration order pursuant to ERISA section 4047.

§ 2625.2 Funding of restored plan.

(a) *General.* Whenever the PBGC issues or has issued a plan restoration order under ERISA section 4047, it shall issue to the plan sponsor a restoration payment schedule order in accordance with the rules of this section. PBGC, through its Executive Director, shall also issue a certification to its Board of Directors and the Internal Revenue Service, as described in paragraph (c) of this section. If more than one plan is or has been restored, the PBGC shall issue a seperate restoration payment schedule order and separate certification with respect to each restored plan.

(b) *Restoration payment schedule order.* A restoration payment schedule order shall set forth a schedule of payments sufficient to amortize the initial restoration amortization base described in paragraph (b) of 26 CFR 1.412(c)(1)–3T over a period extending no more than 30 years after the initial post-restoration valuation date, as defined in paragraph (a)(1) of 26 CFR 1.412(c)(1)–3T. The restorative payment schedule shall be consistent with the requirements of 26 CFR 1.412(c)(1)–3T and may require payments at intervals of less than one year, as determined by the PBGC. The PBGC may, in its discretion, amend the restoration payment schedule at any time, consistent with the requirements of 26 CFR 1.412(c)(1)–3T.

(c) *Certification.* The Executive Director's certification to the Board of Directors and the Internal Revenue Service pursuant to paragraph (a) of this section shall state that the PBGC has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of deferrals as permitted under paragraph (c)(4) of 26 CFR 1.412(c)(1)–3T) and any other factor that the PBGC deems relevant, and, based on that review, determines that it is in the best interests of the plan's participants and beneficiaries and the single-employer insurance program that the restored plan not be reterminated.

(d) *Periodic PBGC review.* As long as a restoration payment schedule order issued under this section is in effect, the PBGC shall review annually the funding status of the plan with respect to which the order applies. As part of this review, the PBGC, through its Executive Director, shall issue a certification in the form described in paragraph (c) of this section. As a result of its funding review, PBGC may amend the restoration payment schedule, consistent with the requirements of paragraph (c)(2) of 26 CFR 1.412(c)(1)–3T.

§ 2625.3 Payment of premiums.

(a) *General.* Upon restoration of a plan pursuant to ERISA section 4047, the obligation to pay PBGC premiums pursuant to ERISA section 4007 is reinstated as of the date on which the plan was trusteed under section 4042 of ERISA. Except as otherwise specifically provided in paragraphs (b) and (c) of this section, the amount of the outstanding premiums owed shall be computed and paid by the plan administrator in accordance with PBGC's Payment of Premiums regulation (29 CFR part 2610) and the forms and instructions issued pursuant thereto, as in effect for the plan years for which premiums are owed.

(b) *Notification of premiums owed.* Whenever the PBGC issues or has issued a plan restoration order, it shall send a written notice to the plan administrator of the restored plan advising the plan administrator of the plan year(s) for which premiums are owed. PBGC will include with the notice the necessary premium payment forms and instructions. The notice shall prescribe the payment due dates for the outstanding premiums.

(c) *Methods for determining variable rate portion of the premium.* In general, the variable rate portion of the outstanding premiums shall be determined in accordance with the premium regulation and forms, as provided in paragraph (a) of this section, except that for any plan year for which Form 5500, Schedule B was not filed because the plan was terminated, the alternative calculation method in § 2610.23(c) may not be used.

§ 2625.4 Repayment of PBGC payments of guaranteed benefits.

(a) *General.* Upon restoration of a plan pursuant to ERISA section 4047, amounts paid by the PBGC from its single-employer insurance fund (the fund established pursuant to ERISA section 4005(a)) to pay guaranteed benefits and related expenses under the plan while it was terminated are a debt of the restored plan. The terms and conditions for payment of this debt shall be determined by the PBGC.

(b) *Repayment terms.* The PBGC shall prescribe reasonable terms and conditions for payment of the debt described in paragraph (a) of this section, including the number, amount and commencement date of the payments. In establishing the terms, PBGC will consider the cash needs of the plan, the timing and amount of contributions owed to the plan, the liquidity of plan assets, the interests of the single-employer insurance program, and any other factors PBGC deems relevant. PBGC may, in its discretion, revise any of the payment terms and conditions, upon written notice to the plan administrator in accordance with paragraph (c) of this section.

(c) *Notification to plan administrator.* Whenever the PBGC issues or has issued a plan restoration order, it shall send a written notice to the plan administrator of the restored plan advising the plan administrator of the amount owed the PBGC pursuant to paragraph (a) of this section. The notice shall also include the terms and conditions for payment of this debt, as established under paragraph (b) of this section.

Issued in Washington, DC this 18th day of October, 1990.

Elizabeth Dole,

Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

Issued on the date set forth pursuant to a resolution of the Board of Directors authorizing its chairman to issue this final rule.

Carol Connor Flowe,

Secretary, Board of Directors, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6982]

List of Communities Eligible for the Sale of Flood Insurance

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of

property located in the communities listed.

EFFECTIVE DATES: The dates listed in the fourth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community or from the National Flood Insurance Program (NFIP) at:

Post Office Box 457, Lanham, Maryland 20706, Phone: (800) 638–7418.

FOR FURTHER INFORMATION CONTACT:

Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646–2717, Federal Center Plaza, 500 C Street, SW., Room 417, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance."

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance and floodplains.

1. The authority citation for part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of Eligible Communities.

State and location	Community No.	Effective date authorization/cancellation of sale of flood insurance in community	Current effective map date

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89-417; RM-6965]

Radio Broadcasting Services; Century, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document, at the request of Ziffle Broadcasting Company, Inc., substitutes Channel 286C3 for Channel 286A at Century, Florida, and modifies its license for Station WKGT(FM) to specify operation on the higher powered channel. *See* 54 FR 40895, October 4, 1989. Channel 286C3 can be allotted to Century in compliance with the minimum distance separation requirements of the Commission's Rules with a site restriction of 7.0 kilometers (4.4 miles) north. The coordinates for Channel 286C3 at Century are North Latitude 31-02-03 and West Longitude 87-16-58. With this action, this proceeding is terminated.

EFFECTIVE DATE: December 3, 1990.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 89-417, adopted September 27, 1990, and released October 18, 1990. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., suite 140, Washington, DC 20037.

47 CFR Part 73

[MM Docket No. 90-396; RM-7189]

Radio Broadcasting Services; Watertown, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document, at the request of Louis D. Bolton, II, substitutes Channel 271C3 for Channel 271A at Watertown, Florida, and modifies the construction permit of Station WQLC(FM) to specify operation on the higher class channel. *See* 55 FR 25853, June 25, 1990. Channel 271C3 can be allotted to Watertown in compliance with the Commission's minimum distance separation requirements with a site restriction of 8.9 kilometers (5.5 miles) northwest, in order to avoid a short-spacing to Station WTRS-FM, Channel 272C2, Dunnellon, Florida. The coordinates for this allotment are North Latitude 30-13-00 and West Longitude 82-41-00. With this action, this proceeding is terminated.

EFFECTIVE DATE: December 3, 1990.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 90-396, adopted September 27, 1990, and released October 18, 1990. DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 642

[Docket No. 900656-0196]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Secretary of Commerce (Secretary) closes the commercial fishery in the exclusive economic zone (EEZ) for king mackerel from the western zone of the Gulf migratory group. The Secretary has determined that the commercial quota for Gulf group king mackerel from the western zone was reached on October 17, 1990. This closure is necessary to protect the overfished Gulf king mackerel resource.

EFFECTIVE DATE: Closure is effective on October 18, 1990, through June 30, 1991.

FOR FURTHER INFORMATION CONTACT: Mark F. Godcharles, 813-893-3722.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic, as amended, was developed by the South Atlantic and Gulf of Mexico Fishery Management Councils (Councils) under authority of the Magnuson Fishery Conservation and Management Act and is implemented by regulations at 50 CFR part 642. Catch limits recommended by the Councils for the Gulf of Mexico migratory group of king mackerel for the current fishing year (July 1, 1990, through June 30, 1991) set the commercial allocation at 1.36 million pounds divided into quotas of 0.94 million pounds for the eastern zone and 0.42 million pounds for the western zone, the same as for the previous fishing year. The boundary between the eastern and western zones is a line directly south from the Florida-Alabama boundary (87°31'06" W. longitude) to the outer limit of the EEZ.

Under § 642.22(a), the Secretary is required to close any segment of the king mackerel commercial fishery when its allocation or quota has been reached, or is projected to be reached, by publishing a notice in the **Federal Register**. The Secretary has determined that the commercial quota of 0.42 million pounds for the western zone of the Gulf migratory group of king mackerel was reached on October 17, 1990. Hence, the commercial fishery for Gulf group king mackerel from the western zone is closed effective October 18, 1990, through June 30, 1991, the end of the fishing year.

Except for a person aboard a charter vessel, during the closure, no person aboard a vessel permitted to fish under a commercial allocation may fish for, retain, or have in possession in the EEZ king mackerel from the western zone. A person aboard a charter vessel may continue to fish for king mackerel in the western zone under the bag limit set forth in § 642.28(a)(1), provided the vessel is under charter and the vessel has an annual charter vessel permit issued under § 642.4(a)(3). A charter vessel with a permit to fish on a commercial allocation is under charter when it carries a passenger who fishes for a fee or when there are more than three persons aboard, including operator and crew. During the closure, king mackerel from the western zone taken in the EEZ, including those harvested under the bag limit, may not be purchased, bartered, traded, or sold. This prohibition does not apply to trade in king mackerel from the western zone that were harvested, landed, and bartered, traded, or sold prior to the closure and held in cold storage by a dealer or processor.

Other Matters

This action is required by 50 CFR 642.22(a) and complies with E.O. 12291.

Authority: 16 U.S.C. 1801 *et seq.*

Proposed Rules

Federal Register
Vol. 55, No. 205
Tuesday, October 23, 1990

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 90-NM-188-AD]

Airworthiness Directives; Boeing Model 707, 727, and 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain Boeing Model 707, 727, and 737–200 series airplanes and to all Boeing Model 737–300, 737–400, and 737–500 series airplanes, which would require inspection; repair, if necessary; and modification of the crew call horn electrical circuits. This proposal is prompted by reports of overheated printed circuit card assemblies caused by electrical short circuit-type failures in the crew call horn. This condition, if not corrected, could result in damage to adjacent circuitry, release of smoke into the airplane, and possible fire.

DATES: Comments must be received no later than December 10, 1990.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM–103, Attention: Airworthiness Rules Docket No. 90–NM–188–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen Slotte, Seattle Aircraft Certification Office, Systems and Equipment Branch, ANM–130S; telephone (206) 227–2797. Mailing address: FAA, Northwest Mountain Region, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 90–NM–188–AD." The post card will be date/time stamped and returned to the commenter.

Discussion

All Boeing Model 737–300, 737–400 and 737–500 series airplanes and certain Model 707, 727 and 737–200 series airplanes contain a warning system which alerts the ground crew, via sounding of the crew call horn, when the Inertial Reference System (IRS) circuitry or Inertial Navigation System (INS) on older models switches to backup battery power or loses equipment cooling. This circuit is tied into the "air/ground relay" and is operational only on the ground.

Since November 1989, there have been 11 reported incidents of heat damaged crew warning system printed circuit card assemblies (PCA) associated with the IRS. The damage was caused by electrical short circuit-type failures in the crew call horn. These short circuit failures caused excessive current to flow through the horn's drive circuitry, which is located on a PCA contained within the Flight Instrument Accessory Unit (FIAU). The current level exceeded the current rating of isolation diodes used in the circuit. These diodes overheated and caused destruction of the PCA on which they were mounted. Although the 11 reported incidents all involved Model 737's, similar circuitry on Boeing Model 707 and 727 series airplanes equipped with IRS/INS could result in this same type of failure on those airplane models.

This condition, if not corrected, could result in damage to adjacent circuitry, release of smoke into the airplane, and possible fire.

Since this condition is likely to exist or develop on other airplanes of these same type designs, an AD is proposed which would require the installation of a 2 ampere thermal circuit breaker electrically located between the IRS/INS crew call horn drive circuitry and the crew call horn in accordance with an FAA-approved modification. This AD would also require inspection for damaged PCA's or other circuitry contained within the FIAU, Integrated Flight System Accessory Unit (IFSAU), and INS Battery Monitor Module, depending on airplane model, and replacement of the damaged circuitry, if necessary.

There are approximately 28 Model 707, 50 Model 727, 9 Model 737–200, 630 Model 737–300, 122 Model 737–400, and 18 Model 737–500 series airplanes of the affected design in the worldwide fleet. It is estimated that no Model 707, 13 Model 727, 2 Model 737–200, 387 Model 737–300, 46 Model 737–400, and 6 Model 737–500 series airplanes of U.S. registry would be affected by this AD (a total of 454 airplanes). It would take approximately 5 manhours per airplane to accomplish the required actions, and the average labor cost would be $40 per manhour. The cost of the required parts is estimated to be $50 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $113,500.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive

Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Aircraft, Air transportation, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised).

Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [AMENDED]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to all Model 737-300, 737-400, and 737-500 series airplanes, prior to line position 1800, certificated in any category.

Also applies to Model 727 series airplanes with the following serial numbers, certificated in any category: 20474, 20808, 20830, 20831, 20832, 20833, 20834, 20835, 21081, 21082, 21103, 21104, 21123, 21124, 21125, 21126, 21127, 21128, 21129, 21228, 21251, 21334, 21367, 21368, 21398, 21458, 21475, 21850.

Also applies to Model 727 series airplanes with the following serial numbers, certificated in any category: 20833, 20862, 20933, 20934, 20935, 20936, 20937, 20938, 20939, 20940, 20941, 20942, 21048, 21080, 21081, 21100, 21101, 21102, 21105, 21106, 21107, 21108, 21228, 21230, 21347, 21348, 21349, 21420, 21427, 21458, 21459, 21460, 21595, 21638, 21644, 21845, 21846, 21847, 21943, 21946, 21957, 21958, 22286, 22352, 22360, 22361, 22362, 22763, 22968, 23062.

Also applies to Model 737-200 series airplanes with the following serial numbers, certificated in any category: 21557, 21613, 21857, 21875, 22080, 22328, 22777, 22778, 22779.

Compliance required within the next 180 days after the effective date of this AD, unless previously accomplished.

To prevent damage to the circuits contained within the Flight Instrument Accessory Unit, Integrated Flight Systems Accessory Unit, or Inertial Navigation System Battery Monitor Module, and to surrounding equipment, accomplish the following:

A. For Model 707 series airplanes:

1. Install a modification to add a 2 ampere thermal circuit breaker electrically located between the crew call horn drive circuitry, located on printed circuit card assembly (part number 60-66243-11) contained within the Flight Instrument Accessory Unit or contained in the Inertial Navigation System Battery Monitor Module (part number 65-36292-192), as applicable, and the crew call horn. The modification must be approved by the Manager, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate.

2. Visually inspect the internal circuitry of the Flight Instrument Accessory Unit or Inertial Navigation System Battery Monitor Module as applicable, for any heat damage. Any component or circuit found to be damaged must be replaced or repaired prior to further flight.

B. For Model 727 series airplanes:

1. Install a modification to add a 2 ampere thermal circuit breaker electrically located between the crew call horn drive circuitry, located on printed circuit card assembly (part number 60-66243-11) contained within the Flight Instrument Accessory Unit, and the crew call horn. The modification must be approved by the Manager, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate.

2. Visually inspect the internal circuitry of the Flight Instrument Accessory Unit for any heat damage. Any component or circuit found to be damaged must be replaced or repaired prior to further flight.

C. For Model 737-200, 737-300, and 737-400 series airplanes:

1. Install a modification to add a 2 ampere thermal circuit breaker electrically located between the crew call horn drive circuitry, located on printed circuit card assembly (part number 60-66243-11) contained within the Flight Instrument Accessory Unit, and the crew call horn. The modification must be approved by the Manager, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate.

2. Visually inspect the internal circuitry of the Flight Instrument Accessory Unit for any heat damage. Any component or circuit found to be damaged must be replaced or repaired prior to further flight.

D. For Model 737-500 series airplanes:

1. Install a modification to add a 2 ampere thermal circuit breaker electrically located between the crew call horn drive circuitry, located on printed circuit card assembly (part number 60-66243-11) contained within the Integrated Flight Systems Accessory Unit, and the crew call horn. The modification must be approved by the Manager, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate.

2. Visually inspect the internal circuitry of the Integrated Flight Systems Accessory Unit for any heat damage. Any component or circuit found to be damaged must be replaced or repaired prior to further flight.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be submitted directly to the Manager, Seattle ACO, and a copy sent to the cognizant FAA Principal Inspector (PI). The PI will then forward comments or concurrence to the Seattle ACO.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

Issued in Renton, Washington, on October 9, 1990.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 90-24094 Filed 10-22-90; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 90-CE-34-AD]

Airworthiness Directives; Cessna Models T310P, T310Q, 320D, 320E, and 320F Airplanes and Models 401, 401A, 401B, 402, 402A, and 402B Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new Airworthiness Directive (AD), which is applicable to certain Cessna 300 and 400 series airplanes and will supersede AD 70-03-04 R1 that currently requires repetitive inspections of the turbocharger turbine stainless steel heat shields. This action would require installation of the turbocharger turbine stainless steel heat shields as terminating action for the repetitive inspections on the 400 series airplanes affected by this AD. The repetitive inspections are still required for the 300 series airplanes, but may be terminated if the replacement action is performed. The FAA's policy on aging commuter class aircraft is to terminate repetitive short interval inspections when improved parts or modifications are available. This action will assure the airworthiness of these airplanes.

DATES: Comments must be received on or before December 12, 1990.

ADDRESSES: Cessna Multi-Engine Service Letter ME72-4, dated March 24, 1972, applicable to this AD, may be obtained from Cessna Aircraft Company, Customer Service, P.O. Box 7704, Wichita, Kansas 67277. This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 90-CE-34-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location

between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT:
Mr. Charles D. Riddle, Aerospace Engineer, Wichita Aircraft Certification Office, Federal Aviation Administration, 1801 Airport Road, room 100, Mid-Continent Airport, Wichita, Kansas 67209, Telephone (316) 946-4427.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report, summarizing each FAA-public contact concerned with the substance of this proposal, will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 90-CE-34-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

Recently, failures involving large transport category airplanes have caused the FAA to reexamine the airworthiness issues related to aging commuter-class airplanes. The continued airworthiness of airplanes normally can be maintained by proper inspection, maintenance, and when necessary, by parts replacement.

The FAA has determined that long-term continued operational safety will be better assured by design changes that remove the source of the problem rather than by repetitive inspection or special operating procedures. Long-term special operating procedures may not provide the degree of safety assurance necessary to maintain operational airworthiness. This determination, along with a better understanding of the human factors associated with numerous continual special procedures, has led the FAA to consider placing less emphasis on special procedures and more emphasis on design improvements.

At an April 1989 public conference, the General Aviation Manufacturers Association (GAMA) and the Regional Airline Association (RAA) recommended 23 separate industry and government actions intended to resolve the aging commuter class airplane issue. Recommendation No. 3 stated: "The FAA should take the lead, working closely with industry, to review existing ADs on all airplanes used in regional air carrier service to determine if repetitive inspections need to be replaced by terminating actions."

In February 1990, the FAA conducted a review of the existing ADs, applicable to Cessna 402 Series airplanes, and identified AD 70-03-04 R1 Amendment 39-5564 (52 FR 5436, February 23, 1987), as one that should be revised to require the installation of an improved part. AD 70-03-04 R1 requires repetitive inspections of the turbocharger turbine housing for cracks, bulging or burned areas on those airplanes equipped with a turbocharger turbine insulation blanket.

Subsequent to the issuance of this AD, Cessna developed turbocharger turbine stainless steel heat shields as an improved method of shielding the turbine. These shields improved the heat dissipation of the turbocharger and thereby increased the turbine housing life. Cessna Multi-Engine Service Letter ME72-4, dated March 24, 1972, sets forth this part replacement.

Since Cessna Multi-Engine Service Letter ME72-4, dated March 24, 1972, presents an available design change where the installation would terminate the repetitive inspections, the FAA is proposing an AD that would require modification on the affected 400 series commuter class airplanes in accordance with this service letter and would supersede AD 70-03-04 R1.

For the purposes of this AD, the 401 and 402 series airplanes are considered commuter class and require a part replacement. The 310 and 320 series airplanes still require repetitive inspections; however if the heat shields are replaced in accordance with Cessna Multi-Engine Service Letter ME72-4, then the repetitive inspections may be terminated.

The compliance time for the proposed modification in paragraph (b) of this proposed AD is 12 months after the effective date. The FAA has determined that a calendar time for compliance is the most desirable method because yearly operational times vary greatly throughout the fleet. According to FAA data, yearly operational times varied from a low of approximately 64 hours time-in-service (TIS) to a high of approximately 2,824 hours TIS.

In light of this, the FAA has determined that using a compliance time based upon hours of TIS is unrealistic from a safety standpoint. Therefore, to maintain continuity and avoid inadvertent grounding of the affected airplanes, compliance based upon calendar time is used.

The FAA has determined there may be as many as 826 of the 400 series airplanes and 816 of the 300 series airplanes affected by the proposed AD. Some of the airplanes affected by the proposed AD have already incorporated the proposed modification, but the FAA does not have a ready means of determining how many have been modified. Accordingly, the following cost estimates are based on the modification of the total fleet.

The cost of installing the turbocharger turbine stainless steel heat shields is estimated to be $1,740 per airplane and the total fleet cost is estimated to be $1,437,240. It would be necessary for a small business entity to own more than two of the affected airplanes to incur a significant cost of compliance with this proposal. Few (less than 33 percent) small business entities affected by the proposal own more than two of the affected airplanes. Therefore, the cost of compliance is so small that the expense of compliance will not have a significant impact on the small business entities operating these airplanes.

The repetitive inspections required on the 300 series airplanes cost approximately $120 per airplane and the total fleet cost is approximately $97,920. Few, if any, small business entities own enough of these airplanes to incur a significant cost impact.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if

promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small business entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Aircraft, Air transportation, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) [Revised Pub. L. 97-449; January 12, 1983]; and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

Cessna: Docket No. 90-CE-34-AD.

Applicability: The following 300 and 400 series airplanes.

Model	Serial No.
T310P	T310P0001 thru T310P0040
T310Q	T310Q0001 thru T310Q0291
320D	320D0001 thru 320D0135
320E	320E0001 thru 320E0116
320F	320F0001 thru 320F0045
401	4010001 thru 4010322
401A	401A0001 thru 401A0122
401B	401B0001 thru 401B0121
402	4020001 thru 4020322
402A	402A0001 thru 402A0129
402B	402B0001 thru 402B0122

Compliance: Required as indicated after the effective date of this AD on those airplanes that have not incorporated Cessna Multi-Engine Service Letter ME72-4, dated March 24, 1972.

To detect incipient failure of turbosupercharger turbine housings installed in the above airplanes, accomplish the following:

(a) Within the next 100 hours time-in-service (TIS), unless already accomplished within the last 100 hours TIS, and thereafter at intervals not to exceed 100 hours TIS, accomplish the following:

(1) Remove the engine top cowling and the turbocharger turbine insulation blanket and visually inspect the complete surface of the turbine housing of the Teledyne Continental Model [TCM] turbocharger assembly Part Number (P/N) 652720 (Aircesearch Industrial Division [AiD] P/N [illegible]) for pitting, scaling, cracks, or bulging areas. Remove the turbocharger insulation blanket in accordance with applicable Cessna Service Manuals.

(2) If pitting, scaling, cracks, or bulging areas are found during the inspection required by paragraph (a) (1) of this AD, prior to further flight replace the defective part with an airworthy part.

(3) If replacement of the blanket is with the stainless steel heat shields in accordance with Cessna Multi-Engine Service Letter ME72-4, dated March 24, 1972, the repetitive inspections may be terminated.

(b) For the 401 and 402 series airplanes, accomplish the following installation within the next 12 calendar months after the effective date of this AD, unless already accomplished:

(1) Install a turbocharger turbine stainless steel heat shield in accordance with Cessna Multi-Engine Service Letter ME72-4, dated March 24, 1972.

(2) The repetitive inspections required in paragraph (a) (1) of this AD may be terminated after the installation required in paragraph (b) (1) of this AD.

(c) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) An alternate method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft certification Office, room 100, 1801 Airport Road, Wichita, Kansas 67209.

NOTE: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and send it to the Manager, Wichita Aircraft Certification Office. All persons affected by this directive may obtain copies of the document referred to herein upon request to the Cessna Aircraft Company, P.O. Box 7704, Wichita, Kansas 67277; or may examine this document at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

This Amendment supersedes AD 72-14-04 R1, Amendment 39-8584.

Issued in Kansas City, Missouri, on October 10, 1990.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 90-CE-35-AD]

Airworthiness Directives; Cessna 310, T310, 320, 401, 402, 411, and 421 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new Airworthiness Directive (AD), which is applicable to certain Cessna 300 and 400 series airplanes and will supersede AD 72-14-06 R1 that currently requires repetitive inspections on the fuel and oil flexible hose lines. This action would require installation of improved fuel and oil flexible hose assemblies in the engine compartment as terminating action for the repetitive inspections on the 401, 402, and 421 series airplanes. The repetitive inspections on the 310, T310, 320, and 411 series airplanes would still be required, but may be terminated if the replacement action is performed. The FAA's policy on aging commuter class aircraft is to terminate repetitive short interval inspections when improved parts or modifications are available. This action would assure the airworthiness of these airplanes.

DATES: Comments must be received on or before December 12, 1990.

ADDRESSES: Cessna Service Information Letters ME68-23, dated November 1, 1968, ME81-17, dated July 10, 1981, and ME81-17, Revision 1, dated November 5, 1982, applicable to this AD, may be obtained from the Cessna Aircraft Company, Customer Service, P.O. Box 7704, Wichita, Kansas 67277. This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 90-CE-35-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. Charles D. Riddle, Aerospace Engineer, Wichita Aircraft Certification Office, Federal Aviation Administration, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209, Telephone (316) 946-4427.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may

be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report, summarizing each FAA-public contact concerned with the substance of this proposal, will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 90-CE-35-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

Recently, structural failures involving large transport category airplanes have caused the FAA to reexamine the airworthiness issues related to aging commuter class airplanes. The continued airworthiness of airplanes normally can be maintained by proper inspection, maintenance, and when necessary, by parts replacement.

The FAA has determined that long-term continued operational safety will be better assured by design changes that remove the source of the problem rather than by repetitive inspection or special operating procedures. Long-term special operating procedures may not provide the degree of safety assurance necessary to maintain operational airworthiness. This determination, along with a better understanding of the human factors associated with numerous continual special procedures, has led the FAA to consider placing less emphasis on special procedures and more emphasis on design improvements.

At an April 1989 public conference, the General Aviation Manufacturers Association (GAMA) and the Regional Airline Association (RAA) recommended 29 separate industry and government actions intended to resolve the aging commuter class airplane issue. Recommendation No. 3 stated: "The FAA should take the lead, working closely with industry, to review existing ADs on all airplanes used in regional air carrier service to determine if repetitive inspections need to be replaced by terminating actions."

In February 1990, the FAA conducted a review of the existing ADs, applicable to Cessna 402 Series airplanes, and identified AD 72-14-06 R1, Amendment 39-1184 (37 FR 13814, July 12, 1972), as one that should be revised to require the installation of an improved part. AD 72-14-06 R1 requires repetitive inspections of the flexible fuel and oil lines in the engine compartment for evidence of leakage and deterioration for the 300 and 400 series airplanes that had not incorporated improved hoses in accordance with Cessna Service Information Letters (SIL) ME81-17, dated July 10, 1981, and ME81-17, Revision 1, dated November 5, 1982.

Therefore, since Cessna SIL ME81-17 and ME81-17, Revision 1present an available design change for these airplanes where the installation would terminate the repetitive inspections, the FAA is proposing an AD that would require modification on the affected commuter class airplanes in accordance with these Service Information Letters and would supersede AD 72-14-06 R1.

For purposes of this AD, the 401, 402, and 421 series airplanes are considered commuter class and would require a mandatory part replacement. The 310, T310, 320 and 411 series airplanes still require repetitive inspections; however, if compliance is made in accordance to Cessna SIL ME81-17 and ME81-17, Revision 1, the repetitive inspections may be terminated.

The compliance time for the proposed modification in paragraph (b) of this AD is 12 months after the effective date. The FAA has determined that a calendar time for compliance is the most desirable method because yearly operational times vary greatly throughout the fleet. According to FAA data, yearly operational times varied from a low of approximately 84 hours time-in-service (TIS) to a high of approximately 2,524 hours TIS.

In light of this, the FAA has determined that using a compliance time based upon hours of TIS is unrealistic from a safety standpoint. Therefore, to maintain continuity and avoid inadvertent grounding of the affected airplanes, compliance based upon calendar time is proposed.

The FAA has determined there may be as many as 2,617 of the 401, 402, and 421 series airplanes and 5,623 of the 310, T310, 320, and 411 series airplanes affected by the proposed AD. Some of the affected airplanes have already incorporated the proposed modification, but the FAA does not have a ready means of determining how many airplanes have been so modified. Accordingly, the following cost estimates are based on the modification of the total fleet.

The cost of installing the improved hose assemblies is estimated to be $3,006 per airplane for the 401 and 402 Series, and $3,143 per airplane for the 421 Series airplanes. The total fleet cost is estimated to be $8,074,401. It would be necessary for a small business entity to own more than one of the affected airplanes to incur a significant cost of compliance with this proposal. Few (less than 33 percent) small business entities affected by the proposal own more than one of the effected airplanes. Therefore, the cost of compliance is so small that the expense of compliance will not have a significant impact on the small entities operating these airplanes.

The inspections required on the 310, T310, 320, and 411 series airplanes are estimated to cost $80 per airplane and the total fleet cost is approximately $401,960. Few, if any, small business entities own enough of these airplanes to incur a significant cost impact.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small business entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) [Revised Pub. L. 97-449, January 12, 1983]; and 14 CFR 11.89.

BEST COPY AVAILABLE

§ 39.13 [AMENDED]

2. Section 39.13 is amended by adding the following new AD:

Cessna: Docket No. 90-CE-2 5-AD.

Applicability: The following 300 and 400 series airplanes:

Model	Serial Number
310, 310B, 310C, 310D.	35000 thru 35259
310F	310-0001 thru 310-0158
310G thru 310Q	310Q0001 thru 310Q1160
310A (U-3A)	36001 thru 36160
310E (U-3B)	310M0001 thru 310M0035
T310P, T310Q	310P0001 thru 310Q1160
320	320-0001 thru 320-0110
320A thru 320F	320A0001 thru 320F0045
401	401-0001 thru 401-0322
401A, 401B	401A0001 thru 401B0221
402	402-0001 thru 402-0322
402A, 402B	402A0001 thru 402B1364
411	411-0001 thru 411-0250
411A	411A0001 thru 411A0300
421	421-0001 thru 421-0200
421A, 421B	421A0001 thru 421B0970

Compliance: Required as indicated after the effective date of this AD on those airplanes that have not incorporated Cessna Service Information Letters ME81-17, dated July 10, 1981 and ME81-17, Revision 1, dated November 5, 1982.

To determine the condition of flammable fluid-carrying hose assemblies in the engine compartment, accomplish the following:

(a) Within the next 50 hours time-in-service (TIS), unless already accomplished within the last 50 hours TIS, and thereafter at intervals not to exceed 50 hours TIS, accomplish the following:

(1) Visually inspect flexible fuel lines as follows:

(i) Pressurize the fuel lines with the boost pump momentarily operating in the prime position. When accomplishing this test, the mixture control should be in the idle cutoff position. While under pressure, examine all hose exteriors in the engine compartment for evidence of leakage such as wetness and fuel stains.

Note 1: After pressure testing fuel hoses, allow sufficient time for excess fuel to drain overboard from the engine manifold before attempting an engine start.

(ii) Examine externally all hoses in the engine compartment for evidence of deterioration or damage such as cracks, cuts, bulges, discoloration, hardness, chafing and excessive wear.

(2) Visually inspect flexible oil lines as follows:

(i) Examine all hose exteriors in the engine compartment for evidence of leakage.

(ii) Examine externally all hoses in the engine compartment for evidence of deterioration or damage such as cracks, cuts, bulges, discoloration, hardness, chafing and excessive wear.

(3) If, as a result of the inspections required by paragraphs (a)(1) or (a)(2) of this AD, leakage or other evidence of deteriorated or damaged hose assemblies is found, prior to further flight replace with an approved serviceable hose assembly.

(4) If replacement of the fuel and oil hose is with an approved hose assembly in accordance with Cessna Service Information Letters ME81-17, dated July 10, 1981 and ME81-17, Revision 1, dated November 5, 1982, the repetitive inspections may be terminated.

Note 2: Cessna Service Letter ME08-23, dated November 1, 1968, and applicable Cessna Service Manuals pertain to paragraph (a) of this AD.

(b) For the affected 401, 402 and 421 Series airplanes, accomplish the following installation within the next 12 calendar months after the effective date of this AD, unless already accomplished:

(1) Install the improved fuel and oil hose assemblies in accordance with Cessna Service Information Service Letters ME81-17, dated July 10, 1981 and ME81-17 Revision No. 1, dated November 5, 1982.

(2) The repetitive inspections required in paragraphs (a)(1) and (a)(2) of this AD may be terminated after the installations required in (b)(1) of this AD.

(c) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) An alternate method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, Room 100, 1801 Airport Road, Wichita, Kansas 67209.

Note 3: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and send it to the Manager, Wichita Aircraft Certification Office. All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Cessna Aircraft Company, P.O. Box 7704, Wichita, Kansas 67277; or may examine these documents at the FAA Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

This Amendment supersedes AD 72-14-06 R1, Amendment 39-1434.

Issued in Kansas City, Missouri, on October 10, 1990.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Staff.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[EE-66-90]

RIN 1545-AP13

Minimum Funding Requirements—Plan Restoration

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the Federal Register, the Internal Revenue Service is issuing temporary regulations relating to the minimum funding requirements of section 412 of the Internal Revenue Code of 1986 as they apply to plans that are restored by the Pension Benefit Guaranty Corporation. The text of those temporary regulations also serves as the text for this Notice of Proposed Rulemaking. These regulations provide the public with guidance necessary to comply with the law. They will affect sponsors of and participants in pension plans covered under title IV of the Employee Retirement Income Security Act ("ERISA").

DATES: Written comments and requests for a public hearing must be delivered or mailed by December 24, 1990.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604 Ben Franklin Station, Attention: CC:CORP:T:R (EE-66-90), Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Michael J. Roach at 202-566-6260 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations in the Rules and Regulations portion of this issue of the Federal Register amend 26 CFR by adding a new § 1.412(c)(1)-3T to part 1 of title 26 of the Code of Federal Regulations to provide guidance with respect to the minimum funding requirements in situations involving plans restored by the Pension Benefit Guaranty Corporation pursuant to its authority in section 4047 of the Employee Retirement Income Security Act of 1974 ("ERISA"). The regulations are proposed to be issued under the authority contained in section 7805 of the Code (26 U.S.C. 7805). For the text of the temporary regulations, see T.D. 8317 published in the Rules and Regulations portion of this issue of the Federal Register.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility

Act [5 U.S.C. chapter 6) do not apply to these regulations, and therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Drafting Information

The principal author of these proposed regulations is Michael J. Roach of the Office of the Assistant Chief Counsel (Employee Benefits and Exempt Organizations), Internal Revenue Service. However, a personnel from other offices of the Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

RIN 1545-AO29

Acquisitions Made To Evade or Avoid Income Tax; Use of Corporate Tax Attributes Following an Ownership Change

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations which provide guidance relating to acquisitions made to evade or avoid income tax under section 269 of the Internal Revenue Code of 1986 (the "Code").

DATES: The public hearing will be held on Monday, December 3, 1990, beginning at 10 a.m. Requests to speak and outlines of oral comments must be received by Monday, November 19, 1990.

ADDRESSES: The public hearing will be held in the IRS Auditorium, Seventh Floor, 7600 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Requests to speak and outlines of oral comments should be submitted to the Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R [CO-77-89], Room 4429, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Bob Boyer of the Regulations Unit, Assistant Chief Counsel (Corporate), 202-566-3235, (not a toll-free number).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is a notice of proposed rulemaking which proposes additions to part 1 of title 26 of the Code of Federal Regulations ("CFR") under sections 269 and 382 of the Code. The proposed regulations provide guidance under sections 269, 382, and 383 relating to acquisitions made to evade or avoid income tax and to the use of pre-change corporate tax attributes following an ownership change with respect to which section 382(l)(5) applies. The proposed regulations appeared in the Federal Register for August 14, 1990 (55 FR 33137).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Monday, November 19, 1990, an outline of the oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 916

Kansas Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; reopening and extension of comment period.

SUMMARY: OSM is announcing receipt of additional revisions pertaining to a previously proposed amendment to the Kansas permanent regulatory program (hereinafter, the "Kansas program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). These revisions pertain to public hearings and minor format and editorial changes. The amendment is intended to revise the State program to be consistent with the corresponding Federal standards, and to clarify ambiguities and improve operational efficiency.

This notice sets forth the times and locations that the Kansas program, proposed amendment to that program, and additional information are available for public inspection, and the reopened comment period during which interested persons may submit written comments on the proposed amendment.

DATES: Written comments must be received on or before 4 p.m., c.s.t. November 7, 1990.

ADDRESSES: Written comments should be mailed or hand delivered to Jerry R. Ennis at the address listed below.

Copies of the Kansas program, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Kansas City Field Office.

Jerry R. Ennis, Director, Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 934

Wyandotte, room 500, Kansas City, MO 64105, Telephone: (816) 374-6405.
Kansas Department of Health and Environment, Surface Mining Section, Shirk Hall, 4th Floor, 1501 S. Joplin, P.O. Box 1418, Pittsburg, KS 66762, Telephone: (316) 231-8515.

FOR FURTHER INFORMATION CONTACT: Jerry R. Ennis, Director, Kansas City Field Office (816) 374-6405.

SUPPLEMENTARY INFORMATION:

I. Background on the Kansas Program

On January 21, 1981, the Secretary of the Interior conditionally approved the Kansas program. General background information on the Kansas program, including the Secretary's findings, the disposition of comments, and the conditions of approval of the Kansas program can be found in the January 21, 1981, Federal Register (46 FR 5892). Subsequent actions concerning Kansas' program and program amendments can be found at 30 CFR 916.12, 916.15, and 916.16.

II. Proposed Amendment

By letter dated June 23, 1989 (Administrative Record No. KS-436), Kansas submitted a proposed amendment to its program pursuant to SMCRA. Kansas submitted the proposed revisions (1) in response to an October 21, 1988, letter that OSM sent in accordance with 30 CFR 732.17(c) requiring certain provisions of the State program to be updated for consistency with the Federal regulations through July 1, 1988, and to satisfy anticipated deficiencies in the State program through July 1, 1988, (2) in response to a May 11, 1989, letter that OSM sent in accordance with 30 CFR 732.17(c) concerning ownership and control, and (3) at the State's own initiative to improve its program.

The regulations that Kansas proposes to amend are: Kansas Administrative Regulations (K.A.R.) 47-1-1, Title; 47-1-2, Communication; 47-1-4, Sessions; 47-1-6, Petitions to Initiate Rulemaking; 47-1-8, Notice of Citizen Suits; 47-1-1-0, General Notice Requirement; 47-1-11, Permittee Preparation and Submission of Reports; 47-2-14, Complete and Accurate Application Defined; 47-2-21, Employee Defined; 47-2-53, Regulatory Authority or State Regulatory Authority Defined; 47-2-67, Surety Bond Defined; 47-2-75, Definitions-Adoption by Reference; 47-3-1, Application for Mining Permit; 47-3-2, Application for Mining Permit-Adoption by Reference; 47-3-3a, Application for Mining Permit-Maps; 473-42, Application for Mining Permit-Adoption by Reference; 47-4-14, Public Hearing-Incorporation by Reference of K.S.A. 77-501 *et seq.*; 47-4-15, Administrative Hearings, Discovery, Incorporation by Reference; 47-4-16, Interim Orders for Temporary Relief; 47-4-17, Administrative Hearings, Award of Costs and Expenses; 47-5-5a, Civil Penalties-Adoption by Reference; 47-5-16, Civil Penalties-Final Assessment and Payment; 47-6-1, Permit Review; 47-6-2, Permit Revision; 47-6-3, Permit Renewals-Adoption by Reference; 47-6-4, Permit Transfers, Assignments, and Sales-Adoption by Reference; 47-6-6, Permit Conditions-Adoption by Reference; 47-6-9, Bonding Procedures-Adoption by Reference; 47-6-11, Use of Forfeited Bond Funds; 47-9-1, Performance Standards-Adoption by Reference; 47-9-2, Revegetation; 47-9-4, Interim Program Performance Standards-Adoption by Reference; 47-10-1, Underground Mining-Adoption by Reference; 47-11-6, Small Operator Assistance Program-Adoption by Reference; 47-12-4, Lands Unsuitable for Surface Mining-Adoption by Reference; 47-13-4, Training and Certification of Blasters-Adoption by Reference; 47-13-5, Responsibilities of Operators and Blasters-in-Charge; 47-13-6, Training Program; 47-14-7, Employee Financial Interest-Adoption by Reference; 47-15-1a, Inspection and Enforcement-Adoption by Reference; 47-15-3, Lack of Information and Inability to Comply; 47-15-4, Injunctive Relief; 47-15-7, State Inspections; 47-15-8, Citizen's Request for State Inspections; 47-15-15, Service of Notices of Violation and Cessation Orders; and 47-15-17, Maintenance of Permit Areas.

OSM published a notice in the July 14, 1989, Federal Register (54 FR 29742) announcing receipt of the amendment and inviting public comment on the adequacy of the proposed amendment (Administrative Record No. KS-441). The public comment period ended August 14, 1989.

During its review of the amendment, OSM identified concerns related to K.A.R. 47-1-9(e) and (f), Notice of Citizen Suits; 47-2-21, Employee Defined; 47-2-53, Regulatory Authority or State Regulatory Authority Defined; 47-2-53a, Regulatory Program Defined; 47-2-58, Significant, Imminent Environmental Harm to Land, Air, and Water Resources Defined; 47-2-64, State Act Defined; 47-2-74, Public Road Defined; 47-2-75(a) (3), (7), and (8), Definitions; 47-2-75(b) (6) (B) and (C), Alluvial Valley Floor and Arid and Semiarid Area Defined; 47-2-75, Ownership and Control Definitions; 47-3-1, Application for Mining Permit; 47-3-2(c) (3), Application for Mining Permit; 47-3-42, Application for Mining Permit; 47-3-42 (b) (15), Special Category Permits; 47-3-42, Application for Mining Permit; 47-4-14, Incorporation by Reference of Kansas Statute Annotated 77-501 *et seq.*; 47-5-5a(a)(10), Individual Civil Penalties; 47-6-2(d), Permit Revision; 47-6-6(b) (4), Permit Review; 47-7, Coal Exploration; 47-9-9(q) (2), Bonding Procedures; 47-9-1(c) (6), Topsoil and Subsoil; 47-9-1(c) (26), Coal Mine Waste: General Requirements; 47-9-1(c) (42) and (d)(39), Surface and Underground Revegetation: Standards for Success; 47-9-1(c) (45) and (d)(44), Surface and Underground Postmining Land Use; 47-9-1(d) (2), Underground Mining Performance Standards; 47-10-1(b) (6), Underground Mining Permit Applications; and Rills and Gullies Guidelines. OSM notified Kansas of the concerns by letter dated September 8, 1989 (Administrative Record No. KS-445). Kansas responded in letters dated October 24, October 30, November 9, and November 15, 1989, and an undated letter received November 17, 1989 (Administrative Record No. KS-449), by submitting a revised amendment.

OSM published a notice in the December 1, 1989, Federal Register (54 FR 49773) announcing receipt of the amendment and inviting public comment on the adequacy of the proposed amendment (Administrative Record No. KS-470). The public comment period ended December 18, 1989.

During its review of the additional information submitted by Kansas, OSM identified concerns related to K.A.R. 47-2-75(e)(6), Definitions; 47-4-14a, (a)(2), and (b)(6), Administrative Hearings-Procedure; 47-4-15(c), Administrative Hearings-Discovery; 47-5-5a (a)(8), Procedures for Assessment Conferences; 47-5-5a (a) (10), Individual Civil Penalties; and 47-5-5a(b)(11), Civil Penalties. OSM notified Kansas of the concerns by letter dated February 13, 1990 (Administrative Record No. KS-463). Kansas responded in letters dated March 26 and June 29, 1990 (Administrative Record No. KS-471), by submitting a revised amendment. In addition, Kansas submitted proposed revisions (1) in response to a May 22, 1989, letter that OSM sent in accordance with 30 CFR 732.17(c) requiring certain provisions of the State program to be updated for consistency with the Federal regulations through July 1, 1989, (2) in response to a February 7, 1990, letter that OSM sent in accordance with 30 CFR 732.17(d) concerning incidental coal extraction, (3) concerning administrative procedures at its own initiative, and (4) in response to a June 22, 1990, letter that OSM sent in accordance with 30 CFR 732.17(d) concerning subsidence control.

On October 9, 1990, Kansas submitted additional revisions to its amendment (Administrative Record No. KS–488) at its own initiative to improve clarity by changes in format and minor editorial revisions, and to improve operational efficiency concerning public hearings at K.A.R. 47–4.

III. Public Comment Procedures

OSM is reopening the comment period on the proposed Kansas program amendment to provide the public an opportunity to reconsider the adequacy of the amendment in light of the additional materials submitted. In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Kansas program.

Written comments should be specific, pertain only to the issue proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Kansas City Field Office will not necessarily be considered in the final rulemaking or included in the administrative record.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 3854–1]

Approval and Promulgation of State Implementation Plans: Colorado; Regulation No. 1

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to approve revisions to the Colorado State Implementation Plan (SIP) submitted on November 17, 1988, by the Governor of Colorado. The revisions include amendments to Colorado Regulation No. 1 to exempt the destruction of missiles under the Intermediate-Range Nuclear Forces (INF) Treaty from meeting the opacity limits. Other amendments were also submitted on November 17, 1988, including revisions to Colorado Regulations No. 3, No. 11, No. 13 and the Common Provisions Regulation, which are addressed in other Federal Register Notices. EPA published a direct final rule approving the submittal in the May 11, 1989, Federal Register (54 FR 20389); but because notice was received that adverse comments would be submitted, the final rule was withdrawn in another Federal Register notice.

The submittal provides for the destruction of missiles under the INF Treaty at the Pueblo Army Depot by static firing. The opacity standard cannot be met by this operation, and the submittal exempts the missile destruction from these standards. The opactiy requirements are not necessary to enforce compliance with the permit which has been issued to ensure that the ambient air quality will be at acceptable levels.

DATES: Comments must be received on or before November 23, 1990.

ADDRESSES: Written comments should be addressed to: Douglas M. Skie, Chief, Air Programs Branch, Environmental Protection Agency, One Denver Place, suite 500, 999 18th Street, Denver, Colorado 80202–2405.

Copies of the state submittal are available for public inspection between 8 a.m. and 4 p.m., Monday through Friday, at the following offices:

Environmental Protection Agency, Region VIII, Air Programs Branch, One Denver Place, suite 500, 999 18th Street, Denver, Colorado 80202–2405.

Colorado Department of Health, Air Pollution Control Division Ptarmigan Place, N. Cherry Creek, Drive and Colorado Blvd., Denver, Colorado.

FOR FURTHER INFORMATION CONTACT: Dale M. Wells, Air Programs Branch, Environmental Protection Agency, One Denver Place, suite 500, 999 18th Street, Denver, Colorado 80202–2405, (303) 293–1773, (FTS) 564–1773.

SUPPLEMENTARY INFORMATION: On December 8, 1987, the United States and the Soviet Union signed the Intermediate-Range Nuclear Forces (INF) Treaty to eliminate intermediate-range and shorter-range Pershing missile systems. The treaty provides specific methods, procedures, and time frames for destroying the missiles once the treaty enters into force.

The Army completed an Environmental Assessment (EA) in February 1988, pursuant to the provisions of the National Environmental Policy Act, on the potential environmental effects of eliminating the missiles. The EA was submitted to the United States Senate for information during the treaty ratification process. The EA discussed destruction methods of static firing and open burning in the State of Colorado. The document concludes with a finding of no significant impact but points out the need for environmental permits. Pueblo Army Depot Activity is the only site evaluated in the EA for the elimination process in Colorado.

To ensure compliance with the mandates of the treaty and state and federal environmental regulations the Army consulted with the Office of the Governor, the State Department of Health, and the EPA. During meetings of April 6–7 1988, the Army was advised to submit a rulemaking peitition to exempt the Pershing elimination activity from the state opacity limit for the reason stated below:

> Air emissions from the static firing of Pershing rocket motors are emitted directly into the ambient air and therefore cannot be mitigated.

The amended Regulation No. 1, Section II.A.9 (new section) would exempt emissions from the static firing of missiles at the Pueblo Army Depot a period not to exceed 36 months from the first day of missile destruction unless otherwise mandated by amendment to the treaty or the state air permit.

In accordance with the Intermediate-Range Nuclear Forces Treaty as ratified, the Pueblo Army Depot submitted an application for an air pollution emission permit to dispose of Pershing rocket motors. On May 31, 1988, the Division observed from the test static firing of one Pershing rocket motor that the opacity of the plume from this activity would exceed the standard of 20% set forth in the Air Quality Control Commission's Regulation No. 1. The Pueblo Army Depot, in order to obtain a permit for the destruction of the remaining rocket motors, must obtain a waiver from the above opacity standard, or the permit will be denied. This waiver would be necessary due to the fact that there are no presently available methods to reduce opacity to compliance levels for this source.

The State adopted section II.A.9. in order to exempt the static firing of intermediate range and shorter range Pershing Missile systems from the opacity limits contained in Regulation No. 1, so long as such static firing results in emissions less than 250 tons per year of any one pollutant, adequate monitoring is conducted, and air pollutants are not emitted in dangerous quantities.

The opacity requirements are found in Regulation 1, Section II.A. and are primarily designed to ensure that standard smokestack type sources of air pollution are well controlled. While opacity requirements are generally appropriate for the control of both stack and fugitive emissions, the State is not, in this case, relying on the application of emission control systems for which opacity is an indication of proper operation.

Although exempted under Regulation 1 for opacity requirements, the State must issue a permit for the missile destruction under Colorado Regulation No. 3 before destruction of the missiles may commence. This permit cannot be issued unless the State determines through air quality dispersion modeling that the National Ambient Air Quality Standards, which protect against health and other effects, are met. This permit was issued on November 3, 1988, and restricts the number and time of the missile burns.

At the public hearing on July 21, 1988, various individuals commented on concerns about health effects from the missile burns. EPA also received four comments expressing concerns regarding adverse health effects and EPA's approval rationale in response to the May 11, 1988, notice. These comments were pertinent to the permit discussed above, but were not pertinent to the opacity standard. EPA reviewed the State's action in issuing the permit, and found that the State acted appropriately. EPA will take no enforcement action against past missile burns because the State has shown in its analysis of the new source permit under Colorado Regulation Number 3 that air quality standards will be met. EPA was involved in the review and approval of this permit and determined that the permit protects against violations of the National Ambient Air Quality Standards and adverse health effects.

Proposed Action

EPA proposes to approve the Colorado amendments to Colorado Regulation No. 1 to exempt the destruction of missiles under the Intermediate-Range Nuclear Forces (INF) Treaty from meeting the opacity limits because these opacity limits are not necessary for enforcement of the applicable permit. While opacity requirements are generally appropriate for the control of both stack and fugitive emissions, the State is not, in this permit, relying on the application of emission control systems for which opacity is an indication of proper operation.

Interested parties are invited to comment on all aspects of these proposed actions.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under 5 U.S.C. 605(b), I certify that this SIP Revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

This action has been classified as a Table 3 action by the Regional Administrator under procedures published in the Federal Register on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

Federal Insurance Administration

44 CFR Part 67

[Docket No. FEMA-7003]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed base flood elevation modifications listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the floodplain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are

adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not prohibit development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

BILLING CODE 6718-03-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 22 and 94

[General Docket No. 82-343; FCC 90-334]

Service and Technical Rules for Government and Non-Government Fixed Service Usage of the Frequency Bands 932-935 MHz and 941-944 MHz

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to amend the Commission's Rules to limit the number of applications a party can file in the Government/Non-Government Fixed Service for point-to-multipoint channels in a particular market. The objective of this action is to ensure that equitable treatment is accorded applicants for channels in the 932–932.5/941–941.5 MHz bands by preventing the filing of multiple applications for the same communications requirement.

DATES: Comments are due November 7, 1990. Reply comments are due November 19, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Rodney Small, telephone (202) 653–8116.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Fourth Notice of Proposed Rulemaking in General Docket 82–343, FCC 90–334, Adopted October 5, 1990, and Released October 12, 1990.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

The following collection of information contained in this proposed rule has been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act. Copies of the submission may be purchased from International Transcription Service. Persons wishing to comment on this information collection should contact Bruce McConnell Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–3785. A copy of any comments made should also be sent to the Federal Communications Commission, Office of the Managing Director, Washington, DC 20554. For further information contact Judy Boley, Federal Communications Commission, (202) 632–7513.

OMB Number: None.

Title: Service and Technical Rules for Government and non-Government Fixed Service Usage of the Frequency Bands 932–935 MHz and 941–941 MHz (47 CFR section 94.15).

Action: Proposed new collection.

Respondents: Business (including small business, State or local governments, and non-profit organizations).

Frequency of Response: On occasion.

Estimated Annual Burden: 50 responses; 500 total hours on respondents; 10 hours each.

Needs and Uses: If the Commission adopts a final rule in this proceeding, data submitted by respondents would be used to determine whether respondents have an ownership interest, direct or indirect, in two or more applications proposing sites within 25 miles of each other.

Summary of Proposed Rule

1. In the *First Report and Order* in this proceeding (50 FR 4650; February 1, 1985), the Commission allocated the 932–935/941–944 MHz bands for Government and non-Government (private and common carrier) fixed service usage on a co-primary basis. In the *Second Report and Order* (54 FR 10328; March 13, 1989), the Commission adopted procedures and rules to be followed in sharing the bands. Specifically, the Commission designated the 932–932.5/941–941.5 MHz bands for point-to-multipoint use and the 932.5935/941.5–944 MHz bands for point-to-point use. In the *Memorandum Opinion and Order* (55 FR 10492; March 21, 1990), the Commission clarified the application and coordination procedures for the service in response to five petitions for clarification or reconsideration. With respect to the point-to-multipoint channels, the Commission decided to conduct a nationwide lottery wherein all applications received would be ranked and then processed in the order of their ranking.

2. In accordance with the *Memorandum Opinion and Order*, the Commission's Office of Engineering and Technology (OET) released a *Public Notice* (55 23284; June 7, 1990) that solicited applications to operate in the fixed service bands at 932–935/941–944 MHz. Prior to the opening of this window, however, the Utilities Telecommunications Council (UTC) filed concurrent petitions with the Commission requesting that the filing window be stayed and that the application filing procedure be clarified or reconsidered. In support of these requests, UTC cited the failure of the *Public Notice* to prohibit applicants from filing multiple applications for the same communications requirement merely as a means of improving their odds of receiving a channel in a lottery. UTC contended that as a result of this omission and the Commission's policy in other services of limiting the filing of multiple applications in lotteries, applicants would be uncertain as to whether they could file multiple applications during the filing window. UTC requested that the Commission remove this uncertainty by clarifying whether multiple applications for the same site or service area would be accepted from the same or substantially the same applicant, absent a special showing of need in accordance with other current Commission licensing policies.

3. OET granted UTC's request for a stay of the filing window in an *Order* (55 FR 28097; July 9, 1990) that stated that UTC had raised an important issue that had not been addressed; *i.e.* the filing of multiple applications in the Government/non-Government Fixed Service. Further, OET stated that the lack of clear guidance regarding the filing of multiple applications could result in irreparable injury to some applicants.

4. The Commission believes that UTC's concern regarding the need to address the issue of whether an applicant can file more point-to-multipoint applications in a market to improve its chances in the lottery has merit.[1] Since the Commission began to use lotteries to select among competing applicants in recent years, it has usually precluded applicants from filing applications that have no purpose but to increase their chances of success in the lottery. Similar requirements appear to be warranted with respect to the point-to-multipoint channels recently made available in this proceeding. It has become clear to the Commission that the legitimate communications requirements of point-to-multipoint users will exceed the number of channels available in major urban areas. Therefore, allowing multiple applications to be filed for the same point-to-multipoint requirement would simply add to the number of applications that could not be granted and place a large administrative burden on both the applicants and the Commission. More importantly, permitting multiple applications for these channels would also unfairly provide an advantage to fee-exempt entities and applicants with substantial financial resources.

5. While the Commission believes that the filing of multiple applications for the purpose of increasing an applicant's chances in a lottery should be prohibited, it also recognizes that an applicant having a legitimate need for more than a single point-to-multipoint channel in a particular market should not be precluded from applying for multiple facilities. Therefore, any rule that is proposed must take into account the legitimate needs of potential applicants. Further, the Commission believes that the differing nature of point-to-multipoint uses under parts 22 and 94 of the Commission's Rules requires separate rules for each service.

6. Common carrier part 22 point-to-multipoint, or multiple address, systems use of fixed facilities consists of controlling one-way signaling operations. Typically, a part 22 multiple address control station communicates with four or more base station transmitters that in turn communicate with individual paging receivers; these base stations must be listed in the application. The Commission anticipates that most part 22 applicants for the 932–932.5/941–941.5 MHz bands will require only one frequency per service area. However, it recognizes that some applicants may have a need to control base stations in more than one paging system in a particular service area. Therefore, the Commission proposes to change § 22.501(g)(1) to provide that an application for a multiple address control frequency subject to this rule making cannot propose to serve any base station that is listed in a different application for these same frequencies.

7. Part 94 users typically construct stations that communicate with more locations than the typical part 22 station. As the Commission does not require these users to specify remote base station coordinates on their applications, it must rely on a different criterion to determine whether an entity has filed duplicate applications. The Commission tentatively concludes that a mileage separation will satisfy its concerns about duplicate applications from part 94 users without unduly complicating the licensing process. The technical parameters associated with multiple address system design are expected to provide licensees with service areas of approximately 25 miles. Therefore, it is proposed to prohibit any party from having an ownership interest, direct or indirect, in two or more applications that specify sites within 25 miles of each other, unless all applications that are submitted by a common owner acknowledge that party's common interest in the applications and describe in detail how each system will be serving different needs.

8. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and

[1] With regard to the point-to-point channels, the Commission believes that no limitation on the number of applications an entity can file is necessary. The size of the point-to-point allocation and the nature of point-to-point communications are such that lotteries are rare, and there is little to gain by filing multiple applications for these channels. Accordingly, on August 28, 1990, the filing window for point-to-point channels was reopened. *See Public Notice* (55 FR 35064 August 28, 1990).

found to impose a new or modified information collection on the public. Implementation of any new or modified requirement will be subject to approval by the Office of Management and Budget as prescribed by the Act.

8. This is a non-restricted notice and comment rule making proceeding. *See* § 1.1206 of the Commission's Rules, 47 CFR § 1.1206, for rules governing permissible *ex parte* contacts.

Ordering Clause

10. This action is taken pursuant to sections 4(i) and 303(f), (g), and (r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(f), (g), and (r).

List of Subjects

47 CFR Part 22

Public mobile service, Radio.

47 CFR Part 94

Private operational-fixed microwave service, Radio.

Proposed Rule Changes

11. Part 22 of title 47 of the Code of Federal Regulations is proposed to be amended as follows:

PART 22—PUBLIC MOBILE SERVICES

12. The authority citation for part 22 would continue to read as follows:

Authority: 47 U.S.C. 154, 303, unless otherwise amended.

13. Section 22.501 is proposed to be amended by revising paragraph (g)(1) down to the table (the table is retained) to read as follows:

§ 22.501 Frequencies.

* * * * *

(g)(1) The frequencies listed in this paragraph are available for control stations utilized within multiple address system that requires the use of at least four simultaneously operated base stations operated on the same frequency assignment. These frequencies will be assigned only when there are four or more base station sites on the same frequency listed on the application for license. For purpose of this four station limitation, base stations proposed to be controlled in the 932–932.5/941–941.5 MHz bands in any multiple address control application filed pursuant to this subsection cannot be listed in, or counted towards, the four base station requirement of any other pending applications for the 932–932.5/941–941.5 MHz bands. The frequencies may be used in paired or unpaired configurations. When paired, the higher frequency will be used by the control/relay station, and the lower frequency will be used by the control station.

* * * * *

14. Part 94 of title 47 of the Code of Federal Regulations is proposed to be amended as follows:

PART 94—PRIVATE OPERATIONAL-FIXED MICROWAVE SERVICE

15. The authority citation for part 94 would continue to read as follows:

Authority: Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303, unless otherwise noted.

* * * * *

16. Section 94.15 is proposed to be amended by revising paragraph (g) to read as follows:

§ 94.15 Policy governing the assignment of frequencies.

* * * * *

(g) Except as provided in paragraph (h) of this section, applicants requiring multiple transmit frequencies employed on separate paths from a single station location will not normally be authorized more than four of the transmit frequencies available in the band. Further, master and remote stations using frequencies listed in § 94.65(a)(1) of this part will not normally be authorized more than four (12.5 kHz) frequencies or frequency pairs. In the 932–932.5/941–941.5 MHz bands, applicants may not apply for a frequency of frequency pair within a 25 mile radius of the location of any previous license it has received or for which it has concurrently applied in the 932–932.5/941–941.5 MHz bands. Further, in these same bands, no party may have an ownership interest, direct or indirect, in two or more applications proposing sites within 25 miles of each other, unless all applications contain a statement acknowledging the commonality of ownership and describe in detail how each proposed system will serve a different communications need. Such descriptions will be evaluated by the Commission in determining the applicant's need for multiple frequencies. If any application subject to the foregoing requirement fails to contain the acknowledgement of ownership interest, all applications with a commonality of interest located within 25 miles will be dismissed.

* * * * *

17. In § 94.73, the table in paragraph (a) is proposed to be amended by removing the footnote designator and removing and reserving foot note one and revising the first sentence in footnote three to read as follows:

§ 94.73 Power limitations.

* * * * *

[3] For multiple address operations, see § 94.65(a)(1)(v). * * *

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 90-446, RM-7062]

Radio Broadcasting Services; Key Largo, FL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Spanish Broadcasting System of Florida, Inc., requesting the substitution of Channel 280C2 for Channel 280A at Key Largo, Florida, and modification of its construction permit (BMPH–871120II) to specify operation on the higher class channel. Channel 280C2 can be allotted to Key Largo in compliance with the Commission's minimum distance separation requirements with a site restriction of 20.3 kilometers (12.6 miles) southwest. The coordinates for this allotment are North Latitude 24–57–20 and West Longitude 80–34–50. In accordance with Section 1.420(g) of the Commission's Rules, competing expressions of interest for use of Channel 280C2 at Key Largo will not be considered and petitioner will not be required to demonstrate the availability of an additional equivalent channel for use by such interested parties.

DATES: Comments must be filed on or before December 10, 1990, and reply comments on or before December 26, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: James M. Weitzman, Kay, Scholer, Fierman, Hays & Handler, 901 15th Street, NW., suite 1100, Washington, DC 20005 (Counsel for Spanish Broadcasting System of Florida, Inc.).

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of

Proposed Rule Making, MM Docket No. 90-446, adopted September 27, 1990, and released October 18, 1990. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 90-311; RM-7195]

Radio Broadcasting Services; Oak Grove, FL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; dismissal of.

SUMMARY: This document dismisses the petition of Oak Grove Broadcasting to allot Channel 283C2 to Oak Grove, Florida, as that community's first local broadcast service. Petitioner filed comments requesting withdrawal of its petition for rule making. With this action, the proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 90-311, adopted September 25, 1990, and released October 17, 1990. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

---

47 CFR Part 73

[MM Docket No. 90-444; RM-7240]

Radio Broadcasting Services; Dexter, ME

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by Daniel F. Priestley, requesting the substitution of Channel 271C2 for Channel 271A at Dexter, Maine. Petitioner also requested modification of his construction permit for Channel 271A at Dexter, to specify operation on Channel 271C2. Canadian concurrence will be requested for this allotment at coordinates 45-01-00 and 69-00-00.

DATES: Comments must filed on or before December 10, 1990, and reply comments on or before December 26, 1990..

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows:

Patricia A. Mahoney, Fletcher, Heald & Hildreth, 1225 Connecticut Avenue, NW., Suite 400, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 90-444, adopted September 27, 1990, and released October 17, 1990. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

[MM Docket No. 89-137, RM-C005 and RM-6998]

Radio Broadcasting Services; Waseca, MN, and Menomonie and Spencer, WI

AGENCY: Federal Communications Commission.

ACTION: Order to show cause.

SUMMARY: This document directs Hackman Broadcasting, the licensee of Station WOSX, Spencer, Wisconsin, to show cause why its license should not be modified to specify operation on Channel 222A instead of Channel 221A. This action could allow Station KOWO-FM, Waseca, Minnesota, to upgrade its facility from Channel 221A to Channel 221C3, and Station WMEQ(FM), Menomonie, Wisconsin, to upgrade its facility from Channel 221A to Channel 221C3. A final determination regarding these proposals must await the outcome of action ordering the license modification of Station WOSX, Spencer, Wisconsin. This Order does not afford additional opportunity to comment on the merits of the conflicting proposal or for the acceptance of additional counterproposals. An opportunity is provided for Station WOSX to object to the ordered channel substitution.

DATES: Comments must be filed by Hackman Broadcasting on or before December 10, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

47 CFR Part 73

[MM Docket No. 90-445; RM-7323, RM-7425]

Radio Broadcasting Services; Brooksville and Quitman, MS

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on two mutually exclusive petitions for rulemaking. Quitman Broadcasting Company, Inc., has requested the substitution of Channel 255C3 for 255A at Quitman, Mississippi, and modification of the license for Station WYKK(FM) to specify operation on the new channel. The coordinates for Channel 255C3 at Quitman are 32-07-36 and 88-42-00. G. Dean Pearce proposed the allotment of FM Channel 255C3 to Brooksville, Mississippi, as that community's first local service. There is a site restriction 12.6 kilometers (7.8 miles) northeast of the community. The coordinates for Channel 255C3 at Brooksville are 33-19-54 and 88-30-30.

DATES: Comments must be filed on or before December 10, 1990, and reply comments on or before December 26, 1990.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows:

Herman Kelly, President, Quitman Broadcasting Company, Inc., Montrose Road, Quitman, Mississippi 39355

Paul Reynolds, 415 North College Street, Greenville, Alabama 36037. (consultant to Quitman Broadcasting Company, Inc.)

G. Dean Pearce, 1169 Northwood Lake, Northport, Alabama 35476.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 90-445, adopted September 27, 1990, and

released October 17, 1990. BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 383

[FHWA Docket No. MC–90–10]

RIN 2125–AC54

Commercial Driver Instruction Permits

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Extension of comment period.

SUMMARY: In the Federal Register of August 22, 1990 (55 FR 34478), the FHWA published a notice of proposed rulemaking (NPRM) requesting public comment on additional minimum Federal standards for State-issued learners' permits that allow drivers to be trained in the operation of commercial motor vehicles (CMVs). The comment period was scheduled to close on October 22, 1990. Subsequently, the FHWA received a request from the American Association of Motor Vehicle Administrators (AAMVA) for an extension of the comment period in order to give the States more time to review, discuss, and develop positions on the NPRM. Owing to the complexity and importance of the NPRM, and the primary role that the States will have in implementing any resultant final rule, the FHWA is granting this request for an extension.

DATES: Comments must be received on or before November 30, 1990.

ADDRESSES: Submit written, signed comments to FHW Docket No. MC–90–10, Room 4232, HCC–10, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. All answers to questions should refer to the appropriate question number, and all comments on specific provisions should refer to the appropriate section and paragraph number. Commenters may, in addition to submitting "hard copies" of their comments, submit a floppy disk (either 1.2Mb or 360Kb density) in a format that is compatible with the Word Perfect word processing program. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m. e.t., Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Neil E. Moyer, Standards Review Division, Office of Motor Carrier Standards (202) 366–4009, or Mr. Paul L. Brennan, Office of the Chief Counsel, (202) 366–0834, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: On October 1, 1990, the AAMVA requested the FHWA to extend, until November 28, 1990, the comment period for the NPRM on Commercial Driver Instruction Permits (CDIPs). The AAMVA asserts that the NPRM, if adopted, would lead to "significant changes" to State Commercial Driver's License issuance policies and procedures. "We are concerned," the AAMVA continues,

"that the States have sufficient time to review the proposals and consider their benefits in the context of changes to state procedures."

The AAMVA regards the originally scheduled October 23 comment closing date as affecting insufficient time to the States to respond fully to the NPRM in view of its scope and potential impact on the States. In addition, the AAMVA Region I and Region III State coordinators will be meeting in late October and early November to discuss CDL issues including the CDLP NPRM.

According to the AAMVA, while not materially affecting the FHWA time frame for issuing a final rule, the proposed extension of the comment date would assist the States in providing more responsive comments to the docket that should assist the FHWA in developing more effective and meaningful requirements in this area.

The FHWA concurs in the AAMVA's reasoning. Since the AAMVA's proposed November 26 date would fall on the Monday immediately following the Thanksgiving Day weekend, the FHWA is extending the comment period through November 30, 1990.

Authority: Title XII of Pub. L. 99-570, 100 Stat. 3207-170; 49 U.S.C. 2122; 49 U.S.C. App. 2505; 49 CFR 1.48.

T.D. Larson,

Administrator.

[FR Doc. 90-24929 Filed 10-22-90; 8:45 am]

BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

49 CFR Part 552

Petitions for Rulemaking, Defect and Noncompliance Orders

AGENCY: National Traffic Safety Administration (NHTSA), DOT.

ACTION: Petition for rulemaking; denial.

SUMMARY: This notice announces the denial of a rulemaking petition to amend Standard No. 208, *Door Locks and Door Retention Components*, to require that the door locks on any vehicle equipped with power door locks be manually operable from inside in the event of electrical power loss. Because the agency is not aware of, and because the petitioner did not identify any, specific vehicles in which this is a problem, the petition is denied.

FOR FURTHER INFORMATION CONTACT: Mr. William Boehly, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington, DC 20590, (202) 366-0842.

SUPPLEMENTARY INFORMATION: Federal Motor Vehicle Safety Standard No. 208, *Door Locks and Door Retention Components*, requires that each door of a passenger car, multipurpose passenger vehicle and truck be equipped with a locking mechanism with an "operating means in the interior of the vehicle." Further, the standard requires that when the locking mechanism is engaged in the rear side doors, both outside and inside door handles or other release controls shall be inoperative. For front doors, outside door handles or release controls shall be inoperative when the locking mechanism is engaged. The standard is silent on whether, for front doors, inside door handles or release controls are to be operative when the locking mechanism is engaged.

On June 21, 1990, C. Thomas VanVechten petitioned this agency to amend Standard No. 208 to require that a vehicle be equipped with means of manually unlocking a power door lock from inside the vehicle in the event of electrical power loss. The petitioner asserted that, on some vehicles equipped with power door locks, if the battery is discharged or disabled, it is not possible to open the vehicle from the inside. The petitioner did not identify any specific vehicles in which this problem occurs.

In response to this petition, NHTSA contacted General Motors, Ford, Chrysler, and the Association of International Automobile Manufacturers, Inc. (AIAM) to determine how power door locks operate on vehicles sold in the United States. Each responded that, on every vehicle they or their members produce, power door locks can be opened manually in the event of electrical power loss.

Thus, it appears from current available information that, contrary to the petitioner's assertion, power door locks can be opened from inside vehicles in the event of electrical power loss. This information is not contradicted by any data provided by the petitioner. Since the information available to the agency indicates that there is no reasonable possibility that a rule mandating that power door locks be capable of being opened manually would be issued at the conclusion of the requested rulemaking proceeding, NHTSA has decided to deny Mr. VanVetch's petition.

Issued on October 17, 1990.

Barry Felrice,

Associate Administrator for Rulemaking.

Notices

Federal Register
Vol. 55, No. 205
Tuesday, October 23, 1990

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 90-201]

Veterinary Biological Products; Genetically Engineered Live Viral Vectored Vaccine

AGENCY: Animal and Plant Health Inspection Service, USDA

ACTION: Notice of hearing and availability of a report and a protocol for limited field trials.

SUMMARY: This document announces that the Animal and Plant Health Inspection Service will be conducting a joint State-Federal hearing to discuss: (1) The request of the Wistar Institute to conduct a limited field trial of a genetically engineered vaccinia vectored rabies vaccine at a test site in Pennsylvania; (2) The first month report of the Parramore Island, Virginia, limited field trial that was initiated on August 20, 1990, with the same vaccine, to be presented by a representative of the Wistar Institute. This document also announces the availability of the first month report of the Parramore Island field trial, additional safety data, and the sponsor's protocol for the Pennsylvania field trial.

DATES: The open hearing will be held on Wednesday, November 14, 1990, from 10 a.m. to 12:30 p.m., local time. The hearing will be reconvened from 1:30 to 4 p.m., Wednesday, November 14, 1990, if persons at the hearing who desire an opportunity to speak have not been heard. Please indicate your interest in attending this open hearing in writing, on or before November 6, 1990, addressed to the contact person listed in this notice.

ADDRESSES: The open hearing will be held at the Center City Holiday Inn, 23 S. Second Street at Chestnut Street, Harrisburg, Pennsylvania 17101. Any interested person may appear and be heard in person or through a representative. Persons who wish to be heard are requested to enter their names on the speaker's list prior to the hearing at the location of the hearing from 9 a.m. to 10 a.m. Those persons who sign the speaker's list will be heard in the order listed. However, any other person wishing to speak at the hearing will be afforded such opportunity after the listed speakers have been heard. If the number of speakers and other participants in attendance at the hearing warrants, the presiding officer may limit the time for each presentation in order to allow everyone wishing to speak the opportunity to be heard.

A copy of the Wistar Institute's first month report of the Parramore Island field trial, additional safety data, and the sponsor's protocol for the Pennsylvania field trial are available for public inspection at the United States Department of Agriculture, room 1141 South Building, 14th Street and Independence Avenue, SW., Washington, DC 20250 between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays, and may be obtained from the contact person listed in this notice.

FOR FURTHER INFORMATION CONTACT: Dr. Robert B. Miller, Senior Staff Veterinarian, Veterinary Biologics; Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 832, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, telephone (301) 436-5563.

SUPPLEMENTARY INFORMATION:

Background

On June 26, 1986, the United States Department of Agriculture (USDA) published its "Final Policy Statement for Research and Regulation of Biotechnology Processes and Products" as part of the Office of Science and Technology Policy (OSTP) "Coordinated Framework for the Regulation of Biotechnology" (51 FR 23336, June 26, 1986). As part of the policy statement, USDA discussed the regulation of veterinary biological products produced through biotechnological processes under the Virus-Serum-Toxin Act, as amended, (21 U.S.C. 151-159). USDA stated that such veterinary biological products will be treated similarly to products prepared by conventional techniques and each product will be evaluated as necessary to establish that it is pure, safe, potent, and efficacious as provided in the regulations (9 CFR parts 101-118).

USDA stated that for purposes of licensing, biologics derived by recombinant DNA techniques or developed from hybridomas may be classified into three broad categories.

The first category includes inactivated recombinant DNA-derived vaccines, bacterins, bacterin-toxoids, virus subunits, or bacterial subunits Monoclonal antibody (hybridoma) products used prophylactically, therapeutically, or as components of diagnostic kits are also included in this category.

The second category includes those products containing live microorganisms that have been modified by the addition or deletion of one or more genes. Precautions must be exercised to assure that this addition or deletion of specific genetic information does not impart increased virulence, pathogenicity, or survival advantages in these organisms which are greater than those found in nature or wild-type forms.

The genetic information to be added or deleted must consist of well-characterized DNA segments. A comparison is also required to be made between the genetically engineered organism and the wild type form with respect to biochemical pathways, virulence traits, and other factors affecting pathogenicity.

The third category of genetically engineered veterinary biologics includes products using live vectors to carry recombinant-derived foreign genes that code for immunizing antigens and/or other immune stimulants. USDA stated in its policy statement that with respect to products in the third category, characteristics of safety and transmission must be examined before questions and concerns dealing with safety to humans, animals and release into the environment can be answered and before such products can be considered for licensing. The Animal and Plant Health Inspection Service (APHIS) had determined that the best approach when considering category three products for licensing and release is to analyze each product individually to assure that all questions regarding safety, transmission, and other

considerations are properly addressed prior to granting any approval to field test or to issue a license.

APHIS, after reviewing its regulations in 9 CFR parts 101–118 for veterinary biological products, had determined that the requirements of such regulations are sufficient to enable the Agency to obtain the types of environmental, safety, purity, potency, and efficacy data needed to properly evaluate category three products before making a decision on the field testing and licensing of such products.

APHIS prepared a draft environmental assessment (EA), held a public meeting in Washington, DC; and prepared a final EA before authorization of a limited field trial of the live vaccinia-vectored rabies vaccine on Parramore Island. The applicant was required to comply with all requirements in 9 CFR 103.3 including obtaining state approval.

In 1989, APHIS approved under 9 CFR 103.3 the request from the Wistar Institute for authorization to conduct a limited field trial of a live vaccinia-vectored rabies vaccine that expresses the rabies virus surface glycoprotein. The limited field trial for this category three product was approved by the state of Virginia in 1989 and by the owners of the Parramore Island site, the Nature Conservancy, in August, 1990. The limited field trial was initiated on August 20, 1990. The protocol called for orally immunizing raccoons in the wild via a bait containing the vaccine.

APHIS will conduct an open hearing in Harrisburg, Pennsylvania, on November 14, 1990, to discuss: (1) The request of the Wistar Institute to conduct a limited field trial of the genetically-engineered vaccinia-vectored vaccine at a test site in Pennsylvania; and (2) The first month report of the Parramore Island limited field trial to be presented by a representative of the Wistar Institute. Please indicate your interest in attending this open hearing in writing, on or before October 31, 1990, addressed to the person listed under "FOR FURTHER INFORMATION CONTACT".

APHIS has previously published in a notice (see 54 FR 161–162, January 4, 1989) the type of data that APHIS will require in deciding whether authorization will be granted to conduct a limited field trial. This hearing will aid in determining specific issues that should be addressed in the development of an EA concerning the proposed Pennsylvania limited field trial.

Done in Washington, DC, this 17th day of October 1990.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

Forest Service

Newspapers To Be Used for Publication of Legal Notice of Appealable Decisions for Southern Region; Alabama, Kentucky, Georgia, Tennessee, Florida, Louisiana, Mississippi, Virginia, Arkansas, Oklahoma, North Carolina, South Carolina, Texas, Puerto Rico

AGENCY: Forest Service, USDA.

ACTION: Notice; semi-annual.

SUMMARY: Deciding Officers in the Southern Region will continue to use the newspapers published in the Federal Register April 5, 1990 (55 FR 12893–12895), as modified below, for publication of legal notice of appealable decisions under 36 CFR part 217. As provided in 36 CFR 217.5(d), the public shall be advised, through Federal Register notice, of the principal newspaper to be utilized for publishing legal notices of decisions. Newspaper publication of notices of decisions is in addition to direct notice of decisions to those who have requested notice in writing and to those known to be interested in or affected by a specific decision.

DATES: The modification to the listing shall begin on or after October 23, 1990.

FOR FURTHER INFORMATION CONTACT: Jean Paul Kruglewicz, Regional Appeals Coordinator, Southern Region, Planning and Budget, 1720 Peachtree Road, NW., Atlanta, Georgia 30367–0102, Phone: 404–347–4067.

SUPPLEMENTARY INFORMATION: Deciding Officers in the Southern Region will give legal notice of decisions subject to appeal under 36 CFR part 217 in the newspapers as previously published on April 5, 1990, with the following exceptions. The timeframe for appeal shall be based on the date of publication of the legal notice of the decision in the principal newspaper.

BILLING CODE 3410-11-M

Revision of the George Washington National Forest Land and Resource Management Plan; Revised Notice of Intent To Prepare an Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Notice; Revised dates for draft and environmental impact statements.

SUMMARY: The George Washington National Forest has, as a result of the scoping process, identified twelve significant issues to be addressed in the revision of the Land and Resource Management Plan for the George Washington National Forest. To allow sufficient time to adequately analyze and address these issues, the Forest is revising the dates for the availability of the draft and final environmental impact statements.

FOR FURTHER INFORMATION CONTACT: Ronald W. Lindenboom, Interdisciplinary Team Leader, George Washington National Forest, Harrison Plaza, P.O. Box 233, Harrisonburg, Virginia 22801, phone (703) 433–2491.

SUPPLEMENTARY INFORMATION: The Notice of Intent for the revision of the Land and Resource Management Plan for the George Washington National Forest was published in the Federal

Register for November 2, 1989 (54 FR 46280–46281).

Twelve significant issues (including sixty-nine sub-issues) have been identified during the scoping process. Interested individuals can receive a 64-page "Summary of Issues" that lists the issues, sub-issues and synopses of substantive comments being addressed in the revision of the *Land and Resource Management Plan for the George Washington National Forest* by contacting the Interdisciplinary Team Leader.

The draft environmental impact statement was scheduled to be filed with the Environmental Protection Agency (EPA) and available for public review by March 1991. It is now expected to be available by October 1991. At that time EPA will publish a notice of availability of the draft environmental impact statement in the Federal Register.

The final environmental impact statement was scheduled to be completed by October 1991. It is now expected to be completed by May 1992.

Dated: October 17, 1990.

Marvin C. Meier,

Deputy Regional Forester.

[FR Doc. 90-25014 Filed 10-22-90; 8:45 am]

BILLING CODE 3410-11-M

Revised Land and Resource Management Plan for the National Forests and Grasslands in Texas, Angelina, Fannin, Houston, Jasper, Montague, Montgomery, Nacogdoches, Newton, Sabine, San Augustine, San Jacinto, Shelby, Trinity, Walker, and Wise Counties, TX

AGENCY: Forest Service, USDA.

ACTION: Notice; intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare a draft and final environmental impact statement for a proposed action to revise the National Forests and Grasslands in Texas Land and Resource Management Plan pursuant to 16 U.S.C. 1604(f)(5) and 36 CFR 219.12. In accordance with 40 CFR 1501.6, the Bureau of Land Management (BLM) will be a cooperating agency.

The agency invites written comments and suggestions on the scope of the analysis. In addition, the agency gives notice that a full environmental analysis and decision-making process will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATES: Comments concerning the scope of the analysis should be received by November 30, 1990, to ensure timely consideration.

ADDRESSES: Submit written comments and suggestions to: William M. Lannen, Forest Supervisor; National Forests in Texas; 701 N. First Street; Lufkin, Texas 75901.

FOR FURTHER INFORMATION CONTACT: Reese Pope, Planning Team Leader; (409) 639–8582.

SUPPLEMENTARY INFORMATION: The Record of Decision for the current Land and Resource Management Plan (Forest Plan) was approved on May 20, 1987. There were 8 administrative appeals of the decision. Two of them were subsequently withdrawn and one was dismissed.

While appeals were pending against the Forest Plan, the Texas Committee on Natural Resources, the Sierra Club, and the Wilderness Society, parties in an ongoing suit against the Forest Service, amended their complaints to raise, inter alia, claims regarding the Forest Plan and, pursuant to the Endangered Species Act (16 U.S.C. 1531 et seq.), claims regarding the Forest's timber management activities with respect to the effect on the red-cockaded woodpecker (*Sierra Club* v. *Lyng*, Civ. No. L–85–69–CA (E.D. Texas 1988)]. The Federal District Court for the Eastern District of Texas ruled that the parties must exhaust the administrative appeal process before it would entertain the Forest Plan issues (see *Sierra Club* v. *Lyng*, 694 F. Supp. 1256 (E.D. Texas 1988)), but it proceeded to hold hearings and a trial and ruled upon the claims relating to the Endangered Species Act.

On June 17, 1988, the court issued a permanent injunction, enjoining the Forest Service from failing to implement certain practices and procedures within 1,200 meters of active and inactive red-cockaded woodpecker colony sites on the National Forests in Texas (*Sierra Club* v. *Lyng*, 694 F. Supp. 1280 (E.D. Texas 1988)). The court made amendments and clarifications to this order on October 20, 1988.

A "Comprehensive Plan" to comply with the June 17 and October 20, 1988, court orders was completed on December 15, 1988, and is currently being implemented on the National Forests in Texas. In accordance with section 7 of the Endangered Species Act, the U.S. Fish and Wildlife Service reviewed the court-ordered management approach and formally issued a jeopardy opinion.

After studying the court decision, the Chief of the Forest Service addressed the 6 remaining administrative appeals by remanding the Forest Plan to the National Forests in Texas for a new analysis and change(s) to the Forest Plan. This remand requires completion of planning steps 1–16 (36 CFR 219.12). The following six paragraphs describe the basis for the Chief's decision to remand the Forest Plan.

The court's orders directly and profoundly affect the management of approximately 200,000 acres, one-third of the 600,000 acres of the National Forests in Texas. Most notable is that the majority of these acres were originally classed as suitable for timber production and managed under the even-aged silvicultural system. Under the December 15, 1988, "Comprehensive Plan," these lands will now be managed using the selection system. To the extent the Forest Plan prescriptions for the affected acres are inconsistent, they must be changed.

The effect of the litigation likely reaches beyond changes in management on these 200,000 acres. In this case the changes that must be made are so fundamental and are on such a large portion of these National Forests, a complete re-analysis is necessary to determine whether the adjustments in the management prescriptions for the remaining areas of the National Forests are necessary. Without such a review, the essential nature of the Forest Plan, as an integrated framework for managing the whole of a National Forest System unit, would be lost.

In formulating the Forest Plan for the National Forests in Texas, the planners worked with assumptions concerning a management situation that no longer exists. A change in the management of approximately one-third the areas of the National Forests in Texas affects the level of goods and services the forests as a whole are able to supply under the current Forest Plan. These acess may now be able to supply less of some goods and services and more of others. It may no longer be feasible, under the current Forest Plan, to provide the mix of goods and services that maximizes net public benefits.

The court order per se does not require that management change outside the 200,000 acres managed for the red-cockaded woodpecker. However, the 200,00 acress are only a part of the National Forests in Texas which the National Forest Management Act requires to be planned for and managed under one integrated forest plan. Therefore, the Forest Plan must be reviewed and modified to meet the court's direction.

The case is currently under appeal to the Fifth Circuit Court of Appeals, and if

the Government prevails, the District Court's orders and the December 15, 1988, "Comprehensive Plan" based on them would not dictate the management of the 200,000 acres. In August 1988, when the Government sought amendment of the court's order, the Forest Service submitted a "Comprehensive Plan" in which it proposed an alternative for managing these acres. If the Forest Service prevails on appeal, management of these acres would not be so drastically affected as under the December 15, 1988, "Comprehensive Plan" currently in operation. However, the effect would still be sufficient to require a review and modification of the entire Forest Plan.

The Chief of the Forest Service directed that the current Forest Plan, as amended, outside the 1,200 meter red-cockaded woodpecker zones, will remain in effect and continue to be implemented during the re-analysis and preparation of the environmental impact statement.

The scope of the revision is to: (1) Establish multiple-use goals and objectives for the four National Forests (Angelina, Sam Houston, Sabine and Davy Crockett) and two Grasslands (Caddo and Lyndon B. Johnson) administered by the National Forests in Texas, (2) establish Forest-wide management requirements (standards and guidelines), (3) establish management area direction applying to future activities in each management area, (4) establish the allowable timber sale quantity and designate lands suitable for timber production, (5) make nonwilderness management area allocations and make recommendations regarding wilderness, (6) establish monitoring and evaluation requirements, (7) designate lands available for future leasing of oil and gas and other minerals, (8) determine harvest systems appropriate for use on suitable lands, (9) decide where clearcutting will not be considered for use, and (10) decide on off-road vehicle management for certain portions of the Forests.

The scope of the revision does not include the following where previously made decisions will continue to apply: (a) Allocations of existing wilderness; (b) allocations of existing Scenic, Protective, and Research Natural Areas; and (c) actions to control southern pine beetle.

The following issues will be addressed in the environmental analysis, as well as any significant issues identified during the scoping process: (1) How much, where and how timber management is to be practiced; (2) how the natural diversity of plants and animals is to be maintained; (3) how the Longleaf Ridge area is to be managed; (4) what balance of commodity and noncommodity goods and services is to be provided; (5) where and how mineral exploration and development is to be conducted; (6) where and how much off-highway vehicle use is to be allowed; and (7) what level of transportation system is to be implemented.

In preparing the environmental impact statement, the Forest Service will develop, as a minimum, a range of alternatives that: (1) Includes a "no action" alternative which is the current Forest Plan, as amended to reflect the most current court ruling (either the current District Court's decision or the pending 5th Circuit Court of Appeal's decision); (2) increase and/or decrease timber harvest and road construction levels, analyze various mixes of timber harvest methods, and analyze various mixes of nontimber activities; (3) evaluate different management strategies, including management of the Longleaf Ridge area and recommendations regarding wilderness; and (4) emphasize different mixes of timber and nontimber resources which may or may not meet demand for those resources.

Public participation will be especially important at several points during the analysis. The first point is during the scoping process (40 CFR 1501.7). The Forest Service will be seeking information, comments, and assistance from Federal, State and local agencies, Indian tribes, and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparation of the draft environmental impact statement (DEIS). The scoping process includes: (1) Identifying potential issues, (2) identifying issues to be analyzed in depth, (3) eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis, (4) exploring additional alternatives, and (5) identifying potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).

Public participation will be solicited by notifying in person and/or by mail known interested and affected publics and key contacts of the scope of the analysis. In addition, news releases will be used to give the public general notice.

The Bureau of Land Management (BLM) has legal jurisdiction pertaining to leasing and developing minerals on National Forest System lands. Consequently, the BLM will be a cooperating agency in accordance with 40 CFR 1501.6.

The draft environmental impact statement is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by September 1992. At that time, EPA will publish a notice of availability of the draft environmental impact statement in the Federal Register.

The comment period on the draft final environmental impact statement will be 90 days from the date the EPA's notice of availability appears in the Federal Register. It is very important that those interested in the management of the National Forests and Grasslands in Texas participate at this time. To be most helpful, comments on the draft should be as specific as possible and should address the merits of the alternatives discussed (See the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal Court decisions have established that reviewers of draft environmental impact statements must structure their participation in the environmental reviews of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions, *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978), and the environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

After the comment period ends on the draft environmental impact statement, the comments will be analyzed, considered, and responded to by the Forest Service in preparing the final environmental impact statement. The final environmental impact statement is scheduled to be completed by June 1993. The responsible official will consider the comments, responses, environmental consequences discussed in the final environmental impact statement, and applicable laws, regulations, and policies in making a decision regarding this revision. The responsible official will document the decision and reasons for the decision in the Record of

Decision. That decision will be subject to appeal in accordance with 36 CFR 217.

The responsible official is John E. Alcock, Regional Forester, Southern Region, 1720 Peachtree Road, NW., Atlanta, Georgia 30367.

Dated: October 16, 1990.

Marvin C. Meier,

Deputy Regional Forester.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

[Docket No. 900861-0261]

Foreign Availability Assessment: Pyrolytic Boron Nitrite (PBN)

AGENCY: Office of Foreign Availability, Bureau of Export Administration, Commerce.

ACTION: Notice of Initiation of an Assessment and Request for Comments.

SUMMARY: The Office of Foreign Availability (OFA) is providing notice that it initiated an assessment of foreign availability of pyrolytic boron nitrite (PBN) crucibles, boats, furnace tubes, liners, and other specially designed shapes used in the manufacture of semiconductor devices, integrated circuits and "assemblies" to controlled countries. OFA will assess foreign availability under the provisions of part 791 of the Export Administration Regulations (EAR). OFA is seeking public comments on the foreign availability of these items worldwide.

DATES: The period for submission of information will close November 23, 1990.

ADDRESSES: Submit information relating to this foreign availability assessment to: Anatoli Welihozkiy, Acting Director, Office of Foreign Availability, Bureau of Export Administration, U.S. Department of Commerce, room SB-097, 14th Street and Pennsylvania Avenue, NW., Washington, DC 20230

The public record concerning this notice will be maintained in the Bureau of Export Administration's Freedom of Information Record Inspection Facility, room 2525, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: John Pastore, Office of Foreign Availability, Department of Commerce, Washington, DC 20230, Telephone: (202) 377-8074.

SUPPLEMENTARY INFORMATION: Although the Export Administration Act (EAA) expired on September 30, 1990, the President, invoking the International Emergency Economic Powers Act, continued in effect the powers of the EAA and the Export Administration Regulations (EAR), to the extent permitted by law, in Executive Order 12730 of September 30, 1990.

Part 791 of the AER (15 CFR part 730 et seq.) establishes procedures and criteria for determining the foreign availability of goods and technology whose export is controlled for national security reasons. OFA is publishing this notice pursuant to Section 791.4 of the EAR.

On July 30, 1990, OFA accepted for filing a foreign availability submission pursuant to § 791.4 of the EAR relating to the decontrol of pyrolytic boron nitride (PBN) crucibles, boats, furnace tubes, liners, and other specially designed shapes used in the manufacture of semiconductor devices, integrated circuits and "assemblies" to controlled countries. These items are controlled for national security reasons under paragraph (b)(1) of Export Control Commodity Number (ECCN) 1355A of the Commodity Control List (CCL) (15 CFR 799.1, Supp. 1): Equipment for the processing of materials for the manufacture of devices and components.

Upon acceptance of the submission, OFA initiated a foreign availability assessment of the item. By December 30, 1990, the Department intends to submit for publication in the Federal Register its determination of the foreign availability of the item.

To assist OFA in assessing such foreign availablity, any person may submit relevant information to OFA at the above address.

The following information would be especially useful:

—Product names and model designations of the U.S. and non-U.S. items;
—Names and locations of non-U.S. sources;
—Key performance elements, attributes, and characteristics of the items on which quality comparisons may be made;
—Non-U.S. sources' production quantities and/or sales of any allegedly comparable item;
—An estimate of market demand and the potential economic impact of the control on the U.S. item;
—Extent to which any allegedly comparable item is based on U.S. technology;
—Information supporting the proposition that the foreign item is in fact available to the country or countries for which foreign availability is alleged.

Evidence supporting such relevant information may include, but is not limited to: foreign manufacturers' catalogs, brochures, or operations or maintenance manuals; articles from reputable trade publications; photographs; and depositions based upon eyewitness accounts. Supplement No. 1 to part 791 of the EAR provides additional examples of evidence that would be helpful to the investigation.

OFA will also accept comments or information accompanied by a request that part or all of the material be treated confidentially because of its proprietary nature or for any other reason. The information for which confidential treatment is requested should be submitted to OFA separately from any non-confidential information submitted. The top of each page should be marked with the term "Confidential Information." OFA either will accept the submission in confidence or, if the submission fails to meet the standards for confidential treatment, return it. A non-confidential summary must accompany such submissions of confidential information. The summary will be made available for public inspection.

Information OFA accepts as privileged under section (b) (3) or (4) of the Freedom of Information Act (5 U.S.C. 552) will be kept confidential and will not be available for public inspection, except as authorized by law. Communications from agencies of the United States Government and foreign governments will not be made available for public inspection.

All other information received in response to this notice will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, the Department requires written comments. Oral comments must be followed by written memoranda, which also will be a matter of public record and will be available for public review and copying.

The public record of information received in response to this notice will be maintained in the Bureau of Export Administration's Freedom of Information Records Inspection Facility, room 4525, Department of Commerce, 14th Street and Pennsylvania Avenue NW., Washington, DC 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in part 4 of title 15 of the *Code of Federal Regulations*.

Information about the inspection and copying of records at the facility may be obtained from Margaret Cornejo, Bureau of Export Administration, Freedom of

BEST COPY AVAILABLE

Information Officer, at the above address or by calling (202) 377–2593.

Because of the strict statutory time limitations in which Commerce must make its determination, the period for submission of relevant information will close November 23, 1990. The Department will consider all information received before the close of the comment period in developing the assessment. Information received after the end of the period will be considered if possible, but its consideration cannot be assured. Accordingly, the Department encourages persons who wish to provide information related to this foreign availability submission to do so at the earliest possible time to permit the Department the fullest consideration of the information.

Dated: October 16, 1990.

James M. LeMunyon,

Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-M

International Trade Administration

[A-588-401]

Calcium Hypochlorite From Japan; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to requests by petitioner, Olin Corporation, the Department of Commerce has conducted administrative reviews of the antidumping duty order on calcium hypochlorite from Japan. The reviews cover two manufacturers/exporters of this merchandise to the United States during the periods April 1, 1988 through March 31, 1989 and April 1, 1989 through March 31, 1990.

One firm had no shipments. For one firm which did not respond to our questionnaire for either review period, we used the best information available, which is the highest rate of any reviewed firm from the previous review.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: October 23, 1990.

FOR FURTHER INFORMATION CONTACT: Fred Baker or Robert Marenick, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On March 31, 1989, the Department of Commerce ("the Department") published a notice of "Opportunity to Request an Administrative Review" (54 FR 13211) of the antidumping duty order on calcium hypochlorite from Japan (50 FR 15470; April 18,1985). On April 10, 1989, the petitioner, Olin Corporation ("Olin"), requested an administrative review of the antidumping duty order. We initiated the review, covering the period April 1, 1988 through March 31, 1989, on May 24, 1989 (54 FR 22465).

On April 10, 1990, the Department published a notice of "Opportunity to Request an Administrative Review" (55 FR 13302) of the antidumping duty order on calcium hypochlorite from Japan for the period April 1, 1989 through March 31, 1990. On April 11, 1990, Olin requested an administrative review of the antidumping duty order. We initiated the review for this period on June 1, 1990 (55 FR 22366). The Department has now conducted these administrative reviews in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act"). The final results of the last administrative review in this case were published in the **Federal Register** on October 10, 1990 (55 FR 41259).

Scope of the Review

Imports covered by the reviews are shipments of calcium hypochlorite from Japan. During the review period such merchandise was classifiable under item number 418.2200 of the Tariff Schedules of the United States Annotated ("TSUSA"). This merchandise is currently classifiable under HTS item 2828.10.00.00. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The reviews cover two manufacturers/exporters of calcium hypochlorite to the United States and the periods April 1, 1988 through March 31, 1989 and April 1, 1989 through March 31, 1990. Tohoku Tosoh Chemical Co., Ltd., had no shipments of calcium hypochlorite to the United States during the periods of review. Because Nankai Chemical Industry Co., Ltd., failed to respond to the antidumping questionnaires for both periods, the Department used the best information available for deposit and assessment purposes, which is the the highest rate of any reviewed firm from the previous review.

Preliminary Results of the Review

As a result of our reviews, we preliminarily determine the margins to be:

Manufacturer/exporter	Period	Margin (percent)
Tohoku Tosoh Chemical Co., Ltd	04/01/88–03/31/89	
	04/01/89–03/31/90	10.56*
		10.56*
Nankai Chemical Industry Co., Ltd	04/01/88–03/31/89	
	04/01/89–03/31/90	10.56
		10.56

* No shipments during the periods; margin from last review in which there were shipments.

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication or the first workday thereafter. Case briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 37 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any written or oral comments.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required on shipments of calcium hypochlorite from Japan by the companies under review. For any future entries of this merchandise from a new producer and/or exporter, not covered in these reviews, whose first shipment occurred after March 31, 1990, and who is unrelated to any firm reviewed in this or any prior review, a cash deposit of 10.56 percent shall be required.

These deposit requirements are effective for all shipments of Japanese calcium hypochlorite entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of these administrative reviews.

These administrative reviews and notice are in accordance with 19 U.S.C. 1675(a)(1), (c) and 19 CFR 353.22.

Dated: October 15, 1990.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-122-005]

Carbon Steel Bars and Structural Shapes From Canada; Revocation of Antidumping Finding

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of revocation of antidumping finding.

SUMMARY: The Department of Commerce has determined to revoke the antidumping finding on carbon steel bars and structural shapes from Canada, because it is no longer of any interest to interested parties.

EFFECTIVE DATE: September 6, 1990.

FOR FURTHER INFORMATION CONTACT: Sheila Forbes or Robert Marenick, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On September 6, 1990, the Department of Commerce (the Department) published in the **Federal Register** (55 FR 36680) its intent to revoke the antidumping finding on carbon steel bars and structural shapes from Canada (29 FR 13319, September 25, 1964).

Additionally, as required by 19 CFR 353.259d)(4)(ii), the Department served written notice of its intent to revoke this finding on each interested party listed on the service list. Interested parties who might object to the revocation were provided the opportunity to submit their comments no later than thirty days from the date of publication.

Scope of the Finding

The United States, under the auspices of the Customs Cooperation Council, has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedules (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by this finding are shipments of carbon steel bars bars-shapes under 3 inches, and structural shapes 3 inches and over from Canada manufactured by Western Canada Steel Ltd. Through 1988, such merchandise was classifiable under item numbers 606.8300 and 608.8000 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item numbers 7215.90.50 and 7216.33.00. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

Determination to Revoke

The Department may revoke an antidumping finding or order if the Secretary of Commerce concludes that the finding or the order is no longer of any interest to interested parties. We conclude that there is no interest in an antidumping finding or order when no interested party has requested an administrative review for four consecutive review periods (19 CFR 353.25(d)(4)(i)) and when no interested party objects to the revocation.

In this case, we received no requests to conduct an administrative review pursuant to our notice of Opportunity to Request Administrative Review for five consecutive review periods (51 FR 31961, September 6, 1986; 52 FR 32951, September 1, 1987; 53 Fr 33836, September 1, 1988; 54 FR 37496, September 11, 1989; 55 FR 36300, September 5, 1990). Furthermore, we received no objections to our notice of intent to revoke the antidumping finding (55 FR 36680). Based on these facts, we have concluded that the antidumping finding covering carbon steel bars and structural shapes from Canada is no longer of any interest to interested parties. Accordingly, we are revoking this antidumping finding in accordance with 19 CFR 353.25(d)(4)(iii).

The revocation applies to all unliquidated entries of carbon steel bars and structural shapes from Canada entered, or withdrawn from warehouse, for consumption on or after September 6, 1990. Entries made during the period September 1, 1989 through September 5, 1990 will be subject to automatic assessment in accordance with 19 CFR 353.22(e). The Department will instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after September 6, 1990, without regard to antidumping duties, and to refund any estimated antidumping duties collected with respect to those entries.

This notice is in accordance with 19 CFR 353.25.

Dated: October 15, 1990.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

Termination of Antidumping Duty Administrative Review; Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, From Romania

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On July 18, 1990, the Department of Commerce (the Department) initiated an administrative review of the antidumping duty order on tapered roller bearings and parts thereof, finished or unfinished, from Romania. This review has now been terminated.

SUPPLEMENTARY INFORMATION:

Background

On July 18, 1990, at the request of UCF America, Inc., an importer of the subject merchandise, the Department initiated an administrative review of the antidumping duty order on tapered roller bearings and parts thereof, finished or unfinished, (TRBs) from Romania. On July 26, 1990, the Department published in the **Federal Register** the notice of initiation of that administrative review (55 FR 30490). The review covered Tehnoimportexport, an exporter of Romanian TRBs, and the period June 1, 1989 through May 31, 1990. UCF America, Inc. subsequently withdrew its request for review on October 10, 1990, based upon the fact that there were no shipments during the period of review. As a result, the Department has terminated the review.

EFFECTIVE DATE: October 23, 1990.

FOR FURTHER INFORMATION CONTACT: Shawn Thompson or Kate Johnson, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-1776 or (202) 377-4103, respectively.

SUPPLEMENTARY INFORMATION: This notice is published in accordance with section 751 of the Tariff Act of 1930, as amended (19 U.S.C. 1675) and 19 CFR 353.22(a)(5).

Dated: October 17, 1990.

Francis J. Sailer,

Deputy Assistant Secretary for Investigations, Import Administration.

Lamb Meat From New Zealand; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On August 30, 1990, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty order on lamb meat from New Zealand. We have now completed that review and determine the total bounty or grant to be 16.25 percent *ad valorem* for Waitaki, 11.31 percent *ad valorem* for Richmond, 0.47 percent *ad valorem* for Weddel Crown, 0.38 percent *ad volorem* for Lamb Gourmet and 2.74 percent *ad valorem* for all other firms during the period April 1, 1988 through March 31, 1989. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*.

EFFECTIVE DATE: October 23, 1990.

FOR FURTHER INFORMATION CONTACT: Gayle Longest or Paul McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On August 30, 1990, the Department of Commerce (the Department) published in the **Federal Register** (55 FR 35443) the preliminary results of its administrative review of the countervailing duty order on lamb meat from New Zealand (50 FR 37708; September 17, 1985). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of Review

Imports covered by this review are shipments of lamb meat, other than prepared, preserved or processed, from New Zealand. During the review period, such merchandise was classifiable under items 106.3000 of the *Tariff Schedules of the United States Annotated* (TSUSA). Such merchandise is currently classifiable under items 0204.10.0000, 0204.22.2000, 0204.23.2000, 0204.30.0000, 0204.42.2000 and 0204.43.2000 of the *Harmonized Tariff Schedule* (HTS). The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period April 1, 1988 through March 31, 1989 and two programs: (1) Export Market Development Taxation Incentive (EMDTI) and (2) Livestock Incentive Scheme (LIS).

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received no comments.

Final Results of Review

As a result of our review, we determine the total bounty or grant to be 16.25 percent *ad valorem* for Waitaki, 11.31 percent *ad valorem* for Richmond, 0.47 percent *ad valorem* for Weddel Crown, 0.38 percent *ad valorem* for Lamb Gourmet and 2.74 percent *ad valorem* for all other firms during the period April 1, 1988 through March 31, 1989. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*.

Therefore, the Department will instruct the Customs Service to assess countervailing duties of 16.25 percent *ad valorem* for Waitaki, 11.31 percent *ad valorem* for Richmond, and 2.74 percent *ad valorem* for all other firms, except Weddel Crown and Lamb Gourmet, on all shipments of this merchandise exported on or after April 1, 1988 and on or before March 31, 1989. For Weddel Crown and Lamb Gourmet, the Department will instruct the Customs Service to liquidate, without regard to countervailing duties, all shipments of this merchandise exported on or after April 1, 1988 and on or before March 31, 1989.

The termination of the EMDTI program reduces the total estimated bounty or grant to 0.38 percent *ad valorem*, a rate which is *de minimis*. Therefore, the Department will instruct the Customs Service to waive cash deposits of estimated countervailing duties on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: October 16, 1990.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

Scope Rulings

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of scope rulings.

SUMMARY: The International Trade Administration (ITA) hereby publishes a list of scope rulings completed between April 1, 1990 and June 30, 1990. In conjunction with this list, the ITA is also publishing a list of pending scope inquiries. The ITA intends to publish future lists within thirty days of the end of each quarter.

EFFECTIVE DATE: October 23, 1990.

FOR FURTHER INFORMATION CONTACT: Melissa G. Skinner, Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-4851.

SUPPLEMENTARY INFORMATION:

Background

Sections 353.29(d)(8) and 355.29(d)(8) of the Department's regulations (19 CFR 353.29(d)(8) and 355.29(d)(8)) provide that on a quarterly basis the Secretary will publish in the **Federal Register** a list of scope rulings completed within the last three months. The lists are to include the case name, reference number, and brief description of the ruling.

This notice lists scope rulings completed between April 1, 1990 and June 30, 1990, and pending scope clarification requests. The ITA intends to publish in October 1990, a notice of scope ruling completed between July 1, 1990 and September 30, 1990.

The following lists provide the country, case reference number, requester(s), and a brief description of either the ruling or product subject to pending request.

Scope Rulings Completed Between April 1, 1990 and June 30, 1990

Country: Canada

A-122-401: Red Raspberries; Various Canadian growers and sellers—berries in tankers and berries in flats

are within the scope of the order—5/16/90

Country: Federal Republic of Germany

A–428–801: Antifriction Bearings; SKF Textile Products, Inc.—antifriction bearings, including integral shaft ball bearings, that are used in textile machinery and that are imported with attachments and augmentations sufficient to advance their function beyond load-bearing/friction-reducing capability (SKF models: FL 11–014239; FL 11–013834; FL 11–013832; FL 11–014238; FL 11–014237; FL 97–017895; FL 98–017898; FL 113–017897; FL 114–017896; FL 06–104330; CK 668–012083; CK 668–012084; CK 668–013334; TL 225–012411; AW 12–014299; SR 23–008537; SR 23–012891; SR 23–953900; SR 23–953901; SR 23–953902; SR 23–953901; SR 23–953905; SR 24–954051; SR 9; FL 11–013832; FL 11–013833; FL 11–013834; FL 15–014956; FL 15–014964; TL 225–022488; TL 225–022486; TL 225–022485; TL 225–024121; CK 12–016446; CK 12–030848; CK 12–16446; CK 12–030848; LE 222–013406; LE 222–022847; LE 222–027128; DR 1918–014623; ZL 18–010975; ZL 20–018867; SR 7–953001; SR 45–017747; SR 45–028044; SR 28–01247; SR 28–012474; SR 23–954031; SR 23–954032; SR–954004; SR 23–954035; SR 23–010058; SR 23–020650; SR 23–953801; SR 23–954030; SR 24–954051; and SR 35–954151) are outside the scope of the order—5/10/90

Country: Taiwan

A–583–003: Fireplace Mesh Panels; Hechingers—inflexible, freestanding panels are outside the scope of the order—5/30/90

Pending Scope Inquiries as of June 30, 1990

Country: United Kingdom

A–412–801: Antifriction Bearings; Durbal GmbH, Nippon Thompson Co., Ltd., and Minebea Co., Ltd.—rod ends

Country: France

A–427–801: Antifriction Bearings; Valeo, Societe Anonyme—clutch release berings; Bell Helicopter Textron Inc.—ball bearings for use in helicopters

Country: Federal Republic of Germany

A–428–801: Antifriction Bearings; Durbal GmbH, Nippon Thompson Co., Ltd., and Minebea Co., Ltd.—rod ends

Country: People's Republic of China

A–570–506: Porcelain-on-Steel Cookware; Texsport—camping sets

A–570–003: Cotton Shop Towels; Able Textile—towels assembled in Canada from cotton grey fabric from People's Republic of China

Country: Korea

A–580–006: Color Television Receivers; Orion Electric Co.—TV/Radio model 799C/Chassis: CTV–8x; Goldstar—TV/Radio model RCV–661S; Goldstar—TV/VCR model KMV–6002; Commodore Business Machines—computer monitor model 1084(D)

A–580–801: Photo Albums and Filler Pages; Worldsource—commemorative binders; U.S. Customs inquiry—unfinished filler pages; Bowon Trading Co.—photo frame/albums (models 101257, 201257, 200957, 214357, 279757, 301457, 401357, 280857, 201057, and 316357)

A–580–805: Color Picture Tubes; Penn-Ray Sutra Corp.—video game displays

A–580–808: Certain Small Business Telephone Systems and Subassemblies Thereof; DBA—Smartalk 200 and 300 systems; Executone—System 432 and subassemblies exclusive to it, as well as subassemblies of the Isoetec line (P/N 15200, P/N 21660, P/N 15640, P/N 15700, P/N 15600, P/N 15620, P/N 15590, P/N 15610, P/N 15680, P/N 15650, P/N 15100, P/N 15410, P/N 15660, P/N 15340, P/N 15670, P/N 09010, P/N 62300, P/N 62100, P/N 62200, P/N 62500, P/N 62400, P/N 83500/80500, P/N 82030, P/N 83700/80700, P/N 82020, P/N 15780, P/N 15790, P/N 15770, P/N 09004, and P/N 15510)

Country: Taiwan

A–583–506: Porcelain-on-Steel Cookware; RSVP—BBQ grill baskets

Country: Japan

A–588–007: Certain High Capacity Pagers; Motorola—components and subassemblies

A–588–015: Television Receiving Sets, Monochrome and Color; NEC—Subassemblies: W5A–1 (HE), W4A–1 (HE), W3A–1 (HE), W5A–1, and W4A–1; Sharp—LCD TV/Radio/Cassette model JC–AV1; Teknika Electronics Corp.—P.C.B. subassemblies; Sharp—LCD TV/VCR model VC–V542U; Casio Computer Co., Ltd., Casio, Inc., Citizen Watch Co., Ltd, Hitachi, Ltd., Hitachi Sales Corporation of America, Hitachi Sales Corporation of Hawaii, Inc., Matsushita Electric Industrial Co., Ltd., Matsushita Electric Corporation of America, NEC Corporation, NEC Home Electronics (U.S.A.), Inc., Seiko Epson Corporation, Toshiba Corporation, and Toshiba America, Inc.—certain hand-held liquid crystal display televisions (Casio Computer Co., Ltd., models TV–400T, TV–500, TV–1400, TV–3100, TV–3500; Citizen Watch Co., Ltd., models 36TA, 35TA, TB20, TA30, TC50, TC53, DD–T128, DD–P238, TC52; Matsushita Electric Industrial Co., Inc., models CT–301E/302E, CT–311E/312E; and Seiko Epson Corporation models LVD–602, LVD–702, LVD–832) and all other LCD TVs under 6" in screen size imported into the United States.

A–588–037: Portable Electric Typewriters; Portable Electric Typewriters; Matsushita—Office typewriter models KX–E400, KX–E500B ("Jetwriter"), KX–E500 [E]*, KX–E501, [E]* ("Jetwriter"), KX–E506 [E]* ("Jetwriter IIe"), KX–E508 [E]* (*–[E] is updated version); Smith Corona—"later developed" typewriters; Tokyo Juki—"office" typewriter models: Juki Seirra 4500, Sierra 3300, Sierra 3400, Sierra 3400C, Sierra 3500, Sierra 3500XL, Sierra Officewriter, Remington Rand 770, Remington Rand 775, Remington Rand 880, Avanti 1400, and Avanti 1500; Swintec/Nakajima—"office" typewriter models: 8000, 8000SP, 8011, 8011SP, 8012, 8014S,. 8014KSR, 8016, 8017, 1145CM, 1146CM, 1146CMA, 1146CMP, 1146CMSp, 1186CM, and 1186CMP; Silver Reed/Silver Seiko—"office" typewriter models: EX–200 EX–300 EX–30 (85–EP), EX–32 (87–EP), EX–34 (89–EP), EX–36 (89–SP), EX–42, EX–43, EX–44, EZ–30, and EZ–50; Matsushita—"penwriter" typerwriter models: X–Y Writer, RK–P200C, RK–P240, RK–P300, RK–P400, RK–P400C, and RK–P440

A–588–405: Cellular Mobile Telephones and Subassemblies; Matsushita—Models EB–3510 and 3511; NovAtel—Models PTR–025; Mitsubishi—Models MT–706FOR6A and 974FOR6A; Sanyo—Model CMP–310; NEC—message recording device (AVA)

A–588–609: Color Picture Tubes; Tektronix—Sony produced cathode ray tube SD–97FS; Toshiba—models A36JAR90X and A32JAR50X;

A–588–702: Stainless Steel Butt Weld Pipefittings; Benkan Corporation—super clean pipe fittings—preliminary issued 6/25/90; DMEX, Inc.—sanitary pipe fittings—preliminary issued 6/25/90

A–588–802: 3.5" Microdisks and Media Thereof; Toshiba—barium ferrite coated microdisks

A–588–804: Antifriction Bearings: Durbal GmbH, Nippon Thompson Co., Ltd., and Minebea Co., Ltd.—rod ends; Imprimis Technology Inc.—ball bearings used in production of disk drives

A–588–806: Electrolytic Manganese Dioxide; Sumitomo—High grade

chemical manganese dioxide (CMD-U)

A-588-808: Certain Small Business Telephone Systems and Subassemblies Thereof; NEC—NEAX 2400 system and subassemblies; Fujitsu—Starlog system; Toshiba—Perception II and Perception Ex systems and subassemblies (telephone sets—EKT 6000-N, EKT 6000-NM, EKT 6015-H, EKT 6015-S, EKT 6025-H, EKT 6025-SD, EKT 6025-D, EKT 6520-SD, EKT 6510-S, EKT 6510-H, EKT 6520-H, HDSS 6060, AND HDSS6060)

Interested parties are invited to comment on the accuracy of the list of pending scope clarification requests. Any comments should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B-099, U.S. Department of Commerce, Washington, DC 20230.

Dated: October 15, 1990.

National Technical Information Services

Government-Owned Inventions; Availability of Licensing

October 15, 1990.

The inventions listed below are owned by agencies of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally funded research and development. Foreign patents are filed on selected inventions to extend market coverage for U.S. companies and may also be available for licensing.

Licensing information may be obtained by writing to: National Technical Information Service, Center for Utilization of Federal Technology—Patent Licensing, U.S. Department of Commerce, P.O. Box 1423, Springfield, Virginia 22151. All patent applications may be purchased, specifying the serial number listed below, by writing NTIS, 5285 Port Royal Road, Springfield, Virginia 22161 or by telephoning the NTIS Sales Desk at (703) 487-4650. Issued patents may be obtained from the Commissioner of Patents, U.S. Patent and Trademark Office, Washington, DC [illegible]

Please cite the number and title of inventions of interest.

Douglas J. Campion,

Patent Licensing Specialist, Center for the Utilization of Federal Technology.

BILLING CODE 3510-04-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Rice and Cotton Exchange: Proposed Amendments Relating to Delivery Points for the Rough Rice Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule change.

SUMMARY: The Chicago Rice and Cotton Exchange (CRCE) has submitted proposed amendments to its rough rice futures contract that will change the locational price differentials for deliveries made at warehouses that are not located at mill sites. In addition, the proposed amendments will change the definition of a mill-site warehouse. The amendments will apply to all futures contract months beginning with the September 1991 contract month. Currently, the Exchange lists contract months through the November 1991 contract month. In accordance with section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, the Acting Director of the Division of Economic Analysis (Division) of the Commodity Futures Trading Commission (Commission) has determined, on behalf of the Commission, that the proposed amendments are of major economic significance. On behalf of the Commission, the Division is requesting comment on this proposal.

DATES: Comments must be received on or before November 23, 1990.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Reference should be made to the proposed changes in delivery point differentials for the CRCE rough rice futures contract.

FOR FURTHER INFORMATION CONTACT: Frederick V. Linse, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, telephone (202) 254–7303.

SUPPLEMENTARY INFORMATION: The rough rice futures contract currently provides that delivery may be made at approved warehouses in a twelve-county area in the state of Arkansas. Deliveries at regular warehouses located at mill sites are made at par. Deliveries at regular warehouses that are not located at mill sites are made at specified price differentials to the par points. The price differential for each non-mill-site warehouse is based on its geographic distance from the nearest mill, as indicated below:

Number of miles to nearest mill	Futures price differential
Less than 5 miles	–5 cents/cwt.
5 miles or greater, but less than 15 miles.	–10 cents/cwt.
15 miles or greater, but less than 30 miles.	–15 cents/cwt.
30 miles or greater, but less than 40 miles.	–20 cents/cwt.

The Exchange proposes to replace the above differential schedule with a single differential of minus 15 cents per hundredweight for futures deliveries at all non-mill-site warehouses, irrespective of the distance to the nearest mill. In support of the proposal, the Exchange states that the proposal will increase the pricing efficiency of the rough rice futures contract.

In addition, the Exchange proposes to change its definition of a mill-site warehouse. Under the current definition, to be classified as a mill-site warehouse, the rice mill must be operating "on a regular basis." Under the proposed definition, to be classified as a mill-site warehouse, the rice mill must be equipped to commercially mill rough rice on a regular basis and also must have milled rough rice within the last twenty-four months.

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, at the above address. Copies of the amended terms and conditions can be obtained through the Office of the Secretariat by mail at the same address or by telephone at (202) 254–6314.

The materials submitted by the CRCE in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987). Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of the Secretariat at the above address in accordance with CFR 145.7 and 145.8.

Any person interested in submitting written data, views, or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, at the above address by the specified date.

Issued in Washington, DC, on October 17, 1990.

Paul M. Architzel,

Acting Director, Division of Economic Analysis.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Department of the Army

Military Traffic Management Command

SUBJECT: Notice.

ACTION: Announcement is made of meeting of the Military/Industry Mobile Homes Symposium. This meeting will be held on November 15, 1990 at Headquarters, Military Traffic Management Command, 5611 Columbia Pike, Falls Church, Virginia, and will convene at 1100 hours and adjourn at approximately 1630 hours.

PROPOSED AGENDA: The purpose of the symposium is to provide an open discussion and free exchange of ideas with the public on procedural changes to the Personal Property Traffic Management Regulation. DOD 4500.34R. and the handling of other matters of mutual interest concerning the Department of Defense Personal Property Shipment and Storage Program.

FOR FURTHER INFORMATION CONTACT: Commander, Military Traffic Management Command, ATTN: MTOO–M, at telephone number 756–1600, between 0900–1530 hours. Topics to be discussed should be received on or before October 19, 1990.

John O. Roach, II,

Department of the Army Liaison With the Federal Register.

BILLING CODE 3710-08-M

Corps of Engineers, Department of the Army

Jacksonville District, Jacksonville, FL; Intent To Prepare Draft Environmental Impact Statement (DEIS) for Proposed Modifications to the Central and Southern Florida Project for Flood Control and Other Purposes—Canal 111

AGENCY: Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: General design work is authorized to modify structures associated with the L–31 borrow canal and the C–111 canal for the project purpose of flood protection and for restoration of Taylor Slough and associated wetlands within Everglades National Park.

FOR FURTHER INFORMATION CONTACT: For questions about the proposed action and DEIS contact Dr. Gerald L. Atmar, U.S. Army Engineer District, P.O. Box 4970, Jacksonville, Florida 32232–0019; telephone (904) 791–2615.

SUPPLEMENTARY INFORMATION: Canal 111 (C–111) was authorized as part of the South Dade County Area Plan of Improvement by the Flood Control Act of October 23, 1962 (Pub. L. 87–874). The specific purpose was to provide flood protection along the lower east coast of Florida. In July, 1988, a General Design Memorandum Addendum and an Environmental assessment were published addressing the need for improved flood protection, water supply, and environmental restoration. Environmental issues included unbalanced distribution of overland water flow to Florida bay and extremely large fresh water releases to Manatee Bay that occurred when an earthen plug at S–197 was removed during major flood events. Subsequent to publication of the GDM and EA, the U.S. Fish and Wildlife Service, Everglades National Park, and the State of Florida expressed dissatisfaction with the scope of the GDM–EA study. The study and EIS noticed here, are to address all affected environmental issues, including impacts to agriculture in the study area and restoration of flows to Taylor Slough in the eastern part of the park.

1. Considered action is to make operation changes to use water control structure S–174 and Pump Station S–332 to capacity to deliver water to Taylor Slough. Water in excess of capacity at S–174 would be discharged through S–1–76 and conveyed southward through C–111. Water in excess of S–332 capacity would be discharged through S–175 southward through the L–31W borrow canal along the easter boundary of Everglades National Park, and from the canal outlet southward in sheet flow toward the Park eastern panhandle.

2. Alternatives include: Making the above-described operational changes, and also installing additional pump capacity to discharge rain driven flows from the historic Taylor Slough drainage basin which crosses the Frog Pond agricultural area. Alternative pump capacities will be considered.

3. The public will be involved in the planning process through mail solicitations and advisements. As a minimum, all parties who have expressed interest in the planning process for modified water deliveries to Everglades National Park will be invited to participate in the planning process. Federal, State and local agencies, affected Indian tribes and groups, and other interested groups will be involved in the process.

4. Significant issues identified to date which shall be analyzed include possible effects on the Frog Pond Agricultural Area, Everglades National Park, Florida Bay and Manatee Bay. Federally listed species including the Florida panther, Cape Sable sparrow, and wood stork will be considered and their habitats modeled to identify effects potentially stemming from the project. Other wading birds habitat requirements will be factored into studies of effects.

5. The U.S. Fish and Wildlife Service and Everglades National Park will be invited to be cooperating agencies in the preparation of the environmental impact statement. The National Marine Fisheries Service and the Florida Game and Fresh Water Fish Commission have been consulted and asked for active participation in planning.

6. A scoping meeting is not scheduled. Meeting to address discrete issues or parts or functions of the study area may be called.

7. The DEIS is scheduled for release to the public during the first quarter of fiscal year 1992.

John Roach,

Department of the Army Liaison, Office with the Federal Register.

[FR Doc. 90–24939 Filed 10–22–90; 8:45 am]

BILLING CODE 3710–AJ–M

[37–10–GMF–M]

Winfield Locks and Dam, Kanawha River, WV; Intent To Prepare Draft Environmental Impact Statement; Supplement

AGENCY: Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a environmental impact statement supplement.

SUMMARY: The Huntington District Engineer has determined that significant environmental changes have resulted from construction activities on additional lands purchased at the Winfield Locks Replacement Project. This action is necessary to be in compliance with NEPA and to mitigate any adverse impacts from such action.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action can be answered by: Mr. Ron Keeney, Phone: 304–529–5712.

SUPPLEMENTARY INFORMATION: 1. Following completion of the Winfield Lock Replacement Interim Feasibility Report and Environmental Impact Statement (September 1986), realignment of the new lock was determined to be necessary as a result of hydraulic modeling studies. The studies found the alignment proposed in the Feasibility Report would have unsatisfactory navigation conditions at higher river stages. Therefore, several design modifications were made. These modifications made it necessary to acquire an additional 157 acres of land for channel alignment and spoil disposal. The Environmental Impact Statement Supplement will address only the impacts associated with the additional 157 acres of new land purchased. Construction efforts on the project site have been implemented.

2. Since construction of the project is ongoing at this time and the change in project has determined the new alignment, the only alternative is the one being implemented.

3. The scoping process in the development of the SEIS will entail a public involvement program and participation of the West Virginia Department of Natural Resources, the United States Fish and Wildlife Service and the United States Environmental Protection Agency as well as any other interested federal, state, local, or private agencies or persons.

4. Anticipated significant issues to be analyzed in depth in the SEIS are;

a. Terrestrial impacts on the additional lands.

b. Impacts on loss of riparian habitat.

c. Impacts on fish spawning, nursery, and feeding areas as a result of increasing channel width.

d. Impact analysis of any hazardous and toxic wastes found on the additional lands.

5. A public scoping meeting is anticipated in early 1991. This public scoping meeting will address and review all study findings and encourage public input into the SEIS process.

Dated: September 28, 1990.

James R. Van Epps,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710–08–M

Defense Logistics Agency

Privacy Act of 1974; Amend a record system

AGENCY: Defense Logistics Agency (DLA), DOD.

ACTION: Amend a record system.

SUMMARY: The Defense Logistics Agency proposes to amend one existing record system to its inventory of record system notices subject to the Privacy Act of 1974, as amended, (5 U.S.C. 552a). The changes made to this notice consist of administrative changes only. Postal Service employees and non-appropriated funded employees have been separated from Federal and Quasi-Federal employees. The routine uses have been rewritten to better enable the public to identify the external agencies using the records and the uses thereof.

DATES: The proposed action will be effective without further notice on November 23, 1990, unless comments are received which would result in a contrary determination.

ADDRESSES: Ms. Susan Salus, DLA–XAM, Defense Logistics Agency, Cameron Station, Alexandria, VA 22304–6100. Telephone (202) 274–6234 or Autovon 284–6234.

SUPPLEMENTARY INFORMATION: The complete inventory of Defense Logistics Agency record system notices subject to the Privacy Act of 1974, as amended, have been published in the Federal Register as follows:

50 FR 22897, May 29, 1985 (DoD Compilation, changes follow)
50 FR 51008, Dec. 20, 1985
51 FR 27443, Jul. 31, 1986
51 FR 30104, Aug. 22, 1986
52 FR 35304, Sep. 18, 1987
52 FR 37495, Oct. 7, 1987
53 FR 04442, Feb. 16, 1988
53 FR 09985, Mar. 28, 1988
53 FR 21511, Jun. 8, 1988
53 FR 26105, Jul. 11, 1988
53 FR 32091, Aug. 23, 1988
53 FR 39129, Oct. 5, 1988
53 FR 44937, Nov. 7, 1988
53 FR 48706, Dec. 2, 1988
54 FR 11997, Mar. 23, 1989
55 FR 21918, May 30, 1990 (DLA Address Directory)
55 FR 32284, Aug. 8, 1990
55 FR 34060, Aug. 21, 1990

The specific changes to the record system being amended are set forth below, followed by the system notice, as amended, in its entirety. This notice is not within the purview of subsection (r) of the Privacy Act of 1974, as amended, (5 U.S.C. 552a), which requires the submission of an altered system report.

Dated: October 17, 1990.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

S332.10 DMDC.

System name:

Defense Manpower Data Center Data Base, (55 FR 32284, August 8, 1990).

Changes:

* * * * *

Categories of individual covered by the system:

Add the following two paragraphs to the end of the entry "All U.S. Postal Service employees.

All non-appropriated funded individuals who are employed by the Department of Defense."

Categories of records in the system:

Add the following two paragraphs to the end of the entry "U.S. Postal Service records containing Social Security Number, name, salary, home and work address.

Non-appropriated fund records consists of security Security Number, name, and work address.

S322.10 DMDC

SYSTEM NAME:

Defense Manpower Data Center Data Base.

SYSTEM LOCATION:

Primary location—W.R. Church Computer Center, Naval Postgraduate School, Monterey, CA 93920–5000.

Back-up files maintained in a bank vault in Hermann Hall, Naval Postgraduate School, Monterey, CA 93920–5000.

Decentralized segments—Portions of this file may be maintained by the military and non-appropriated fund personnel and finance centers of the military services, selected civilian contractors with research contracts in manpower area, and other Federal agencies.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All uniformed services officers and enlisted personnel who served on active duty from July 1, 1968, and after or who have been a member of a reserve component since July 1975; retired military personnel; participants in Project 100,000 and Project Transition, and the evaluation control groups for these programs. All individuals examined to determine eligibility for military service at an Armed Forces Entrance and Examining Station from July 1, 1970, and later.

DoD civilian employees separated since January 1, 1971. All veterans who have used the GI Bill education and training employment services office since January 1, 1971. All veterans who have used GI Bill education and training entitlements, who visited a state employment service office since January 1, 1971, or who participated in a Department of Labor special program since July 1, 1971. All individuals who ever participated in an educational program sponsored by the U.S. Armed Forces Institute and all individuals who ever participated in the Armed Forces Vocational Aptitude Testing Programs at the high school level since September 1969.

Individuals who responded to various paid advertising campaigns seeking enlistment information since July 1, 1973; participants in the Department of Health and Human Services National Longitudinal Survey. Individuals responding to recruiting advertisements since January 1987; survivors of retired military personnel who are eligible for or currently receiving disability payments or disability income compensation from the Department of Veterans Affairs; surviving spouses of active or retired deceased military personnel; 100% disabled veterans and their survivors.

Individuals receiving disability compensation from the Department of Veterans Affairs or who are covered by a Department of Veterans Affairs' insurance or benefit program; civilian employees of the Federal Government; dependents of active duty military retirees, selective service registrants.

Individuals receiving a security background investigation as identified in the Defense Central Index of Investigation. Former military and civilian personnel who are employed by DoD contractors and are subject to the provisions of 10 U.S.C. 2397.

All U.S. Postal Service Employees.

All non-appropriated funded individuals who are employed by the Department of Defense.

CATEGORIES OF RECORDS IN THE SYSTEM:

Computerized personnel/employment/pay records consisting of name, Service Number, Selective Service Number, Social Security Number, compensation data, demographic information such as home town, age, sex, race, and educational level; civilian occupational information; civilian and military acquisition work force warrant, training and job specialty information; military personnel

information such as rank, length of service, military occupation, aptitude scores, post-service, military occupation, aptitude scores, post-service education, training, and employment information for veterans; participation in various inservice education and training programs; military hospitalization records; and home and work addresses.

CHAMPUS claim records containing enrollee, patient and health care facility, provided data such as cause of treatment, amount of payment, name and Social Security or tax ID of providers or potential providers of care.

Selective Service System registration data.

Department of Veterans Affairs disability payment records.

Credit or financial data as required for security background investigations.

Criminal history information on individuals who subsequently enter the military.

U.S. Postal Service employment/personnel records containing Social Security Number, name, salary, home and work address.

Non-appropriated fund employment/personnel records consist of Social Security number, name, and work address.

AUTHORITY FOR THE MAINTENANCE OF THE SYSTEM:

10 U.S.C. 136, Assistant Secretaries of Defense; Appointment Powers and Duties; 10 U.S.C. 2358; Research Projects; Pub. L. 95-452, as amended (Inspector General Act of 1978); and Executive Order 9397.

PURPOSE(S):

The purpose of the system of records is to provide a single central facility within the Department of Defense to assess manpower trends, support personnel functions to perform longitudinal statistical analyses, identify current and former DoD civilian and military personnel for purposes of detecting fraud and abuse of pay and benefit programs, and to collect debts owed to the United States Government and state and local governments.

All records in this record system are subject to use in authorized computer matching programs within the Department of Defense and with other Federal agencies or non-Federal agencies as regulated by the Privacy Act of 1974, as amended, (5 U.S.C. 552a).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To the Department of Veterans Affairs (DVA), Statistical Policy and Research Office, Office of Information Management and Statistics, DVA Management Sciences Division to provide military personnel employment and pay data for the purpose of selection samples for surveys asking veterans about the use of veteran benefits and satisfaction with DVA services, and to validate eligibility for DVA benefits; and to analyze the cost to the individual of military service under the Veteran's Group Life Insurance program.

To the Department of Veterans Affairs (DVA) to provide identifying military personnel data to the DVA and its contractor, the Prudential Insurance Company, for the purpose of notifying members of the Individual Ready Reserve (IRR) of their right to apply for Veteran's Group Life Insurance coverage.

To the Department of Veterans Affairs (DVA) to conduct computer matching programs regulated by the Privacy Act of 1974, as amended (5 U.S.C. 552a), for the purpose of:

1. Providing full identification of active duty military personnel, including full-time National Guard/Reserve support personnel, for use in the administration of DVA's Compensation and Pension benefit program (38 U.S.C. 3104(c), 3006-3008). The information is used to determine continued eligibility for DVA disability compensation to receipients who have returned to active duty so that benefits can be adjusted or terminated as required and steps taken by DVA to collect any resulting overpayments.

2. Providing military personnel and financial data to the Veterans Benefits Administration, DVA for the purpose of determining initial eligibility and any changes in eligibility status to insure proper payment of benefits for GI Bill education and training benefits by the DVA under the Montgomery GI Bill (Title 10 U.S.C., Chapter 106—Selected Reserve and Title 38 U.S.C., Chapter 30—Active Duty). The administrative responsibilities designated to both agencies by the law require that data be exchanged in administering the programs.

3. Providing identification of active duty, including full-time support National Guard/Reserve military personnel, to the Veterans Benefits Administration, DVA, for the purpose of determining eligibility for or amount of benefits or verifying other information with respect thereto of DVA disability compensation to recipients who have returned to active duty. The law (38 U.S.C. 3104(c)) prohibits duplication of benefits, i.e. compensation by the DVA and receiving active service pay. DoD is obligated to provided such information to the DVA pursuant to 38 U.S.C. 3006.

To the Office of Personnel Management (OPM) consisting of personnel/employment/financial data for the purpose of carrying out OPM's management functions. Records disclosed concern pay, benefit, retirement deductions and any other information necessary for those management functions required by law (Pub. L. 83-598, 84-356, 86-724, 94-455 and 5 U.S.C. 1302, 2951, 3301, 3372, 4118, 8347).

To the Office of Personnel Management (OMP) to conduct computer matching programs regulated by the Privacy Act of 1974, as amended (5 U.S.C. 552a) for the purpose of:

1. Exchanging personnel and financial information on regular military officer retirees, who are also civilian employees of the Federal government, for the purpose of identifying those individuals subject to a limitation on the amount of military retired pay they can receive under the Dual Compensation Act (5 U.S.C. 5532), and to permit adjustments of military retired pay by the military finance centers and to take steps to recoup excess of that permitted under the dual compensation and pay cap restrictions.

2. Exchanging personnel and financial data on civil service annuitants (including disability annuitants under age 60) who are reemployed by DoD to insure that annuities of DoD reemployed annuitants are terminated where applicable, and salaries are correctly offset where applicable as required by law (5 U.S.C. 8331, 8344, 8401 and 8468).

3. Exchanging personnel and financial data to identify individuals who are improperly receiving military retired pay and credit for military service in their civil service annuities, or annuities based on the "guaranteed minimum" disability formula. The match will identify and/or prevent erroneous payments under the Civil Service Retirement Act (CSRA) 5 U.S.C. 8331 and the Federal Employees' Retirement System Act (FERSA) 5 U.S.C. 8411. DoD's legal authority for monitoring retired pay is 10 U.S.C. 1401.

4. Exchanging civil service and Reserve military personnel data to identify those individuals of the Reserve forces who are employed by the Federal government in a civilian position. The purpose of the match is to identify those particular individuals occupying critical positions as civilians and cannot be released for extended active duty in the event of mobilization. Employing Federal agencies are informed of the reserve status of those affected personnel so that a choice of terminating the position or the reserve assignment

S-051999 0014(00)(22-OCT-90-13:36:14)

can be made by the individual concerned. The authority for conducting the computer match is contained in E.O. 11190, Providing for the Screening of the Ready Reserve of the Armed Services.

To the Internal Revenue Service (IRS) for the purpose of obtaining home addresses to contact Reserve component members for mobilization purposes and for tax administration. For the purpose of conducting aggregate statistical analyses on the impact of DoD personnel of actual changes in the tax laws and to conduct aggregate statistical analyses to lifestream earnings of current and former military personnel to be used in studying the comparability of civilian and military pay benefits. To aid in administration of Federal Income Tax laws and regulations, to identify non-compliance and delinquent filers.

To the Department of Health and Human Services (DHHS) Office of the Inspector General, for the purpose of identification and investigatin of DoD employees and military members who may be improperly receiving funds under the Aid to Families of Dependent Children Program. To the Office of Child Support Enforcement, DHHS, pursuant to 42 U.S.C. 653 and Pub. L. 94–505, to assist state child support offices in locating absent parents in order to establish and/or enforce child support obligations.

To the Social Security Administration (SSA), Office of Research and Statistics for the purpose of conducting statistical analyses of impact of military service and use of GI Bill benefits on long term earnings.

To the Bureau of Supplemental Security Income, SSA, to conduct computer matching programs regulated by the Privacy Act of 1974, as amended (5 U.S.C. 552a), for the purpose of verifying information provided to the SSA by applicants and recipients who are retired military members or their survivors for Supplemental Security Income (SSI) benefits. By law (42 U.S.C. 1383) the SSA is required to verify eligibility factors and other relevant information provided by the SSI applicant from independent or collateral sources and obtain additional information as necessary before making SSI determinations of eligibility, payment amounts or adjustments thereto.

To the Selective Service System (SSS) for the purpose of facilitating compliance of members and former members of the Armed Forces, both active and reserve, with the provisions of the Selective Service registration regulations (50 U.S.C. App. and E.O. 11623).

To DoD Civilian Contractors for the purpose of performing research on manpower problems for statistical analyses.

To the Department of Labor (DOL) to reconcile the accuracy of unemployment compensation payments made to former DoD civilian employees and military members by the states.

To Federal and Quasi-Federal agencies, territorial, state, and local governments to support personnel functions requiring data on prior military service credit for their employees or for job applications. To determine continued eligibility and help eliminate fraud and abuse in benefit programs and to collect debts and overpayments owed to these programs. To assist in the return of unclaimed property or assets escheated to states of civilian employees and military member and to provide members and former members with information and assistance regarding various benefit entitlements, such as state bonuses for veterans, etc. Information released includes name, Social Security Number, and military or civilian address of individuals. To detect fraud, waste and abuse pursuant to the authority contained in the Inspector General Act of 1978, as amended (Pub. L. 95–452) for the purpose of determining eligibility for, and/or continued compliance with, any Federal benefit program requirements.

To private consumer reporting agencies to comply with the requirements to update security clearance investigations of DoD personnel.

To Defense contractors to monitor the employment of former DoD employees and members subject to the provisions of 10 U.S.C. 2397.

To financial depository institutions to assist in locating individuals with dormant accounts in danger of reverting to state ownership by escheatment for accounts of DoD civilian employees and military members.

To any Federal, state or local agency to conduct authorized computer matching programs regulated by the Privacy Act of 1974, as amended, (5 U.S.C. 552a) for the purposes of identifying and locating delinquent debtors for collection of a claim owed the Department of Defense or the United States Government under the Debt Collection Act of 1982 (Pub. L. 97–365).

To state and local law enforcement investigative agencies to obtain criminal history information for the purpose of evaluating military service performance and security clearance procedures (10 U.S.C. 2358).

The Defense Logistics Agency "Blanket Routine Uses" published at the beginning of the DLA compilation of record system notices also apply to this record system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Electronic storage media.

RETRIEVABILITY:

Retrieved by name, Social Security Number, occupation, or any other data element contained in system.

SAFEGUARDS:

W.R. Church Computer Center—Tapes are stored in a locked cage in a controlled access area; tapes can be physically accessed only by computer center personnel and can be mounted for processing only if the appropriate security code is provided.

Back-up location—Tapes are stored in a bank-type vault; buildings are locked after hours and only properly cleared and authorized personnel have access.

RETENTION AND DISPOSAL:

Files constitute a historical data base and are permanent.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Director, Defense Manpower Data Center, 99 Pacific Street, Suite 155A, Monterey, CA 93940–2453.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Deputy Director, Defense Manpower Data Center, 99 Pacific Street, Suite 155A, Monterey, CA 93940–2453.

Written requests should contain the full name, Social Security Number, date of birth, and current address and telephone number of the individual.

For personal visits, the individual should be able to provide some acceptable identification such as driver's license or military or other identification card.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address inquiries to the Deputy Director, Defense Manpower Data Center, 99 Pacific Street, Suite 155A, Monterey, CA 93940–2453.

Written requests should contain the full name, Social Security Number, date of birth, and current address and telephone number of the individual.

For personal visits, the individual should be able to provide some

acceptable identification such as driver's license or military or other identification card.

CONTESTING RECORD PROCEDURES:

DLA rules for contesting contents and appealing initial agency determinations are contained in DLA Regulation 5400.21, "Personal Privacy and Rights of Individuals Regarding Their Personal Records"; 32 CFR part 1286; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

The military services, the Department of Veterans Affairs, the Department of Education, Department of Health and Human Services, from individuals via survey questionnaires, the Department of Labor, the Office of Personnel Management, Federal and Quasi-Federal agencies, Selective Service System, and the U.S. Postal Service.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

Intent To Grant License; Somategenetics International, Inc.

AGENCY: Department of the Navy, DOD.

ACTION: Intent to grant exclusive patent license; Somategenetics International, Inc.

SUMMARY: The Department of the Navy hereby gives notice of its intent to grant to Somategenetics International, Inc. a revocable, nonassignable, exclusive license to practice the Government-owned inventions described in U.S. Patent No. 4,776,991, "Scaled-Up Production Of Liposome-Encapsulated Hemoglobin", issued October 11, 1988 and U.S. Patent No. 4,911,929, "Blood Substitute Comprising Liposome-Encapsulated Hemoglobin", issued March 27, 1990.

Anyone wishing to object to the grant of this license has 60 days from the date of this notice to file written objections along with supporting evidence, if any. Written objections are to be filed with the Office of the Chief of Naval Research (Code OOCCIP), Arlington, Virginia 22217-5000.

DATES: October 23, 1990.

FOR FURTHER INFORMATION CONTACT: Mr. R.J. Erickson, Staff Patent Attorney, Office of the Chief of Naval Research (Code OOCCIP), 800 N. Quincy street, Arlington, Virginia 22217-5000, telephone [703] 696-4001.

Dated: October 12, 1990.

Wayne T. Baucino,

LT, JAGC, USNR, Alternate Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Privacy Act of 1974; Delete Record Systems

AGENCY: Department of the Navy, DOD.

ACTION: Delete Record Systems.

SUMMARY: The Department of the Navy proposes to delete four existing record systems in its inventory of record systems subject to the Privacy Act of 1974, as amended (5 U.S.C. 552a).

DATES: The proposed action will be effective on or before October 23, 1990.

ADDRESSES: Send any comments to Mrs. Gwendolyn Aitken, Head, PA/FOIA Branch, Office of the Chief of Naval Operations (OP-09B30), Department of the Navy, The Pentagon, Washington, DC 20350-2000. Telephone (703) 614-1459.

SUPPLEMENTARY INFORMATION: The Department of the Navy record system notices for records systems subject to the Privacy Act of 1974, as amended, (5 U.S.C. 552a) were published in the Federal Register as follows:

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. TM91-1-84-004]

Caprock Pipeline Co.; Proposed Changes in FERC Gas Tariff

October 16, 1990.

Take notice that on October 11, 1990, Caprock Pipeline Company (Caprock) filed proposed changes in its F.E.R.C. Gas Tariff, Revised Original Volume No. 3. The purpose of these changes is to correct the ACA surcharge in its rates

for fiscal year 1990, to correct the format of Caprock's tariff sheets setting forth its currently effective rates, and to reflect the appropriate ACA surcharge for fiscal year 1991.

Caprock states that a copy of this filing has been served upon all of Caprock's customers.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24950 Filed 10-22-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TA91-1-32-001, RP90-166-001 TM91-1-32-002]

Colorado Interstate Gas Co.; Amended Annual PGA Filing

October 16, 1990.

Pursuant to the Commission's order issued September 28, 1990 in Docket No. TA91-1-32-000, Colorado Interstate Gas Company ("CIG") states it has reapplied for a waiver of § 154.305(b)(1) of the Commissions regulations. Although in its September 28, 1990 order the Commission denied CIG's similar waiver filed on September 5, 1990, CIG notes that such denial was without prejudice to CIG reapplying for a waiver by October 13, 1990, if CIG had signed any producer contracts before the October 1, 1990 effective date of its annual PGA that will cause it to actually incur producer demand charges.

CIG states it has entered into two such contracts with nonaffiliated producers. CIG is filing one copy of each of these contracts solely with the Commission pursuant to § 388.112 of the Commission's regulations, and requests privileged treatment by the Commission of all pages of these contracts. Such contracts have been attached in a separate sealed envelope. These contracts contain information that is commercially sensitive and could affect CIG's competitive position, and could jeopardize ongoing negotiations with other third party producers supplying gas to CIG.

CIG also submits for filing, as a part of its Original Volume No. 1 FERC Gas Tariff, 14 copies of the following proposed tariff sheets:

Second Sub. Third Rev. Second Sub. First Revised Sheet No. 7.1
Second Sub. Third Rev. Second Sub. First Revised Sheet No. 7.2
Second Sub. Third Rev. Second Sub. First Revised Sheet No. 8.1
Second Sub. Third Rev. Second Sub. First Revised Sheet No. 8.2
Substitute Fourth Rev. Second Sub. First Revised Sheet No. 7.1
Substitute Fourth Rev. Second Sub. First Revised Sheet No. 7.2
Substitute Fourth Rev. Second Sub. First Revised Sheet No. 8.1
Substitute Fourth Rev. Second Sub. First Revised Sheet No. 8.2

CIG states it is revising its rates contained in its August 1, 1990 filing in Docket No. TA91-1-32-000 solely to reflect the "as billed" flow-through of the demand and commodity pricing provisions in the two newly negotiated September 28, 1990 producer contracts. This effect is shown on Second Substitute Third Revised Second Substitute First Revised Sheet Nos. 7.1 through 8.2, which reflect a 2 cent increase in the Demand-1 rate and a 0.002 cent decrease in the commodity rate for the G-1, P-1, SG-1, H-1, F-1 and PS-1 rate schedules effective October 1, 1990.

CIG states that copies of the supplemental filing have been served upon CIG's jurisdictional customers and public bodies and are otherwise available for public inspection at CIG's offices in Colorado Springs, Colorado.

CIG has requested that the Commission grant whatever waivers it may deem necessary to permit Second Substitute Third Revised Second Substitute First Revised Sheet Nos. 7.1 through 8.2 to become effective on October 1, 1990, and Substitute Fourth Revised Second Substitute First Revised Sheet Nos. 7.1 through 8.2 to become effective on November 1, 1990.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TQ91-1-2-001 and TM91-1-2-001

East Tennessee Natural Gas Co.; Proposed Changes in FERC Gas Tariff

October 16, 1990.

Take notice that on October 11, 1990, East Tennesee Natural Gas Company (East Tennessee) tendered for filing in compliance with the Commission's September 28, 1990 Letter Order in the captioned dockets, its 59th Revised Sheet No. 4 to Original Volume No. 1 of its FERC Gas Tariff to be effective November 1, 1990.

East Tennessee states that the purpose of this filing is to revise the Annual Charge Adjustment (ACA) to reflect the revision in the ACA rate in the Commission's September 28, 1990 order in Docket Nos. RM97-3-000, et al., and in the Letter Order.

East Tennessee states that a copy of this tariff filing is being mailed to all affected customers on East Tennessee's system and state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20416, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM91-1-51-002]

Great Lakes Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

October 16, 1990.

Take notice that Great Lakes Gas Transmission Company ("Great Lakes") on October 10, 1990 tendered for filing the following tariff sheet to its FERC Gas Tariff proposed to be effective November 1, 1990:

First Revised Volume No. 1

Fourth Revised Sheet No. 57(iv)

Great Lakes states that on August 29, 1990 it filed with the Commission in Docket No. TM91-1-51-000, its ACA rate pursuant to the Annual Charges Adjustment ("ACA") provisions of Commission Order No. 472.

Great Lakes states its ACA rate, $.0019 per Mcf, was specifically identified on Third Revised Sheet No. 57(iv), First Revised Volume No. 1 of its FERC Gas Tariff, to be effective October 1, 1990.

Great Lakes states that by Commission Order of September 28, 1990 in Docket No. RM87-3-000, et al, the Commission revised the ACA rate from $.0019 per Mcf to $.0022 per Mcf to correct for an omission of a debit adjustment in the determination of the appropriation ACA rate. Pursuant to Ordering Paragraph (D) of the Commission's Order, Great Lakes states that it was permitted to file, within 15 days of the Order, a revised tariff sheet to reflect a $.0022 per Mcf ACA rate to be effective November 1, 1990.

Great Lakes states that the referenced tariff sheet reflects the appropriate ACA rate as determined by the Commission's Order of September 28, 1990 in Docket No. RM87-3-000, *et al.*

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM91-1-45-001]

Jupiter Energy Corp.; Proposed Changes in FERC Gas Tariff

October 16, 1990.

Take notice that Jupiter Energy Corporation ("Jupiter Energy" or the "Company") on October 11, 1990 tendered for filing the following sheets of its FERC Gas Tariff, Original Volume No. 1.

Fourth Revised Sheet No. 4A
Fourth Revised Sheet No. 5A
Fourth Revised Sheet No. 6A

Jupiter Energy states that the filed tariff sheets reflect revision, pursuant to the Commission's September 28, 1990 order in the above-captioned docket, of Jupiter Energy's Annual Charge Adjustment ("ACA") surcharge. The new ACA surcharge rate is 0.22¢ per Mcf.

Jupiter Energy proposes an effective date of November 1, 1990.

Jupiter Energy states that copies of the filing have been served on the Company's jurisdictional customers.

Any person desiring to protect said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24954 Filed 10-22-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TM91-1-53-001 and TA91-1-53-001]

K N Energy, Inc.; Tariff Filing

October 16, 1990.

On October 11, 1990, K N Energy, Inc. (K N) tendered for filing the following revised tariff sheets:

TM91-1-53-001

Third Revised Volume No. 1

First Revised Forty-Ninth Revise Sheet No. 4
First Revised Twenty-Seventh Revised Sheet No. 4B

Original Volume No. 1-A

Fourth Revised Sheet No. 4

TA91-1-53-001

Third Revised Volume No. 1

Substitute Fifteenth Revised Sheet No. 4
Substitute Twenty-Eighth Revised Sheet No. 4B

K N states that this filing is made pursuant to the Commission's Order clarifying the Annual Charge Adjustment [ACA] unit charge and requests that the ACA related tariff sheets be made effective November 1, 1990. Prior to receiving the Commission's Order, K N filed its regularly scheduled annual PGA. The tariff sheets in the PGA have also been restated to reflect the clarified ACA surcharge.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24955 Filed 10-22-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM91-1-71-001]

Michigan Consolidated Gas Co., Interstate Storage Division; Proposed Changes in FERC Gas Tariffs

October 16, 1990.

Take notice that on October 11, 1990, Michigan Consolidated Gas Company—Interstate Storage Division (ISD) tendered for filing proposed changes to the following tariff sheets in its FERC Gas Tariffs, Original Volume No. 1, Original Volume No. 2 and Original Volume No. 3.:

Original Volume No. 1

Substitute Fourth Revised Sheet No. 1B

Original Volume No. 2

Substitute Fourth Revised Sheet No. 1A

Original Volume No. 3

Substitute Sixth Revised Sheet No. 2

ISD states that the proposed changes reflect the revised Annual Charge Adjustment (ACA) unit charge of $.0022 per Mcf in ISD's FERC Gas Tariffs. ISD states that the proposed changes are pursuant to the Commission's Order issued September 26, 1990 in Docket No. RM87-3-000, et. al., whereby the Commission revised the ACA surcharge to $.0022 per Mcf to account for the debit amounts assessed in the current year to recover undercollections from the previous year. In its order, the Commission accepted tariff sheets reflecting an ACA surcharge amount of less than $.0022 per Mcf, but permitted pipelines which submitted those sheets to file revised tariff sheets reflecting an ACA surcharge of $.0022 per Mcf within 15 days of the issuance date of the order.

ISD states that it respectfully requested waiver of the Commission's September 26, 1990 Order requiring that the revised tariff sheets be effective November 1, 1990, and requested that the above revised tariff sheets be made effective October 1, 1990. Such waiver would allow ISD to include the proper ACA surcharge rate in its October billings, thus eliminating any future billing adjustments associated with the ACA surcharge.

Alternatively, if the Commission denies ISD's requested waiver, ISD tendered for filing proposed changes to the following tariff sheets in its FERC Gas Tariffs, Original Volume No. 1, Original Volume No. 2 and Original Volume No. 3:

Original Volume No. 1

Fifth Revised Sheet No. 1B

Original Volume No. 2

Fifth Revised Sheet No. 1A

Original Volume No. 3

Seventh Revised Sheet No. 2

ISD states that the above proposed tariff sheets provide for a revised ACA surcharge of $.0022 per Mcf to be effective November 1, 1990. As stated in the Commission's September 26, 1990 Order, a billing adjustment would be permitted in the November billings to account for any ACA surcharge underrecoveries that occurred during October.

ISD states that copies of its filing have been served upon its customers and the Michigan Public Service Commission.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TQ91-1-5-001 and TM91-1-5-001]

Midwestern Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

October 16, 1990.

Take notice that October 11, 1990, Midwestern Gas Transmission Company (Midwestern) submitted for filing in compliance with the Commission's September 26, 1990 Letter Order in the captioned dockets, its Seventeenth Revised Sheet No. 5 and Twelfth Revised Sheet No. 6 to First Revised Volume No. 1 of its FERC Gas Tariff, to be effective November 1, 1990.

Midwestern states that the purpose of this filing is to revise the Annual Charge Adjustment (ACA) to reflect the revision in the ACA rate in the Commission's September 26, 1990 order in Docket Nos. RM87-3-000, *et al.*, and in the Letter Order.

Midwestern states that a copy of this tariff filing is being mailed to all affected customers on Midwestern's system and state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM91-1-27-001]

North Penn Gas Co.; Proposed Changes in FERC Gas Tariff

October 16, 1990.

Take notice that North Penn Gas Company (North Penn) on October 11, 1990 tendered for filing Second Revised Sheet No. 3A to its FERC Gas Tariff, First Revised Volume No. 1.

North Penn states that the filed tariff sheet reflects revision, as per the Commission letter order dated September 26, 1990, of North Penn's Annual Charge Adjustment (ACA) surcharge to recover the Commission's annual charges billing. The new ACA surcharge rate is $0.0022 per Mcf.

North Penn proposes an effective date of November 1, 1990.

North Penn states that copies of the filing have been served on the Company's jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket Nos. TM91-1-89-002 and TF91-1-89-001]

Northern Natural Gas Co., Division of Enron Corp.; Proposed Changes in FERC Gas Tariff

October 16, 1990.

Take notice that on October 5, 1990, Northern Natural Gas Company, Division of Enron Corp. (Northern), submitted for filing as part of its FERC Gas Tariff the following tariff sheets:

Third Revised Volume No. 1

Substitute Eighty-Fifth Revised Sheet No. 4B
Substitute Fifty-Third Revised Sheet No. 4B.1

Northern states that the purpose of this filing is due to a change in the

Annual Charge Adjustment (ACA). Northern states that the ACA rate is being restated from $.0022 to $.0021 for the month of October.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure [18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to the taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24959 Filed 10-22-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TA91-1-41-001 and TA91-1-41-001]

Paiute Pipeline Co.; Revised Annual Charge Adjustment Filing

October 16, 1990.

Take notice that on October 11, 1990, Paiute Pipeline Company (Paiute) tendered for filing and acceptance the following tariff sheets to be a part of its FERC Gas Tariff:

Original volume No. 1

Substitute Sixteenth Revised Sheet No. 10

Original volume No. 1-A

Eighth Revised Sheet No. 10

Paiute states that the purpose of said filing is to revise its annual charge adjustment surcharge in order to recover the Commission's annual charges for the 1990 fiscal year as well as Commission adjustments to the prior year's ACA billing, as permitted by the Commission in its September 26, 1990 "Order Accepting and Rejecting Tariff Sheets and Clarifying Annual Charge Bills." Paiute also states that Subetitute Sixteen Revised Sheet No. 1 to Original Volume No. 1 of its tariff should be subetitated in Docket No. TA91-1-41 for Sixteenth Revised Sheet No. 10, which is pending acceptance and approval in Paiute's annual purchased gas cost adjustment (PGA) proceeding in that docket. Paiute indicates that Substitute Sixteenth Revised Sheet No. 10 incorporates the PGA rate changes proposed in Docket No. TA91-1-41 and reflected on Sixteenth Revised Sheet No. 10.

Paiute has requested that the Commission accept its tariff sheets to become effective on November 1, 1990.

Paiute states that copies of this filing have been mailed to all jurisdictional sales customers and affected state regulatory commissions, and have been served upon all parties in Docket No. TA91-1-41.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA91-1-29-001]

Panhandle Eastern Pipe Line Co., Change in Tariff

October 16, 1990.

Take notice that on October 11, 1990 Panhandle Easter Pipe Line Company (Panhandle) tendered for filing revised sheets to its FERC Gas Tariff, Original Volumes No. 1, as reflected in appendix No. 1, and to its FERC Gas Tariff, Original Volume No. 2, as reflected in appendix No. 2.

Panhandle states that the Commission, by Order No. 472 issued May 29, 1987, implemented procedures providing for the assessment and collection from interstate pipelines, inter alia, of annual charges as required by the Omnibus Budget Reconciliation Act of 1986. Pursuant to Order No. 472, the Commission authorized the tracking for automatic pass through to pipline customers of the annual charges. In its order issued September 26, 1990 the Commission clarified the annual charge bills affirming that "the ACA surcharge was thus intended to give the pipelines an opportunity to recover fully the annual charges for which they are billed. The sum of the surcharge attributable to fiscal year 1990 program costs plus the surcharge attributable to the true-up for fiscal year 1989 yields a total ACA surcharge for the fiscal year 1990 bill of $0.0022 per Mcf." Section 20, Annual Charge Adjustment Provision, contained in the General Terms and Conditions of Panhandle's FERC Gas Tariff, Original Volume No. 1 provides for the tracking of such annual charges to Panhandle's customers.

Panhandle states that in its order of September 26, 1990 the Commission provides that pipelines which filed tariff sheets refecting an ACA surcharge of less than $0.0022 per Mcf may file revised tariff sheets reflecting the $0.0022 per Mcf surcharge without additional filing fees effective November 1, 1990. The purpose of this filing are: (1) To include the Panhandle's rates by this filing a total of $0.0022 per dth in accordance with the Commission's order dated September 26, 1990 and with section 20 of the General Terms and Conditions of its FERC Gas Tariff and to incorporate in certain rate schedules in Panhandle's FERC Gas Tariff, Original Volume No. 2 ACA revisions filed by third party pipelines for which Panhandle reflects in those certain rates schedules capacity utilization.

The proposed effective date of the above referenced tariff sheets is October 1, 1990.

An effective date of November 1, 1990 as specified in the Commission's September 26, 1990 order is inconsistent with the manner in which the annual change in the ACA surcharge is implemented under Panhandle's tariff. Accordingly, Panhandle respectfully requests waiver of the Commission's September 26, 1990 order requiring that the revised tariff sheets submitted will be effective November 1, 1990, and hereby requests that the revised tariff sheets reflected in appendix No. 1 and appendix No. 2 herewith be made effective October 1, 1990.

Panhandle states that copies of this letter and enclosures are being served on all customers subject to the tariff sheets and applicable state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM91-1-79-001]

Sabine Pipe Line Co.; Proposed Changes in FERC Gas Tariff

October 16, 1990.

Take notice that Sabine Pipe Line Company (Sabine) on October 11, 1990 tendered for filing the following proposed change to its FERC Gas Tariff, First Revised Volume No. 1, to be effective November 1, 1990.

Eighth Revised Sheet No. 20

Sabine states that the Commission has specified Annual Charges Adjustment (ACA) unit charge of $.0022/MCF to be applied to rates in 1991 for recovery of 1990 annual charges and underrecovered 1989 annual charges. The ACA unit rate of $.0022/MCF converts to $.0022/MMBTU under Sabine's basis for billing. Sabine further states that the listed tariff sheet sets forth the applicable provisions required to effect recovery of 1990 annual charges.

Sabine states that copies of the filing were served upon Sabine's customers the State of Louisiana, Department of Natural Resources, Office of Conservation and the Railroad Commission of Texas.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 Noth Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket Nos. TQ91-1-8-001, TM91-1-8-001, and TF91-1-8-001]

South Georgia Natural Gas Co.; Proposed Changes to FERC Gas Tariff

October 16, 1990.

Take notice that on October 11, 1990, South Georgia Natural Gas Company (South Georgia) tendered for filing the following tariff sheets to its FERC Gas Tariff First Revised Volume No. 1:

First Substitute Sixty-Fifth Revised Sheet No. 4

First Substitute Sixty-Sixth Revised Sheet No. 4

First Substitute Sixth Revised Sheet No. 34A

The foregoing tariff sheets are submitted in compliance with the Commission's letter order of September 27, 1990 in Docket Nos. TQ91-1-8-000 and TM91-1-8-000 (September 27 Order) regarding the Annual Charge Adjustment (ACA) rate. South Georgia states that the proposed tariff sheets are being filed with a proposed effective date of October 1, 1990. South Georgia states First Substitute Sixty-Fifth Revised Sheet No. 4 reflects the Commission's order in Docket Nos. RM87-3-000, TM91-1-20-000, *et al.*, which revised the ACA rate to .22¢ per Mcf. In addition, South Georgia has revised Sixty-Sixth Revised Sheet No. 4, which was filed in Docket No. TF91-1-8-000 on October 1, 1990, by way of First Substitute Sixty-Sixth Revised Sheet No. 4 in order to reflect the .22¢ per Mcf ACA rate as well.

South Georgia states that copies of the filing will be served upon all of South Georgia's purchasers, interested state commissions and interested parties as well as on all parties of record in the subject proceedings.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM91-2-29-001]

Transcontinental Gas Pipe Line Corp.; Supplemental Tariff Filing

October 16, 1990.

Take notice that on October 12, 1990 Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing as a supplement to its August 31, 1990 Annual Charge Adjustment (ACA) filing certain revised tariff sheets to Second Revised Volume No. 1 of its FERC Gas Tariff, which tariff sheets are listed in appendix A attached thereto. The August 31 filing was accepted September 28, 1990 by Commission order in Docket No. TM91-2-29-000. The purpose of the instant filing is to revise the reference reflected on certain Rate Schedule IT and FT transportation tariff sheets to conform the ACA unit rate reflected therein to the ACA unit rate approved for collection by the Commission's September 28 order. The tariff sheets submitted in the instant filing were inadvertently omitted from Transco's August 31 filing. Transco respectfully requests the Commission grant any waiver of its Regulations which may be necessary to permit the instant filing to become effective on October 1, 1990, the same date on which the tariff sheets filed in the August 31 filing were accepted to be effective.

Transco is serving copies of the instant filing upon all parties served in Docket No. TM91-2-29-000. In accordance with provisions of § 154.16 of the Commission's Regulations, copies of this filing are available for public inspection, during regular business hours, in a convenient form and place at Transco's main offices at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24964 Filed 10-22-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM91-1-30-001]

Trunkline Gas Co.; Change in Tariff

October 16, 1990.

Take notice that on October 11, 1990 Trunkline Gas Company (Trunkline) tendered for filing revised sheets to its FERC Gas Tariff, Original Volume No. 2, as reflected in appendix No. 1.

Trunkline states that the Commission, by Order No. 472 issued May 29, 1987, implemented procedures providing for the assessment and collection from interstate pipelines, inter alia, of annual charges as required by the Omnibus Budget Reconciliation Act of 1986. Pursuant to Order No. 472, the Commission authorized the tracking for automatic pass through to pipeline customers of the annual charges. In its order issued September 28, 1990 the Commission clarified the annual charge bills affirming that "the ACA surcharge was thus intended to give the pipelines an opportunity to recover fully the annual charges for which they are billed. The sum of the surcharge attributable to fiscal year 1990 program costs plus the surcharge attributable to the true-up for fiscal year 1989 yields a total ACA surcharge for the fiscal year 1990 bill of $0.0022 per Mcf." Section 20, Annual Charge Adjustment Provision, contained in the General Terms and Conditions of Trunkline's FERC Gas Tariff, Original Volume No. 1 provides for the tracking of such annual charges to trunkline's customers.

Trunkline states that in its order of September 28, 1990 the Commission provides that pipelines which filed tariff sheets reflecting an ACA surcharge of less than $0.0022 per Mcf may file revised tariff sheets reflecting the $0.0022 per Mcf surcharge without additional filing fees effective November 1, 1990. Several of Trunkline's rate schedules involve utilization of Trunkline's capacity in third party pipelines. The purpose of this filing is to incorporate ACA revisions filed by these third party pipelines into Trunkline's FERC Gas Tariff, Original Volume No. 2.

The proposed effective date of the above referenced tariff sheets is October 1, 1990.

An effective date of November 1, 1990 as specified in the Commission's September 28, 1990 order is inconsistent with the manner in which the annual change in the ACA surcharge is implemented under Trunkline's tariff. Accordingly, Trunkline respectfully requests waiver of the Commission's September 28, 1990 order requiring that the revised tariff sheets submitted will be effective November 1, 1990, and hereby requests that the revised tariff sheets reflected in appendix No. 1 herewith be made effective October 1, 1990.

Trunkline states that copies of this letter and enclosure are being served on all customers subject to the tariff sheets and applicable state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance wih Rules 214 and 211 of the Commission's Rules of Practice and Procdure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket Nos. TQ90-1-11-001, TQ90-2-11-002, TA90-1-11-004]

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

October 16, 1990.

Take notice that on October 12, 1990, United Gas Pine Line Company (United tendered for filing the following tariff sheets.

Second Revised Volume No. 1 to be Effective January 1, 1990 Through March 31, 1990 Filed in Docket No. TQ90-1-11

Substitute First Revised Sheet No. 4
Substitute First Revised Sheet No. 4-A
Substitute First Revised Sheet No. 4-B
Substitute First Revised Sheet No. 4-D
Substitute First Revised Sheet No. 4-I

To be Effective April 1, 1990 Through June 30, 1990 Filed in Docket No. TQ90-2-11

Second Substitute Third Revised Sheet No. 4
Second Substitute Third Revised Sheet No. 4-A
Second Substitute Third Revised Sheet No. 4-B
Substitute Second Revised Sheet No. 4-D
Second Substitute Third Revised Sheet No. 4-I

United states that the above mentioned tariff sheets are being filed to reflect the revised PGA surcharge that was approved by Commission Order dated July 23, 1990 in Docket No. TA90-1-11-003 (United's annual PGA filing effective October 1, 1990).

United also states that the tariff sheets are being mailed to its jurisdictional customers and to interested state commissions.

Any person desiring to protect said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission are are available for public inspection.

Secretary.

[FR Doc. 90-24966 Filed 10-22-90; 8:45 am]

BILLING CODE 6717-01-M

Viking Gas Transmission Co.; Filing

October 16, 1990.

Take notice that on October 11, 1990, Viking Gas Transmission Company (Viking) filed its Eleventh Revised Sheet No. 6 to Original Volume No. 1 of its FERC Gas Tariff to be effective November 1, 1990. Viking states that this filing reflects the new Annual Charge Adjustment of $.0022 per dekatherm and is pursuant to the Commission's Order issued on September 28, 1990, in Docket Nos. RM87-3, *et al.*

Viking states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this

filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24967 Filed 10-22-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM91-1-76-001]

Wyoming Interstate Company Ltd.; Filing

October 16, 1990.

Take notice that on October 10, 1990, Wyoming Interstate Company, Ltd. (WIC) submitted for filing six copies of Eleventh Revised Sheet No. 5 increasing by 0.03 cent/Mcf the presently effective ACA rate from 0.19 cent/Mcf to 0.22 cent/Mcf effective November 1, 1990.

WIC notes that it sought to place a new ACA rate of 0.19 cent/Mcf in effect on October 1, 1990 in its "initial" 1990 ACA filing on August 30, 1990. This was approved by Commission order issued on September 28, 1990 in Docket No. RM87-3-000 and Docket Nos. TM91-1-20 et al. In the "initial" ACA filing, WIC did not consider as a part of the 0.19 cent/Mcf ACA rate the additional billings it had received and paid related to the Commission's under-recovery of its 1989 fiscal year ACA program costs. WIC notes, however, that it requested permission to revise its ACA charge should the Commission approve recovery of the 1989 fiscal year under-recovery amount. In paragraph D of its September 28, 1990 order, the Commission did approve a 0.03 cent/Mcf upward adjustment in the ACA rate to correct for the 1989 fiscal year under-recovery for any pipeline filing a revised ACA charge of 0.22 cent/Mcf within 15 days of the Commission's order. The revised 0.22 cent/Mcf charge is effective on November 1, 1990. The Commission also permits the filing pipeline to adjust its November, 1990 bill for the ACA under-recovery at the 0.19 cent/Mcf rate approved for October, 1990.

Accordingly, WIC submitted for filing Eleventh Revised Sheet No. 5 of its FERC Gas Tariff, Original Volume No. 1 incorporating the "revised" 0.22 cent/Mcf ACA billing rate to become effective on November 1, 1990.

WIC states that copies of this filing have been served upon WIC's jurisdictional customers and public bodies, and are otherwise available for public inspection at WIC's offices in Colorado Springs, Colorado.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 23, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Office of Fossil Energy

[FE Docket No. 90-35-NG]

Phibro Energy, Inc.; Order Granting Blanket Authorization To Import and Export Natural Gas, Including Liquefied Natural Gas

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of an order granting blanket authorization to import and export natural gas, and liquefied natural gas, and granting intervention.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Phibro Energy, Inc. blanket authorization to import up to 200 Bcf of natural gas, including liquefied natural gas (LNG), from Mexico, Canada, and other countries, and to export up to 200 Bcf of natural gas, including LNG, to Mexico, Canada, and other countries, over a two year term beginning on the date of first import or export.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue SE., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 15, 1990.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

[FE Docket No. 90-33-NG]

Poco Petroleum, Inc.; Application To Export Natural Gas to Canada

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application for blanket authorization to export natural gas to Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on September 21, 1990, of an application filed by Poco Petroleum, Inc. (Poco), requesting blanket authorization to export from the United States to Canada up to 100,000 MMBtus per day and up to a total of 70,000,000 MMBtus (approximately 70 Bcf) of natural gas over a two-year period commencing with the date of first delivery. Poco intends to use existing pipeline facilities within the United States and at the international border for transportation of the exported natural gas. Poco states that it will notify the DOE of the date of first delivery and submit quarterly reports detailing each transaction.

The application was filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures and writen comments are to be filed at the address listed below no later than 4:30 p.m., e.s.t., November 23, 1990.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, room 3F-056, FE-50, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Perry Bolger, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-1789

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, room 6E-042, 1000 Independence Avenue SW., Washington, DC 20585 (202) 586-6667

SUPPLEMENTARY INFORMATION: Poco is a Delaware corporation and the wholly owned subsidiary of Poco Petroleums Ltd., an Alberta corporation headquartered in Calgary, Alberta. Poco

requests authorization to export for its own account as well as for the accounts of suppliers and purchasers. Poco states that the contractual arrangements will be the product of arms-length negotiations with an emphasis on competitive prices and contract flexibility.

This export application will be reviewed under section 3 of the Natural Gas Act and the authority contained in DOE Delegation Order Nos. 0204–111 and 0204–127. In deciding whether the proposed export of natural gas is in the public interest, domestic need for the natural gas will be considered, and any other issue determined to be appropriate, including whether the arrangement is consistent with DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties, especially those that may oppose this application, should comment on these matters as they related to the requested export authority. The applicant asserts that there is no current need for the domestic gas that would be exported under the proposed arrangements. Parties opposing this application bear the burden of overcoming this assertion.

All parties should be aware that if this blanket export application is granted, a total two-year term volume may be designated, rather than a daily or annual limit, in order to provide the applicant with maximum flexibility of operation.

NEPA Compliance

The National Environmental Policy Act (NEPA) (42 U.S.C. 4321 *et seq.*) requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and response filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Poco's application is available for inspection and copying in the Office of Fuels Programs Docket Room, room 3F–056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays.

Issued in Washington, DC on October 15, 1990.

Clifford L. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

Office of Air and Radiation

Title: NSPS for Volatile Organic Liquid Storage Vessels (Subpart K). (ICR #1132.03; OMB #2060–0074). This is a reinstatement of a previously approved collection.

Abstract: Owners or operators of volatile organic liquid (VOL) storage vessels with a storage capacity greater than, or equal to, 40 cubic meters must notify EPA of any construction, reconstructions, modifications, and repairs made to their vessels. Owners or operators must inspect the roofs and seals of each vessel prior to filling it with VOL, inspect the seals yearly, repair any defects found on the seals within 45 days, and they must also inspect the tank and seals when the tank is emptied and degassed. Owners or operators must measure gaps between the tank wall and the primary and secondary seals during the initial testing of the vessel, and, when necessary, make the proper repairs within 45 days. Owners or operators must record the results of all these tests and repairs, and must retain such records for two years. EPA uses these data to ensure compliance with the standards.

Burden statement: The annual public burden for this collection of information is estimated to average 9 hours per notification, and 2 hours per recordkeeper. This estimate includes the time needed to review instructions, search existing data sources, gather the

data needed and review the collection of information.

Respondents: Owners and operators of VOL storage vessels.

Estimated no. of respondents: 857.

Estimated no. of responses per respondent: 6.

Estimated total annual burden on respondents: 47,718 hours.

Frequency of collection: Initial notification and on occasion.

Send comments regarding the burden estimates, or any other aspect of the information collection, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch, 401 M Street, SW., Washington, DC 20460

and

Nicolas Garcia, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place, NW., Washington, DC 20530.

Dated: October 11, 1990.

Paul Lapsley,

Director, Regulatory Management Division.

Contractor Access to Confidential Business Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA has authorized its contractor, Research and Evaluation Associates, Inc. (REA), of Chapel Hill, North Carolina, for access to information that has been, or will be, submitted to EPA under section 114 of the Clean Air Act (CAA) as amended. Some of the information may be claimed to be confidential business information (CBI) by the submitter.

DATE: October 1, 1990.

FOR FURTHER INFORMATION CONTACT: Gene W. Smith, Document Control Officer, Office of Air Quality Planning and Standards (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, (919) 541-5439.

SUPPLEMENTARY INFORMATION: Under contract number 68-DO-0063, the contractor, REA, 100 Europa Drive, suite 590, Chapel Hill, North Carolina, will assist the Office of Air Quality Planning and Standards (OAQPS) in designing and implementing a system for the handling, tracking, and safeguarding of CBI gathered under the CAA projects.

In accordance with 40 CFR 2.305(h), EPA has determined that REA requires access to CBI submitted to EPA under section 114 of the CAA in order to perform work satisfactorily under the above noted contract. The REA personnel will be given access to all information submitted under section 114 of the CAA. Some of the information may be claimed or determined to be CBI. The EPA is issuing this notice to inform all submitters of information under section 114 of the CCA that EPA may provide REA access to these materials on a need-to-know basis. The REA personnel will be required to sign nondisclosure agreements and will be briefed on appropriate security procedures before they are permitted access to CBI. All access to CAA CBI under this contract will take place at EPA facilities.

Clearance for access to CAA CBI under this contract is scheduled to expire on September 30, 1994.

Dated: October 17, 1990.

Michael Shapiro,

Assistant Administrator for Air and Radiation.

Open Meeting of the International Environmental Technology Transfer Advisory Board

Under Public Law 92-463, notice is hereby given that a meeting of the International Environmental Technology Transfer Advisory Board (IETTAB) will be held on November 13, 1990 in the Board room of the ASAE Building, 1575 Eye Street, NW., Washington, DC. The meeting is open to the public and will run from 9 a.m. until approximately 12 p.m. The purpose of this meeting is to discuss a final report.

Public comments can be made through written statements which will be distributed to Board members. Written statements must be sent in care of the Executive Secretary listed below no later than November 6, 1990, in order to distribute to Board members before the meeting time. Seating for interested members of the public is limited to seventy seats. Seats will be filled on a first-come basis. To confirm your interest in attending, contact the Executive Secretary by November 6, 1990.

FOR FURTHER INFORMATION CONTACT: Mark Kasman, Executive Secretary, Office of International Activities (A-106), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 475-7424.

Dated: October 2, 1990.

Terry Davies,

Assistant Administrator for International Activities.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: Existing Collection without OMB Approval.

Title: Application for National Warning System Service.

Abstract: Federal agencies, Military, State and local governments responsible for Civil Defense warning in their purview will apply in writing for the National Warning System Service (NAWAS) as instructed. Information is used to evaluate request for approval/disapproval of NAWAS service.

Type of Respondents: Federal agencies and State or local governments.

Estimate of Total Annual Reporting and Recordkeeping Burden: 50.

Number of Respondents: 50.

Estimated Average Burden Hours Per Response: 1.

Frequency of Response: Other; once.

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Borror (202) 646-2624, 500 C Street, SW., Washington, DC 20472.

Direct comments regarding the burden estimate or any aspect of this information collection, including suggestions for reducing this burden, to: the FEMA Clearance Officer at the above address; and to Gary Waxman, (202) 395-7340, Office of Management and Budget, 3235 New Executive Office Building, Washington, DC 20503 within four weeks of this notice.

Date: October 10, 1990.

Wesley C. Moore,

Director, Office of Administrative Support.

FEDERAL RESERVE SYSTEM

Creditanstalt-Bankverein Vienna, Austria; Application To Engage in Private Placement Activities

Creditanstalt-Bankverein, Vienna, Austria ("Creditanstalt"), has applied pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) (the "BHC Act") and § 225.23(a) of the Board's Regulation Y (12 CFR 225.23(a)), for prior approval to engage through its wholly-owned subsidiary, Creditanstalt International Advisers, Inc., New York, New York ("Advisers"), in acting as agent for issuers in the private placement of all types of securities, and providing related advisory services. Company would conduct the proposed activities on a domestic and international basis.

The Board has previously authorized Advisers to engage in the following activities: (1) Providing investment advisory and securities brokerage services on a combined basis ("full-service brokerage"); (2) engaging in brokerage services separately; (3) buying and selling all types of securities on the order of investors as a "riskless principal;" and (4) providing corporate financial advisory services. *See Creditanstalt-Bankverein*, 76 Federal Reserve Bulletin 781 (1990).

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with prior Board approval, engage directly or indirectly in any activities "which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto."

The Board has previously determined that, subject to certain conditions, acting as agent for issuers in the private placement of all types of securities, including the provision of related advisory services, is generally permissible for bank holding companies. *J.P. Morgan & Company Incorporated*, 76 Federal Reserve Bulletin 26 (1990) ("*Morgan*"); *Bankers Trust New York Corporation*, 75 Federal Reserve Bulletin 829 (1989) ("*Bankers Trust*").

Creditanstalt has proposed to act as agent in the private placement of all types of securities, using the same methods and procedures and subject to the prudential limitations established in the *Bankers Trust* and *Morgan* Orders, as modified to reflect Creditanstalt's status as a foreign banking organization, in accordance with prior Board orders (*Canadian Imperial Bank of Commerce, The Royal Bank of Canada*, and *Barclays PLC*, 76 Federal Reserve Bulletin 158 (1990); *see also The Toronto-Dominion Bank*, 76 Federal Reserve Bulletin 573 (1990)), and as modified to reflect the fact that Creditanstalt is not proposing to engage in any securities underwriting or dealing activities. *See The Royal Bank of Scotland Group plc*, 76 Federal Reserve Bulletin 888 (1990).

In determining whether an activity is a proper incident to banking, the Board must consider whether the proposal may "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." 23 U.S.C. 1843(c)(8). Creditanstalt contends that permitting it to engage in the proposed activities would result in increased competition, greater convenience to customers, and increased efficiency in the provision of financial services. Moreover, Creditanstalt believes that the proposed activities will not result in any unsound banking practices or other adverse effects.

In publishing the proposal for comment, the Board does not take a position on issues raised by the proposal. Notice of the proposal is published solely in order to seek the views of interested persons on the issues presented by the application and does not represent a determination by the Board that the proposal meets or is likely to meet the standards of the BHC Act or the Glass-Steagall Act.

Any comments or requests for a hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than November 15, 1990. Any request for a hearing on this application must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, October 17, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Report of the "Tar," Nicotine, and Carbon Monoxide Content of 370 Varieties of Domestic Cigarettes

ACTION: Notice.

SUMMARY: The Federal Trade Commission publishes the Report of the "Tar," Nicotine, and Carbon Monoxide Content of 370 Varieties of Domestic Cigarettes.

DATE: October 23, 1990.

ADDRESSES: Copies of the full report are available from the FTC's Public Reference Branch, room 130, 6th St. and Pennsylvania Ave., NW., Washington, DC 20580. (202) 326-3272.

FOR FURTHER INFORMATION CONTACT: Joanna Crane-Murray, Bureau of Consumer Protection, at the address given above, telephone (202) 326-3256.

SUPPLEMENTARY INFORMATION: These are the most recent test results of the "tar," nicotine, and carbon monoxide levels of the smoke of domestic cigarettes reported by the FTC. The Tobacco Institute Testing Laboratory, (TITL), a private laboratory operated by the cigarette industry, conducted the "tar," nicotine, and carbon monoxide testing for the widely-available domestic cigarette varieties. This testing was conducted under the supervision of a representative of the FTC. TITL provided the results to the respective cigarette companies. The companies provided the data generated by TITL regarding their own brands to the FTC in response to compulsory process issued by the Commission. Cigarette smoke from generic-priced, private label, and not-widely-available cigarettes was not tested by TITL, but was tested by the cigarette companies and provided under compulsory process to the FTC. The methodology, processes and procedures that the companies and TITL employed are identical to those the Commission has followed in the past.

By Direction of the Commission.

Donald S. Clark,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Office of Human Development Services; Statement of Organization, Functions, and Delegations of Authority

This Notice amends Part D of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services, Office of Human Development Services as follows: Chapter DC, Administration for Children, Youth and Families (ACYF) (49 FR 17593), as last amended July 7, 1988. This reorganization would transfer the operational functions of The National Center on Child Abuse and Neglect (NCCAN) from the Children's Bureau to the Immediate Office of the Commissioner, ACYF. The Children's Bureau will eliminate two office titles, the National Center on Child Abuse and Neglect and Office of Discretionary Grant Programs and the Office of State Welfare Grants and will be restructured with the four remaining Divisions: Program Support Division, Program Operations Division, Formula Grants Division and the Financial Operations Review Division.

1. Amends Chapter DC, Office of Human Development Services, DC.00 "Mission: The Administration for Children, Youth and Families (ACYF), by deleting paragraph 2 and replacing it with the following:

Administers State grant programs under title IV–B, IV–E and title IV–A

Foster Care of the Social Security Act. Manages the Adoption Opportunities program. Administers discretionary grant programs and other provisions of the Head Start Act and of the Runaway and Homeless Youth Act. Administers the provisions of Public Law 100–690, title III, chapters 1 and 2 of the Anti-Drug Abuse Act. Administers the Child Abuse Prevention and Treatment Act, as amended, and the Child Abuse Prevention Challenge Grants Reauthorization Act. Administers discretionary grant programs under title xi, section 201–207 of the Children's Justice and Assistance Act and those under the provisions of the Abandoned Infants Assistance Act. Supports and encourages services which prevent or remedy the effects of abuse and/or neglect of children and youth. Manages the National Center on Child Abuse and Neglect, including the National Clearinghouse and the Child Abuse and Neglect State and discretionary grant programs. Provides staff support to the activities of the Advisory Board on Child Abuse and Neglect.

2. Amends Chapter DC, Office of Human Development Services, DC.10 "Organization. The Administration for Children, Youth and Families" by deleting paragraphs 2 and 3 and replacing it with:

Children's Bureau: Program Support Division, Financial Operations Review Division, Formula Grants Division, Program Operations Division. Family and Youth Services Bureau: Program Operations Division, Program Support Division. The National Center on Child Abuse and Neglect: Program Policy and Planning Division, Clearinghouse Division.

3. Amends Chapter DC, Office of Human Development Services, DC 20 "Functions": A. The Immediate Office of the Commissioner by deleting it in its entirety and replacing it with the following:

DC.20 Functions. A. The Immediate Office of the Commissioner serves as the principal advisor to the Assistant Secretary for Human Development Services, the Secretary of Health and Human Services, and other elements of the Department in the areas of children, youth, and families. Provides executive direction and management strategy to Administration for Children, Youth and Families' component units. Staff of the Office of the Commissioner provides general staff support for the Advisory Board on Child Abuse and Neglect. Staff provides results of studies, research, or analyses of various matters affecting child abuse and neglect for the Board to use in its deliberations and recommendations. Assists the Board in preparing and submitting to the Secretary and appropriate Committees of Congress an annual report which contains recommendations on ways in which the purposes of the Child Abuse Prevention and Treatment Act can most effectively be achieved. Works with other Federal, State, and local governmental and national and sub-national private sector organizations to assure that Board recommendations accepted by the Secretary and/or the Congress are implemented. Makes arrangements for all meetings and hearings of the Board. The Deputy Commissioner acts as Commissioner in the absence of the Commissioner.

4. Amends Chapter DC, Office of Human Development Services, DC.20 "Functions". D.1 National Center on Child Abuse and Neglect and Office of Discretionary Grant Programs by deleting it in its entirety and replacing it with the following

D.1. Program Support Division manages the Title IV–B Child Welfare Training Program and the Adoption Opportunities Program. Provides technical expertise in specific, substantive program areas for developing programmatic policies, standards, model laws, regulations and guidelines for child welfare services. Provides expert advice and assistance to a broad array of public and private agencies in these areas. Develops areas for research, demonstration, and evaluation activities to investigate the current status of child welfare practices and to improve the quality and levels of service provided to children, including abandoned infants. Manages discretionary projects assigned to the Bureau which are related to child welfare services and related areas. Reviews current practices and problems: recommends action to meet special needs of children at risk and promotes successful models.

Develops and implements training and technical assistance plans. Analyzes regional child welfare services' training and technical assistance reports and provides technical guidance to the regional offices. Develops model curricula and other materials for training persons engaged in child welfare programs.

(1) Assistance Branch

Acts as the principal focus within the Program Support Division for developing and implementing policies, advice and plans on identifying and diagnosing children and families who need child welfare assistance including improving and upgrading services to children and families in their own homes, services for children and families in need of emergency care; services to children in need of substitute care (with foster families or in institutions or group homes): And services relating to restoration of children with their families and permanency planning.

(2) Adoption Opportunities Branch

Acts as the principal focus within the Division for development of policies, advice and plans on programs relating to the improvement of adoption services, especially those for children with special needs. Provides technical expertise in developing programmatic policies, standards, model laws, regulatory material and guidelines for improving adoption services. Provides expert knowledge, training and technical assistance to a broad array of public and private social service agencies in improvement of adoption services.

Develops and manages the Adoption Opportunities Program (Title II of the Child Abuse Prevention and Treatment and Adoption Reform Act) to facilitate the elimination of barriers to adoption and to provide permanent homes for children who would benefit by adoption. Develops model adoption legislation and procedures and provides training and technical assistance in their use by States: develops and manages a national adoption information exchange system, including the operation of a national adoption exchange: develops, manages and monitors a training and technical assistance program to promote quality standards and services in the adoption of children with special needs.

Develops training and technical assistance objectives and program guidance for the Regional Offices in the improvement of adoption services. Identifies, develops, demonstrates and disseminates training curricula and technical assistance materials for persons providing adoption services. Recommends areas for research, demonstration and evaluation activities. Manages assigned discretionary projects.

5. Amends Chapter DC, Office of Human Development Services. DC 20 "Functions": D.2. Office of Child Welfare State Grants by deleting it in its entirety and replacing it with:

D.2. Program Operations Division generates policies and procedures for developing State child welfare program plans authorized under titles IV–B and IV–E of the Social Security Act including child welfare services, foster care and adoption assistance: develops and interprets regulations, guidelines, and instructions. Coordinates child welfare

services with other Federal agencies and non-Federal groups.

Provides technical direction on administration of state grant programs. Advises Regional Offices on recommendation for disapproval of State plans or amendments.

(1) Implementation Branch

Performs reviews for eligibility of funds under section 427, Public Law 96-272 and program reviews when required; develops compliance review procedures and reviews compliance of State plans and expenditures with the requirements and makes recommendations to the Associate Commissioner; Prepares appropriate orientation materials for regional offices and States; assists or prepares regional orientation plans; analyzes and, in conjunction with regional offices, collects child welfare services program data; formulates and implements the Division's planning strategy including the development of the annual operational plan; and engages in joint program planning with States.

(2) Policy Branch

Develops policies and procedures for developing State plans for title IV-E and the Child Welfare Program authorized under title IV-B of the Social Security Act; develops and interprets regulations, guidelines and instructions under titles IV-B and IV-E of that Act and Public Law 96-272; interprets questions of State implementation; assists regional office technical assistance activities to meet requirements for State grants; coordinates child welfare services with other Federal agencies and non-Federal groups; analyzes regional offices monitoring and training and technical assistance reports; and provides program technical direction to regional offices.

D.3. Formula Grants Division develops and interprets program specific fiscal regulations, guidelines and instructions for the management of formula grant and entitlement programs including Child Welfare Services, Foster Care, and Adoption Assistance. Provides technical guidance to the regional offices in all fiscal aspects of these programs and develops procedures for the regional offices to use in acting on requests for funds.

Develops the annual funding allocations and quarterly financial plans, reviews all States estimates of need. Prepares quarterly State grants for award, makes adjustments to State funding plans as required.

Makes financial adjustments associated with deferral and disallowance actions. Provides technical expertise to the regional offices in the development of these actions. Processes all these actions in concert with the Office of Management Services/Division of Grants and Contracts Management.

Manages technical and procedural activities incident to audit questions and appeals. Provides technical assistance to the Department of Health and Human Services Inspector General in developing comprehensive audit techniques for these programs, including sampling and review methodology. Takes part in audits of State programs. Designs audit plans to meet special circumstances.

Provides technical advice on regulations, guidelines, and fiscal practices to Office of General Counsel in all related audit appeals being heard by the DHHS Grants Appeals Board. Provides technical assistance on issues affecting ACYF formula and entitlement programs to staff of the Assistant Secretary for Legislation and for the Assistant Secretary for Management and Budget.

D.4. Financial Operations Review Division arranges for and participates in financial reviews of State Child Welfare Services, Foster Care and Adoption Assistance grant operations. This requires coordination with Regional Administrators, and includes developing and refining procedures, establishing standards and criteria, and training Regional and Central Office Staff in conducting regular on-site financial reviews.

Coordinates and consults as appropriate and necessary, with the Commissioner, ACYF, Staff Office Directors, and Regional Administrators in organizing, assigning staff, conducting the reviews and analyzing review findings.

Analyze and review results for consistency in application and operation, and make recommendations to the Commissioner, ACYF, on policies and procedural improvements.

Assists OGC with cases appealed to the Departmental Appeals Board as a result of the financial reviews.

6. Amends Chapter DC, Office of Human Development Services, DC 20 "Functions" by adding the following:

F. National Center on Child Abuse and Neglect serves as the principal advisor to the Commissioner in matters related to child abuse and neglect. Recommends legislative and budgetary proposals, operational planning system objectives and initiatives, and projects and issue areas for evaluation, research, and demonstration activities. Represents ACYF in initiating and implementing inter-agency activities and projects affecting children that are abused or neglected. Provides leadership and coordination for the program, activities, and subordinate units of the center.

Provides staff support for the activities of the Inter-Agency Task Force on Child Abuse and Neglect. The Director, National Center on Child Abuse and Neglect serves as Chairperson of the Task Force.

F.1. Program Policy and Planning Division. In coordination with the ACYF Division of Planning, Research, and Evaluation, establishes objectives, determines priorities, develops and implements research and demonstration programs, and plans to prevent, identify and treat child abuse and neglect. Recommends evaluation activities to be performed.

With the Regional Offices, verifies eligibility and allocates funds to States found to be in compliance with the requirements of the Child Abuse Prevention and Treatment Act, and monitors State programs funded under the Act. Allocates funds to States to support activities under the Children's Justice and Assistance Act and under the Child Abuse Prevention Challenge Grants Reauthorization Act.

Plans and implements training and technical assistance activities by directly managing grants and contracts.

F.2. Clearinghouse Division. Develops, maintains and updates the Information Clearinghouse on Child Abuse and Neglect on research and demonstration projects, operating programs and other activities. Through surveys and other information collection activities provides information on a continuing basis on research and demonstration projects and operating programs, directed at preventing, identifying and treating child abuse and neglect.

Compiles, analyzes, prepares and disseminates information, publications and other materials on child abuse and neglect. Provides assistance to other government agencies, public and private service organizations and the general public concerning the availability and use of information on child abuse and neglect.

Studies the incidence of child abuse and neglect to show severity and trends and assists in the development of central registries and forms for reporting child abuse and neglect.

Dated: October 15, 1990.

Louis W. Sullivan,

Secretary.

BILLING CODE 4150-04-M

Agency for Health Care Policy and Research

Assessment of Medical Technology: Heart-Lung Transplantation

The Public Health Service's (PHS) Agency for Health Care Policy and Research, through the Office of Health Technology Assessment (OHTA), announces that it is performing an assessment of heart-lung transplantation for the Office of Civilian Health and Medical Program of the Uniformed Services (CHAMPUS).

This assessment will consider: (1) The specific medical indications for which heart-lung transplantation are appropriate; (2) the types of medical evidence necessary to verify these indications; (3) the specific contraindications to heart-lung transplantation; (4) the specific institutional or team criteria which are necessary to establish acceptable standards of experience and medical care that will ensure optimum success for heart-lung transplantation; and (5) the basis for using the existing CHAMPUS heart transplantation institutional and team criteria for heart-lung transplantation.

The PHS assessment consists of a synthesis of information obtained from appropriate organizations in the private sector and from PHS agencies and others in the Federal Government. PHS assessments are based on the most current knowledge concerning the indications for the safety, clinical effectiveness, and appropriate uses of a technology. Based on this assessment, a PHS recommendation will be formulated to assist CHAMPUS in establishing coverage policy. The information being specifically sought in this assessment are the indications and contraindications for heart-lung transplantation as well as the appropriate selection criteria for both patients and transplant institutions.

Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than February 1, 1991 or within 90 days from the date of publication of this notice.

For purposes of evaluation by the interested scientific community, it is sometimes helpful to include attributions for the comments cited in OHTA assessments. In addition, information provided in response to notices such as this one are often requested by interested individuals or groups. Without a written consent to the disclosure of the source of the comments received, the identity of the source will be kept confidential in accordance with 42 U.S.C. 299a-1(c) and title IX of the Public Health Service Act, section 903(c). Please indicate as part of the response whether disclosure is acceptable.

Written material should be submitted to: Office of Health Technology Assessment, 5600 Fishers Lane, room 18-40, Rockville, MD 20857, (301) 443-4990.

Thomas V. Holohan,

Director, Office of Health Technology Assessment, Agency for Health Care Policy and Research.

[FR Doc. 90-25000 Filed 10-22-90; 8:45 am]

BILLING CODE 4160-90-M

Assessment of Medical Technology

The Public Health Service's (PHS), Agency for Health Care Policy and Research, through the Office of Health Technology Assessment (OHTA), announces that it is coordinating an assessment of the safety and effectiveness of single and double lung transplantation.

Information is sought as to the risks and benefits associated with the use of this mode of treatment. Information is also sought pertaining to the specific indications for which single and double lung transplantation are appropriate. We also seek information concerning that institutional or team criteria are necessary to establish acceptable standards that will ensure optimum success for these transplantation procedures.

The PHS assessment consists of a synthesis of published literature and information obtained from appropriate organizations in the private sector and from PHS agencies and others in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety, clinical effectiveness, and appropriate uses of technology. Based on this assessment, a PHS recommendation will be formulated to assist the Office of Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) in establishing a CHAMPUS coverage policy. The information being sought is a review and assessment of past, current, and planned research related to this technology, as well as a bibliography of published, controlled clinical trials and other well designed clinical studies. Information related to the characterization of the patient population most likely to benefit from it, as well as on clinical acceptability and the effectiveness of this technology and extent of use, are also being sought. Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than February 1, 1991 or within 90 days from the date of publication of this notice.

For purposes of evaluation by the interested scientific community, it is sometimes helpful to include attributions for the comments cited in OHTA assessments. In addition, information provided in response to notices such as this one are often requested by interested individuals or groups. Without a written consent to the disclosure of the source of the comments received, the identity of the source will be kept confidential, in accordance with 42 U.S.C. 299a-1(c) and the title IX of the Public Health Service Act, section 903(c). Please indicate as part of the response whether disclosure is acceptable.

Writen material should be submitted to: Director, Office of Health Technology Assessment, 5600 Fishers Lane, room 18-40, Rockville, MD 20857, (301) 443-4990.

Thomas V. Holohan,

Director, Office of Health Technology Assessment, Agency for Health Care Policy and Research.

BILLING CODE 4160-90-M

Food and Drug Administration

[Docket No. 90P-0440]

Eggnog Deviating From Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a temporary permit has been issued to Coleman Dairy, Inc., to market test a product designated as "light eggnog" that deviates from the U.S. standard of identity for eggnog (21 CFR 131.170). The purpose of the temporary permit is to allow the applicant to measure consumer acceptance of the product.

DATES: This permit is effective for 15 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but not later than January 21, 1991.

FOR FURTHER INFORMATION CONTACT: Joanne Travers, Center for Food Safety and Applied Nutrition (HFF-414), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-485-0100.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 130.17

concerning temporary permits to facilitate market testing of foods deviating from the requirements of the standards of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), FDA is giving notice that a temporary permit has been issued to Coleman Dairy, Inc., 5801 Asher Ave., Little Rock, AR 72214.

The permit covers limited interstate marketing tests of a product that deviates from the U.S. standard of identity for eggnog in 21 CFR 131.170 in that: (1) The fat content of the product is reduced from 6 percent to 1 percent, and (2) sufficient vitamin A palmitate is added to ensure that a 4-fluid-ounce (118.5-milliliter) serving of the product contains 8 percent of the U.S. Recommended Daily Allowance for vitamin A. The product meets all requirements of the standard with the exception of these deviations. The purpose of the variation is to offer consumers a product that is nutritionally equivalent to eggnog but contains fewer calories and less fat.

For the purpose of this permit, the name of the product is "light eggnog." The principal display panel of the label must include the statements "reduced calories" and "reduced fat" following the name. In addition, the label must bear the comparative statements "⅓ less calories" and "75% less fat than regular eggnog".

The product complies with the reduced calorie labeling requirements in 21 CFR 105.66(d). In accordance with FDA's current views, reduced fat food labeling is acceptable because there is at least a 50-percent reduction in the fat content of the product. The information panel of the label will bear nutrition labeling in accordance with 21 CFR 101.9.

This permit provides for the temporary marketing of 32,000 quarts of the test product. The test product is to be manufactured at Coleman Dairy, Inc., Little Rock, AR 72204, and will be distributed in Arkansas, Louisiana, Mississippi, and Missouri.

Each of the ingredients used in the food must be stated on the label as required by the applicable sections of 21 CFR part 101. This permit is effective for 15 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but not later than January 21, 1991.

Dated: October 12, 1990.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

[Docket No. 90F-0332]

Eggnog Deviating From Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a temporary permit has been issued to Marigold Foods, Inc., to test market a product designated as "lite eggnog" that deviates from the U.S. standard of identity for eggnog (21 CFR 131.170). The purpose of the temporary permit is to allow the applicant to measure consumer acceptance of the product.

DATES: This permit is effective for 15 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but not later than January 21, 1990.

FOR FURTHER INFORMATION CONTACT: Joanne Travers, Center for Food Safety and Applied Nutrition (HFF-414), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-485-0100.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 130.17 concerning temporary permits to facilitate market testing of foods deviating from the requirements of the standards of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), FDA is giving notice that a temporary permit has been issued to Marigold Foods, Inc., 2929 University Ave. SE., Minneapolis, MN 55414.

The permit covers limited interstate marketing tests of a product that deviates from the U.S. standard of identity for eggnog in 21 CFR 131.170 in that: (1) The fat content of the product is reduced from 6 percent to 2 percent, and (2) sufficient vitamin A palmitate is added to ensure that a 4-fluid-ounce (118.5 milliliter) serving of the product contains 8 percent of the U.S. Recommended Daily Allowance for vitamin A. The product meets all requirements of the standard with the exception of these deviations. The purpose of the variation is to offer consumers a product that is nutritionally equivalent but contains fewer calories and less fat.

For the purpose of this permit, the name of the product is "lite eggnog." The principal display panel of the label must include the statements "reduced calories" and "reduced fat" following the name. In addition, the label must bear the comparative statements "⅓ less calories" and "⅓ less fat than regular eggnog".

The product complies with the reduced calorie labeling requirements in 21 CFR 105.66(d). In accordance with FDA's current views, reduced fat food labeling is acceptable because there is at least a 50-percent reduction in the fat content of the product. The information panel of the label will bear nutrition labeling in accordance with 21 CFR 101.9.

This permit provides for the temporary marketing of 250,000 quarts (575 liters) of the test product. The test product is to be manufactured at Marigold Foods, Inc., Rochester Plant, 700 First Ave. SE., Rochester, MN 55901, and Marigold Foods, Inc., Kewaskum Plant, 110 First St., Box 476, Kewaskum, WI 53040, and will be distributed in Minnesota and Wisconsin.

Each of the ingredients used in the food must be stated on the label as required by the applicable sections of 21 CFR part 101. This permit is effective for 15 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but not later than January 21, 1991.

Dated: October 12, 1990.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

[Docket No. 90M-0299]

Abbott Laboratories; Premarket Approval of Abbott PgR-EIA Monoclonal

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Abbott Laboratories, Abbott Park, IL, for premarket approval, under the Medical Device amendments of 1976, of the ABBOTT PgR-EIA Monoclonal. After reviewing the recommendation of the Clinical Chemistry and Clinical Toxicology Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of September 6, 1990, of the approval of the application.

DATES: Petitions for administrative review by November 23, 1990.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food

and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kaiser Aziz, Center for Devices and Radiological Health (HFZ–440), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301–427–1243.

SUPPLEMENTARY INFORMATION: On February 16, 1990, Abbott Laboratories, Abbott Park, IL 60064–5300, submitted to CDRH an application for premarket approval of the ABBOTT PgR–EIA Monoclonal. The ABBOTT PgR–EIA Monoclonal is indicated for the quantitative measurement of human progesterone receptor in breast tumor tissue cytosol to be used as an aid in assessing the likelihood of response to hormonal therapy, and to aid in the prognosis and management of breast cancer patients.

On June 19, 1990, the Clinical Chemistry and Clinical Toxicology Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On September 6, 1990, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Kaiser Aziz (HFZ–440), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the Act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before November 23, 1990, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: October 16, 1990.

Elisabeth D. Jacobson,

Acting Deputy Director, Center for Devices and Radiological Health.

BILLING CODE 4160–01–M

[Docket No. 90M–0312]

AGENA Starke Gesellschaft M.B.H.; Premarket Approval of AGENASORB 9020®

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by AGENA Starke Gesellschaft m.b.H., Vienna, Austria, for premarket approval, under the Medical Device Amendments of 1976, of AGENASORB 9020®. After reviewing the recommendation of the General and Plastic Surgery Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of September 13, 1990, of the approval of the application.

DATES: Petitions for administrative review by November 23, 1990.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Roger Barnes, Center for Devices and Radiological Health (HFZ–410), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301–427–1090.

SUPPLEMENTARY INFORMATION: On November 18, 1988, AGENA Starke Gesellschaft, m.b.H., Vienna, Austria, submitted to CDRH an application for premarket approval of the AGENASORB 9020® which is indicated as a lubricating powder for surgeon's gloves. The device is an absorbable dusting powder manufactured by chemically cross-linking corn starch. The powder meets the specifications set forth in the monograph "Absorbable Dusting Powder," published by the U.S. Pharmacopeia XXII/National Formulary XVII (1990), and in the monograph "Sterilizable Maize Starch," published by the British Pharmacopeia (1988).

On April 12, 1990, the General and Plastic Surgery Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On September 13, 1990, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Roger Barnes (HFZ–410), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or

independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before November 23, 1990, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: October 16, 1990.

Concord/Portex, Inc.; Premarket Approval of the Trophocan™ Chorionic Villus Sampling Catheter

AGENCY: The Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Concord/Portex, Inc., Keene, NH, for premarket approval, under the Medical Device Amendments of 1976, of the Trophocan™ Chorionic Villus Sampling Catheter. After reviewing the recommendation of the Obstetrics and Gynecology Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of August 9, 1990, of the approval of the application.

DATES: Petitions for administrative review by November 23, 1990.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Raju G. Kammula, Center for Devices and Radiological Health (HFZ-470), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1180.

SUPPLEMENTARY INFORMATION: On April 6, 1989, Concord/Porex, Inc., Keene, NH 03431, submitted to CDRH an application for premarket approval of the Trophocan™ Chorionic Villus Sampling Catheter which is indicated for use in obtaining chorionic tissue samples for the prenatal diagnosis of genetic abnormalities during the first trimester of pregnancy (i.e., between 8 and 12 weeks gestation). On August 24, 1989, the Obstetrics and Gynecology Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On August 9, 1990, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Managment Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Raju G. Kammula (HFZ-470), address above.

Opportunity for Administrative Review

Section 515(d)(3) of he Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administraive review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's adminstrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. Physiologic Diagnostic Service, Inc. (PDS); Premarket Approval of the Genesis® Home Uterine Activity Monitoring System

AGENCY: Food and Drug Administration HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Physiologic Diagnostic Service, Inc. (PDS), Atlanta, GA, for premarket approval, under the Medical Device Amendments of 1976, of the Genesis® Home Uterine Activity Monitoring System. After reviewing the recommendation of the Obstetrics and Gynecology Devices Panel, FDA's Center for Devices and Radiological Health (CRDH) notified the applicant, by letter of September 12, 1990, of the approval of the application.

DATES: Petitions for administrative review by November 23, 1990.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Raju G. Kammula, Center for Devices and Radiological Health (HFZ-470), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1160.

SUPPLEMENTARY INFORMATION: On November 10, 1989, Physiologic Diagnostic Service, Inc., Atlanta, GA 30350, submitted to CRDH an application for premarket approval of the Genesis® Home Uterine Activity Monitoring System which is indicated for use, in conjunction with standard high risk care, for the daily at-home measurement of uterine activity in pregnancies > 24 weeks gestation for women with a history of previous preterm birth. Uterine activity data is displayed at a remote location to aid in the early detection of preterm labor (PTL) as evidenced by cervical dilation at the time of preterm labor diagnosis.

On April 4, 1990, the Obstetrics and Gynecology Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On September 12, 1990, CRDH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CRDH.

A summary of the safety and effectiveness data on which CRDH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

Boston Scientific Corp.; Premarket Approval of the Mansfield Aortic Valvuloplasty Balloon Dilatation Catheter

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Boston Scientific Corp., Watertown, MA, for premarket approval, under the Medical Device Amendments of 1976, of the Mansfield Aortic Valvuloplasty Balloon Dilatation Catheter, Models Standard Profile and Low Profile. After reviewing the recommendation of the Circulatory System Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of September 19, 1990, of the approval of the application.

DATES: Petitions for administrative review by November 23, 1990.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Tara A. Ryan, Center for Devices and Radiological Health (HFZ-450), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1187.

SUPPLEMENTARY INFORMATION: On August 18, 1988, Boston Scientific Corp., Watertown, MA 02272, submitted to CDRH an application for premarket approval of the Mansfield Aortic Valvuloplasty Balloon Dilatation Catheter. The catheter is indicated for percutaneous transluminal valvuloplasty of aortic stenosis in patients who are determined to be inoperable.

On January 29, 1990, the Circulatory System Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On September 19, 1990, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Tara A. Ryan (HFZ-450), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for

reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at anytime on or before November 23, 1990, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: October 16, 1990.

Elizabeth D. Jacobson,

Acting Deputy Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Program Announcement for Professional Nurse Traineeships

The Health Resources and Services Administration (HRSA) announces that applications for fiscal year (FY) 1991 Professional Nurse Traineeships are being accepted under the authority of sections 830 (a) and (c) of the Public Health Service Act, as amended by Public Law 100-607.

The Administration's budget request for FY 1991 does not include funding for this program. Applicants should be advised that this program announcement is a contingency action being taken to ensure that should funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the program as well as to provide for even distribution of funds throughout the fiscal year. This notice regarding applications does not reflect any change in this policy.

Section 830(a) of the Public Health Service Act, as amended, authorizes Professional Nurse Traineeship Grants to cover the costs of traineeships for nurses in masters' degree and doctoral degree programs in order to educate such nurses to:

(1) Serve in and prepare for practice as nurse practitioners;

(2) Serve in and prepare for practice as nurse administrators, nurse educators, and nurse researchers; or

(3) Serve in and prepare for practice in other professional specialities determined by the Secretary to require advanced education.

Section 830(c) authorizes grants to cover the cost of traineeships for students who are enrolled at least half-time in programs offering a master's degree in nursing and who agree to complete the degree requirements within the academic year in which the traineeship is received.

Eligible Applicants

To be eligible to receive support an applicant must be a public no nonprofit private institution providing regis'ered nurses with full-time advanced education leading to a graduate degree in professional nursing specialties, or a public or nonprofit private school of nursing or an entity which prepares registered nurses to practice as nurse midwives. The nurses midwife program must be approved by the American College of Nurse Midwives.

Eligible Trainees

In order to qualify for traineeship support, an individual must:

(1) Meet the grantee institution's admission requirements for graduate study or the nurse midwife program (as applicable);

(2) Be a United States citizen, noncitizen national, or foreign national who possesses a visa permitting permanent residence in the United States;

(3) Have graduated from a State-approved school of nursing;

(4) Be currently licensed as a registered professional nurse in a State; and

(5) Be enrolled full-time in a graduate course of study, or half-time in a school of nursing, pursuing a master's degree which would be completed within the academic year of support.

Review Criteria

The review of applications will take into consideration the following criteria:

(a) The program(s) offered;

(b) The qualifications of the program director;

(c) The number of full-time registered nurse students enrolled in the program(s); and

(d) The number of projected half-time master's degree students who agree to complete the degree requirements within the academic year in which the traineeship is received.

In addition, the following mechanism may be applied in determining the amount of funding of approved applications.

Funding Preferences

Funding of a specific category or group of approved applications ahead of other categories or groups of applications, such as competing continuations ahead of new projects in a discretionary program or favorable

adjustment of the formula determining grant award in a formula grant program.

Funding Preferences

The Secretary shall give a funding preference to applications:

(1) For nurse practitioner and nurse midwifery programs which conform to guidelines established and codified in the appendix at 42 CFR 57.2401–57.2416;

(2) Which demonstrate a three year average enrollment of minority students in the graduate nursing program in excess of the national average; and/or

(3) Which demonstrate an increase in the enrollment of full-time graduate minority students as of October 15 in the current school year from the number enrolled full-time as of October 15 in the preceding school year.

"Minority" means an individual whose race/ethnicity is classified as American Indian or Alaskan Native, Asian or Pacific Islander, Black or Hispanic.

These funding preferences were established as special considerations in FY 1989 after public comment and the Administration is extending them as funding preferences in FY 1991.

To determine the amount of the grant to be awarded to each approved professional nurse traineeship program, the Secretary will use a formula that includes provisions for the statutorily required setaside for half-time students and special consideration for nurse practitioner/nurse midwifery training. It also includes consideration of full-time student enrollment and minority student enrollment.

The application deadline date is November 30, 1990. Applications shall be considered as meeting the deadline if they are either:

(1) *Received on* or before the deadline date, or

(2) *Postmarked on* or before the deadline date and received in time for submission for review. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing. Applications received after the deadline will be returned to the applicant.

For specific guidelines and information regarding these programs contact: Division of Nursing, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8C–13, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–5783.

Requests for application materials, questions regarding grants policy and completed applications should be directed to: Grants Management Officer (A–11), Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8C–26, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–5915.

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060.

This program is listed at 13.358 in the *Catalog of Federal Domestic Assistance* and is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented by 45 CFR part 100).

Dated: September 25, 1990.

Robert G. Harmon,

Acting Administrator.

[FR Doc. 90–25046 Filed 10–22–90; 8:45 am]

BILLING CODE 4160–15–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA–060–01–4410–04–ADVB]

Meeting of the California Desert District Advisory Council

SUMMARY: Notice is hereby given, in accordance with Public Laws 92–463 and 94–579, that the California Desert District Advisory Council to the Bureau of Land Management, U.S. Department of the Interior, will meet in formal session Thursday, November 15, 1990, from 8:00 p.m. to 4:00 p.m. and Saturday, November 17, 1990, from 8:00 p.m. to 5:00 p.m., in the Needles City Hall at 1111 Bailey in Needles, California.

Agenda items for the meetings will include:

—A variety of desert tortoise related issues, including raven management, the tortoise habitat compensation formula, the status of various consultations with the U.S. Fish and Wildlife Service, the Western Mojave tortoise plan, and the task force studying livestock grazing in desert tortoise habitat. During this portion of the meeting, the California Desert District Advisory Council functions as California's Desert Tortoise Coordinating Committee

—An update on the current status of the Low Level Radioactive Waste Disposal Site Environmental Impact Statement and future anticipated actions, and a discussion evaluating the public participation process that accompanied the initiative

—An update on the South Coast resource management planning effort in preparation for a more indepth discussion in January or February

—A report from the Desert District's Futuring Committee, whose members are looking at anticipated land management issues for the next 10 and 20 years

—A discussion of the draft Santa Rosa Mountains National Scenic Area Management Philosophy Statement and Interim Program Guidance

—A report from the Wind Energy Task Force

All formal Council meetings are open to the public. Time is allocated for public comments, and time also may be made available by the Council Chairman during the presentation of various agenda items.

On Friday, November 16, from 7:30 a.m. to 5 p.m., Council members will participate in a field trip through the East Mojave National Scenic Area. Specific sites to be visited include the Keystone Spring area of the New York Mountains, where a mining company has sought a modification in a Public Water Reserve withdrawal to allow removal of high-grade limestone; the new campground at Hole-in-the-Wall; and the new Back Country Byway network in the Scenic Area. On the return trip to Needles, the Council will go by the Old Woman Mountains, which are included in a coordinated resource management planning effort, and Ward Valley, proposed site of a low-level radioactive waste disposal facility.

The public is welcome to participate in the field tour, but should plan on providing their own transportation, drinks, and lunch. Anyone interested in participating should contact BLM at (714) 276–6363 for more information. The tour will assemble at the Days Inn, 1111 Pashard Street in Needles on Friday morning at 7:15 a.m.

Written comments may be filed in advance of the meeting with the California Desert District Advisory Council Chairman, Mr. David Fisher, c/o Bureau of Land Management, Public Affairs Office, 1695 Spruce Street, Riverside, California 92507. Written comments are also accepted at the time of the meeting and, if copies are provided to the recorder, will be incorporated into the minutes.

FOR FURTHER INFORMATION AND MEETING CONFIRMATION: Contact the Bureau of Land Management, California Desert District, Public Affairs Office, 1695 Spruce Street, Riverside, California 92507; (714) 276–6363.

Dated: October 17, 1990.
Gerald E. Hiller,
District Manager.

BILLING CODE 4310-40-M

Availability of Draft Bishop Resource Management Plan and Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with section 202 of the National Environmental Policy Act of 1969, a draft Resource Management Plan/Environmental Impact Statement (RMP/EIS) has been prepared for the Bishop Resource Area. The RMP/EIS describes and analyses future options for managing approxiamtely 750,000 acres of public land in California's Inyo and Mono Counties. It includes analysis of three transmission line corridor alternatives. The Inyo National Forest is a cooperating agency for the transmission line corridor portion of the document.

Decisions generated during this planning process will supersede the Benton-Owens Valley and Bodie-Coleville Management Framework Plans. The RMP/EIS incorporates land use decisions in the Benton-Owens Valley/Bodie-Coleville Wilderness EIS (1987). Copies may be obtained from the Bishop Resource Area, 787 North Main Street, Suite P, Bishop, CA 93514; phone (619) 872-4881.

Copies will be available for review at public libraries in Inyo and Mono Counties and the following BLM locations:

Office of Public Affairs, Main Interior Bldg., rm 5600, 18th and C Street, NW., Washington, DC 20240
California State Office, 2800 Cottage Way, Sacramento, CA 95825
Bakersfield District Office, 800 Truxton Ave., Bakersfield, CA 93301.

Background information and maps used in developing the RMP/EIS can be reviewed at the Bishop Resource Area.

DATES: Written comments on the draft RMP/EIS must be submitted or postmarked no later than January 17, 1991. Written comments may also be presented at three public meetings to be held:

7 p.m. Tuesday November 27, American Legion Hall, U.S. Highway 395, Independence, CA.
7 p.m. Thursday November 29, Parish Hall, 849 Home Street, Bishop, CA.
7 p.m. Tuesday December 4, Memorial Hall, School Street, Bridgeport, CA.
7 p.m. Thursday December 6, Benton Community Center, Highway 120, Benton, CA.

ADDRESSES: Written comments on the document should be addressed to Mike Ferguson, Area Manager, Bureau of Land Management, 787 North Main St., Suite P, Bishop, CA 93514.

FOR FURTHER INFORMATION CONTACT: Holden Brink, RMP Team Leader, Bishop Resource Area; phone (619) 872-4881.

SUPPLEMENTARY INFORMATION: The draft RMP/EIS analyzes four alternatives to resolve the following four issues: Recreation, Wildlife, Minerals, and Land Ownership and Authorizations. Each alternative represents a complete management plan for the area. The alternatives can be summarized as: (1) No action or continuation of present management, (2) custodial management (3) natural resource enhancement, and (4) the preferred alternative. In addition to two existing Areas of Critical Environmental Concern (ACEC's), the RMP/EIS proposes the designation of five areas as ACEC's. Management prescriptions for the areas are described in chapter 2 of the RMP/EIS. The Preferred Alternative would designate:

The Slinkard ACEC to protect wildlife habitat scenic values, and recreation opportunities. Habitat conditions for mountain beaver would be improved by limiting the types of uses and vegetative treatments allowed in riparian zones, particularly aspen adn willow groves. Five creeks would be managed so they remain suitable for the reintroduction of cutthroat trout. The historic Golden Gate Mine site would be protected and interpreted and there would be yearlong protection of old growth timber. This ACEC totals 6,560 acres of public land in portions of T. 9 N., R. 21 E., MDMB: SE¼ Section 1 east of the Alpine-Mono County line, E½ Section 12 east of the Alpine-Mono County line, NE¼ and SE¼ Section 13 east of the Alpine-Mono County line, E½ Section 24 east of the Alpine-Mono County line, NE¼ Section 25 east of the Alpine-Mono County line; T. 9 N., R. 22 E.: N½ Section 4, Sections 5-7, W½ and NE¼ Section 8, SW¼ and SE¼ Section 9, Section 10 south of Highway 89, Section 11 south of Highway 89, Section 14, Section 15, Section 17, NW¼ and SW¼ Section 18, Section 19, Section 22 and 23, SW¼ Section 25, Sections 26 and 27, Section 30 north and east of the Alpine-Mono County line, Section 31 north and east of the Alpine-Mono County line, Section 34, Section 35.

The Conway Summit ACEC to protect scenery and dispersed recreation opportunities. The area would have yearlong protection and would be managed to conform to VRM I standards. Livestock grazing would be prohibited on acquired lands and opportunities for dispersed recreation such as camping, mountain biking, hiking, and winter sports would be enhanced. This ACEC totals 2,701 acres of public land in portions of T. 3 N., R 25 E., MDBM: Sections 22, 23, 26, 27, 34 and SE¼ Section 15, S½ Section 14, NW¼ Section 35.

The Bodie Bowl ACEC to protect visual and historic values in accordance with the cooperative agreement with Bodie State Park. Actions within the area would not be allowed if they significantly threatened the existing historical integrity of the landscape. There would be not shooting allowed and the area would be designated a Special Recreation Management Area. This ACEC totals 5,934 acres of public lands in portions of T. 4 N.R. 26 E. MDBM: S½ Section 1, SE¼ Section 2, NE¼ Section 11, Section 12, and NE¼ Section 13 and T. 4 N., R 27 E.: SW½ Section 3, Section 4, S½ Section 5, S½ and NW¼ Section 6, Sections 7-10, W½ Section 11, Sections 14-17 N½ and SE¼ Section 18, Sections 20-21, W½ and NE¼ Section 22, NW¼ Section 23.

The Crater Mountain ACEC to protect scenic values and recreation and geologic interpretive opportunities. 240 acres would be acquired to protect recreation and scenic resources. This ACEC totals 5,734 acres of public land in portions of T. 9 S, R. 33 E., MDBM: Sections 25 and 36, SE¼ Section 24; T. 10 S., R. 33 E., Sections 1 and 12, NE¼ Section 13; T. 9 S. R. 34 E.: SW¼ Section 19 and Sections 29-32, T. 10 S., R 34 E.: Sections 5-8, N½ Section 18, and NE¼ Section 17.

The Keynot Peak ACEC to protect the scientific and scenic values of the bristlecone pine forest. It would have yearlong protection and be managed to meet wilderness guidelines. Campfires would be prohibited and wood could be removed only for research or museum purposes. This ACEC totals 2,162 acres of public land in portions of projected T. 14 S., R. 37 E., MDBM: Sections 6, 7, 8, 16, 17, 18, 20, 21, 28, 29, 32, 33, 34 and projected T. 15 S. R. 37 E., Sections 3, 4, 10, and 11. Its eastern edge follows the crest of the Inyo Mountains. It encompasses the bristlecone pine vegetation type within the south Inyo Wilderness Study Area.

Public participation has occurred throughout the RMP process. A Notice of Intent was filed in the Federal Register in June 1988. Since that time there have been several mailings and public meetings to solicit comments and ideas.

All comments received have been considered.

Dated: October 12, 1990.

Michael A. Ferguson,

Bishop Resource Area Manager.

Receipt of Applications for Permits

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Bio Systems Analysis, Inc., Santa Cruz, CA, PRT-751892

The applicant requests a permit to live-trap and release Tipton kangaroo rats (*Dipodomys n. nitratoides*) in Kern County, California, to determine the occurrence of this species at locations of proposed projects.

Applicant: Duke University, Durham, NC, PRT-752008

The applicant requests a permit to import one male mongoose lemur (*Lemur mongoz*) from Poland for enhancement of propagation or survival of the species through captive breeding. This animal was confiscated by Polish authorities and is now being held at Wielkopolski Park Zoologiczny.

Applicant: University of California, La Jolla, CA, PRT-738264

The applicant requests a permit to import hair samples of captive gibbons (*Hylobates* sp.) for genetic research. The animals are held at zoo facilities in Thailand, Malaysia and Indonesia.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) room 430, 4401 N. Fairfax Dr., Arlington, VA 22203, or by writing to the the Director, U.S. Office of Management Authority, 4401 N. Fairfax Drive, room 432, Arlington, VA 22203.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Dated: October 17, 1990.

Karen Wilson,

Acting Chief, Branch of Permits, U.S. Office of Management Authority.

BILLING CODE 4310-55-M

Outer Continental Shelf Advisory Board; Gulf of Mexico Regional Technical Working Group; Meeting

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of Gulf of Mexico Regional Technical Working Group (RTWG) meeting.

SUMMARY: Notice of this meeting is issued in accordance with the Federal Advisory Committee Act (Pub. L. No. 92-463). The Gulf of Mexico RTWG meeting will be held November 16, 1990, 9 a.m. to 1 p.m., at the Doubletree Hotel, Crescent Room, 300 Canal Street, New Orleans, Louisiana.

The RTWG business meeting will be held in conjunction with the Information Transfer Meeting. Agenda items for the business meeting include:

- Roundtable Discussion.
- Oil and Gas Reserves Estimates.
- Bathymetric Maps for the Gulf of Mexico.
- Flower Gardens—Video and Discussion.

FOR FURTHER INFORMATION: This meeting is open to the public. Individuals wishing to make oral presentations to the committee concerning agenda items should contact Ann Hanks of the Gulf of Mexico OCS Regional Office at (504) 736-2589 by November 5, 1990. Written statements should be submitted by the same date to the Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123. A transcript and complete summary minutes of the meeting will be available for public inspection in the Office of the Regional Director at the above address not later than 60 days after the meeting.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico RTWG is one of six such Committees that advises the Director of the Minerals Management Service on technical matters of regional concern regarding offshore prelease and postlease sale activities. The RTWG membership consists of representatives from Federal Agencies, the coastal States of Alabama, Florida, Louisiana, Mississippi, and Texas, the petroleum industry, the environmental community, and other private interests.

Dated: October 11, 1990.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

National Park Service

Santa Fe National Historic Trail Advisory Council; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act, Public Law 92-463, that a meeting of the Santa Fe National Historic Trail Advisory Council will be held beginning at 8:15 a.m., at the Quality Inn, 1325 E. 3rd Street, La Junta, Colorado.

The Santa Fe National Historic Trail Advisory Council was established pursuant to Public Law 50-543 establishing the Santa Fe National Historic Trail to advise the National Park Service on such issues as preservation of trail routes and features, public use, standards for posting and maintaining trail markers, as well as administrative matters.

The matters to be discussed include:

—Review of interpretive planning matters.
—Auto tour route signing.
—Fundraising proposals.
—Status of certification projects and agreements with states.
—Historical research projects.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited, and persons will be accommodated on a first-come, first-served basis. Any member of the public may file a written statement concerning the matters to be discussed with David Gaines, Project Coordinator.

Persons wishing further information concerning this meeting, or who wish to submit written statements may contact David Gaines, Project Coordinator, Santa Fe National Historic Trail, P.O. Box 728, Santa Fe, New Mexico 87504-0728, telephone 505/988-6888. Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of the Project Coordinator, located in Room 346, Pinon Building, 1220 South St. Francis Drive, Santa Fe, New Mexico.

Dated: October 11, 1990.

John E. Cook,

Regional Director, Southwest Region.

Mine Safety and Health Administration

[Docket No. M-90-11-M]

Harney Rock and Paving Co., Petition for Modification of Application of Mandatory Safety Standard

Harney Rock and Paving Company, P.O. Box 600, Hines, Oregon 97738 has filed a petiton to modify the applicatior of 30 CFR 56.14130 (roll-over protective structures (ROPS) and seat belts) to its Crusher No. 1 (I.D. No. 35-03345) located in Harney County, Oregon. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that front-end loaders be equipped with roll-over protective structures (ROPS).

2. As an alternate method petitioner proposes to operate front-end loaders without ROPS.

3. The front-end loader would be operated on flat, stable ground.

4. The loader would be loading railroad cars in a loading area until its retirement.

5. Petitioner states that this is a safe alternate method since there is no danger of the equipment rolling over.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 23, 1990. Copies of the petition are available for inspection at that address.

Dated: October 15, 1990.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-90-17-M]

Kennecott Utah Copper, Petition for Modification of Application of Mandatory Safety Standard

Kennecott Utah Copper, P.O. Box 525, Bingham Canyon, Utah 84006-0525 has filed a petition to modify the application of 30 CFR 56.14211 (blocking equipment

in a raised position) to its Kennecott Utah North Copper Concentrator (I.D. No. 42-00717) located in Salt Lake County, Utah. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a raised component of mobile equipment is considered to be blocked or mechanically secured if provided with a functional load-locking device or a device which prevents free and uncontrolled descent.

2. As an alternate method petitioner proposes to use a crane to hoist, lower or suspend persons in a work platform attached to the hook of the load block.

3. In support of the petition, petitioner states that the overhead crane will meet all applicable federal and American National Standards Institute (ANSI) standards and include all standard safety features such as trolley stops, bridge bumpers, trolley bumpers, holding brakes for hoist motors, control braking trolley bumpers, holding brakes for hoist motors, control braking capable of maintaining safe lowering speeds, trolley and bridge brakes, upper and lower limit switches and emergency stop switches.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 23, 1990. Copies of the petition are available for inspection at that address.

Dated: October 15, 1990.

BILLING CODE 4510-43-M

[Docket No. M-90-247-C]

Pyro Mining Co., Petition for Modification of Application of Mandatory Safety Standard

Pyro Mining Company, P.O. Box 267, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.507 (power connection points) to its Wheatcroft No. 9 Mine (I.D. No. 15-13920) located in Webster County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that except where permissible power connection units are used, all power-connection points out-by the last open crosscut be in intake air.

2. As an alternate method, petitioner proposes to operate a nonpermissible submersible pump in a return air shaft.

3. In support of this request, petitioner states that—

(a) The pump would be installed with motor and all motor connections below water level and be controlled by intrinsically safe liquid sensors through an intrinsically safe relay mounted in a square starting box;

(b) Only the pump, power cable and liquid level sensors would be in return air; and

(c) Circuit protection would be provided at the center, motor overloads would be located in the line starter, and all electricial equipment would be accessible for inspection.

4. For these reasons, petitioner requests modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 23, 1990. Copies of the petition are available for inspection at that address.

Dated: October 15, 1990.

BILLING CODE 4510-43-M

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit applications received under the Antarctic Conservation Act of 1978, Public Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of 1978 at title 45 part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to these permit applications by November 23, 1990. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 627, Division of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Charles E. Myers at the above address or (202) 357-7934.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. Law 95-541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed in 1964 by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest.

The applications received are as follow:

1. Applicant (90-31)
   Jim Claus,
   Society Expeditions, Inc.,
   3131 Elliott Avenue, Suite 700,
   Seattle, Washington 98121
   Activity for Which Permit Requested
   Taking. The applicant requests permission to salvage dead specimens (i.e., penguin wing or flipper, seal skull or bird beak) on an opportunity basis. Specimens would be used for educational purposes during discussions and lectures to cruise ship passengers.
   Location
   Ross Sea area, Antarctica.
   Dates
   December 1990-February 1991.
2. *Applicant* (90-32)
   Jim Claus,
   Society Expeditions, Inc.,
   3131 Elliott Avenue, Suite 700,
   Seattle, Washington 98121
   Activity for Which Permit Requested

Taking. The applicant requests permission to salvage dead specimens (i.e., penguin wing or flipper, seal skull or bird beak) on an opportunity basis. Specimens would be used for educational purposes during discussions and lectures to cruise ship passengers.

Location

Antarctic Peninsula area and offshore islands.

Dates

December 1990–March 1991.

3. *Applicant* (90–32)

David F. Parmelee,
Bell Museum,
University of Minnesota,
Minneapolis, Minnesota 55455

Activity for Which Permit Requested

Taking. Enter Specially Protected area. Enter Site of Special Scientific Interest. The applicant proposes to visit nesting areas for birds (except penguins) to examine birds previously banded. This is a follow-up to a long-team study of longevity and migration of birds.

Location

Antarctic peninsula area.

Dates

December 1990–March 1991.

Charles Myers,
Permit Office.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-461]

Illinois Power Co., et al.; Environmental Assessment and Finding of No Significant Impact

[Docket No. 50-461]

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to the Illinois Power Company (IP) and Soyland Power Cooperative, Inc. (the licensees), for operation of Clinton Power Station, Unit 1, located in DeWitt County, Illinois.

Environmental Assessment

Identification of Proposed Action

The licensees have requested a license amendment that would revise the Technical Specifications (TS) to delete Section 3/4.3.8, "Turbine Overspeed Protection System."

This revision to the Clinton Power Station TS would be made in response to the licensees' application for amendment dated October 30, 1987.

The Need for the Proposed Action

IP, et al., have proposed an amendment to Facility Operating License No. NPF–62 which consists of changes to the TS. Section 3/4.3.8 addresses the operability and surveillance requirements for the turbine overspeed protection system. The CPS Updated Safety Analysis Report (USAR) provides an analysis of the probability of turbine missile damage to safety-related components. The analysis considered turbine placement and orientation and the potential generation of low-trajectory and high-trajectory missiles.

The probability of turbine missile damage was based on the probabilities of missile generation, of a missile striking a barrier, and of a missile penetrating a barrier. The CPS USAR also provides a discussion of the inservice inspection program for the turbine-generator, including the licensee commitment to an inspection program on the steam valves in accordance with the manufacturer's recommendations. Based on the low probability of a turbine generated missile damaging safety-related equipment and other existing procedural requirements for inspection and test of the turbine steam valves, the licensee proposes to delete Section 3/4.3.8 entirely.

Environmental Impacts of the Proposed Action

The proposed change removes the turnine overspeed protection system requirements from the plant TS but no changes to plant design are proposed. The licensee will continue to perform inspection and testing on the turbine overspeed protection system based on vendor recommendations.

The Commission has concluded that these changes do not significantly increase the probability or consequences of any accident and that potential radiological releases during normal operations or transients would not be increased. With regard to nonradiological impacts, the proposed amendment involves systems located within the restricted area as defined in 10 CFR part 20. They do not affect nonradiological plant effluents and have no other environmental impact. Therefore, the staff also concludes that there are no significant nonradiological environmental impacts associated with the proposed amendment.

Accordingly, the Commission findings in the "Final Environmental Statement related to the operation of Clinton Power Station, Unit No. 1" dated May 1982 regarding radiological environmental impacts from the plant during normal operation or after accident conditions, are not adversely altered by this action. IP is committed to operate Clinton, Unit 1, in accordance with standards and regulations to maintain occupational exposure levels "as low as reasonably achievable."

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the Federal Register on February 18, 1988 (53 FR 4918). No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

The principal alternative would be to deny the requested amendment. This alternative, in effect, would be the same as a "no action" alternative. Since the Commission has concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statements for the Clinton Station, Unit 1, dated May 1982.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request of October 30, 1987 and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon this environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for amendment dated October 30, 1987 and the Final Environmental Statement for the Clinton Power Station dated May 1982, which are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC and at the Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

Dated at Rockville, Maryland, this 18th day of October 1990.

BILLING CODE 7590–01–M

Application for License To Export a Utilization Facility

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following application for an export license. A copy of the application is on file in the Nuclear Regulatory Commission's Public Document Room located at 2120 L Street, NW., Washington, DC.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555; the Secretary, U.S. Nuclear Regulatory Commission; and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

In its review of the application for a license to export a utilization facility as defined in 10 CFR part 110 and noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the material to be exported. The information concerning this application follows.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittees on Containment Systems and Structural Engineering; Meeting

The ACRS Subcommittees on Containment Systems and Structural Engineering will hold a joint meeting on November 7, 1990, room P–110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, November 7, 1990—8:30 a.m. until the conclusion of business

The Subcommittees will discuss containment design criteria for future plants.

Oral statements may be presented by members of the public with the concurrence of the Subcommittees Chairmen; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting open to the public, and questions may be asked only by members of the Subcommittees, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the meeting, the Subcommittees, along with any of their consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairmen's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Dean Houston (telephone 301/492–8521) between 7:30 a.m. and 4:15 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: October 16, 1990.

Gary R. Quittschreiber,

Chief, Nuclear Reactors Branch.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittee on Thermal Hydraulic Phenomena; Meeting

The Subcommittee on Thermal Hydraulic Phenomena will hold a meeting on November 6, 1990, room P–110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows: *Tuesday, November 6, 1990—8:30 a.m. until the conclusion of business.*

The Subcommittee will discuss the status of the NRC staff's program on interfacing systems loss of coolant accident (ISLOCA).

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present

oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the Designated Federal Official, Mr. Paul Boehnert (telephone 301/492–8558) between 7:30 a.m. and 4:15 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: October 18, 1990.

Gary R. Quittschreiber,

Chief, Nuclear Reactors Branch.

BILLING CODE 7590–01–M

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Meeting

ACTION: Notice of Meeting.

Pursuant to the Nuclear Waste Technical Review Board's (NWTRB) authority under section 5051 of Public Law 100–203, the Nuclear Waste Policy Amendments Act (NWPAA) of 1987, the NWTRB Structural Geology & Geoengineering Panel will hold a technical exchange meeting from 1 p.m. to 4 p.m. on November 19, 1990, and from 8 a.m. to 4 p.m. on November 20, 1990, at the Denver Hyatt Regency Hotel, Downtown, 1750 Welton Street, Denver, Colorado 80202; (303) 295–1200.

Panel members will receive an interim report from representatives of the Department of Energy (DOE), Sandia National Laboratories, and other DOE contractors, on the alternatives analysis study for the exploratory shaft facility (ESF). The study, which is to be completed by January 1991, will evaluate configurations for an ESF as part of site-characterization activities related to the proposed development and operation of a permanent repository, at Yucca Mountain, Nevada, for high level waste (HLW), including commercial spent fuel and defense high-level waste from reprocessing. Discussion will focus on progress in identifying a recommended configuration for an ESF at the Yucca Mountain Site. The public is welcome to attend as observers.

The NWTRB was established by the Nuclear Waste Policy Amendments Act (NWPAA) of 1987 (Pub. L. 100–203) to evaluate the scientific and technical validity of activities undertaken by the DOE's program for managing HLW. In the same act, Congress directed the DOE to characterize a site at Yucca Mountain, Nevada, as the possible location for a permanent underground repository for HLW. The Board's charge includes the evaluation of the DOE's activities relating to site-characterization, and to the packaging and transportation of HLW.

For further information, please contact the NWTRB office at 1100 Wilson Boulevard, suite 910, Arlington, Virginia 22209; (703) 235–4473.

Dated October 18, 1990.

William D. Barnard,

Executive Director, Nuclear Waste Technical Review Board.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by the Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272–2142

Upon Written Request Copy Available From: Securities and Exchange Commission, Office of Consumer Affairs, 450 5th Street NW., Washington, DC 20549.

New

Form ID

File No. 270–291

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for clearance a new Form ID to replace its existing Form ID. The information collected via the new Form ID will be used by the Commission to verify the identity of applicants before EDGAR identification codes and passwords are issued, to provide an official contact for receipt of EDGAR-related information and to establish a contact for receipt of invoices and billing information.

The estimated average burden hours to comply with this request is one half hour each for approximately 20,000 respondents.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, 450 Fifth Street NW., Washington DC 20549, and Gary Waxman, Clearance Officer, Office of Management and Budget, Paperwork Reduction Act Project (3235–0040A), Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: October 15, 1990.

Margaret H. McFarland,

Deputy Secretary.

[Rel. No. 34–28548; File No. 4–291]

Joint Industry Plan; Fifteenth Amendment to the Consolidated Tape Association Plan and Nineteenth Amendment to the Consolidated Quotation Plan

I. Introduction

On September 27, 1990, the Participants in the Consolidated Quotation Plan ("CQ Plan") and the Consolidated Tape Association ("CTA") submitted amendments to the plan governing the operation of the consolidated quotation system ("CQS") and the plan governing the operation of the consolidated transaction system ("CTS"). The amendments to both Plans were filed pursuant to section (c)(2) of rule 11Aa3–2 under the Securities Exchange Act of 1934 ("Act"). The CTA amendments also were submitted pursuant to rule 11Aa3–1 under the Act.

II. Purpose of the Amendments

The amendments are intended to serve four purposes. First, the amendments would make the Chicago Board Options Exchange ("CBOE") a Participant in the Restated CTA Plan and in the CQ Plan. Second, the amendments would alter the revenue sharing provisions of the CTA and CQ Plans. Third, they would amend the CTA Plan procedures for becoming a Plan Participant to make those provisions consistent with the procedures in the CQ Plan and, finally, the amendments make several technical conforming amendments.

A. CBOE Participation

The CBOE has submitted a package of stock rules to the Commission for review under section 19 of the Act, which if approved, would authorize the CBOE to provide trading facilities for individual stocks and other non-option securities for the first time. Rule 11Aa3–1 requires that every exchange file a transaction reporting Plan for transactions in listed equity and NASDAQ securities executed through its facilities.[1] In light of its plans to provide trading facilities for such securities, the CBOE requested that it be made a Participant in the CTA Plan. In addition, rule 11Ac1–1 requires that

[1] Rule 11Aa3–1(b)(1).

each exchange establish and maintain procedures for the collection and dissemination to vendors of quotation data.[2] Because the CQ Plan provides such procedures, the CBOE also requested that it be made a Participant in the CQ Plan. The amendments would add CBOE as a participant in both Plans.

B. Revenue Sharing Provisions

The proposed amendments would alter the provisions contained in both Plans that govern how revenues received for the market data disseminated pursuant to the Plans are to be distributed among the Participants. Specifically, the amendments alter the calculation of "Annual Share," which represents the relative percentage of last sale reports and quotations submitted to the Plan processor by each Participant and is the basis for apportioning Plan revenues. The proposed amendments would exclude from the Annual Share calculation last sale prices on any security that is the subject of a contractual relationship that grants a Participant: (1) The exclusive right to trade the security or (2) the discretion to determine which other Participants may trade the security.

This amendment has been proposed in response to CBOE's proposal to trade "SuperShares," which is currently being reviewed by the Commission.[3] One significant characteristic of SuperShares, for purposes of this filing, is the fact that CBOE has entered into an exclusive agreement with the potential issuer of these securities.

In their submission, the Participants stated that the original Participants to the CTA Plan filed the Plan to provide a system to disseminate on a consolidated basis last sale prices of securities traded on more than one of the Participants and thereby to comply with rule 17a–15 (later redesignated as rule 11Aa3–1) of the Act. The Participants also stated that they believe that the CTA Plan, as originally filed, did not contemplate use of the CTA facilities to disseminate last sale prices relating to anything other than securities that are eligible for multiple trading on the Participant markets.

The Participants acknowledged, however, that they have allowed Participants to use the CTA facilities to disseminate last sale prices on other issues. For example, three weeks after the original CTA Plan became effective, the Participants filed an amendment to allow each Participant to use the CTA facilities to disseminate last sale prices in bonds and options traded on the Participant. The Participants stated that the amendment provided, however, that the bonds and options would not participate in revenue sharing.[4] The Participants also amended the CTA Plan in 1978 to permit the concurrent use of the facilities for the reporting of the last sale prices relating to "local" issues that did not meet the CTA Plan's definition of an "Eligible Security." However, the Participants stated that they excluded those local issues in the calculation of each Participant's annual share of revenue. In addition, the Participants stated that they have traditionally allowed Participants to use CTA and CQ systems to disseminate information relating to exclusively traded securities, but only at the exclusion of those last sale prices from the Annual Share calculations. Thus, the Participants stated that they believe that it is appropriate that the amendments extend the exclusively traded security principle to the new circumstance presented by the CBOE's proposed participation.

C. New Participant Provisions

The amendments also would amend the CTA Plan procedures for becoming a Plan Participant to make those provisions consistent with those in the CQ Plan. Both Plans contain provisions to the general effect that any other national securities exchange may become a Participant. The CQ Plan contains a specific mechanism to effect the addition of a new Participant but the Restated CTA Plan does not. The Participants stated that they believe the Plans should be in conformity on this matter and, accordingly, proposed amendments to the Restated CTA Plan to conform it to the CQ Plan. In addition, the amendments would add a new section to the CTA Plan to provide that the Plan, and any contracts and resolutions made pursuant to the Plan, shall be effective as to that Participant when, among other things, the Participant has begun to furnish last sale prices to the Processor.

D. Conforming Amendments

As noted above, the submission also contained various conforming amendments. These amendments generally add references to the CBOE throughout the Plan, as necessary.

IV. Implementation of the Amendments

The Participants noted, that in their view, three issues remain to be resolved "in relation to" the CBOE's participation in the two Plans. First, the Participants noted that CBOE has proposed to commence trading Eligible Securities prior to the time that the Plans' processor will have completed the system modifications to the CTS and the CQS that are required to enable these systems to receive, process, consolidate and disseminate CBOE last sale prices and/or bid and asked prices. The processor has provided CBOE with estimates of the costs and time needed to complete the work, currently targeted for mid-January, 1991, and CBO has authorized the processor to proceed. The CTA noted that the CBOE's application for participation was submitted during the final stages of a multi-phase program to upgrade CTS to a stand-alone system and that work on an interface between CBOE and CTS would not commence until that upgrade was completed. In the interim, CBOE plans to disseminate data through CTS and CQS facilities, if necessary, by "piggybacking" into the input circuits of another Participant, the Cincinnati Stock Exchange, Inc., ("CSE"), until CBOE is able to transmit information directly to the processor. Among other implications, this "piggybacking" procedure will result in the reporting of CBOE trade reports and quotations with a CSE market identifier of the CSE. The Participants also stated that the CBOE and the CSE have agreed that the CBOE would refrain from commencing to trade any Eligible Security on the CSE for the duration of the CBOE's use of the CSE's input circuits in order to avoid the confusion and practical problems that would result from having both exchanges transmitting indistinguishable trade reports and quotations in the same security. In addition, the Participants asserted that the CBOE and the CSE have undertaken: (1) To obtain from the Commission any exemptions necessary to address any inconsistencies between the "piggybacking" proposal and Commission rules; (2) to identify to, and obtain waivers from, the other Participants necessary to address any inconsistencies between the "piggbacking" proposal and the CTA Plan and the CQ Plan; and (3) to indemnify the Participants and the Plan's processor for any adverse consequences from the "piggyback" arrangement.

Second, the Participants stated that they have not yet agreed with the CBOE on either the amount or the method of

---

[2] Rule 11Aa1–1(b)(1).

[3] *See* Securities Exchange Act Rel. No. 28132 (June 15, 1990), 55 FR 25056.

[4] The reference to options was subsequently deleted when the CTA Plan was restated in 1990 given the formation and organization of the Options Price Reporting Authority.

reimbursement of the Participants for access to CTS and CQS facilities. The CBOE has made a proposal that is being studied by a subcommittee of the CTA and CQ Operating Committee. The Participants also stated that they have agreed not to make the resolution of this issue a precondition to the CBOE's participation.

Third, the CBOE has not yet demonstrated to the Participants that SuperShares, the security that CBOE would like to report through CTA and CQ facilities, meets the definition of an Eligible Security. Because SuperShares may be the first security as to which the CBOE furnishes trade reports and quotations, the Participants stated that they believe that this determination has special significance. Specifically, the Participants stated that they believe that the CBOE's participation in the Plan cannot become effective until it commences to furnish trade reports and quotations in an Eligible Security.

V. Request for Comment

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communication relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the CTA. All submissions should refer to the file number in the caption above and should be submitted by November 6, 1990.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. 17 CFR 200.30-3(a)(27).

Dated: October 16, 1990.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. 34-28548; International Series Rel. No. 178; File No. SR-AMEX-90-19]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by the American Stock Exchange, Inc. Relating to the Calculation of the Japan Index

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 15, 1990, the American Stock Exchange, Inc. ("AMEX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Commission recently approved an AMEX proposal to list for trading a new index option contract based on the Japan Index ("Japan Index" or "Index")—a broad-based on index of Japanese stocks that are traded on the Tokyo Stock Exchange ("TKE").[1] The AMEX proposes to modify its method of calculating the daily value of the Japan Index by basing the Index value solely on the last sale prices of the component stocks on the TKE. Currently, if a component stock does not trade on a given day on the TKE, but does trade on the Osaka Stock Exchange ("OSE"), the last sale price on the OSE of such component stock will used in the calculation of the Index.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in Sections A, B, and C below.

[1] *See* Securities Exchange Release No. 28473 (September 27, 1990), 55 FR 40462.

A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis, for the Proposed Rule Change

The Japan Index is a price-weighted index developed by the AMEX that is comprised of 210 Japanese stocks traded on the TKE. Currently, the specifications of the Japan Index provide for the calculation of the Index's daily value to be generally based on the closing prices of the component stocks on the TKE. The specifications further provide that in the event on any day a component stock does not trade on the TKE, but does trade on the OSE, the last sale price on the OSE will be used for calculating the Index value.

For settlement purposes, however, the existing specifications provide that the Index's settlement value is based exclusively on the latest closing TKE prices available on the trading day in Japan following the last day of trading in expiring Index option series, regardless of whether a more recent trade occurred on OSE. The Exchange now proposes to base its daily Japan Index value calculation exclusively on the closing prices of the component stocks on TKE in a manner similar to that employed in calculating the Index's settlement value.

The Exchange believes that it is appropriate to have consistency in the methods of calculating both the daily Index value and the Index settlement value. Moreover, the Exchange believes that basing an index value exclusively on component stock prices from the primary market, such as the TKE in the case of the Japan Index, is consistent with the Exchange's method of calculating other index values, such as is Major Market Index and Institutional Index. Moreover, the Exchange believes that basing the Index value upon the last prices in the primary market is consistent with methods of index calculation utilized by other administrators of stock indexes.

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act in that it will facilitate transactions in securities and protect investors and the public interest. In particular, the Exchange believes that the proposed rule change is consistent with section 6(b)(5) of the Act, which provides in pertinent part, that the rules of the Exchange be designed to promote just and equitable principles of trade and to protect the investing public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The AMEX does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section [2] and the rules and regulations thereunder. Specifically, the Commission believes that it is consistent with the objectives of the Act for the Exchange to utilize the same index calculation method for the daily disseminated Index values and as the Index value for settlement purposes. The Commission notes that, because of AMEX's Japan Index option is a standardized European-style options contract (exercisable only at expiration) and currently only TKE prices are used for calculating the Index's value for settlement purposes, this proposed rule change will not affect the value of any Japan Index options contracts. The proposal will, however, eliminate potential uncertainty and confusion among investors of Japan Index options as to when, and if, the AMEX has utilized the non–TKE prices of some of the securities included in the Index when calculating the Index's disseminated value. Accordingly, the Commission believes that the AMEX's proposal to utilize only TKE prices for determining the value of the Japan Index will avoid investor confusion, thereby protecting investors and the public interest.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because it will permit existing investors of Japan Index options contracts to track more easily and accurately the Index's current value and will not affect the value of any existing Japan Index options contracts.

[2] 15 U.S.C. 78f (1982).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by November 13, 1990.

It is therefore ordered, pursuant to section 19(b)(2) of the act,[3] that the proposed rule change is approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[4]

Dated: October 17, 1990.

Margaret H. McFarland

Deputy Secretary.

[Rel. No. 34-28544; International Series Rel. No. 177; File Nos. SR-AMEX-90-08; SR-NYSE-90-36; SR-PHLX-90-25; SR-PSE-90-18]

Self-Regulatory Organizations; American Stock Exchange, Inc., et al.; Order Approving Proposed Rule Changes Relating to the Listing of Index Warrants Based on the CAC–40 Index

I. Introduction and Background

The American ("AMEX"), New York ("NYSE"), Philadelphia ("PHLX"), and Pacific ("PSE") Stock Exchanges, collectively ("Exchanges"), have submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] and rule 19b–4 thereunder,[2] proposed rule changes to list warrants based on the Cotation Assistée en Continu 40 Index ("CAC–40" or "Index")—a broad-based index of French stocks traded on the Paris Bourse.[3]

The proposed rule changes were published for comment in various releases.[4] No comments were received on these proposed rule changes.

II. Description of the Proposal

The Exchanges propose to list index warrants [5] based on the CAC–40, an internationally recognized, capitalization-weighted index consisting of 40 leading stocks listed and traded on the Paris Bourse and calculated by the Societe des Bourses Francaises ("SBF").[6]

[3] 15 U.S.C. 78s(b)(2) (1988).

[3] In France, securities may be listed on only one of seven stock exchanges. Together these bourses or stock exchanges—Paris, Bordeaux, Lille, Lyons, Marseilles, Nancy and Nantes—form a single exchange system operating under the same principles, headed by the same authorities and subject to the same rules and regulations. For purposes of calculating the CAC–40 Index, however, only securities traded on the Paris Bourse are considered. For a more complete description of the regulatory structure in France, see *infra* note 7.

[4] *See* Securities Exchange Act Rel. Nos. 28070 (May 29, 1990), 55 FR 23323 (notice of file no. SR-AMEX-90-08); 28225 (July 18, 1990), 55 FR 30770 (notice of File No. SR-CBOE-90-16); 28300 (August 3, 1990), 55 FR 32720 (notice of File No. SR-MSE-90-10); 28319 (August 8, 1990), 55 FR 33480 (notice of File No. SR-NYSE-90-36); 28385 (August 28, 1990), 55 FR 36377 (notice of File No. SR-PHLX-90-25); 28068 (May 29, 1990), 55 FR 22262 (notice of File No. SR-PSE-90-18.

[5] Warrants on a stock index are securities that incorporate certain characteristics of both stocks and options. Like stock, they are issued by a corporation that serves as guarantor of the warrant obligation. Like a stock index option, however, an index warrant is based on the performance of an underlying index and has a fixed expiration date. Index warrants are also cash-settled and, just as with options, the risk to a buyer is known and limited. For a description of how index warrants are cash-settled, see *infra* text at p. 8.

[6] The SBF is a "specialized financial institution," under the direction of the Conseil des Bourses de Valeurs or Stock Exchange Council. It implements decisions taken by the Stock Exchange Council, such as day-to-day administration of French securities markets, development and promotion, and provides investors and the general public with comprehensive information on market activities. In addition, the SBF monitors and supervises the market and exchange member firms under delegated authority by the Exchange Council. The Stock Exchange Council is the regulatory authority similar to a self-regulatory organization in the United States, charged with formulating the rules under which the French market and brokerage firms operate. The rules of the Stock Exchange Council, called the Règlement Général du Conseil des Bourses de Valeurs, set forth terms and conditions for the creation of new brokerage houses, security listings, removals from listing and suspension, and takeover bids and establish a code of conduct for exchange members. In addition, the Council ensures member compliance with its rules by bringing disciplinary action if necessary. The French

Continued

The CAC–40 is calculated based on 40 French stocks chosen by the SBF to provide an indication of the performance of the French stock market. In particular, the Index is designed so that the economic sectors contained in the Index receive approximately the same weighting as in the overall French market, for both market value and trading volume.[7] In order to achieve such broad representaton, the SBF selects compenent securities based on the following market and economic criteria. First, there are three market thresholds for a security to satisfy before such security can be contained in the Index: (1) It must rank among the top 100 securities traded on the Paris Bourse's monthy settlement market in terms of market capitalization; [8] (2) it must have a large enough float to ensure that it is widely-held; and (3) it must be continuously traded either on the Paris Bourse's computerized trading system or by open outcry on the exchange floor.[9] Second, component securities must satisfy an economic criteria, namely, that when considering the other stocks in the Index, a security does not distort the representative sampling of the major industry sectors in the Index. If a security fails to meet any of these requirements, it will be removed and replaced.[10]

The CAC is continuously calculated using the last sale price of each of the 40 quoted stocks comprising the Index and disseminated at 30-second intervals throughout the Paris Bourse trading day from 10 a.m. to 5 p.m. (Paris time) (4 a.m. to 11 p.m. Eastern Standard Time). The Index is published daily in, among other places, the *Wall Street Journal*, as well as being available real-time on Telefax, Reuters and other market information systems which disseminate information on a minute-by-minute basis. To calculate the CAC, the SBF takes the sum of the market values of the 40 stocks in the Index and divides this number by a base adjusted market value or divisor. In order to provide continuity for the Index's value, the divisor is adjusted periodically to reflect events such as new issuances of stock and other capitalization changes.

In addition, whenever there is stale last sale information for a large percentage of component securities in the Index, the CAC–40 Index is replaced with an "éclaireur." The "éclaireur" is a collection of indicators used to show the trend of the market based on the component stocks that are actually traded.[11] The éclaireur is disseminated at the start of each daily trading session, prior to the establishment of an initial quoted price for each component stock, and in the event that tradeing has been suspended in stocks representing more than 35% of the total market capitalization of the component stocks.[12]

As of June 28, 1990, the total capitalization of the CAC–40 was $166.6 billion or approximately 60% of the capitalization of the CAC–240 General Index, a benchmark of French listed-securities.[13] Business sector representation in the CAC as of June 28, 1990, was as follows: (1) Raw materials (16%); (2) construction (4%); (3) capital goods (12%); (4) durable goods (6%); non-durable goods (8%); (6) food products (13%); (7) services (9%) and (8) financial companies (23%).

The five largest issues contained in the CAC–40 Index account for approximately 31.30% of the Index's value.[14] The average daily trading volume during the first six months of 1990 for the five most heavily weighted stocks in the CAC was 652,990 shares collectively and 130,998 individually.[15] The total average daily trading volume of the 40 CAC stocks for the same period was 2,874,523 shares. Additionally, the smallest corporation in the CAC–40, which was "Etablissements Economiques du Casino," represented .55% of the Index with a market capitalization of 5.2 billion French francs or approximately $924 million.

The Exchanges propose to trade CAC warrants pursuant to the requirements of their generic Index Warrant Approval Orders, that, among other things, permit the Exchanges to list index warrants based on established market indexes, both foreign and domestic.[16]

Consistent with the generic Index Warrant Approval Orders, the Exchanges represent that the CAC–40 warrant issues will conform to their

---

regulatory body known as the Commission des Operations de Bourse ("COB") approves the rules of the Stock Exchange Council. The COB is an autonomous administrative body patterned after the U.S. Securities and Exchange Commission. It functions as the French market regulator with authority to undertake investigations, notify French judicial authorities, and levy fines.

[7] *See, infra*, notes 13 and 15, and accompanying text.

[8] Securities listed on the Paris Bourse may be traded in the cash market ("marché ou component") or on the monthly settlement market ("réglement mensuel" or "RM"). The most actively traded French stocks are traded on a monthly settlement basis. Under the monthly settlement system, transactions are firm in both price and quantity once they have been concluded, but actual cash settlement and delivery does not occur until the end of the trading month.

[9] All securities in the RM market are traded continuously. With the exception of a limited number of securities still traded on the floor by open outcry, transactions are handled by Coatation Assistée en Continu ("CAC"), a computer-assisted trading system that electronically executes and records all trades, which are made through terminals installed in brokerage firms and linked to the SBF's central computers. The CAC–40 is derived from the top issuers in terms of capitalization and trading volume within the CAC system.

[10] The SBF has appointed an independent body of experts called the Scientific Advisory Commission ("SAC") to manage the CAC. This Commission is composed of seven members (one of which must be the President of the SBF) appointed by the Stock Exchange Council. The SAC ordinarily conducts a quarterly review of the Index to ensure that its component stocks are representative of the state of the equity market for the largest French companies. Changes in the Index are generally infrequent. Since July 1984, there only have been four replacements.

[11] Specifically, the éclaireur indicates the weighted average of price variations for those stocks actually trading. These variations are the difference between the current price and the price used to calculate the last index.

[12] For instance, if at the start of a trading session only 30 of the 40 shares are trading and the market capitalization of those 10 issues not trading represent 36% of the total market capitalization of the Index, then the CAC will be substituted by the "éclaireur," meaningful measure of the French equity market: (1) The number of CAC–40 component stocks still being traded; (2) the relative weight of stocks still traded, expressed as a percentage of the aggregate market capitalization of the component CAC–40 stocks; and (3) the percentage change in market capitalization of stocks still traded with respect to their market capitalization as of the last published index. The "éclaireur" has not been limited to episodes of dramatic price movement, as well as cases of technical difficulty which arise to hinder the dissemination of last sale information.

[13] The CAC–240 General Index represents the total French equity market value. Indeed, calculations by the SBF show that the correlation of the monthly price settlement between the CAC–40 and the CAC–240 General Index is 97%. *See* "Paris Bourse Index CAC–40—A New Base for Futures and Options Traded on the MATIF and the MONEP," August 1988, at 2. Moreover, the index's component stocks are highly capitalized as the mean and median capitalization for the 40 firms (as of June 28, 1990) was 23.44 billion French francs ($4.71 billion dollars) and 15 billion francs ($2.67 billion dollars), respectively. The U.S. dollar/French franc exchange rate used for these calculations was $.17808 per French franc on June 28, 1990.

[14] As of June 28, 1990, the five most heavily weighted stocks in the CAC–40 were: Société Nationale ELF–Aquitaine (7.82%); Compagnie Générale d'Electricité (7.02%); Louis Vuitton Moët Hennessy—LVMH (5.89%); Compagnie Financière de Suez (5.57%); and Compagnie Générale des Eaux (5.13%). In addition, these issues represent the following respective business sectors: (1) Raw materials; (2) capital goods; (3) food products; (4) financial companies; and (5) services.

[15] In addition, most issues are among the most actively traded on the Paris Bourse with the mean and median average daily trading volume for the 40 issues of 71,800 and 20,800 shares, respectively.

[16] *See* Securities Exchange Act Release Nos. 28151 (October 2, 1990), 53 FR 39822 ("AMEX Index Warrant Approval Order"); 28133 (June 28, 1990), 55 FR 27734 ("NYSE Index Warrant Approval Order"); 28208 (July 26, 1990), 55 FR 31275 ("PHLX Index Warrant Approval Order"); and 28094 (May 22, 1990), 55 FR 22001 ("PSE Index Warrant Approval Order") (collectively, "Index Warrant Approval Orders"). With the exception of some minor differences, these guidelines are uniform.

respective index warrant listing guidelines.[17] Specifically, the listing guidelines of the Exchanges require that: (1) The issuer shall have assets in excess of $100,000,000 and otherwise substantially exceed the respective Exchange's size and earnings requirements; (2) the term of the warrants shall be for a period ranging from one to five years from the date of issuance;[18] and (3) the minimum public distribution of such issues shall be 1,000,000 warrants together with a minimum of 400 public holders,[19] and have an aggregate market value of $4,000,000.[20]

The Exchanges propose that the CAC–40 warrants will be direct obligations of their issuer subject to cash-settlement during their term, and either exercisable throughout their life (*i.e.*, American style) or exercisble only on their expiration date (*i.e.*, European style). Upon exercise, or at the warrant expiration date (if not exercisable prior to such date), the holder of a warrant structured as a "put" would receive payment in U.S. dollars to the extent that the CAC–40 Index has declined below a pre-stated cash settlement value. Conversely, holders of a warrant structured as a "call" would, upon exercise or at expiration, receive payment in U.S. dollars to the extent that the CAC–40 Index has increased above the pre-stated cash settlement value. If "out-of-the-money" at the time of expiration, the warrants would expire worthless.

Because index warrants are derivative in nature and closely resemble index options, the Exchanges have proposed safeguards that are designed to meet the investor protection concerns raised by the trading of index options. First, the Exchanges propose to apply their options suitability standards to index warrant recommendations and the requirement that discretionary orders in index warrants by approved on the day entered by a Senior Registered Options Principal ("SROP") or a Registered Options Principal ("ROP"). In addition, the Exchanges have recommended that the CAC–40 warrants only be sold to options approved accounts. Moreover, the Exchanges, prior to commencement of trading of CAC–40 warrants, will distribute a circular to their membership calling attention to the specific risks associated with warrants on the CAC–40.

III. Discussion

The Index warrants are the first derivative instruments to be traded on a U.S. exchange that are based on a stock index comprised exclusively of French stocks. The Commission believes that the availability of warrants on the Index is consistent with section 6(b)(5) of the Act in that it should help remove impediments to a free and open securities market and facilitate transactions in securities because the Index warrants will provide investors a means by which to hedge against investment decisions made in the French equity market and a surrogate instrument for trading the French securities market.[21] In particular, CAC–40 warrants will benefit U.S. investors by allowing them to obtain differential rates of return on a capital outlay if the CAC–40 moves in a favorable direction within a specified time period. Of course, if the CAC–40 moves in the wrong direction or fails to move in the right direction, the warrants will expire worthless and the investors will have lost their entire investment. Thus, the trading of warrants on the CAC–40 Index will provide investors with a valuable hedging vehicle that should reflect accurately the overall movement of the French equity market.

The Commission further believes that the CAC warrants are consistent with the generic Index Warrant Approval Orders of the Exchanges. Nevertheless, the trading of warrants on the Index raises several concerns, namely issues related to customer protection, index design, surveillance and market impact. The Commission believes, for the reasons discussed below, that the Exchanges adequately have addressed these concerns.

A. Customer Protection

Due to the derivative nature of index warrants, the Commission believes that CAC–40 warrants only should be sold to investors capable of evaluating and bearing the risks associated with trading in such instruments and that adequate risk disclosure is made to investors. In this regard, the Commission notes that the rules and procedures of the Exchanges that address the special concerns attendant to the secondary trading of index warrants will be applicable to the CAC–40 warrants. In particular, by imposing the special suitability disclosure, and compliance requirements noted above, the Exchanges have addressed adequately potential public customer problems that could arise from the derivative nature of CAC warrants. Moreover, the Exchanges plan to distribute circulars to their members calling attention to the specific risks associated with warrants on the CAC and, pursuant to each exchange's listing gidelines, only substantial companis capable of meeting their warrant obligations will be eligible to issue CAC warrants.[22]

In order to be eligible for trading of warrants pursuant to the Generic Index Warrant Approval Orders, an index must not raise significant manipulative or other trading abuse concerns. In light of the design of the Index and its component securities,[23] the Commission believes that the CAC is broad-based index of actively traded, well-capitalized stocks. As described more thoroughtly above, the Index is comprised of eight industry sectors, the largest of which accounts for 23% of the Index. In addition, the stocks contained in the Index are selected from the top 100 stocks traded on the Paris Bourse and, as such, are among the most highly-capitalized and activitely traded.[24] Moreover, no stock or small group of stocks accounts for a substantial portion of the Index. Accordingly, the Commission believes that the broad diversification, large capitalization and liquid markets of the Index's component stocks significantly minimize the potential for manipulation of the Index.

C. Surveillance

As a general matter, before approving a new derivative product, the

---

[17] *See* section 103 of the AMEX *Company Guide*; NYSE section 703.17 of its *Listed Company Manual*; PHLX Rule 803; and PSE Rule I, Section 2(b).

[18] The NYSE CAC–40 filing (SR–NYSE–90–36) does not limit the duration of the warrants to five years but states that they shall be for a period of at least one year.

[19] The NYSE CAC–40 filing (SR–NYSE–90–36) calls for a minimum distribution of 1,100,000 warrants instead of the 1,000,000 required by the other exchanges.

[20] In addition, the PHLX and PSE propose to trade CAC–40 warrants on an unlisted trading privilege basis. To do so, the PHLX and PSE would have to make a separate application under section 12(f) of the Act.

[21] Pursuant to section 6(b)(5) of the Act the Commission must predicate approval of any new securities product upon a finding that the introduction of such product is in the public interest. Such a finding would be difficult with respect to a warrant that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns.

[22] The terms of the warrant issuances may vary as to whether the éclaireur value or a prior or subsequent regular calculation of the CAC–40 Index is used for settlement purposes if the Index is replaced by an éclaireur on expiration day. Before listing a CAC–40 Index warrant, and Exchange should be satisfied that the relevant disclosure documents explain clearly the calculation procedures for settlement determination, and the Exchanges should make efforts to ensure that their members are aware of the Index calculation procedures.

[23] *See supra*, notes 13–14 and accompanying text.

[24] *See supra*, notes 14–15 and accompanying text.

Commission requires that a surveillance sharing agreement be in place between the exchange that proposes to trade the derivative product and the exchange where the underlying shares are traded. The Commission believes that such an agreement is a critical component of any program aimed at detecting and deterring potential intermarket manipulation.

Due to the fact that the CAC is a foreign index, the Commission believes adequate surveillance sharing agreements between the Exchanges and the Paris Bourse are a necessary prerequisite to deter and detect potential manipulations or other improper or illegal trading involving the warrants. To address this concern, the Exchanges have entered into separate surveillance sharing agreements with the SBF that provide for the exchange of information relating to the trading of CAC warrants on the Exchange and trading in the component securities of the Index on the Paris Bourse.[25] These agreements obligate the Exchanges and SBF to compile and transmit market surveillance information and to resolve in "good faith" any disagreements regarding requests for information in response thereto.

Despite the surveillance sharing agreements between the Exchanges and SBF, the SBF asserts that the French blocking statute [26] restricts its ability to supply the U.S. exchanges with the necessary customer trading information related to trading on the Paris Bourse.[27] Therefore, in order to obtain customer information, the Commission and the COB have exchanged letters that establish a mechanism for the exchange of information, including customer information, for transactions involving a derivative security or the stocks underlying such security when a derivative security is traded in U.S. or French markets and the underlying securities are traded in the other country's markets.[28] This SEC/COB letter exchange confirms that the SEC will be able to secure information not obtainable from the SBF, and thus ensure that an investigation can occur with access to all necessary surveillance information.[29] Accordingly, the Commission believes the arrangement made pursuant to the SEC/COB exchange of letters, together with agreements consummated by the Exchanges with the SBF, are adequate to allay Commission concerns regarding the Commission and/or Exchanges' ability to obtain information necessary to take appropriate regulatory action regarding alleged manipulation or other trading abuses between markets involving the trading of CAC warrants.

D. Market Impact

The Commission believes that the listing and trading of CAC–40 Index warrants on the Exchanges will not adversely impact the securities markets in the U.S. or France.[30] First, the existing index options surveillance procedures of the Exchanges will apply to warrants based on the CAC Index. Second, the Commission notes that the Index is broad-based and diversified and includes highly capitalized securities that are actively traded on the Paris Bourse.[31] Third, the Commission notes that at the present time, index options and futures contracts based on the CAC–40 are traded on French exchanges,[32] and that numerous warrant and off-exchange options are traded worldwide on the CAC–40.[33] Accordingly, the Commission does not believe that the introduction of CAC–40 warrants by the Exchanges will have a significant effect on the underlying French securities market.

IV. Conclusion

For the reasons set forth above, the Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[34]

It therefore is ordered, pursuant to section 19(b)(2) of the Act,[35] that the proposed rule changes (SR–AMEX–90–08; SR–NYSE–90–36; SR–PHLX–90–25; and SR–PSE–90–18) are approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[36]

Dated: October 17, 1990.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 90–25022 Filed 10–22–90; 8:45 am]

BILLING CODE 8010–01–M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Boston Stock Exchange, Inc.

October 15, 1990.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and rule 12f–1 thereunder for unlisted trading privileges in the following securities:

American Waste Services, Inc.
Class A Common Stock, No Par Value (File No. 7–6260)

Cadence Design Systems, Inc.
Common Stock, $.01 Par Value (File No. 7–6261)

---

[25] The SBF, as the body charged with enforcing the rules applicable to the Paris Bourse, would be the appropriate SRO with which to enter into a surveillance sharing arrangement.

[26] A blocking statute prohibits the disclosure, inspection, copying and removal of documents located in the enacting state in compliance with orders of foreign authorities. *See,* The 1980 French Law on Documents and Information, Law No. 80–538 (1980) J.O. 1799.

[27] In this regard, the SBF asserts that it does not have the legal capacity to obtain specific customer information, but instead, must rely on the COB. The COB is prohibited from furnishing customer information to a non-governmental body, such as the Exchanges. As described below, pursuant to a letter exchange between the SEC and the COB, the COB confirms that it will furnish customer information directly to the Commission.

[28] *See* letter from Richard Ketchum, Director, Division of Market Regulation, SEC, to Patrick Mordacq, Secretary General, COB, dated September 18, 1990; and letter from Patrick Mordacq, Secretary General, COB, to Richard Ketchum, Director, Division of Market Regulation, SEC, dated September 18, 1990.

[29] The SEC entered into an Administrative Agreement with the COB on December 14, 1989. Despite the fact that such agreement has not formally entered into force, both countries have been operating informally in accordance with the principles set forth in that agreement. This cooperative effort on the part of both U.S. and French officials has expanded the availability of information with respect to investigations of possible securities law violations in both countries. To further this end, the Agreement establishes a system of mutual assistance, to facilitate the exchange of such information when requested by either country, in connection with an inquiry into insider trading, market manipulation or other possible securities law violations.

[30] The CAC–40 index contains 11 stocks which are available on an American Depository Receipt ("ADR") basis. These ADRs are traded over-the-counter ("OTC") except for Club Méditerranée, which is listed on the NYSE. An ADR is a receipt for the shares of a foreign-based corporation held in the vault of a U.S. bank and entitling the shareholder to all dividends and capital gains. Instead of purchasing shares of a foreign-based corporation in overseas markets, a U.S. investor can buy shares in the U.S. in the form of such ADR.

[31] *See* discussion of the Index's composition, *supra,* at pp. 5–7.

[32] Options on the CAC–40 are traded on the Marché des opérations négociables de Paris ("MONEP"), the Paris traded options market, and futures on the CAC–40 are traded on the Marché à Terme d'Instruments Financiers ("MATIF"), the French financial futures market.

[33] The CAC will be widely and publicly disseminated by various market information systems and the print media.

[34] 15 U.S.C. 78f(b)(5) (1982).

[35] 15 U.S.C. 78s(b) (1982).

BILLING CODE 8010-01-M

[Release No. 34-28538; File No. SR-NASD-90-36]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to the Establishment of a Permanent Subscriber Fee for the National Quotation Data Service.

On July 9, 1990, the National Association of Securities Dealers, Inc. ("NASD") submitted a proposed rule change (File No. SR-NASD-90-36,[1] to the Securities and Exchange Commission ("Commission" or "SEC") pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[2] to establish a permanent charge of $50.00 per month for subscribers to the National Quotation Data Service ("NQDS" or "Service").[3] No comments were received in response to this proposal. This order approves the proposed NQDS fee.

The NQDS service will incorporate individuals market maker quotations, Level 1 or "inside" quotations in NASDAQ and NASDAQ/NMS Last Sale information into a combined or "bundled" feed that will be supplied to NQDS vendors. This charge will apply to every interrogation or display device receiving the NQDS from an authorized vendor. Certain vendors of securities information have contracted with the NASD to receive this broadcast and distribute the information through their communications networks to interested subscribers. The NASD stated that the

[1] *See* Securities Exchange Act Release No. 28200, July 12, 1990, 55 FR 29446.

[2] 15 U.S.C. 78s(b)(1) (1982).

[3] NASDAQ, Inc. disseminates a variety of market data on approximately 5,400 securities that are authorized for inclusion in the NASDAQ system. NASDAQ level 1 service can access the inside market (*i.e.*, the best bid and offer) for any NASDAQ security during the trading day. NASDAQ Level 2 service consists of all market makers' bids and offers for all NASDAQ securities. NASDAQ Level 3 provides the same information as Level 2, with an update capability for market makers to enter quotations. The NQDS service consists of the same quotation information as Level 2 but is provided to vendors in the form of a data stream rather than a preformatted display of information. The vendor, therefore must arrange the quotation information for retrieval and display by subscribers. The NASD also disseminates last sale information on NASDAQ/National Market System ("NMS") securities.

proposed fee is structured to recoup the costs attributable to the NASD's collection, validation, and distribution of NQDS data to vendors. These costs would be recovered by assessing the proposed fee against the vendors' subscribers on a per terminal basis.

At present, NQDS subscribers pay a monthly charge of $8.75 for each terminal device receiving NQDS. That charge was established by the Commission on an interim basis pending the NASD's development of a cost-based charge for the NQDS. The interim charge resulted from a lengthy series of legal proceedings which culminated with a United States Court of Appeals decision [4] upholding a Commission order issued on April 17, 1984.[5]

I. Description of Prior Proceedings

In June of 1983, the NASD made its initial rule filing with the Commission to establish an intended schedule of fees for provision of the NQDS service.[6] The 1983 fee proposal called for a $3,200 per month vendor fee to recover the Association's costs of transmitting NQDS data, on a computer-to-computer interface, to an interested vendor. The 1983 fee proposal also provided that NQDS subscribers (*i.e.*, customers of any vendor marketing the NQDS service) would pay the NASD a monthly fee of $150/terminal for receipt of NQDS data, the same fee paid by all Level 2/3 subscribers. On July 15, 1983, the sole vendor interested in marketing the NQDS service filed a petition with the Commission, pursuant to section 11A(b)(5) of the Act, alleging that the proposed fees constituted an inappropriate limitation or prohibition on access to services provided by the NASD as an exclusive processor of securities information.

The ensuring proceedings resulted in the Commission issuing the April Order,[7] which, other things, found that: (1) The $3,200/month vendor fee was not an inappropriate prohibition or limitation on vendor access to the NQDS service under section 11A(b)(5) of the Act; [8] (2) the imposition of a charge based on the number of terminals subscribing to the NQDS service would not constitute an inappropriate prohibition or limitation on access to the NQDS service; (3) the proposed NQDS subscriber fee of $150/terminal/month contravened section 11A(b)(5) because it included the cost of operating the Level 2/3 query function, which was not included in the NQDS service to be provided to the vendor; and (4) in formulating an acceptable subscriber fee for NQDS service, the NASD may recover only those costs of operating a "pass-through" system that collects, validates, and prepares quotations for shipment to vendors.

During the latter half of 1984, the NASD filed two motions requesting the Commission's reconsideration of the April Order. Both were rejected.[9] the NASD then petitioned the United States Court of Appeals for the District of Columbia for review of the April Order. The Circuit Court affirmed the Commission's action in September of 1985.[10]

On July 31, 1985, the NASD submitted a rule filing proposing a subscriber fee of $79/terminal/month for NQDS service.[11] After publication of notice and receipt of comments on the proposed rule change, the Commission instituted proceedings, pursuant to section 19(b)(2)(B) of the Act, to determine whether to disapprove the 1985 fee proposal on the basis that it was inconsistent with the April Order and section 15A(b)(5) of the Act.[12]

On July 29, 1988, the NASD withdrew the 1985 fee proposal and submitted a new proposed rule change to establish a permanent charge of $50.75 per month for subscribers to the NQDS.[13] The proposed fee elicited adverse commentary submitted on behalf of NQDS vendors, however.[14] In response, the NASD sought to negotiate a fee with the NQDS vendors that would effectively recover expenses associated with the delivery of the Service while addressing the concerns of those vendors. Accordingly, on July 9, 1990, the NASD submitted a new fee proposal [15] and withdrew the 1988 fee proposal.

II. The NASD's Cost Allocation in Support of 1988 Fee Proposal

The NASD incorporated into the instant filing the financial statements submitted to the Commission in 1988 in support of the proposed $50.75 fee for a NQDS-only vendor feed. The Commission has reviewed those documents, as well as the two comment letters submitted in the earlier proposal, in its consideration of the current $50.00 fee the NASD has proposed to charge for the bundled service consisting of NQDS, Level 1 and last sale data.

In earlier proceedings on this matter, the Commission determined that an acceptable fee would be one composed solely of the costs incurred by the NASD (or its operating subsidiaries) in collecting, validating, and preparing NQDS information for transmission to a vendor.[16] The Instinet and Bridge comment letters argued, however, that the NQDS proposed fee failed to comply with the Commission's prior orders, which required that any difference in the fee for NQDS data over that charged for the NASDAQ Level 1 must be based on "demonstrable differences in cost" between the two services, and that any higher NQDS fee must reflect the functional apportionment of total costs to the particular service to which the costs relate. The commenters further noted that the NASD failed to explain why its NQDS costs differed from its Level 1 fee and questioned its methodology in the allocation of costs to update quotations.

III. Discussion

The Commission has determined to approve the NASD's proposed rule change because the Commission believes the new fee for NQDS is

---

[6] *See* File No. SR–NASD–83–13, Securities Exchange Act Release No. 19884 (June 17, 1983), 48 FR 29088 ("1983 fee proposal").

[7] *See* note 2, *supra*.

[8] Section 11A(b)(5) of the Act establishes a mechanism by which the Commission can review prohibitions or limitations on access to services offered by registered securities information processors. NASDAQ, Inc. is such a registered securities information processor.

[9] *See* Securities Exchange Act Release Nos. 21471 (November 8, 1984), 49 FR 45282, and 21832 (March 8, 1985), 50 FR 10555.

[10] *See* NASD v. SEC, 801 F.2d 1415 (D.C. Cir. 1986).

[11] *See* File No. SR–NASD–85–19, Securities Exchange Act Release No. 22035 (February 21, 1986), 51 FR 6957 ("1985 fee proposal").

[12] The Commission declined to find that the proposed fee was cost-based, finding that the proposal included certain costs that were contrary to the terms of the April Order. As such, the Commission did not find, pursuant to section 15A(b)(9) of the Act, that the proposed rule change did not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

[13] *See* File No. SR–NASD–88–35, Securities Exchange Act Release No. 26119, (September 27, 1988), 53 FR 38002.

[14] Letter from Daniel T. Brooks, counsel to Instinet Corporation, to Jonathan G. Katz, Secretary, SEC, dated October 25, 1988, ("Instinet letter") and letter from Stephen L. Williams, Executive Vice President, Bridge Information Systems, Inc., to Jonathan G. Katz, Secretary, SEC, dated October 31, 1988 ("Bridge letter").

[15] *See* File No. SR–NASD–90–33, Securities Exchange Act Release No. 28200, July 12, 1990, 55 FR 29446.

[16] To isolate the specific costs associated with collecting, validating, and processing of NQDS data for transmission to a vendor, the NASD identified direct operational costs relating to the physical processing of the data; systems software development and maintenance activities; and allocated overhead and general and administrative costs based on the relative percentage of direct costs allocable to these functions.

consistent with sections 11A(c)(1),[17] 15A(b)(5), (6) and (9) of the Act.[18] The NASD collects and disseminates an array of information including market makers' quotations. The NASD's distribution of such information, especially the terms under which it is distributed to different classes of users, must be guided by certain principles set forth in section 11A(c)(1). That section requires the prompt, accurate, reliable and fair collection, processing, distribution and publication of information,[19] and that all securities information processors may obtain such information on fair and reasonable terms,[20] which are not unreasonably discriminatory.[21] In addition, section 15A(b)(5) requires that the NASD's rules provide an equitable allocation of reasonable charges among members for the use of any facility or system that the NASD operates. Section 15A(b)(6) requires, among other things, that the NASD's rules be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in processing information with respect to and facilitating transactions in securities; to protect investors and the public interest; and that the NASD's rules not be designed to permit unfair discrimination between customers, brokers, or dealers. Further, section 15A(b)(9), requires that the NASD rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

In its April Order, the Commission rejected the NASD's original NQDS subscriber charge of $150 per terminal per month because it was not found to be cost-based.[22] Simultaneously, the Commission authorized the interim subscriber fee of $6.75, which is the established monthly charge for terminal devices receiving Level 1 Service.[23] The Commission adopted this interim charge because of asserted similarities between NASDAQ Level 1 and NQDS: (1) both services are derived from quotation information collected from NASDAQ market makers, (2) the collected information is subject to validation processing; and (3) the processed data is broadcast to vendors for distribution to their subscribers.[24]

The April Order also held that an acceptable subscriber charge could recover the costs associated with collecting, validating, and preparing quotations for shipment to an NQDS vendor. To formulate an acceptable NQDS charge, the NASD was required to analyze the NASDAQ system functions, isolate those functional costs incurred to support the NQDS, and calculate the subscriber charge by dividing those costs among the universe of terminals receiving the NQDS. In evaluating that methodology relative to the parameters of the April Order the Commission did "not requir[e] the NASD to prepare an economically perfect allocation of relevant costs, but only a reasonable allocation based on the best available information.[25]

In reviewing the fairness and reasonableness of the proposal, the Commission finds it significant that the proposed fee of $50.00 is the result of negotiations among the concerned parties after protracted proceedings. Based on the Commission's review of the NASD's financial submissions, the Commission finds that by expanding the categories of information provided to vendors and reducing the charge to $50.00, the NASD has proposed a fee that reasonably reflects the costs attributable to collecting, validating and preparing the information for transmission to vendors.

IV. Conclusion

The Commission believes that the $50.00 charge submitted by the NASD, as a term of access to NQDS information, satisfies the statutory standards outlined above, as well as the terms of the April Order. The Commission, therefore, has concluded that it is appropriate to approve the NQDS fee of $50.00.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[26]

Dated: October 15, 1990.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 90-24871 Filed 10-22-90; 8:45 am]

BILLING CODE 8010-01-M

---

[17] 15 U.S.C. 78k-1 (1982).

[18] 15 U.S.C. 78o-3 (1982).

[19] Section 11A(c)(1)(D).

[20] Section 11A(c)(1)(C).

[21] Section 11A(c)(1)(D).

[22] The NASD also charges $150 for subscription to NASDAQ Level 2 Service. Like NQDS subscribers, NASDAQ Level 2 subscribers can obtain the prevailing quotes displayed by all market makers in any NASDAQ security.

Originally, the NASD maintained that the monthly subscriber fee charged for Level 2 should apply to NQDS in that both services were built upon the same elements of information. The Commission specifically rejected the value-of-service approach to pricing because it would have resulted in NQDS subscribers paying for processing functions that were not integral to the Service.

[23] Terminal devices authorized for NASDAQ Level 1 Service can access the inside market (*i.e.*, the best bid and offer) for any NASDAQ security during the trading day. This service is marked exclusively through vendors that take the NASD's Level 1 data feed, represent the information, and distribute it through private communications networks to their subscribers. Although the NQDS is distributed in the same manner, the NQDS feed provides more information.

[24] The Commission's intent is clearly indicated in the following excerpt from the April Order:

To ensure that such a processor's services are made available on reasonable and nondiscriminatory terms, the Commission believes that " " " where an exclusive processor supplies information to other vendors and competes with those vendors in providing information and terminal devices, the exclusive processor's fees should be based strictly on the expenses that it incurs in providing information to vendors.

April Order, *supra* note 14, at 17853.

[Release No. 34-28540; File No. SR-NYSE-90-44]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the New York Stock Exchange, Inc. Relating to Amendments to Exchange Rule 103A—Specialist Stock Reallocation

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on September 25, 1990, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to Exchange Rule 103A which will add performance standards relating to the Exchange's Specialist Performance Evaluation Questionnaire ("SPEQ").[1]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of

---

[1] The SPEQ, which was last revised in February, 1990 (*see* note 4, *infra*), is a quarterly survey on specialist performance completed by eligible floor brokers (*i.e.*, any floor broker with at least one year of experience). The SPEQ requires floor brokers to rate, and provide written comments on, the performance of specialist units with whom they deal frequently.

and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

III. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

Exchange Rule 103A specifies performance standards for specialists and provides for the initiation of a formal "Performance Improvement Action" in any case where a specialist unit does not meet a performance standard specified in the Rule.[2] NYSE Rule 103A historically has contained performance standards applicable to the SPEQ for both a specialist unit's overall rating result and its results on the different functional categories under which specific questions are grouped.[3]

Effective with the first quarter 1990, the Exchange implemented the new, current SPEQ process which was approved by the Commission on February 5, 1990.[4] The former SPEQ produced raw scores, whereas the scoring methodology on the new SPEQ, as described below, gives specialists their overall rank among all specialist units, and their range of ranks which shows their comparability to other units. Accordingly, the performance standards relating to the previous SPEQ that had been incorporated into NYSE Rule 103A could not be applied to the new SPEQ because the scoring methodology had been changed. The Exchange, therefore, received Commission approval to eliminate the standards applicable to the former SPEQ from NYSE Rule 103A with the understanding that the Exchange would adopt and file with the Commission, as a proposed rule change, minimum relative performance standards so that specialists who are regularly among the lowest ranked units on a relative basis would be subject to performance improvement actions.[5] Pursuant to this understanding, the revised standards were to be filed with the Commission after the new SPEQ had been administered for two quarters. The proposal being considered herein sets forth these revised standards.

Scoring Methodology

The scoring methodology for the new SPEQ produces two types of results. Specialist units are informed as to how they rank on an overall basis, and in each of the five functions (Dealer, Service, Competitiveness, Communication, and Administrative), among all specialist units. Currently, there are 46 specialist units on the Exchange. A unit might, for example, receive a rank of 20 on an overall basis, and a rank of 22 on a particular function, meaning that it ranked 20 out of 46 units overall, and 22 out of 46 on that function.

Specialist units also receive a "range of ranks" on an overall basis and for each function. This scoring methodology allows a unit to determine whether its scores are statistically significantly different from the scores received by other specialist units. For example, a unit might receive an overall rank of 20, with a range of ranks from 17 to 25. This means that the unit ranked 20th out of 46 units, but its scores were roughly comparable to a unit ranked as high as 17, and as low as 25.

Proposed Performance Standards

The Exchange proposes that a unit be subject to the initiation of a Performance Improvement Action where its overall rank placed it in the bottom 10% of all units, and its range of ranks placed it in the bottom 15% of all units, for any quarter. For example, a unit ranked 43 out of 46, with a range of ranks from 40 to 46, would have been placed in the bottom 10% in overall ranking and its range of ranks would place it in the bottom 15%, as this range indicates that the unit is not statistically significantly different from a unit rated no higher than 40 (which is the bottom 15%). Thus, a unit receiving such results would be subject to a Performance Improvement Action.

Regarding scores for particular functions, a unit would be subject to a Performance Improvement Action under NYSE Rule 103A if *in any quarter* the unit received an overall rank in the bottom 10%, and a range of ranks in the bottom 15%, *for two or more functions.* A unit would also be subject to a Performance Improvement Action if it received an overall rank in the bottom 10%, and a range of ranks in the bottom 15%, for the *same function* in *two consecutive quarters.*

Two quarters of experience with the new SPEQ indicates that under the proposed standards no unit would have been subject to a Performance Improvement Action based on its overall score in the first two quarters of 1990. One unit did, however, fall into the bottom 10% in its rank and the bottom 15% in its range of ranks in two functions in the first quarter. Under the new standards, therefore, the unit would have been subject to a Performance Improvement Action. Additionally, in the second quarter, two units fell into the bottom 10% in their ranks and the bottom 15% in their range of ranks for one function. If these units repeated this performance for the same function in the following quarter, they also would be subject to a Performance Improvement Action.

In addition to the proposed new performance standards, the Exchange's Market Performance Committee will continue to have the authority to engage in counseling sessions with units when appropriate. This Committee also will continue to impose allocation freezes (*i.e.*, periods during which a unit is not permitted to apply to be a specialist for a newly listed security) where appropriate to improve performance even if no Performance Improvement Action is mandated by the standards of NYSE Rule 103A.

(2) Statutory Basis

The proposed rule change is consistent with section 6(b)(5) under the Act which requires that an exchange have rules that are designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and in general, to protect investors and the public interest. The proposed amendments to Rule 103A are consistent with these objectives in that they facilitate high quality specialist performance through the Exchange's performance improvement process.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will not impose any burden on competition not

---

[2] Under NYSE Rule 103A, a specialist's performance is measured by a combination of SPEQ scores and objective standards of performance (*e.g.*, timeliness of regular openings; promptness in seeking floor official approval of non-regulatory delayed openings; and responses to administrative messages).

[3] Currently, the SPEQ is comprised of 21 questions which are grouped under the following five functional categories: the Dealer Function, the Communications Function, the Administrative Function, the Service Function and the Competitiveness Function. The Dealer, Service, and Competitive Function categories are each accorded a percentage weight of 30% on the SPEQ, while the Communications and Administrative Function sections have a percentage weight of 5% each.

[4] *See* Securities Exchange Act Release No. 27675 (February 5, 1990), 55 FR 4922 (order approving File No. SR–NYSE–89–32).

[5] *See* Securities Exchange Act Release No. 28215 (July 17, 1990), 55 FR 30080 (notice of filing and order granting accelerated temporary approval to File No. SR–NYSE–90–24).

necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Act

Within 35 days of the date of publication of this notice in the Federal Register or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC, 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to File No. SR–NYSE–90–44 and should be submitted by November 13, 1990.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 16, 1990.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-28541; File No. SR-NYSE-90-47]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by the New York Stock Exchange, Inc. Relating to Fees for Fingerprint Processing

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 1, 1990, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NYSE, pursuant to Rule 19b-4 of the Act, submitted a proposed rule change to amend its plan for fingerprinting pursuant to Rule 17f-2(c) under the Act. The Exchange proposes to increase its fingerprint processing fee from $21.50 to $24.50 per fingerprint card processed.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Pursuant to a plan filed with the Commission under SEC Rule 17f-2(c), the Exchange acts as a processor of fingerprints for its members and others and channels fingerprint cards and attendant payments to the Federal Bureau of Investigation ("FBI"). The purpose of the proposed rule change is to pass along the FBI's increase in the user fee for processing fingerprint cards.

Effective October 1, 1990, the FBI increased its fee for processing fingerprint cards from $20.00 to $23.00 per card. The FBI is increasing its fee due to its increased costs for fingerprint processing, including rising personnel costs. Accordingly, the Exchange proposes to amend its plan as follows: $24.50 per fingerprint card processed, consisting of $23.00 per fingerprint card for FBI processing and $1.50 per fingerprint card for Exchange processing. The NYSE's current $1.50 charge per fingerprint card for Exchange processing, therefore, will remain constant.

The statutory basis for the proposed rule change is section 6(b)(4) of the Act in that it provides for the equitable allocation of reasonable dues, fees and other charges among NYSE members and issuers and other persons using its facilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee or other charge imposed by the Exchange, it has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written

communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to File No. SR-NYSE-90-47 and should be submitted by November 13, 1990.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 16, 1990.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Incorporated

October 15, 1990.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and rule 12f-1 thereunder for unlisted trading privileges in the following securities:

Compania de Telefonos de Chile S.A.
American Depositary Shares (File No. 7-6282)

ACM Managed Multi-Market Trust, Inc.
Common Stock, $0.01 Par Value (File No. 7-6283)

Allstate Municipal Income Opportunities Trust II
Shares of Beneficial Interest, $0.01 Par Value (File No. 7-6284)

American Government Income Fund, Inc.
Common Stock, $0.01 Par Value (File No. 7-6285)

American Government Income Portfolio, Inc.
Common Stock, $0.01 Par Value (File No. 7-6286)

American Government Term Trust, Inc.
Common Stock, $0.01 Par Value (File No. 7-6287)

Colonial Intermediate High Income Fund
Shares of Beneficial Interest, No Par Value (File No. 7-6288)

Colonial InterMarket Income Trust I
Shares of Beneficial Interest, No Par Value (File No. 7-6289)

High Yield Plus Fund, Inc.
Common Stock, $0.01 Par Value (File No. 7-6290)

High Yield Income Fund, Inc.
Common Stock, $0.01 Par Value (File No. 7-6291)

Nuveen California Municipal Income Fund, Inc.
Common Stock, $0.01 Par Value (File No. 7-6292)

Oppenheimer Multi-Government Trust
Shares of Beneficial Interest, $0.01 Par Value (File No. 7-6293)

Putnam High Income Convertible and Bond Fund
Shares of Beneficial Interest, No Par Value (File No. 7-6294)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before November 5, 1990, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 35-25167]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

October 12, 1990.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by November 5, 1990 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Entergy Corporation, et al. (70-7786)

Entergy Corporation ("Entergy"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, Arkansas Power & Light Company ("AP&L"), 425 West Capitol, 40th Floor, Little Rock, Arkansas 72201, Louisiana Power & Light Company ("LP&L"), 317 Baronne Street, New Orleans, Louisiana 70112, Mississippi Power & Light Company ("MP&L"), 308 East Pearl Street, Jackson, Mississippi 39201, New Orleans Public Service Inc. ("NOPSI"), 317 Baronne Street, New Orleans, Louisiana 70112 (collectively, "Operating Companies"), System Fuels, Inc. ("SFI"), 639 Loyola Avenue, New Orleans, Louisiana 70113, System Energy Resources, Inc. ("SERI"), 1340 Echelon Parkway, Jackson, Mississippi 39213, Entergy Operations, Inc. ("EOI"), 1340 Echelon Parkway, Jackson, Mississippi 39213 and Entergy Services, Inc. ("Services"), 639 Loyola Avenue, New Orleans, Louisiana 70113 (collectively, "Participating Companies"), have filed an application-declaration under sections 6(a), 7, 9(a), 10, and 12(b) of the Act and rules 40, 43 and 50(a)(5) thereunder.

Each of the Participating Companies propose, through November 30, 1992, to lend money to the Entergy system money pool ("Money Pool"). The Operating Companies, SERI, SFI, EOI, and Services further propose, through November 30, 1992, to borrow from the Money Pool and in the cases of the Operating Companies and SERI, to issue unsecured promissory notes to banks ("Notes") and commercial paper to commercial paper dealers ("Commercial Paper").

Total borrowings through the Money Pool by Services, EOI and SFI will not

exceed, at any one time outstanding, amounts equal to the aggregate unused portions of lines of credit then available to these companies and/or other borrowing arrangements approved by the Commission. Total borrowings by the Operating Companies and SERI through the Money Pool, the issuance and sale of the Notes and Commercial Paper will not exceed: (1) $240 million for AP&L; (2) $260 million for LP&L; (3) $110 million for MP&L; (4) $35 million for NOPSI and (5) $290 million for SERI, in any combination thereof.

The Notes will mature in less than one year from the date of issuance, at an effective interest rate cost of approximately 11.1%, based on a base lending rate of 10%. The Commercial Paper will be in the form of unsecured promissory notes having varying maturities of not in excess of 270 days. The Operating Companies and SERI have requested an exception from the competitive bidding requirements of Rule 50 pursuant to subsection (a)(5) so that they may be authorized to carry out negotiations for the terms of the placement of the commercial paper. They may do so.

The proceeds from the proposed borrowings will be used to provide interim financing for construction expenditures, to fund long-term debt maturities and sinking fund requirements, and in the case of AP&L and MP&L, to finance deferred costs associated with their respective retail rate phase-in programs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-17969; 811-4346]

Bench Portfolios Fund; Application

October 16, 1990.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for Deregistration under the Investment Company Act of 1940 ("1940 Act").

APPLICANT: Bench Portfolios Fund.

RELEVANT 1940 ACT SECTIONS: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be investment company.

FILING DATE: The application was filed on July 30, 1990, and amended on September 28, 1990, and October 12, 1990.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on Novermber 13, 1990, and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 222 Bridge Plaza South, Fort Lee, New Jersey 07024.

FOR FURTHER INFORMATION CONTACT: Barbara Chretien-Dar, Staff Attorney, at (202) 272-3022, or Jeremy N. Rubenstein, Branch Chief, at (202) 272-3023 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch or from the SEC's commercial copier at (800) 231-3282 (in Maryland (301) 738-1400).

Applicant's Representations

1. Applicant, an open-end investment company organized as a Massachusetts trust, registered under the 1940 Act on July 13, 1965. On the same date, it filed a registration statement with respect to an indefinite number of shares under the Securities Act of 1933, which registration statement was declared effective on January 31, 1966. Applicant offered two portfolios: Total Return Equity Portfolio and Blue Chip Portfolio.

2. On September 19, 1989, pursuant to offices of settlement from applicant's investment adviser, Bench Group, Inc., and from the investment adviser's president, Nachman Bench, the SEC issued an order imposing remedial sanctions on the investment adviser and Mr. Bench for violations of various provisions of the 1940 Act and the Investment Advisers Act of 1940 (the "Advisers Act").[1]

3. The order naming Mr. Bench as respondent found that he violated section 17(a) of the 1940 Act; that he aided and abetted violations of sections 15(a), 17(f), 17(g), 17(j), 22(c), 22(e), 31(a), and 32(a) and Rules 17f-4, 17g-1, 17j-1, 22c-1 and 31a-1 under the 1940 Act; that he violated section 204 and 206(3) of the Advisers Act and rules 204-1, 204-2, 204-3, and 206(4)-1 thereunder. The order bars him from serving or acting as an employee, officer, director, member of an advisory board, investment adviser of, depositor of, or principal underwriter for, a registered investment company or affiliated person of such investment adviser, depositor, or principal underwriter and compels him to refrain, for a period of six months, from soliciting or accepting new advisory clients.

4. The order naming the investment adviser as respondent found that the adviser violated section 15(a) and 17(a) of the 1940 Act and sections 204 and 206(3) of the Advisers Act and rules 204-1, 204-2, 204-3, and 206(4)-1 thereunder. The order permanently prohibits the investment adviser from, among other things, serving or acting as an investment adviser or depositor of, or principal underwriter for, a registered investment company or affiliated person of such investment adviser, depositor, or principal underwriter, and compels the adviser to refrain, for a period of six months, from soliciting or accepting new advisory clients.

5. On or about October 19, 1987, applicant began experiencing mass redemptions by its shareholders. Redeeming shareholders received net asset value for their shares. At January 1, 1989, the Blue Chip Portfolio had 484,192 shares outstanding with a per share net asset value of $7.78, and the Total Return Equity Portfolio had 6,174 shares outstanding with a per share net asset value of $0.30. By April 3, 1989, the sole shareholder remaining was applicant's investment adviser. Portfolio securities were sold at market value to meet redemption requests and commissions were paid by applicant at the rate of $0.10 per share.

6. On February 3, 1989, applicant's board of trustees authorized and recommended for shareholder approval applicant's liquidation. The liquidation of applicant was approved by the sole shareholder on June 30, 1989. Legal and accounting fees incurred in connection with the liquidation were paid by the applicant's investment adviser.

7. Applicant retains no assets and has no further liabilities. Applicant has no knowledge of any other litigation or administrative proceedings to which it is

[1] *See* Administrative Proceeding File No. 3-7280, Investment Advisers Act Rel. No. 1202, Investment Company Act Rel. No. 17141 (September 19, 1989).

a party. Applicant has no remaining shareholders other than the investment adviser.

8. Applicant is not now engaged, nor does it propose to engage, in any investment comany activities other than those necessary for the winding-up of its affairs. Applicant intends to file articles of dissolution under Massachusetts law.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Investment Company Act Rel. No. 17803; International Series Rel. No. 178; 812-7601]

Scottish Widows International Fund; Application

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("Act").

APPLICANT: Scottish Widows International Fund.

RELEVANT ACT SECTIONS: Exemption requested under section 6(c) from the provisions of section 12(d)(3) and rule 12d3-1.

SUMMARY OF APPLICATION: Applicant seeks a conditional order permitting it to invest in equity and convertible debt securities of foreign issuers that, in each of their most recent fiscal years, derived more than 15% of their gross revenues from their activities as a broker, dealer, underwriter or investment adviser ("foreign securities companies") in accordance with the conditions of the proposed amendments to Rule 12d3-1.

FILING DATE: The application was filed on October 5, 1990.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on November 13, 1990, and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, c/o Robert L. Thomas, President, 60 State Street, Boston, MA 02109.

FOR FURTHER INFORMATION CONTACT: Jeremy N. Rubenstein, Branch Chief, at (202) 272-3023 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch or by contacting the SEC's commercial copier at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant is registered under the Act as an open-end, diversified management investment company. Applicant is managed by Boston Security Counsellors, Inc., a Massachusetts corporation. Scottish Widows Investment Management Limited, a Scottish corporation, serves as applicant's sub-adviser.

2. Applicant seeks to diversify its portfolio further by being permitted to invest in foreign issuers that, in their most recent fiscal year, derived more than 15% of their gross revenues from their activities as a broker, dealer, underwriter, or investment adviser.

3. Applicant seeks relief from section 12(d)(3) of the Act and Rule 12d3-1 thereunder to invest in securities of foreign securities companies to the extend allowed in the proposed amendments to rule 12d3-1. *See* Investment Company Act Release No. 17099 (Aug. 3, 1990), 54 FR 33027 (Aug. 11, 1989). Proposed amended rule 12d3-1 would, among other things, facilitate the acquisition by applicant of equity securities issued by foreign securities companies. Applicant's proposed acquisitions of securities issued by foreign securities companies will satisfy each of the requirements of proposed amended rule 12d3-1.

Applicant's Legal Conclusions

1. Section 12(d)(3) of the Act prohibits an investment company from acquiring any security issued by any person who is a broker, dealer, underwriter, or investment adviser. Rule 12d3-1 under the Act provides an exemption from section 12(d)(3) for investment companies acquiring securities of an issuer that derived more than 15% of its gross revenues in its most recent fiscal year from securities-related activities, provided the acquisitions satisfy certain conditions set forth in the rule. Subparagraph (b)(4) of rule 12d3-1 provides that "any equity security of the issuer * * * (must be) a 'margin security' as defined in Regulation T promulgated by the Board of Governors of the Federal Reserve System." Since a "margin security" generally must be one which is traded in the United States markets, securities issued by many foreign securities firms would not meet this test. Accordingly, applicant seeks an exemption from the "margin security" requirements of rule 12d3-1.

2. Proposed amended rule 12d3-1 provides that the "margin security" requirement would be excused if the acquiring company purchases the equity securities of foreign securities companies that meet criteria comparable to those applicable to equity securities of United States securities-related businesses. The criteria as set forth in the proposed amendments, "are based particularly on the policies that under lie the requirements for inclusion on the list of over-the-counter margin stocks." Investment Company Act Release No. 17099 (Aug. 3, 1989) 54 FR 33027 (Aug. 11, 1989).

Applicant's Condition

Applicant agrees to the following condition in connection with the relief requested:

Applicant will comply with the provisions of the proposed amendments to rule 12d3-1 (Investment Company Act Release No. 17099 (Aug. 3, 1989); 54 FR 33027 (Aug. 11, 1989)), and as such amendments may be reproposed, adopted, or amended.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Urban Mass Transportation Administration

Environmental Impact Statement on the Extension of Transit Service to the Fort Point Channel/South Boston Piers Area in Boston, MA

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Notice of intent to prepare an Environmental Impact Statement.

SUMMARY: The Urban Mass Transportation Administration (UMTA) and the Massachusetts Bay Transportation Authority (MBTA) hereby give notice that they intend to prepare an Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act (NEPA) on the proposed extension of transit service in Boston, Massachusetts from midtown to the Fort Point Channel/South Boston Piers area. The largely underutilized 300-acre Piers area has been identified as a priority corridor for regional transportation improvements due to significant new development projected in the near term. Proposed transit to serve trips generated by that development would operate between the existing MBTA rapid transit system and the Boston Marine Industrial Park (BMIP). A Draft Environmental Impact Report (DEIR) for this project satisfying the Massachusetts Environmental Protection Act (MEPA) was released in September, 1990. Based on DEIR analyses, it is proposed that the EIS evaluate three build alternatives for the transit improvements in addition to the No Action alternative.

DATES: Written comments on the scope of alternatives and impacts to be considered should be sent to the MBTA by November 23, 1990. See **ADDRESSES** below.

FOR FURTHER INFORMATION CONTACT: Ms. Mary Beth Mello, Senior Project Manager, UMTA Region 1, 55 Broadway, Cambridge, MA 02142. Telephone: (617) 494-2055.

ADDRESSES: Written comments should be sent to: Mr. Joseph Aiello, Assistant Director of Construction, MBTA, One South Station, room 2300, Boston, MA 02110. Telephone: (617) 722-6122.

SUPPLEMENTARY INFORMATION:

Scoping:

The Commonwealth of Massachusetts Executive Office of Environmental Affairs (EOEA) held two non-Federal scoping meetings for the Fort Point Channel/South Boston Piers transit project on December 10, 1987 at 1:00 p.m. and 7:00 p.m. at the Federal Reserve Bank in downtown Boston. Notice of the meetings was given in the November 12, 1987 *Environmental Monitor*, in the *Boston Globe* and *Boston Herald*, and in five regional newspapers serving the project area: *Sampan*, the *South Boston Tribune*, *The Boston Ledger*, *The Tab*, and the *South End News*. In addition, invitations to the meetings were mailed to 160 persons including private citizens, environmental, neighborhood, and conservation groups, and federal, state, and local agencies. The meetings were scheduled to be convenient for interested parties and were attended by approximately 60 persons, including representatives from over a dozen local, state, and federal agencies and several community groups. Comments on the proposed Scope of Work, alternatives to be assessed, impacts to be analyzed, and evaluation criteria to be used in decision making were requested at these meetings.

Five alternatives identified during the scoping process were analyzed for the State DEIR in terms of their effectiveness, environmental impacts, financial feasibility, and cost-effectiveness. These alternatives were No Action (incremental increases in current bus routes), Bus/TSM (high frequency surface shuttle bus service operating from South Station, Park Square, and North Station to the Piers area, and utilization of Transportation System Management (TSM) actions), At-Grade Light Rail (light rail vehicles operating in a surface transit reservation between North Station and BMIP), Underground Transitway (either people movers, light rail vehicles, or buses operating in tunnel between Boylston Street Station and the World Trade Center), and Red Line Loop (diversion of the existing Red Line heavy rail system). Based on DEIR analysis, the MBTA selected the Underground Transitway as the most advantageous alternative. Copies of the State DEIR (EOEA Number 0626) are available at the State Transportation Library, 10 Park Plaza, Boston, MA 02116, and at the Executive Office of Environmental Affairs, MEPA Unit, 100 Cambridge Street, Boston, MA 02202.

The Federal EIS will build upon work performed during the State EIR process by further analyzing variations of the Transitway and TSM alternatives. Given the substantial and ongoing public involvement process conducted for this project, no additional public scoping meeting is planned. A meeting to gain input from key Federal agencies will be held on November 8, 1990. For further information please contact Mr. Joseph Aiello at (617) 722-6122.

The MBTA and UMTA invite written comments for a period of 30 days after the publication of this notice (See **DATES** and **ADDRESSES** above). Comments should focus on the appropriateness of proposed alternatives, rather than on individual preference for a particular alternative; endorsement of an alternative should be communicated after the Draft EIS has been completed. Comments on specific social, economic, or environmental impacts to be evaluated and on evaluation criteria are also invited.

If you wish to be placed on the mailing list to receive further information as the project continues, contact Joseph Aiello at the MBTA (see **ADDRESSES** above).

Description of Study Area and Project Need: the study area consists of approximately 300 acres of largely underutilized land separated from down-town Boston by a narrow water channel. Approximately 9 million square feet of developed land, most of which is used for maritime and industrial purposes, is clustered primarily in the eastern and westernmost thirds of the area. The area is roughly defined by Fort Point Channel on the west, Boston Harbor on the north, the Reserved Channel on the east, and Summer Street on the south. Currently, only three local bus routes serve development in the Piers area.

City and State officials expect that more than 13 million square feet of new development as well as the upgrading and conversion of existing development to more intense use will occur in the area in the next fifteen years. This development would generate almost 20,000 peak hour peak direction trips per day, compared to only 7,000 trips today. Based on dramatic development projections and the shift from lesser traffic-generating land uses to others that generate much higher traffic, the transportation agencies for the greater Boston region have identified the Piers area as the priority corridor for regional transportation improvements. Transit is needed to serve projected trips, thereby furthering the environmental, social, and economic objectives of the area. These objectives include maintenance of air quality standards, improved accessibility between downtown Boston

and the Piers area, and support for planned development throughout the study area.

Alternatives: Alternatives proposed for evaluation in the federal EIS represent refinements of those evaluated during the State DEIR process. Based on technical and community processes conducted as part of the state DEIR (and a preceding Feasibility Study), three build alternatives will be analyzed further. These build alternatives in addition to the No Build alternative are described below:

(1) *No build.* Increases in conventional bus service that do not require investment in trasportation fixed facilities.

(2) *Surface Bus-Transportation System Management (TSM).* Low-to-medium cost improvements to the facilities and operations of the MBTA including high frequency shuttle bus service from key downtown transit stations and TSM actions such as proposed HOV lanes.

(3) *Underground Transitway Using Trackless Trolley Technology:* Trackless trolleys would be operated in tunnel between Boylston Street Station and the World Trade Center, portalling at D Street to provide surface operation to the Boston Marine Industrial Park. The proposed underground alignment would follow Avery Street/Hayward Place/Essex Street to South Station, turn north following Atlantic Avenue above the depressed northbound Central Artery, cross under the Fort Point Channel south of the New Northern Avenue bridge, and follow rights-of-way along New Northern Avenue and New Congress Street to the World Trade Center. Surface operation throughout the service area would be provided from a proposed portal at D Street. This alternative includes five proposed stations: (1) At existing Boylston Street Station providing transfers to the Green Line and integration with Washington Street Replacement Transit Service: (2) at Chinatown providing transfer to the Orange Line; (3) at South Station providing transfer to the Red Line and connection to both commuter rail and an air rights bus terminal; (4) at Fan Pier/Pier 4; and at a terminal station located at the World Trade Center. In addition, a shorter section of the alignment between South Station and the Piers area will be evaluated.

(4) *Underground Transitway Using Dual Mode Bus Technology:* This alternative would follow the same alignment described above but would operate dual mode (electric/diesel) buses. These buses would operate in electric mode in tunnel, switching to diesel mode to operate on surface streets without catenary. As above, a shorter alignment between South Station and the Piers area will also be evaluated.

Probable Effects: UMTA and the MBTA will evaluate all significant environmental, social, and economic impacts of the four alternatives analyzed in the EIS. Impacts include changes in the natural environment (air and water quality, rare and endangered species), changes in the social environment (land use and neighborhoods, noice and vibration, aesthetics, parklands, historic/archaeological resources) and changes in transit service and patronage; associated changes in highway congestion and traffic and parking near stations will also be evaluated. Project capital and operating costs will be estimated, cost-effectiveness calculated, and financial implications analyzed. All impacts will be evaluated for each alternative during three periods: (1) The construction perod; (2) the period during which the initial segment is operated; and (3) the long-term period of full-build operation. Mitigation measures for any adverse impacts identified will be explored.

UMTA Procedures: In accordance with the Urban Mass Transportation Act and UMTA policy, the Draft EIS will be prepared in conjunction with an Alternatives Analysis, and the Final EIS in conjunction with Preliminary Engineering. After its publication, the Draft EIS will be available for public and agency review and comment, and a public hearing will be held. On the basis of the draft EIS and the comments received, the MBTA will select a locally preferred alternative and seek approval from UMTA to continue with Preliminary Engineering and preparation of the Final EIS.

Issued on: October 17, 1990.

Richard H. Doyle,

Acting Director, Eastern Area.

BILLING CODE 4910-57-M

UNITED STATES INSTITUTE OF PEACE

Grant Applications; Procedures and Deadlines

AGENCY: United States Institute of Peace.

ACTION: Notice, call for applications.

SUMMARY: The United States Institute of Peace announces the 1991 cycles of its annual Solicited Grants competition for the Grants Program. This year's topics are: (1) Curriculum Development and Teacher Training in International Peace and Conflict Management; and (2) Peace, Conflict and Governance in Latin America. The Institute encourages applications from nonprofit organizations, official public institutions, and individuals. Detailed information and application materials are available upon request.

DATES: Applications must be postmarked by January 1, 1991 in order to be considered in the current cycle. Announcements of awards will be made on or about May 1, 1991.

ADDRESSES: United States Institute of Peace: 1550 M Street, NW.—suite 700; Washington, DC 20005–1708.

FOR FURTHER INFORMATION CONTACT: Solicited Grant Projects; Hrach Gregorian, telephone (202) 457–1700.

Dated: October 18, 1990.

Bernice Carney,

Director of Administration.

Sunshine Act Meetings

Federal Register
Vol. 55, No. 205
Tuesday, October 23, 1990

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: Wednesday, October 24, 1990, 10:30 a.m., Commission Meeting.

LOCATION: Room 556, Westwood Towers, 5401 Westbard Avenue, Bethesda, Maryland.

STATUS: OPEN TO THE PUBLIC.

MATTERS TO BE CONSIDERED:

1. Final Rules to Require Child-Resistant Packaging for Glue Removers Containing Acetonitrile and Permanent Wave Neutralizers Containing Potassium Bromate or Sodium Bromate

The staff will brief the Commission on the final rules to require child-resistant packaging for glue removers containing acetonitrile and permanent wave neutralizers containing potassium bromate or sodium bromate.

2. Safety Standard for Waterbeds: Petition CP 89-4

The staff will brief the Commission on petition CP 89-4 from the Consumer Federation of America, the New York State Attorney General and the American Academy of Pediatrics which requests a mandatory labeling standard for adult-size waterbeds.

FOR A RECORDED MESSAGE CONTAINING THE LATEST AGENDA INFORMATION, CALL: 301-492-5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207—301-492-6800.

Dated: October 18, 1990.

Sheldon D. Butts,

Deputy Secretary.

[FR Doc. 90-25143 Filed 10-19-90; 2:17 pm]

BILLING CODE 6355-01-M

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

October 18, 1990.

TIME AND DATE: 10:00 a.m., Thursday, October 25, 1990.

PLACE: Room 600, 1730 K Street, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. *Medusa Cement Company*, Docket No. SE 88-102-M. (Issues include whether the judge erred in concluding that Medusa Cement violated 30 CFR § 56.14211(d).)

Any personn intending to attend this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR § 2706.150(a)(3) and § 2706.160(d).

CONTACT PERSON FOR MORE INFO: Jean Ellen (202) 653-5629/(202) 708-9300 for TDD Relay 1-800-877-8339 (Toll Free).

Jean H. Ellen,

Agenda Clerk.

BILLING CODE 6735-01-M

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 11:00 a.m., Monday, October 29, 1990.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed purchase of computers within the Federal Reserve System.
2. Federal Reserve Bank and Branch director appointments.
3. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
4. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: October 19, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

Part II

Department of Defense
General Services Administration
National Aeronautics and Space Administration

48 CFR Part 44

Federal Acquisition Regulation (FAR); Contractor's Purchasing Systems Reviews (CPSR's); Proposed Rule

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 44

Federal Acquisition Regulation (FAR); Contractor's Purchasing Systems Reviews (CPSR's)

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are proposing changes to the FAR concerning contractor's purchasing systems reviews (CPSR's). This revision continues the current trend to streamline the acquisition process, reduce contractor oversight, and to eliminate or reduce regulatory burdens on both the contracting officers and contractors.

DATES: Comments should be submitted to the FAR Secretariat at the address shown below on or before December 24, 1990, to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets, NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 90–53 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein, Office of Federal Acquisition Policy, Room 4041, GS Building, Washington, DC 20405, (202) 501–3775. Please cite FAR Case 90–53.

SUPPLEMENTARY INFORMATION:

A. Background

The revision to FAR 44.302(b) extends the reasons a special review may be conducted to include a major change or deficiency in the contractor's policy, procedures, or key personnel. FAR 44.304(a) is revised to delete the requirement for Administrative Contracting Officers (ACO's) to make an annual determination on whether to continue purchasing system approval based on formal surveillance, or to request a CPSR or special review as a basis for continuing or withdrawing approval. This proposed revision in no way reduces the Government's responsibility or ability to maintain a sufficient level of surveillance in evaluating the contractor's purchasing system. The proposed revision to 44.304(b) substitutes the words "should include" for the words "shall include" when referring to what needs to be included in an ACO's surveillance plan. This change gives contracting officers more latitude and discretion in the development of their plan, as well as in the approach and scope of their surveillance plans. In addition the last sentence of 44.304(b) has been deleted. It is considered to be unnecessary.

B. Regulatory Flexibility Act

The proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, et seq. An Initial Regulatory Flexibility Analysis has therefore not been performed. However, comments from small entities concerning the affected FAR section will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite section 90–610 (FAR Case 90–53) in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Part 44

Government procurement.

Dated: October 15, 1990.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, it is proposed that 48 CFR Part 44 be amended as set forth below:

PART 44—SUBCONTRACTING POLICIES AND PROCEDURES

1. The authority citation for 48 CFR part 44 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2473(c).

2. Section 44.302 is amended by revising paragraph (b) to read as follows:

44.302 Requirements.

* * * * * *

(b) A CPSR shall be conducted by the cognizant contract administration agency (see subpart 42.3) at least every 3 years for contractors that continue to meet the requirements of paragraph (a) of this section. This review may be accomplished at one time or on a continuing basis. A more frequent review cycle may be established if warranted, and special reviews may be conducted when information reveals a deficiency or major change in the contractor's purchasing system, policy, procedures or key personnel.

3. Section 44.304 is amended by removing the second sentence in paragraph (a), and by revising paragraph (b) to read as follows:

44.304 Surveillance.

* * * * *

(b) Surveillance shall be accomplished in accordance with a plan developed by the ACO with the assistance of subcontracting, audit, pricing, technical, or other specialists as necessary. The plan should cover pertinent phases of a contractor's purchasing system (preaward, postaward, performance, and contract completion) and pertinent operations that affect the contractor's purchasing and subcontracting. The plan should also provide for reviewing the effectiveness of the contractor's corrective actions taken as a result of previous Government recommendations.

BILLING CODE 6820-34-M

federal register

Tuesday
October 23, 1990

Part III

Department of Labor

Employment Standards Administration, Wage and Hour Division

29 CFR Part 570

Occupations Particularly Hazardous for the Employment of Minors Between 16 and 18 Years of Age, or Detrimental to Their Health or Well-Being; Proposed Rule

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

29 CFR Part 570

Subpart E—Occupations Particularly Hazardous for the Employment of Minors Between 16 and 18 Years of Age, or Detrimental to Their Health or Well-Being

AGENCY: Wage and Hour Division, ESA, Labor.

ACTION: Proposed rule; request for comments.

SUMMARY: This document provides proposed changes to three existing Hazardous Occupations Orders (HOs), issued pursuant to section 3(l) of the Fair Labor Standards Act (hereafter, "FLSA" or "Act"), which prohibit the employment of minors under 18 years of age in occupations declared by the Secretary of Labor to be particularly hazardous for such minors, or detrimental to their health or well-being. The affected HOs are those related to the operation of a motor vehicle (HO 2), the use of power-driven meat processing equipment (HO 10), and the operation of paper-products machines (HO 12).

The proposed changes to the existing rules would: (1) Eliminate exemption procedures (essentially now dormant) contained in HO 2 which have allowed the employment of minors under 18 years of age as school bus drivers; (2) clarify that restaurants, fast food establishments, and other retail establishments are subject to HO 10 prohibiting minors under the age of 18 from using powerdriven meat processing equipment; (3) specifically provide that meat slicers are meat processing equipment within the meaning of the HO 10 prohibitions, and seek comments and data concerning injury rates and types associated with the use of meat slicers in food service establishments; and (4) amend HO 12 to expressly prohibit minors under the age of 18 from using power-driven paper machinery in the processing of waste paper.

DATES: Comments are due on or before November 23, 1990.

ADDRESSES: Submit written comments (preferably in triplicate) to Samuel D. Walker, Acting Administrator, Wage and Hour Division, ESA, U.S. Department of Labor, room S–3502, 200 Constitution Avenue NW., Washington, DC 20210.

Commenters who wish to receive notification of receipt of comments are requested to include a self-addressed, stamped post card.

FOR FURTHER INFORMATION CONTACT: Samuel D. Walker, Acting Administrator, Wage and Hour Division, U.S. Department of Labor, room S–3502, 200 Constitution Avenue NW., Washington, DC 20210, (202) 523–8305. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

I. Background

Sections 3(l) and 12 of the FLSA authorize the Department of Labor to regulate youth employment to ensure that it does not interfere with the schooling, health, or well-being of minors.

Section 3(l) of the FLSA provides a minimum age of 18 years for any nonagricultural occupations which the Secretary of Labor finds to be particularly hazardous for minors 16 and 17 years of age, or detrimental to their health and well-being. The current 17 non-agricultural HOs are contained in 29 CFR part 570, subpart E.

The proposed revisions to three of the HOs are clarifying modifications that incorporate Departmental regulatory and enforcement policy.

While the Department is proposing modifying changes to these three HOs, a thorough review of all the current HOs—with particular attention to the possible development of generic rather than machine-specific HOs—is continuing, so that the regulations can reflect contemporary rather than historical realities. Part of this process has been accomplished by the Child Labor Advisory Committee, which the Department established in August 1967 to provide advice and technical expertise in the development of possible proposals to change the existing child labor standards. The Committee consists of 21 members, representing employers, education, labor, child guidance professionals, civic groups, child advocacy groups, State officials, and safety groups.

II. Paperwork Reduction Act

The proposed rules contain no reporting or recordkeeping requirements subject to the Paperwork Reduction Act. The general FLSA information collection requirements have been approved by the Office of Management and Budget under the control number 1215–0017.

III. Summary of Rule

HO 2—Occupations of Motor Vehicle Driver and Outside Helper, 29 CFR 570.52

HO 2 contains the finding that employment as a motor vehicle driver or as an outside helper on a motor vehicle is particularly hazardous for minors under the age of 18. The proposed revision to HO 2 would eliminate an exception under which States can request that 16- and 17-year old youths be permitted to drive school buses. This is a modest change because the majority of States already prohibit minors from operating school buses, and, in recent years, the Department has been phasing-out the application of this exemption. Essentially, the proposal would bring the existing regulations into conformance with current practice.

The existing HO includes a provision which permits the Secretary to grant an exemption for 16- and 17-year-old youths to drive school buses on the basis of the Secretary's approval of an application filed by the Governor of the State in which the vehicle is registered.

When public employees first were brought under coverage of the FLSA by the 1966 Amendments, such employees also became subject to FLSA's child labor provisions and regulations. A number of States that, prior to 1966, had been using youths under 18 years of age to drive school buses appealed to the Secretary for permission to continue that practice. After completion of a study and a public hearing, it was determined at that time that school bus driving was not particularly hazardous for 16- and 17-year-old minors who were carefully selected, trained, and supervised.

In 1968, an amendment to HO 2 was adopted allowing State Governors to apply annually to the Secretary of Labor for authorization to employ 16- and 17-year-old youths to drive school buses in their States. Fourteen States initially applied for the exemption to continue their practice of employing minors under age 18 to drive school buses.

In reviewing requests of Governors to use minors under age 18 to drive school buses, the Secretary weighed their compliance with eleven criteria set forth in 29 CFR 570.52 concerning selection, training, and supervision of the minors employed.

By 1986, through actions of State Departments of Education or laws passed by State legislatures, only nine State Governors requested approval to use 16- and 17-year-old youths to drive school buses. In 1987, applications were received from six State Governors for approval to use minors under age 18 to drive school buses during the school year. In the last two years, however, only one State has requested approval, and the exemption only applies to one school district in that State.

Over the years, the concern of the Department of Labor has become heightened by an increasing number of school bus accidents involving 16- and 17-year-old drivers where school children have been killed or seriously injured.

In a 1982 report, entitled "The 16/17 Year Old School Bus Driver," the Office of Driver and Pedestrian Safety of the National Highway Traffic Safety Administration (NHTSA) concluded that 16- and 17-year-old school bus drivers were overrepresented in school bus accidents. The NHTSA study covered a ten-year period (1969–1979) and the twelve states that employed school bus drivers under age 18. The study found that on the average 16 and 17-year old drivers had more accidents per million miles than drivers aged 18 and over. (Sixteen and 17-year-olds accounted for .181 accidents per driver and 22.61 accidents per million miles. Drivers aged 18 and over averaged .093 accidents per driver and 11.60 accidents per million miles.)

In addition, the Fatal Accident Reporting System (FARS) data for 1979 indicated that 16- and 17-year-olds were involved in 8.9% of all fatal school bus accidents, even though they comprised only 2.7% of all school bus drivers in the nation that year.

Following a serious school bus accident in 1985 involving a 17-year-old driver, the National Transportation Safety Board (NTSB) studied the accident rates of 16 and 17-year-old school bus drivers for three school years (1982–83 through 1984–85) for the state in which the accident occurred. The study showed that accident rates for 16- and 17-year-old drivers were significantly higher than those for older school bus drivers. The accident rate per million miles for 16- and 17-year-old drivers was 12.7 for 1982–83, 14.0 for 1983–84, and 13.2 for 1984–85. The accident rate per million miles for 18-year-old and older drivers was 8.1, 10.0, and 9.2, respectively. The NTSB recommended that the three States with the highest accident rates involving 16 and 17-year-olds discontinue the practice of hiring 16- and 17-year-olds to drive school buses.

After a comprehensive study conducted by the Department, the matter was referred to the Advisory Committee for its review and recommendations.

At its meeting in March 1988, the Committee recommended that there be no exemption from HO 2 to allow school bus driving by 16- and 17-year-olds. The Committee reviewed the States' accident and injury data, the report and recommendations of the NTSB, and other data on the factors attributed to the causes of some of the more serious accidents.

The Committee's rationale was that minors who drive school buses are subject to the following hazards: (1) Minors have difficulty maintaining discipline on school buses due to peer pressure; (2) driving a school bus is a serious responsibility; and (3) 16- and 17-year-old drivers lack experience, maturity and have poorer judgment than adults.

The Department reviewed the same data utilized by the Committee and concluded that the occupation of motor vehicle operator is too hazardous for 16- and 17-year-old youths. In comparison to adult drivers, 16- and 17-year-old minors generally have more accidents per million miles and per driver.

Accordingly, the proposed rule would eliminate the procedures for States to obtain an exemption from HO 2 for school bus drivers.

HO 10—Occupations Involving Slaughtering, Meat Packing or Processing, or Rendering, 29 CFR 570.61

HO 10, among other things, prohibits the employment of 16- and 17-year-old minors in certain occupations in or about slaughtering and meat packing establishments and rendering plants, and wholesale, retail or service establishments, including the operation or feeding, setting up, adjusting, repairing, oiling, or cleaning of specific power-driven meat-processing machines.

HO 10 applied in its original form to occupations in the slaughtering and meat packing industries. When the Congress amended the FLSA in 1961 to cover certain retail and service enterprises, the Department amended HO 10 to include such firms. Since then, the Department has consistently applied this HO to restaurants and fast food establishments. Over the past few years, however, there have been several Administrative Law Judge decisions concerning the application of HO 10 to restaurants and fast food establishments holding that the HO did not apply to such establishments. In light of this potential uncertainty concerning the application of HO 10 to the food service industry, the Department requested that the Advisory Committee also review this issue.

After reviewing the regulations, relevant case law, and other pertinent background information, the Committee recommended that HO 10 be modified to clarify that restaurants and fast food establishments are included within the HO's definition of retail and wholesale service establishments. The proposed revision to HO 10 would clarify that restaurants, fast food establishments, as well as all other retail and service establishments are subject to this Order.

Additionally, although not specifically named in the current HO, the Department has consistently interpreted the HO 10 prohibition against the use of power-driven knives as applying to meat slicers. The Committee was asked to review this matter and recommended that the Department codify this interpretation by specifically listing power-driven meat slicers.

The Department is also soliciting comments and data on the safety of meat slicers used in food service establishments. Comments should, for example, address injury rates, types of injuries, types of machines, and circumstances surrounding injury by meat slicers used in food service establishments. Information is also requested on the safety-related design and guarding of such machines currently used in these establishments. Stratification of these data by age is encouraged, although data on the safety of the machines for all employees will also be useful. Information received will be analyzed to determine whether the final HO 10 should specifically include meat slicers, exclude meat slicers, or include meat slicers while further study is undertaken.

HO 12—Occupations Involved in the Operation of Paper-Products Machines, 29 CFR 570.63

HO 12 currently defines "paper products machines" as "power-driven machines used in the remanufacture or conversion of paper or pulp into a finished product" (emphasis added). The proposed revision to HO 12 would clarify that the operation of power-driven paper machines also is prohibited where the equipment is used to convert paper into waste paper.

Since the intent of the Hazardous Orders is to prevent injury, the nature of a product or specific use of a machine should not be a determining factor of the Order. Accordingly, the Advisory Committee also recommended that HO 12 be revised to prohibit the operation of all power-driven paper products machines, regardless of the products being manufactured or processed, or the type of establishment in which they are used. As the regulation is written at present, the term "paper products machine" is defined to include scrap-paper balers and other power-driven machines "used in the remanufacture or conversion of paper or pulp into a finished product." The Department's experience has shown that scrap paper

balers are used in many grocery and other retail stores and operations to compact empty boxes and other forms of waste paper for the purpose of disposing of them. The Department believes that the proposed change would clarify the issue regarding the ultimate disposition of the paper and would provide a proper focus on the intent of the prohibition, which is to prevent injury to the minor based on the potential hazards of operating the equipment.

Accordingly, the proposed rule would clarify that the use of power-drive paper products machines is within the scope of HO 12, irrespective of the ultimate use of the paper product processed or the type of establishment in which such machines are used.

IV. Executive Order 12291

This rule is not classified as a "major rule" under Executive Order 12291 on Federal Regulations, because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, no regulatory impact analysis is required.

V. Regulatory Flexibility Act

The proposed rules, if promulgated, will not have a significant effect on a substantial number of small entities. This conclusion is based on all information presently available to the Department. The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. As discussed above, the proposed revisions to these three HOs are narrow, technical, clarifying modifications that incorporate Departmental regulatory and enforcement policy.

This document was prepared under the direction and control of Samuel D. Walker, Acting Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor.

List of Subjects in 29 CFR Part 570

Employment, Investigations, Labor, Law enforcement.

Signed at Washington, DC, on this 17th day of October 1990.

Elizabeth Dole,

Secretary of Labor.

William C. Brooks,

Assistant Secretary for Employment Standards.

Samuel D. Walker,

Acting Administrator, Wage and Hour Division.

For the reasons set out in the preamble, title 29, part 570, subpart E of the Code of Federal Regulations is proposed to be amended as follows.

PART 570—CHILD LABOR REGULATIONS, ORDERS AND STATEMENTS OF INTERPRETATION

1. The authority citation for part 570 continues to read as follows:

Authority: Secs. 3, 11, 12, 52 Stat. 1060, as amended, 1066, as amended, 1067, as amended; 29 U.S.C. 203, 211, 212.

2. Section 570.52 is proposed to be revised to read as follows:

§ 570.52 Occupations of motor-vehicle driver and outside helper (Order 2).

(a) *Findings and declaration of fact.* Except as provided in paragraph (b) of this section, the occupations of motor-vehicle driver and outside helper on any public road, highway, in or about any mine (including open pit mine or quarry), place where logging or sawmill operations are in progress, or in any excavation of the type identified in § 570.68(a) are particularly hazardous for the employment of minors between 16 and 18 years of age.

(b) *Exemption—Incidental and occasional driving.* The findings and declaration in paragraph (a) of this section shall not apply to the operation of automobiles or trucks not exceeding 6,000 pounds gross vehicle weight if such driving is restricted to daylight hours *Provided* such operation is only occasional and incidental to the minor's employment; that the minor holds a State license valid for the type of driving involved in the job performed and has completed a State approved driver education course; *and provided further,* That the vehicle is equipped with a seat belt or similar restraining device for the driver and for each helper, and the employer has instructed each minor that such belts or other devices must be used. This paragraph shall not be applicable to any occupation of motor-vehicle driver which involves the towing of vehicles.

(c) *Definitions.* For purpose of this section:

(1) The term *motor vehicle* shall mean any automobile, truck, truck-tractor, trailer, semitrailer, motorcycle, or similar vehicle propelled or drawn by mechanical power and designed for use as a means of transportation but shall not include any vehicle operated exclusively on rails.

(2) The term *driver* shall mean any individual who, in the course of employment, drives a motor vehicle at any time.

(3) The term *outside helper* shall mean any individual, other than a driver, whose work includes riding on a motor vehicle outside the cab for the purpose of assisting in transporting or delivering goods.

(4) The term *gross vehicle weight* includes the truck chassis with lubricants, water and a full tank or tanks of fuel, plus the weight of the cab or driver's compartment, body and special chassis and body equipment, and payload.

3. Section 570.61 is proposed to be revised to read as follows:

§ 570.61 Occupations in the operation of power-driven meat-processing machines and occupations involving slaughtering, meat packing or processing or rendering (Order 10).

(a) *Findings and declaration of fact.* The following occupations in or about slaughtering and meat packing establishments, rendering plants, or wholesale, retail or service establishments are particularly hazardous for the employment of minors between 16 and 18 years of age or detrimental to their health or well-being:

(1) All occupations on the killing floor, in curing cellars, and in hide cellars, except the work of messengers, runners, handtruckers, and similar occupations which require entering such workrooms or workplaces infrequently and for short periods of time.

(2) All occupations involved in the recovery of lard and oils, except packaging and shipping of such products and the operation of lard-roll machines.

(3) All occupations involved in tankage or rendering of dead animals, animal offal, animal fats, scrap meats, blood, and bones into stock feeds, tallow, inedible greases, fertilizer ingredients, and similar products.

(4) All occupations involved in the operation or feeding of the following power-driven machines, including setting-up, adjusting, repairing, oiling, or cleaning such machines, regardless of the product being processed by these machines: Meat patty forming machines, meat and bone cutting saws, meat slicers, knives (except bacon-slicing machines), headsplitters, and guillotine cutters; snoutpullers and jaw-pullers;

skinning machines; horizontal rotary washing machines; casing-cleaning machines such as crushing, stripping, and finishing machines; grinding, mixing, chopping, and hashing machines; and presses (except belly-rolling machines).

(5) All boning occupations.

(6) All occupations that involve the pushing or dropping of any suspended carcass, half carcass, or quarter carcass.

(7) All occupations involving handlifting or hand-carrying any carcass or half carcass of beef, pork, or horse, or any quarter carcass of beef or horse.

(b) *Definitions.* As used in this section:

(1) The term *slaughtering and meat packing establishments* means places in or about which cattle, calves, hogs, sheep, lambs, goats, or horses are killed, butchered, or processed. The term also includes establishments which manufacture or process meat products or sausage casings from such animals.

(2) The term *rendering plants* means establishments engaged in the conversion of dead animals, animal offal, animal fats, scrap meats, blood, and bones into stock feeds, tallow, inedible greases, fertilizer ingredients, and similar products.

(3) The term *killing floor* includes a workroom, workplace where cattle, calves, hogs, sheep, lambs, goats, or horses are immobilized, shackled, or killed, and the carcasses are dressed prior to chilling.

(4) The term *curing cellar* includes a workroom or workplace which is primarily devoted to the preservation and flavoring of meat by curing materials. It does not include a workroom or workplace solely where meats are smoked.

(5) The term *hide cellar* includes a workroom or workplace where hides are graded, trimmed, salted, and otherwise cured.

(6) The term *boning occupations* means the removal of bones from meat cuts. It does not include work that involves cutting, scraping, or trimming meat from cuts containing bones.

(7) The term *retail/wholesale or service establishments* includes establishments where meat or meat products are processed or handled, such as butcher shops, grocery stores, restaurants/fast-food establishments, hotels, delicatessens, and meat-locker (freezer-locker) companies, and establishments where any food product is prepared or processed for serving to customers using machines prohibited by section (a) of this Order.

(c) *Exemptions.* This section shall not apply to:

(1) The killing and processing of poultry, rabbits, or small game in areas physically separated from the killing floor.

(2) The employment of apprentices or student-learners under the conditions prescribed in § 570.50 (b) and (c).

4. Section 570.63 is proposed to be revised to read as follows:

§ 570.63 Occupations involved in the operation of paper products machines (Order 12)

(a) *Findings and declaration of fact.* The following occupations are particularly hazardous for the employment of minors between 16 and 18 years of age:

(1) The occupations of operation or assisting to operate any of the following power-driven paper products machines:

(i) Arm-type wire stitcher or stapler, circular or band saw, corner cutter or mitering machine, corrugating and single-or-double-facing machine, envelope die-cutting press, guillotine paper cutter or shear, horizontal bar scorer, laminating or combining machine, sheeting machine, scrap-paper baler, or vertical slotter.

(ii) Platen die-cutting press, platen printing press, or punch press which involves hand feeding of the machine.

(2) The occupations of setting up, adjusting, repairing, oiling, or cleaning these machines including those which do not involve hand feeding.

(b) *Definitions.* (1) The term *operating or assisting to operate* shall mean all work which involves starting or stopping a machine covered by this section, placing or removing materials into or from the machine, or any other work directly involved in operating the machine.

(2) The term *paper products* machine shall mean all power-driven machines used in (i) the remanufacture or conversion of paper or pulp into a finished product; or (ii) the preparation of such materials for disposal. The term applies to such machines whether they are used in establishments that manufacture converted paper or pulp products, or in any other type of manufacturing or non-manufacturing establishment.

(c) *Exemptions.* This section shall not apply to the employment of apprentices or student-learners under the conditions prescribed in § 570.50 (b) and (c).

Part IV

United States Sentencing Commission

Revisions to the Sentencing Guidelines for United States Courts; Notice

UNITED STATES SENTENCING COMMISSION

Revisions to the Sentencing Guidelines for United States Courts

AGENCY: United States Sentencing Commission.

ACTION: Notice of final action regarding amendments to sentencing guidelines and policy statements effective November 1, 1990.

SUMMARY: The Sentencing Commission hereby gives public notice of several actions taken pursuant to its authority under section 217(a) of the Comprehensive Crime Control Act of 1984 (28 U.S.C. 994 (a) and (u)). The Commission has reviewed amendments submitted to Congress on April 26, 1990, that may result in a lower guideline range and has designated two such amendments for inclusion in policy statement 1B1.10 (Retroactivity of Amended Guideline Range). Also, the Commission has promulgated new policy statements for revocation of probation and supervised release. Finally, the Commission approved several minor editorial, clarifying, and conforming amendments to the Guidelines Manual as set forth below.

DATES: The Commission has specified an effective date of November 1, 1990, for these actions.

FOR FURTHER INFORMATION CONTACT: Paul K. Martin, Communications Director, Telephone: (202) 626-8500.

SUPPLEMENTARY INFORMATION: The United States Sentencing Commission is an independent agency in the judicial branch of the U.S. Government. The Commission is empowered by 28 U.S.C. 994(a) to promulgate sentencing guidelines and policy statements for federal sentencing courts. Sections 994 (o) and (p) of title 28, United States Code, further direct the Commission to periodically review and revise guidelines and policy statements previously promulgated, and require that guideline amendments be submitted to Congress for review. Absent action of the Congress to the contrary, guideline amendments become effective following 180 days of Congressional review on the date specified by the Commission (*i.e.*, November 1, 1990). Unlike new guidelines and amendments thereto issued pursuant to 28 U.S.C. 994 (a) and (p), sentencing policy statements, commentary, and amendments thereto promulgated by the Commission are not required to be submitted to Congress for 180 days' review prior to their taking effect.

The policy statements on revocation of probation and supervised release set forth below supplant the existing policy statements in Chapter Seven of the Guidelines Manual. These policy statements, issued pursuant to the specific directive in 28 U.S.C. 994 (a)(3), provide more extensive guidance to courts in imposing an appropriate sanction upon revocation of probation or supervised release. The Commission intends that courts will be guided by these policy statements, promulgated specifically for revocation decisions, rather than by the guidelines applicable to initial sentencing decisions. While the revocation policy statements are not binding upon courts in the same fashion as revocation guidelines would be, the Commission strongly encourages their use and welcomes comments regarding the policy statements prior to the issuance of revocation guidelines at a future date.

In connection with its ongoing review of the Guidelines Manual, the Commission continues to welcome comment on any aspect of the sentencing guidelines, policy statements, and official commentary. Comments should be sent to: The United States Sentencing Commission, 1331 Pennsylvania Avenue, NW., suite 1400, Washington, DC 20004, Attn: Communications Director.

Authority: Section 217(a) of the Comprehensive Crime Control Act of 1984 (28 U.S.C. 994(a)).

William W. Wilkins, Jr.
Chairman.

Additional Revisions to the Guidelines Manual

(1) Subsection (d) of § 1B1.10 (Retroactivity of Amended Guideline Range (Policy Statement)) is amended by deleting "and 269" and inserting in lieu thereof "269, 328, and 341".

This amendment implements the directive in 28 U.S.C. 994(u) in respect to the guideline amendments effective November 1, 1990.

(2) Chapter Seven is deleted in its entirety as follows:

CHAPTER SEVEN—VIOLATIONS OF PROBATION AND SUPERVISED RELEASE

§ 7A1.1. Reporting of Violations of Probation and Supervised Release (Policy Statement)

(a) The Probation Officer shall promptly report to the court any alleged violation of a condition of probation or supervised release that constitutes new criminal conduct, other than conduct that would constitute a petty offense.

(b) The Probation Officer shall promptly report to the court any other alleged violation of a condition of probation or supervised release, unless the officer determines: (1) that such violation is minor, not part of a continuing pattern of violation, and not indicative of a serious adjustment problem; and (2) that non-reporting will not present an undue risk to the public or be inconsistent with any directive of the court relative to the reporting of violations.

Commentary

This policy statement addresses the reporting of volations of probation and supervised release. It is the Commission's intent that significant violations be promptly reported to the court. At the same time, the Commission realizes that it would neither be practical nor desirable to require such reporting for every minor violation.

§ 7A1.2. Revocation of Probation (Policy Statement)

(a) Upon a finding of a violation of probation involving new criminal conduct, other than criminal conduct constituting a petty offense, the court shall revoke probation.

(b) Upon a finding of a violation of probation involving conduct other than conduct under subsection (a), the court may: (1) Revoke probation; or (2) extend the term of probation and/or modify the conditions of probation.

Commentary

This policy statement expresses a presumption that probation is to be revoked in the case of new criminal conduct other than a petty offense. For lesser violations, the policy statements provide that the court may revoke probation, extend the term of supervision, or modify the conditions of supervision.

§ 7A1.3. Revocation of Supervised Release (Policy Statement)

(a) Upon a finding of a violation of supervised release involving new criminal conduct, other than criminal conduct constituting a petty offense, the court shall revoke supervised release.

(b) Upon a finding of a violation of supervised release involving conduct other than conduct under subsection (a), the court may: (1) revoke supervised release; or (2) extend the term of supervised release and/or modify the conditions of supervised release.

Commentary

This policy statement expresses a presumption that supervised release is to be revoked in the case of new criminal conduct other than a petty offense. For lesser violations, the policy statements provide that the court may revoke supervised release,

extend the term of supervision, or modify the conditions of supervision.

§ 7A1.4. No Credit for Time Under Supervision (Policy Statement)

(a) Upon revocation of probation, no credit shall be given (toward any sentence of imprisonment imposed) for any portion of the term of probation served prior to revocation.

(b) Upon revocation of supervised release, no credit shall be given (toward any term of imprisonment ordered) for time previously served on post-release supervision.

Commentary

This policy statement provides that time served on probation or supervised release is not to be credited in the determination of any term of imprisonment imposed upon revocation."

and the following inserted in lieu thereof:

CHAPTER SEVEN—VIOLATIONS OF PROBATION AND SUPERVISED RELEASE

Part A—Introduction to Chapter Seven

1. Authority

Under 28 U.S.C. 994(a)(3), the Sentencing Commission is required to issue guidelines or policy statements applicable to the revocation of probation and supervised release. At this time, the Commission has chosen to promulgate policy statements only. These policy statements will provide guidance while allowing for the identification of any substantive or procedural issues that require further review. The Commission views these policy statements as evolutionary and will review relevant data and materials concerning revocation determinations under these policy statements. Revocation guidelines will be issued after federal judges, probation officers, practitioners, and others have the opportunity to evaluate and comment on these policy statements.

2. Background

(a) Probation

Prior to the implementation of the federal sentencing guidelines, a court could stay the imposition or execution of sentence and place a defendant on probation. When a court found that a defendant violated a condition of probation, the court could continue probation, with or without extending the term or modifying the conditions, or revoke probation and either impose the term of imprisonment previously stayed, or, where no term or imprisonment had originally been imposed, impose any term of imprisonment that was available at the initial sentencing.

The statutory authority to "suspend" the imposition or execution of sentence in order to impose a term of probation was abolished upon implementation of the sentencing guidelines. Instead, the Sentencing Reform Act recognized probation as a sentence in itself. 18 U.S.C. 3561. Under current law, if the court finds that a defendant violated a condition of probation, the court may continue probation, with or without extending the term or modifying the conditions, or revoke probation and impose any other sentence that initially could have been imposed. 18 U.S.C. 3565. For certain violations, revocation is required by statute.

(b) Supervised Release

Supervised release, a new form of post-imprisonment supervision created by the Sentencing Reform Act, accompanied implementation of the guidelines. A term of supervised release may be imposed by the court as a part of the sentence of imprisonment at the time of initial sentencing. 18 U.S.C. 3583(a). Unlike parole, a term of supervised release does not replace a portion of the sentence of imprisonment, but rather is an order of supervision in addition to any term of imprisonment imposed by the court. Accordingly, supervised release is more analogous to the additional "special parole term" previously authorized for certain drug offenses.

With the exception of intermittent confinement, which is available only for a sentence of probation, the conditions of supervised release authorized by statute are the same as those for a sentence of probation. When the court finds that the defendant violated a condition of supervised release, it may continue the defendant on supervised release, with or without extending the term or modifying the conditions, or revoke supervised release and impose a term of imprisonment. The periods of imprisonment authorized by statute for a violation of the conditions of supervised release generally are more limited, however, than those available for a violation of the conditions of probation. 18 U.S.C. § 3583(e)(3).

3. Resolution of Major Issues

(a) Guidelines Versus Policy Statements

At the outset, the Commission faced a choice between promulgating guidelines or issuing advisory policy statements for the revocation of probation and supervised release. After considered debate and input from judges, probation officers, and prosecuting and defense attorneys, the Commission decided, for a variety of reasons, initially to issue policy statements. Not only was the policy statement option expressly authorized by statute, but this approach provided greater flexibility to both the Commission and the courts. Unlike guidelines, policy statements are not subject to the May 1 statutory deadline for submission to Congress, and the Commission believed that it would benefit from the additional time to consider complex issues relating to revocation guidelines provided by the policy statement option.

Moreover, the Commission anticipates that, because of its greater flexibility, the policy statement option will provide better opportunities for evaluation by the courts and the Commission. This flexibility is important, given that supervised release as a method of post-incarceration supervision and transformation of probation from a suspension of sentence to a sentence in itself represent recent changes in federal sentencing practices. After an adequate period of evaluation, the Commission intends to promulgate revocation guidelines.

(b) Choice Between Theories

The Commission debated two different approaches to sanctioning violations of probation and supervised release.

The first option considered a violation resulting from a defendant's failure to follow the court-imposed conditions of probation or supervised release as a "breach of trust." While the nature of the conduct leading to the revocation would be considered in measuring the extent of the breach of trust, imposition of an appropriate punishment for any new criminal conduct would not be the primary goal of a revocation sentence. Instead, the sentence imposed upon revocation would be intended to sanction the violator for failing to abide by the conditions of the court-ordered supervision, leaving the punishment for any new criminal conduct to the court responsible for imposing the sentence for that offense.

The second option considered by the Commission sought to sanction violators for the particular conduct triggering the revocation as if that conduct were being sentenced as new federal criminal conduct. Under this approach, offense guidelines in Chapters Two and Three of the Guidelines Manual would be applied to any criminal conduct that formed the basis of the violation, after which the criminal history in Chapter Four of the Guidelines Manual would be recalculated to determine the appropriate revocation sentence. This

option would also address a violation not constituting a criminal offense.

After lengthy consideration, the Commission adopted an approach that is consistent with the theory of the first option; i.e., at revocation the court should sanction primarily the defendant's breach of trust, while taking into account, to a limited degree, the seriousness of the underlying violation and the criminal history of the violator.

The Commission adopted this approach for a variety of reasons. First, although the Commission found desirable several aspects of the second option that provided for a detailed revocation guideline system similar to that applied at the initial sentencing, extensive testing proved it to be impractical. In particular, with regard to new criminal conduct that constituted a violation of state or local law, working groups expert in the functioning of federal criminal law noted that it would be difficult in many instances for the court or the parties to obtain the information necessary to apply properly the guidelines to this new conduct. The potential unavailability of information and witnesses necessary for a determination of specific offense characteristics or other guideline adjustments could create questions about the accuracy of factual findings concerning the existence of those factors.

In addition, the Commission rejected the second option because that option was inconsistent with its views that the court with jurisdiction over the criminal conduct leading to revocation is the more appropriate body to impose punishment for that new criminal conduct, and that, as a breach of trust inherent in the conditions of supervision, the sanction for the violation of trust should be in addition, or consecutive, to any sentence for the new conduct. In contrast, the second option would have the revocation court substantially duplicate the sanctioning role of the court with jurisdiction over a defendant's new criminal conduct and would provide for the punishment imposed upon revocation to run concurrently with, and thus generally be subsumed in, any sentence imposed for that new criminal conduct.

Further, the sanctions available to the courts upon revocation are, in many cases, more significantly restrained by statute. Specifically, the term of imprisonment that may be imposed upon revocation of supervised release is limited by statute to not more than five years for persons convicted of Class A felonies, except for certain title 21 drug offenses; not more than three years for Class B felonies; not more than two years for Class C or D felonies; and not more than one year for Class E felonies. 18 U.S.C. 3583(e)(3).

Given the relatively narrow ranges of incarceration available in many cases, combined with the potential difficulty in obtaining information necessary to determine specific offense characteristics, the Commission felt that it was undesirable at this time to develop guidelines that attempt to distinguish, in detail, the wide variety of behavior that can lead to revocation. Indeed, with the relatively low ceilings set by statute, revocation policy statements that attempted to delineate with great particularity the gradations of conduct leading to revocation would frequently result in a sentence at the statutory maximum penalty.

Accordingly, the Commission determined that revocation policy statements that provided for three broad grades of violations would permit proportionally longer terms for more serious violations and thereby would address adequately concerns about proportionality, without creating the problems inherent in the second option.

4. The Basic Approach

The revocation policy statements categorize violations of probation and supervised release in three broad classifications ranging from serious new felonious criminal conduct to less serious criminal conduct and technical violations. The grade of the violation, together with the violator's criminal history category calculated at the time of the initial sentencing, fix the applicable sentencing range.

The Commission has elected to develop a single set of policy statements for revocation of both probation and supervised release. In reviewing the relevant literature, the Commission determined that the purpose of supervision for probation and supervised release should focus on the integration of the violator into the community, while providing the supervision designed to limit further criminal conduct. Although there was considerable debate as to whether the sanction imposed upon revocation of probation should be different from that imposed upon revocation of supervised release, the Commission has initially concluded that a single set of policy statements is appropriate.

5. A Concluding Note

The Commission views these policy statements for revocation of probation and supervised release as the first step in an evolutionary process. The Commission expects to issue revocation guidelines after judges, probation officers, and practitioners have had an opportunity to apply and comment on the policy statements.

In developing these policy statements, the Commission assembled two outside working groups of experienced probation officers representing every circuit in the nation, officials from the Probation Division of the Administrative Office of the U.S. Courts, the General Counsel's office at the Administrative Office of the U.S. Courts, and the U.S. Parole Commission. In addition, a number of federal judges, members of the Criminal Law and Probation Administration Committee of the Judicial Conference, and representatives from the Department of Justice and federal and community defenders provided considerable input into this effort.

Part B—Probation and Supervised Release Violations

Introductory Commentary

The policy statements in this chapter seek to prescribe penalties only for the violation of the judicial order imposing supervision. Where a defendant is convicted of a criminal charge that also is a basis of the violation, these policy statements do not purport to provide the appropriate sanction for the criminal charge itself. The Commission has concluded that the determination of the appropriate sentence on any new criminal conviction should be a separate determination for the court having jurisdiction over such conviction.

Because these policy statements focus on the violation of the court-ordered supervision, this chapter, to the extent permitted by law, treats violations of the conditions of probation and supervised release as functionally equivalent.

Under 18 U.S.C. 3584, the court, upon consideration of the factors set forth in 18 U.S.C. 3553(a), including applicable guidelines and policy statements issued by the Sentencing Commission, may order a term of imprisonment to be served consecutively or concurrently to an undischarged term of imprisonment. It is the policy of the Commission that the sanction imposed upon revocation is to be served consecutively to any other term of imprisonment imposed for any criminal conduct that is the basis of the revocation.

This chapter is applicable in the case of a defendant under supervision for a felony or Class A misdemeanor. Consistent with § 1B1.9 (Class B or C Misdemeanors and Infractions), this chapter does not apply in the case of a defendant under supervision for a Class B or C misdemeanor or an infraction.

§ 7B1.1. Classification of Violations (Policy Statement)

(a) There are three grades of probation and supervised release violations:

(1) Grade A Violations—conduct constituting (A) a Federal, State, or local offense punishable by a term of imprisonment exceeding one year that (i) is a crime of violence, (ii) is a controlled substance offense, or (iii) involves possession of a firearm or destructive device of a type described in 26 U.S.C. 5845(a); or (B) any other Federal, State, or local offense punishable by a term of imprisonment exceeding twenty years;

(2) Grade B Violations—conduct constituting any other Federal, State, or local offense punishable by a term of imprisonment exceeding one year;

(3) Grace C Violations—conduct constituting (A) a Federal, State, or local offense punishable by a term of imprisonment of one year or less; or (B) a violation of any other condition of supervision.

(b) Where there is more than one violation of the conditions of supervision, or the violation includes conduct that constitutes more than one offense, the grade of the violation is determined by the violation having the most serious grade.

Commentary

Application Notes

1. Under 18 U.S.C. 3563(a)(1) and 3583(d), a mandatory condition of probation and supervised release is that the defendant not commit another Federal, State, or local crime. A violation of this condition may be charged whether or not the defendant has been the subject of a separate Federal, State or local prosecution for such conduct. The grade of violation does not depend upon the conduct that is the subject of criminal charges or of which the defendant is convicted in a criminal proceeding. Rather, the grade of the violation is to be based on the defendant's actual conduct.

2. "Crime of violence" has the same meaning as set forth in § 4B1.2(1), and includes any offense under federal or state law punishable by imprisonment for a term exceeding one year that—

(i) has as an element the use, attempted use, or threatened use of physical force against the person of another; or

(ii) is burglary of a dwelling, arson, or extortion, involves use of explosives, or otherwise involves conduct that presents a serious potential risk of physical injury to another.

A crime of violence includes murder, manslaughter, kidnapping, aggravated assault, forcible sex offenses, robbery, arson, extortion, extortionate extension of credit, and burglary of a dwelling. Other offenses are included where (A) that offense has as an element the use, attempted use, or threatened use of physical force against the person of another, or (B) the conduct set forth in the violation charged involved use of explosives or, by its nature, presented a serious potential risk of physical injury to another. A crime of violence also includes the offenses of aiding and abetting, conspiring, and attempting to commit such offenses.

3. "Controlled substance offense" includes any offense under a federal or state law prohibiting the manufacture, import, export, distribution, or dispensing of a controlled substance (or a counterfeit substance) or the possession of a controlled substance (or a counterfeit substance) with the intent to manufacture, import, export, distribute, or dispense. A controlled substance offense also includes the offenses of aiding and abetting, conspiring, and attempting to commit such offenses.

4. A "firearm or destructive device of a type described in 26 U.S.C. 5845(a)" includes a shotgun, or a weapon made from a shotgun, with a barrel or barrels of less than 18 inches in length; a weapon made from a shotgun or rifle with an overall length of less than 26 inches; a rifle, or a weapon made from a rifle, with a barrel or barrels of less than 16 inches in length; a machine gun; a muffler or silencer for a firearm; a destructive device; and certain large bore weapons.

5. Where the defendant is under supervision in connection with a felony conviction, or has a prior felony conviction, possession of a firearm (other than a firearm of a type described in 26 U.S.C. 5845(a)) will generally constitute a Grade B violation, because 18 U.S.C. 922(g) prohibits a convicted felon from possessing a firearm. The term "generally" is used in the preceding sentence, however, because there are certain limited exceptions to the applicability of 18 U.S.C. 922(g). See, e.g., 18 U.S.C. 925(c).

§ 7B1.2. Reporting of Violations of Probation and Supervised Release (Policy Statement)

(a) The probation officer shall promptly report to the court any alleged Grade A or B violation.

(b) The probation officer shall promptly report to the court any alleged Grade C violation unless the officer determines: (1) That such violation is minor, and not part of a continuing pattern of violations; and (2) that non-reporting will not present an undue risk to an individual or the public or be inconsistent with any directive of the court relative to the reporting of violations.

Commentary

Application Note

1. Under subsection (b), a Grade C violation must be promptly reported to the court unless the probation officer makes an affirmative determination that the alleged violation meets the criteria for non-reporting. For example, an isolated failure to file a monthly report or a minor traffic infraction generally would not require reporting.

§ 7B1.3. Revocation of Probation or Supervised Release (Policy Statement)

(a)(1) Upon a finding of a Grade A or B violation, the court shall revoke probation or supervised release.

(2) Upon a finding of a Grade C violation, the court may (A) revoke probation or supervised release; or (B) extend the term of probation or supervised release and/or modify the conditions of supervision.

(b) In the case of a revocation of probation or supervised release, the applicable range of imprisonment is that set forth in § 7B1.4 (Term of Imprisonment).

(c) In the case of a Grade B or C violation—

(1) Where the minimum term of imprisonment determined under § 7B1.4 (Term of Imprisonment) is at least one month but not more than six months, the minimum term may be satisfied by (1) a sentence of imprisonment; or (2) a sentence of imprisonment that includes a term of supervised release with a condition that substitutes community confinement or home detention according to the schedule in § 5C1.1(e) for any portion of the minimum term; and

(2) Where the minimum term of imprisonment determined under § 7B1.4 (Term of Imprisonment) is more than six months but not more than ten months, the minimum term may be satisfied by (1) a sentence of imprisonment; or (2) a sentence of imprisonment that includes a term of supervised release with a condition that substitutes community confinement or home detention according to the schedule in § 5C1.1(e), provided that at least one-half of the minimum term is satisfied by imprisonment.

(3) In the case of a revocation based, at least in part, or on a violation of a condition specifically pertaining to community confinement, intermittent confinement, or home detention, use of the same or a less restrictive sanction is not recommended.

(d) Any restitution, fine, community confinement, home detention, or intermittent confinement previously imposed in connection with the sentence for which revocation is ordered that remains unpaid or unserved at the time of revocation shall be ordered to be paid or served in addition to the sanction determined under § 7B1.4 (Term of Imprisonment), and any such unserved period of community confinement, home detention, or intermittent confinement may be converted to an equivalent period of imprisonment.

(e) Where the court revokes probation or supervised release and imposes a term of imprisonment, it shall increase the term of imprisonment determined under subsections (b), (c), and (d) above by the amount of time in official detention that will be credited toward service of the term of imprisonment under 18 U.S.C. 3585(b), other than time

in official detention resulting from the federal probation or supervised release violation warrant or proceeding.

(f) Any term of imprisonment imposed upon the revocation of probation or supervised release shall be ordered to be served consecutively to any sentence of imprisonment that the defendant is serving, whether or not the sentence of imprisonment being served resulted from the conduct that is the basis of the revocation of probation or supervised release.

(g)(1) Where probation is revoked and a term of imprisonment is imposed, the provisions of §§ 5D1.1–1.3 shall apply to the imposition of a term of supervised release.

(2) Where supervised release is revoked and the term of imprisonment imposed is less than the maximum term of imprisonment imposable upon revocation, the defendant may, to the extent permitted by law, be ordered to recommence supervised release upon release from imprisonment.

Commentary

Application Notes

1. Revocation of probation or supervised release generally is the appropriate disposition in the case of a Grade C violation by a defendant who, having been continued on supervision after a finding of violation, again violates the conditions of his supervision.

2. The provisions for the revocation, as well as early termination and extension, of a term of supervised release are found in 18 U.S.C. 3583(e). This statute, however, neither expressly authorizes nor precludes a court from ordering that a term of supervised release recommence after revocation. Under § 7B1.3(f)(2), the court may order, to the extent permitted by law, the recommencement of a supervised release term following revocation.

3. Subsection (c) provides for the use of certain alternatives to imprisonment upon revocation. It is to be noted, however, that a court may decide that not every alternative is authorized by statute in every circumstance. For example, in United States v. Behnezhad, No. 89–10529 (9th Cir. July 3, 1990), the Ninth Circuit held that where a term of supervised release was revoked there was no statutory authority to impose a further term of supervised release. Under this decision, in the case of a revocation of a term of supervised release, an alternative that is contingent upon imposition of a further term of supervised release (e.g., a period of imprisonment followed by a period of community confinement or detention as a condition of supervised release) cannot be implemented. The Commission has transmitted to the Congress a proposal for a statutory amendment to address this issue.

4. Subsection (e) is designed to ensure that the revocation penalty is not decreased by credit for time in official detention other than time in official detention resulting from the federal probation or supervised release violation warrant or proceeding. Example: A defendant, who was in pre-trial detention for three months, is placed on probation, and subsequently violates that probation. The court finds the violation to be a Grade C violation, determines that the applicable range of imprisonment is 4–10 months, and determines that revocation of probation and imposition of a term of imprisonment of four months is appropriate. Under subsection (e), a sentence of seven months imprisonment would be required because the Bureau of Prisons, under 18 U.S.C. 3585(b), will allow the defendant three months' credit toward the term of imprisonment imposed upon revocation.

5. Subsection (f) provides that any term of imprisonment imposed upon the revocation of probation or supervised release shall run consecutively to any sentence of imprisonment being served by the defendant. Similarly, it is the Commission's recommendation that any sentence of imprisonment for a criminal offense that is imposed after revocation of probation or supervised release be run consecutively to any term of imprisonment imposed upon revocation.

6. Intermittent confinement is authorized only as a condition of probation during the first year of the term of probation. 18 U.S.C. 3563(b)(11). Intermittent confinement is not authorized as a condition of supervised release. 18 U.S.C. 3583(d).

§ 7B1.4 Term of Imprisonment (Policy Statement)

(a) The range of imprisonment applicable upon revocation is set forth in the following table:

REVOCATION TABLE (MONTHS OF IMPRISONMENT)

[Criminal History Category*]

Grade of violation	I	II	III	IV	V	VI
Grade C	3–9	4–10	5–11	6–12	7–13	8–14
Grade B	4–10	6–12	8–14	12–18	18–24	21–27
Grade A						
(1) Except as provided in subdivision (2) below	12–18	15–21	18–24	24–30	30–37	33–41
(2) Where the defendant was on probation or supervised release as a result of a sentence for A Class A felony	24–30	27–33	30–37	37–46	46–57	51–63

*The criminal history category is the category applicable at the time the defendant originally was sentenced to a term of supervision.

(b) Provided, that—

(1) Where the statutorily authorized maximum term of imprisonment that is imposable upon revocation is less than the minimum of the applicable range, the statutorily authorized maximum term shall be substituted for the applicable range; and

(2) Where the minimum term of imprisonment required by statute, if any, is greater than the maximum of the applicable range, the minimum term of imprisonment required by statute shall be substituted for the applicable range.

(3) In any other case, the sentence upon revocation may be imposed at any point within the applicable range, provided that the sentence—

(A) is not greater than the maximum term of imprisonment authorized by statute; and

(B) is not less than any minimum term of imprisonment required by statute.

Commentary

Application Notes

1. The criminal history category to be used in determining the applicable range of imprisonment in the Revocation Table is the category determined at the time the defendant originally was sentenced to the term of supervision. The criminal history category is not to be recalculated because the ranges set forth in the Revocation Table have been designed to take into account that the defendant violated supervision. In the rare case in which no criminal history category was determined when the defendant originally was sentenced to the term of supervision being revoked, the court shall determine the criminal history category that would have been applicable at the time the defendant originally was sentenced to the term of supervision. (See the criminal history provisions of §§ 4A1.1–4B1.4.)

2. Departure from the applicable range of imprisonment in the Revocation Table may be warranted when the court departed from the applicable range for reasons set forth in § 4A1.3 (Adequacy of Criminal History Category) in originally imposing the sentence that resulted in supervision. Additionally, an upward departure may be warranted when a defendant, subsequent to the federal sentence resulting in supervision, has been sentenced for an offense that is not the basis of the violation proceeding.

3. In the case of a Grade C violation that is associated with a high risk of new felonious

conduct (e.g., a defendant, under supervision for conviction of criminal sexual abuse, violates the condition that he not associate with children by loitering near a schoolyard), an upward departure may be warranted.

4. Where the original sentence was the result of a downward departure (e.g., as a reward for substantial assistance), or a charge reduction that resulted in a sentence below the guideline range applicable to the defendant's underlying conduct, an upward departure may be warranted.

5. Under 18 U.S.C. 3565(a), upon a finding that a defendant violated a condition of probation by being in possession of a controlled substance, the court is required "to revoke the sentence of probation and sentence the defendant to not less than one-third of the original sentence." Under 18 U.S.C. 3583(g), upon a finding that a defendant violated a condition of supervised release by being in possession of a controlled substance, the court is required "to terminate supervised release and sentence the defendant to serve in prison not less than one-third of the term of supervised release." The Commission leaves to the court the determination of whether evidence of drug usage established solely by laboratory analysis constitutes "possession of a controlled substance" as set forth in 18 U.S.C. 3565(a) and 3583(g).

6. Under 18 U.S.C. 3565(b), upon a finding that a defendant violated a condition of probation by the actual possession of a firearm, the court is required "to revoke the sentence of probation and impose any other sentence that was available * * * at the time of initial sentencing."

§ 7B1.5. No Credit for Time Under Supervision (Policy Statement)

(a) Upon revocation of probation, no credit shall be given (toward any sentence of imprisonment imposed) for any portion of the term of probation served prior to revocation.

(b) Upon revocation of supervised release, no credit shall be given (toward any term of imprisonment ordered) for time previously served on post-release supervision.

(c) Provided, that in the case of a person serving a period of supervised release on a foreign sentence under the provisions of 18 U.S.C. 4106A, credit shall be given for time on supervision prior to revocation, except that no credit shall be given for any time in escape or absconder status.

Commentary

Application Note

1. Subsection (c) implements 18 U.S.C. 4106A(b)(1)(C), which provides that the combined periods of imprisonment and supervised release in transfer treaty cases shall not exceed the term of imprisonment imposed by the foreign court.

Background: This section provides that time served on probation or supervised release is not to be credited in the determination of any term of imprisonment imposed upon revocation. Other aspects of the defendant's conduct, such as compliance with supervision conditions and adjustment while under supervision, appropriately may be considered by the court in the determination of the sentence to be imposed within the applicable revocation range."

This amendment replaces chapter Seven with a set of more detailed policy statements applicable to violations of probation and supervised release. Under 28 U.S.C. 994(a)(3), the Sentencing Commission is required to issue guidelines or policy statements applicable to the revocation of probation and supervised release. At this time, the Commission has chosen to promulgate policy statements only. These policy statements will provide guidance while allowing for the identification of any substantive or procedural issues that require further review. The Commission views these policy statements as evolutionary and will review relevant data and materials concerning revocation determinations under these policy statements. Revocation guidelines will be issued after federal judges, probation officers, practitioners, and others have the opportunity to evaluate and comment on these policy statements.

(3) The following minor editorial revisions have been made to update the Guidelines Manual to reflect that the guidelines system now constitutes current practice: the terms "current practice," "existing practice," and "present practice," where used to denote sentencing practice prior to guidelines, have been replaced by the term "pre-guidelines practice" and conforming tense changes have been made in § 2B3.1, comment. (backg'd); chapter Two, part C, intro. comment., § 2F1.1, comment. (backg'd); § 2J1.3, comment. (backg'd); § 2K2.1, comment. (backg'd); § 2R1.1, comment. (backg'd); § 2T1.1, comment. (backg'd); § 2T1.2, comment. (backg'd); § 2T1.3, comment. (backg'd); § 6A1.3, comment.; and chapter Six, part B, intro. comment.

(4) The following additional sentence has been inserted for clarity in the Commentary captioned "Statutory Provision[s]" of each chapter Two offense guideline that has additional statutory provision(s) listed in Appendix A (Statutory Index): "For additional statutory provision(s), see Appendix A (Statutory Index)."

(5) The following additional minor clarifying and conforming amendments have been made:

(A) The Commentary to § 3C1.2 captioned "Application Notes" is amended in Note 1 by deleting "(e.g., a fleeing defendant discharged a weapon at a pursuing officer)"; by renumbering Notes 1 and 2 as 2 and 3 respectively; and by inserting the following as Note 1:

"1. Do not apply this enhancement where the offense guideline in chapter Two, or another adjustment in chapter Three, results in an equivalent or greater increase in offense level solely on the basis of the same conduct."

This amendment clarifies the application of this guideline.

(B) The Commentary to § 4B1.4 is amended by inserting the following between "Commentary" and "Background":

Application Note

1. This guideline applies in the case of a defendant subject to an enhanced sentence under 18 U.S.C. § 924(e). Under 18 U.S.C. § 924(e)(1), a defendant is subject to an enhanced sentence if the instant offense of conviction is a violation of 18 U.S.C. § 922(g) and the defendant has at least three prior convictions for a "violent felony" or "serious drug offense," or both, committed on occasions different from one another. The terms "violent felony" and "serious drug offense" are defined in 18 U.S.C. 924(e)(2). It is to be noted that the definitions of "violent felony" and "serious drug offense" in 18 U.S.C. 924(e)(2) are not identical to the definitions of "crime of violence" and "controlled substance offense" used in § 4B1.1 (Career Offender), nor are the time periods for the counting of prior sentences under § 4A1.2 (Definitions and Instructions for Computing Criminal History) applicable to the determination of whether a defendant is subject to an enhanced sentence under 18 U.S.C. 924(e).

It is also to be noted that the procedural steps relative to the imposition of an enhanced sentence under 18 U.S.C. 924(e) are not set forth by statute and may vary to some extent from jurisdiction to jurisdiction."

This amendment provides additional explanatory material as to the operation of this section.

(C) The Commentary to § 2A2.1 captioned "Statutory Provisions," as amended, is further amended by deleting "1952A".

This amendment conforms the statutory provisions to Appendix A (Statutory Index).

(D) The Commentary to § 2B2.1 is amended by inserting between "Commentary" and "Application Notes" the following:

"Statutory Provision: 18 U.S.C. 1153."

This amendment inserts Commentary to list a statutory provision referenced to this guideline in Appendix A (Statutory Index) and conform the format of this guideline to that of the other offense guidelines.

(E) The Commentary to § 2B4.1 captioned "Statutory Provisions" is amended by deleting "§§ 1," and inserting in lieu thereof "§§".

This amendment deletes an incorrect reference.

(F) The Commentary to § 2D3.4 captioned "Statutory Provisions" is amended by deleting "Provision" and inserting in lieu thereof "Provisions", and by deleting "§ 842" and inserting in lieu of thereof "§§ 954, 961".

This amendment conforms the statutory provisions to Appendix A (Statutory Index).

(G) The Commentary to § 2F1.1 captioned "Statutory Provisions" is amended by deleting "290" and inserting in lieu thereof "299".

This amendment deletes a reference to a petty offense that was inadvertently retained when other references to petty offenses were deleted from the Manual.

(H) The Commentary to § 2M6.2 is amended by inserting between "Commentary" and "Background" the following:

"Statutory Provision: 42 U.S.C. 2273".

This amendment inserts Commentary to list a statutory provision referenced to this

guideline in Appendix A (Statutory Index) and conform the format of this guideline to that of the other offense guidelines.

(I) The Commentary to § 2T2.2 captioned "Statutory Provisions" is amended by deleting "5601–5605, 5607, 5608" and inserting in lieu thereof "5601, 5603–5605", and by deleting "5607,".

This amendment conforms the Statutory Provisions to Appendix A (Statutory Index).

(J) The Commentary to § 2X2.1 captioned "Statutory Provisions" is amended by deleting "Provisions" and inserting in lieu thereof "Provision", by deleting "§§ 2,755–757" and inserting in lieu thereof "§ 2".

This amendment conforms the statutory provisions to Appendix A (Statutory Index).

(K) Appendix A (Statutory Index), as amended, is further amended by inserting in the appropriate place by title and section:

"42 U.S.C. 300i–1; 2Q1.4, 2Q1.5"; in the line beginning 18 U.S.C. 496 by inserting ", 2T3.1" immediately following "2F1.1"; in the line beginning 18 U.S.C. 757 by inserting at the end ", 2X3.1"; in the line beginning 18 U.S.C. 842(a) by deleting "(g)" and inserting in lieu thereof "(i)"; and in the line beginning 26 U.S.C. 5871 by deleting "2A2.1, 2A2.2" and inserting in lieu thereof "2K2.1, 2K2.2".

This amendment inserts additional statutory references to conform the Statutory Index to the statutory provisions of the referenced offense guidelines, and corrects a clerical error.

(L) The third paragraph of § 1A4(b), as amended, is further amended in the third sentence by deleting "assault, or arson" and inserting in lieu thereof "or assault".

This amendment deletes an inaccurate reference.

(M) The Commentary to § 1B1.1 captioned "Application Notes" is amended in Note 1 by inserting the following additional subdivision at the end:

"(k) 'Destructive device' means any article described in 18 U.S.C. 921(a)(4) (including an explosive, incendiary, or poison gas—(i) bomb, (ii) grenade, (iii) rocket having a propellant charge of more than four ounces, (iv) missile having an explosive or incendiary charge of more than one-quarter ounce, (v) mine, or (vi) device similar to any of the devices described in the preceding clauses).".

The Commentary to § 2B1.1 captioned "Application Notes" is amended in Note 1 by deleting "and 'firearm' " and inserting in lieu thereof ", 'firearm,' and 'destructive device' ", and by deleting the last sentence as follows: " 'Destructive device' is defined in the Commentary to § 2K1.4 (Arson: Property Damage by Use of Explosives).".

The Commentary to § 2B1.2 captioned "Application Notes" is amended in Note 1 by deleting "and 'firearm' " and inserting in lieu thereof ", 'firearm,' and 'destructive device' ", and by deleting the last sentence as follows: " 'Destructive device' is defined in the Commentary to § 2K1.4 (Arson: Property Damage by Use of Explosives).".

The Commentary to § 2B2.1 captioned "Application Notes" is amended in Note 1 by inserting " 'destructive device,' " immediately before "and 'dangerous weapon' ", and by deleting the last sentence as follows: " 'Destructive device' is defined in the Commentary to § 2K1.4 (Arson: Property Damage by Use of Explosives).".

The Commentary to § 2B2.2 captioned "Application Notes" is amended in Note 1 by deleting "and 'firearm' " and inserting in lieu thereof ", 'firearm,' 'destructive device,' and 'dangerous weapon' ", and by deleting the last sentence as follows: " 'Destructive device' is defined in the Commentary to § 2K1.4 (Arson: Property Damage by Use of Explosives).".

The Commentary to § 2B3.1 captioned "Application Notes" is amended in Note 1 by inserting " 'destructive device,' " immediately before " 'dangerous weapon,' ".

This amendment inserts the definition of a destructive device, formerly in the Commentary to § 2K1.4, in the Commentary to § 1B1.1, with minor revisions to the examples of the articles prohibited by 18 U.S.C. 921(a)(4) to better reflect the statutory provision. This amendment also conforms the commentary of various offense guidelines to reference the definitions set forth in Application Note 1 of the Commentary to § 1B1.1.

(N) The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the subdivision of the "Drug Equivalency Tables" captioned "Cocaine and Other Schedule I and II Stimulants (and their immediate precursors)" by inserting the following additional entry as the seventh entry: "1 gm of Methamphetamine (Pure) = 50 gm of cocaine/10 gm of heroin".

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the subdivision of the "Drug Equivalency Tables" captioned "Cocaine and Other Schedule I and II Stimulants (and their immediate precursors)" in the twelfth (formerly eleventh) entry by deleting "0.418 gm" and inserting in lieu thereof "0.416 gm".

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the subdivision of the "Drug Equivalency Tables" captioned "Schedule IV Substances" by deleting "1 gm of Mephobarbital = 0.125 mg of heroin/0.125 gm of marijuana".

This amendment provides an additional equivalency to reflect the distinction between methamphetamine and pure methamphetamine in the Drug Quantity Table at § 2D1.1(c), corrects an error in the equivalency for Phenylacetone/P_2P, and deletes a duplicate listing for Mephobarbital.

(O) The Commentary to § 2K1.7 captioned "Application Notes", as amended, is further amended in the third sentence of Note 4 by deleting "because, in such cases," and inserting in lieu thereof "required because".

The Commentary to § 2K2.4 captioned "Application Notes", as amended, is further amended in the third sentence of Note 4 by inserting "required" immediately before "because".

This amendment makes editorial revisions to enhance the clarity of this commentary.

(P) The Commentary to § 2L1.1 captioned "Background" is amended in the second sentence by deleting "and did not know the alien was excludable as a subversive" immediately following "profit".

This amendment conforms the Background Commentary of this section to the guideline, as amended.

(Q) The Commentary to § 3C1.1 captioned "Application Notes", as amended, is further amended in Note 2 by deleting "In addition to conduct prohibited by 18 U.S.C. 1501–1516,"; and in Note 3 by inserting the following additional subdivision:

"(i) conduct prohibited by 18 U.S.C. 1501–1516.", and by deleting the period at the end of subdivision (h) and inserting in lieu thereof a semicolon.

This amendment makes an editorial revision to enhance the clarity of this commentary.

(R) The Commentary to § 3D1.2 captioned "Application Notes," as amended, is further amended in example (4) of Note 4 by deleting "this subsection" and inserting in lieu thereof "either this subsection or subsection (d)".

This amendment clarifies that, in this example, the counts are to be grouped together under either subsection (b) or (d).

(S) The Commentary to § 3D1.2 captioned "Application Notes" is amended in Note 6 by deleting the third sentence of the first paragraph as follows:

"The same general type of offense" is to be construed broadly, and would include, for example, larceny, embezzlement, forgery, and fraud."; and by inserting the following additional paragraph as the second paragraph:

"Counts involving offenses to which different offense guidelines apply are grouped together under subsection (d) if the offenses are of the same general type and otherwise meet the criteria for grouping under this subsection. In such cases, the offense guideline that results in the highest offense level is used; see § 3D1.3(b). The 'same general type' of offense is to be construed broadly, and would include, for example, larceny, embezzlement, forgery, and fraud.".

This amendment clarifies the interaction of §§ 3D1.2(d) and 3D1.3(b).

(T) Section 5K2.0, as amended, is further amended in the seventh sentence of the first paragraph by deleting "listed elsewhere in the guidelines (e.g., as an adjustment or specific offense characteristic)" and inserting in lieu thereof "taken into consideration in the guidelines (e.g., as a specific offense characteristic or other adjustment)".

This amendment clarifies this sentence.

The President

Proclamation 6218 of October 19, 1990

National Red Ribbon Week for a Drug-Free America, 1990

By the President of the United States of America

A Proclamation

Illegal drug use costs the United States billions of dollars each year in terms of health care demands and lost economic productivity. Far more disturbing, however, is its daily toll in terms of human lives disrupted and destroyed. Those costs are immeasurable.

Former addicts, families terrified by neighborhood violence, law enforcement officials and emergency medical personnel—all can describe the grave consequences of illicit drug use. Affecting individuals and families of every region, every race, every age, and every walk of life, illicit drug use undermines the very foundation of our society.

Fortunately, however, we have made important strides in the fight against illegal drug use. Tougher law enforcement and escalated interdiction efforts, as well as education, prevention, and treatment programs in both the public and private sectors, have begun to prove effective. In many parts of the United States today cocaine is harder to find, more expensive, and less pure than it was one year ago. The operations of a number of drug cartels have been disrupted. Surveys and other research indicators show that attitudes toward illicit drug use, including casual use, are also changing for the better. More and more Americans are refusing to tolerate in their communities illegal drugs and the insidious profiteers who deal them. More and more Americans agree that there is no safe use of illegal drugs. Most important, perhaps, more and more youngsters in this country are beginning to recognize that experimenting with drugs isn't cool, that drugs can kill.

While we have made welcome the progress in the war on drugs—thanks to the creative and determined efforts of law enforcement personnel, parents, educators, and other concerned individuals—we still have much work to do. The National Institute on Drug Abuse reports that as many as 14.5 million Americans age 12 and over currently use illicit drugs. Seventy percent of all illegal drug users are employed—a percentage that underscores the threat drugs pose to the strength and productivity of American business and industry.

During the past several years, the National Federation of Parents for Drug-Free Youth has encouraged the observance of a "National Red Ribbon Week for a Drug-Free America." Millions of Americans—including members of parents' groups, civic organizations, and business associations across the country—take part in this important public education campaign. The red ribbon signifies our refusal to tolerate the use of illicit drugs and the use of alcohol by underaged youth. By wearing or displaying this bright symbol, we express our personal resolve and collective determination to help eliminate the scourge of drugs.

The Congress, by Senate Joint Resolution 348, has designated the week of October 20 through October 28, 1990, as "National Red Ribbon Week for a Drug-Free America" and has authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week of October 20 through October 28, 1990, as National Red Ribbon Week for a Drug-Free America. I call upon all Americans to observe this week by supporting community drug and alcohol abuse prevention efforts. I also encourage every American to wear a red ribbon during this week as an expression of his or her commitment to a healthy, drug-free lifestyle.

IN WITNESS WHEREOF, I have hereunto set my hand this nineteenth day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

George Bush

Proclamation 6211 of October 20, 1990

American Textile Industry Bicentennial Week, 1990

By the President of the United States of America

A Proclamation

In marking the 200th anniversary of the establishment of the American textile industry, we are reminded of the important role this industry has played in the growth and competitiveness of our Nation's economy.

The United States has led all other countries in investment in state-of-the-art machinery for its textile industry, and today it is effectively meeting the challenge of intense foreign competition. Indeed, our commitment to technological improvements has contributed significantly to the strength and productivity of the textile industry. As a result, U.S. textile production continued to grow during the 1980s.

By investing nearly $18 billion in new plants and equipment during the past decade, the textile industry has prepared to meet the new challenges and opportunities of the 1990s—including greater integration of the North American and European markets, economic reforms in Eastern Europe and the Soviet Union, and further progress in the elimination of trade barriers worldwide.

The Congress, by House Joint Resolution 518, has designated the week of October 13 through October 20, 1990, as "American Textile Industry Bicentennial Week" and has authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week of October 13 through 20, 1990, as American Textile Industry Bicentennial Week. I invite the American people to join with me in honoring the more than one million men and women who produce the fiber and fabrics of our Nation.

IN WITNESS WHEREOF, I have hereunto set my hand this twentieth day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

LIST OF PUBLIC LAWS

Last List October 22, 1990

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 523-6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 2999/Pub. L. 101-438
To provide for the conveyance of certain lands to the State of California, and for other purposes. (Oct. 17, 1990; 104 Stat. 993; 3 pages) Price: $1.00

H.R. 1677/Pub. L. 101-437
Children's Television Act of 1990. (Oct. 18, 1990; 104 Stat. 996; 5 pages) Price: $1.00

Upon expiration of the 10-day period prescribed by the Constitution of the United States, H.R. 1677 became law on Oct. 18, 1990, without the President's signature.

Public Laws

are now available for the 101st Congress, 2nd Session, 1990

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 101st Congress, 2nd Session, 1990.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

The Federal Register

Regulations appear as agency documents which are published daily in the Federal Register and codified annually in the Code of Federal Regulations

The Federal Register, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a Federal Register subscription are: the LSA (List of CFR Sections Affected) which leads users of the Code of Federal Regulations to amendatory actions published in the daily Federal Register; and the cumulative Federal Register Index.

The Code of Federal Regulations (CFR) comprising approximately 196 volumes contains the annual codification of the final regulations printed in the Federal Register. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current CFR volumes appears both in the Federal Register each Monday and the monthly LSA (List of CFR Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

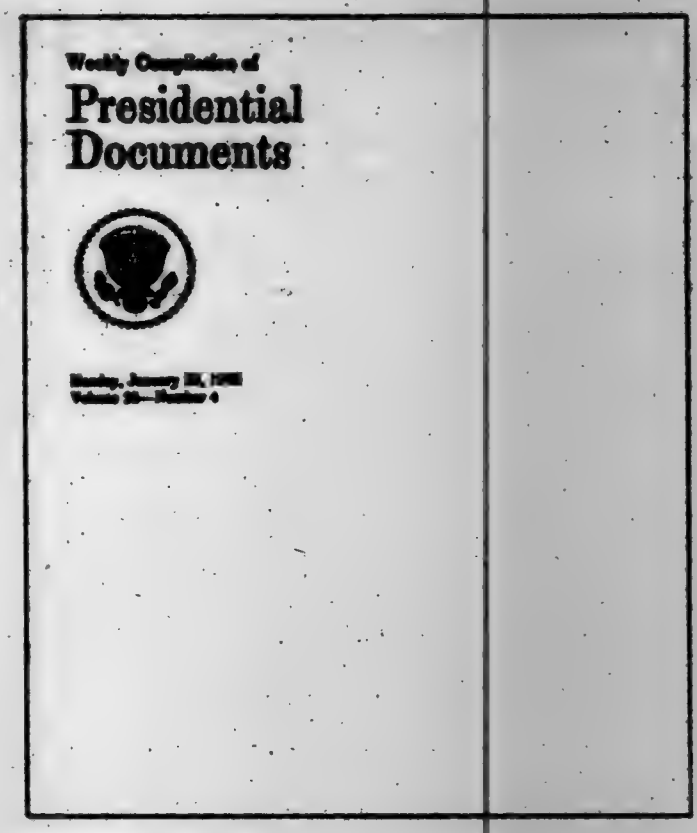
The authentic text behind the news . . .

The Weekly Compilation of Presidential Documents

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the Federal Register shall be judicially noticed.

The Federal Register will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the Federal Register.

How To Cite This Publication: Use the volume number and the page number. Example: 55 FR 12345.

Title 3—

The President

Presidential Determination No. 90–22 of June 3, 1990

Determination Under Subsection 402(d)(5) of the Trade Act of 1974—Continuation of the Waiver Applicable to the Czech and Slovak Federal Republic

Memorandum for the Secretary of State

Pursuant to the authority vested in me under the Trade Act of 1974 (Public Law 93–618) ("the Act") I determine that the continuation of the waiver applicable to the Czech and Slovak Federal Republic will substantially promote the objectives of Section 402 of the Act, 19 U.S.C. 2432.

You are authorized and directed to publish this determination in the Federal Register.

Determination Under Section 405 of Public Law 101-246

Memorandum for the Secretary of State

Pursuant to Section 405 of Public Law 101-246, I hereby determine that the United Nations

—has continued implementation of consensus-based decision-making procedures on budgetary matters, which assure that sufficient attention is paid to the views of the United States and other member states who are major financial contributors to the budget;

—is making further progress toward the elimination of the abuse and secondment in the United Nations Secretariat; and

—is implementing the 15 percent reduction in the staff of the United Nations Secretariat, and that such reduction is being equitably applied among the nationals on such staff.

You are authorized and directed to report this determination to the Congress and to publish it in the **Federal Register**.

Presidential Determination No. 90–40 of September 30, 1990

Determination to Authorize the Furnishing of Emergency Military Assistance to Israel Under Section 506(a)(1) of the Foreign Assistance Act

Memorandum for the Secretary of State

Pursuant to the authority vested in me by Section 506(a)(1) of the Foreign Assistance Act of 1961, as amended ("the Act"), 22 U.S.C. 2318(a)(1), I hereby determine that:

1. an unforeseen emergency exists which requires immediate military assistance to Israel; and

2. the aforementioned emergency requirement cannot be met under the authority of the Arms Export Control Act or any other law except Section 506 of the Act.

Therefore, I hereby authorize the furnishing of up to $74 million in defense articles from the stocks of the Department of Defense, defense services of the Department of Defense, and military education and training.

You are authorized and directed to report this determination to the Congress immediately and to publish it in the **Federal Register**.

Drawdown from DoD Stocks for Disaster Assistance for the Philippines

Memorandum for the Secretary of State

Pursuant to the authority vested in me by Section 506(a)(2) of the Foreign Assistance Act of 1961, as amended, 22 U.S.C. 2318(a)(2), I hereby determine that it is in the national interest of the United States to draw down defense articles from the stocks of the Department of Defense, defense services of the Department of Defense, and military education and training for the purpose of the provision of international disaster assistance for the Philippines.

Therefore, I hereby authorize the furnishing of up to $10 million of defense articles from the stocks of the Department of Defense, defense services of the Department of Defense, and military education and training for the purposes and under the authorities of Chapter 9 of Part I of the Act.

You are authorized and directed to report this determination to the Congress immediately and to arrange for its publication in the Federal Register.

Rules and Regulations

Federal Register
Vol. 55, No. 208
Wednesday, October 24, 1990

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

[Docket No. FV-90-202IR]

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Temporarily Relaxation of Minimum Size Requirements for Red Seedless Grapefruit and Dancy Tangerines for the 1990-91 Season

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule temporarily relaxes the minimum size requirements for domestic and import shipments of red seedless grapefruit to 3$^{5}/_{16}$ inches in diameter on October 22, 1990, the same date that the minimum was to have increased to 3$^{5}/_{16}$ inches in diameter under the current handling regulation. This rule also temporarily reduces the minimum size requirement for domestic shipments of Dancy tangerines to 2$^{9}/_{16}$ inches in diameter from 2$^{9}/_{16}$ inches in diameter. This action is based on the current and prospective crop and market demand conditions and maturity level and size composition of these citrus fruits.

DATES: The grapefruit size relaxation is effective for the period October 22, 1990, through October 20, 1991, and the Dancy tangerine size relaxation is effective for the period November 5, 1990, through August 18, 1991. Comments which are received by November 23, 1990, will be considered prior to issuance of the final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525-S, Washington, DC 20090-6456. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. All comments should reference the docket number, date, and page number of this issue of the Federal Register.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525-S, Washington, DC 20090-6456; telephone: (202) 475-3918.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Agreement and Marketing Order No. 905, both as amended (7 CFR part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This rule has been reviewed by the Department in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 100 Florida citrus handlers subject to regulation under the marketing order covering oranges, grapefruit, tangerines, and tangelos grown in Florida. In addition, there are about 13,000 producers of these citrus fruits in Florida. There are also about 25 importers of grapefruit. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. A minority of these handlers and a majority of the producers and a majority of importers may be classified as small entities.

The Citrus Administrative Committee (CAC), which administers the marketing order locally, met September 11, 1990, and unanimously recommended this action. The CAC meets prior to and during each season to review the handling regulations effective on a continuous basis for each citrus fruit regulated under the marketing order. CAC meetings are open to the public, and interested persons may express their views at these meetings. The U.S. Department of Agriculture reviews CAC recommendations and information submitted by the CAC and other available information and determines whether modification, suspension, or termination of the handling regulations would tend to effectuate the declared policy of the Act.

Section 905.306 (7 CFR 905.306) in Table I of paragraph (a) specifies minimum grade and size requirements for grapefruit and tangerines grown in Florida shipped to the domestic market. The domestic market is defined as the 48 contiguous States and the District of Columbia of the United States.

This action relaxes the minimum size requirement for domestic shipments of red seedless grapefruit grown in Florida to 3$^{5}/_{16}$ inches in diameter for the period October 22, 1990, through October 20, 1991. Unless relaxed, under the current handling regulation the minimum size would increase to 3$^{5}/_{16}$ inches in diameter from 3$^{5}/_{16}$ inches in diameter on October 22, 1990.

The CAC recommended this action based on the expected maturity, flavor level, and size composition of the crop remaining for shipment on October 22. The CAC reports that this season's Florida grapefuit shipments began in mid-August, about three weeks earlier than normal. It also reports that grapefruit 3$^{5}/_{16}$ inches in diameter is of more advanced maturity than normal for this time of the year and that it is receiving good consumer acceptance. Also, the grapefruit are not sizing as fast as they normally do. This action will permit smaller sized grapefruit to

BEST COPY AVAILABLE

continue to be shipped to domestic markets to meet the anticipated market demand and is designed to maximize shipments to fresh market channels. The Florida grapefruit shipping season normally begins in September and continues until the following July.

This action also relaxes the minimum size requirement for domestic shipments of Dancy tangerines grown in Florida to 2 1/16 inches in diameter from 2 2/16 inches for the period November 5, 1990 through August 15, 1991. This action follows the practice of prior years of lowering the size requirement at such time during the season when the smaller sized tangerines reach an acceptable level of flavor and maturity. By November 5 of this year, the CAC expects that the smaller sized tangerines will have reached a satisfactory level of maturity and flavor which consumers prefer.

The CAC recommended this action based on the expected maturity, flavor level, and size composition of the crop remaining for shipment on November 5. The CAC expects this season's Dancy tangerine crop to mature about three weeks earlier than normal. This action will permit size 210 Dancy tangerines to be shipped to domestic markets to meet anticipated market demand and is designed to maximize shipments to fresh market channels. Dancy tangerine shipments each season normally begin about the first of November, peak in December, and end the following March.

Some Florida citrus fruit shipments are exempt from the handling requirements effective under the marketing order. Handlers may ship up to 15 standard packed cartons (12 bushels) of fruit per day under a minimum quantity exemption provision. Also, handlers may ship up to two standard packed cartons of fruit per day in gift packages which are individually addressed and not for resale, under the current exemption provisions. Fruit shipped for animal feed is also exempt under specific conditions. In addition, fruit shipped to commercial processors for conversion into canned or frozen products or into a beverage base are not subject to the handling requirements.

Section 8e of the Act (7 U.S.C. 608e–1) provides that whenever specified commodities, including grapefruit, are regulated under a Federal marketing order, imports of these commodities into the United States are prohibited unless they meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodities. Section 8e also provides that whenever two or more marketing orders regulate the same commodity produced in different areas of the United States, the Secretary shall determine which area the imported commodity is in most direct competition with and apply the regulations for that area to the imported commodity.

Grapefruit import requirements are specified in § 944.106 (7 CFR part 944), and are effective under section 8e of the Act. That section requires that grapefruit imported into the United States must meet the same minimum grade and size requirements as those specified for the various varieties of Florida grapefruit in Table I of paragraph (a) in § 905.306. Since this action reduces minimum size requirements for domestically produced Florida red seedless grapefruit, the reduced size requirements also apply to imported red seedless grapefruit. Since revising Table I automatically changes the import requirements, no change is necessary in § 944.106. An exemption provision in the grapefruit import regulation permits persons to import up to 10 standard packed ¼-bushel cartons exempt from the import requirements.

This action reflects the CAC's and the Department's appraisal of the need to make the size relaxations hereinafter set forth. The Department's view is that this action will have a beneficial impact on producers and handlers since it would allow Florida citrus handlers to ship those sizes of fruit available to meet consumer needs consistent with this season's crop and market conditions.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other information, it is found that the relaxations set forth below will lead to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined, upon good cause, that it is impracticable, unnecessary and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because: (1) This action relaxes minimum size requirements currently in effect for Florida red seedless grapefruit and Dancy tangerines and imported red seedless grapefruit; (2) Florida red seedless grapefruit and Dancy tangerine handlers are aware of this action which was recommended by the CAC at a public meeting and they will need no additional time to comply with the relaxed requirements; (3) shipment of the 1990–91 season Florida grapefruit crop has begun and the Florida Dancy tangerine crop is expected to be in full swing by November 5, 1990; and (4) the rule provides a 30-day comment period, and any comments received will be considered prior to issuance of a final rule.

List of Subjects in 7 CFR Part 905

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements, Tangelos, Tangerines.

For the reasons set forth in the preamble, 7 CFR part 905 is amended as follows:

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

1. The authority citation for 7 CFR part 905 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. In paragraph (a), Table I, of § 905.306 the entries for seedless, red grapefruit and Dancy tangerines are revised to read as follows:

Note: This section will appear in the annual Code of Federal Regulations.

§ 905.306 Orange, Grapefruit, Tangerine, and Tangelo Regulation 6.

BILLING CODE 3410-02-M

Rural Electrification Administration

7 CFR Parts 1744, 1751, 1773, and 1788

Electric and Telephone Programs, Redesignation of Regulations; Correction

AGENCY: Rural Electrification Administration, USDA.

ACTION: Correction to final rule.

SUMMARY: The Rural Electrification Administration (REA) hereby corrects minor typographical errors in a final rule published September 27, 1990, at 55 FR 39393 to redesignate certain Agency regulations as part of a project to simplify, clarify, and update REA regulations. None of the published errors affects the substance of any regulation. One of the errors is in the Distribution Table in the preamble to the published regulation; the other two are in the headings of regulations.

FOR FURTHER INFORMATION CONTACT: Mr. Blaine D. Stockton, Jr., Assistant Administrator—Management, Rural Electrification Administration, U.S. Department of Agriculture, Washington, DC 20250-1500, telephone number (202) 382-9552.

SUPPLEMENTARY INFORMATION: In document 90-22901 beginning on page 39393 in the issue of Thursday September 27, 1990, REA makes the following corrections:

1. On page 39394 in the second column, at the end of the Distribution Table, the following entry is added:

Old part or section	*New part or section*
* * * * *	
1788	1773

PART 1744—[CORRECTED]

2. On page 39396, in the second column, in the heading for part 1744, the words "POST LOAN" should read "POST-LOAN".

PART 1751—[CORRECTED]

3. On page 39397, in the third column, in the heading for part 1751, the word "PROCEDURE" should read "PROCEDURES".

Dated: October 18, 1990.

Gary C. Byrne,

Administrator.

U.S. Department of Energy, CE-43.1, Docket No. CE-RM-87-102, Forrestal Building, Room 6B-025, 1000 Independence Avenue SW., Washington, DC 20585 (202) 586-9320.

SUPPLEMENTARY INFORMATION:

I. Discussion
II. Environmental Review
III. Regulatory Impact, Federalism and Regulatory Flexibility Reviews

I. Discussion

DOE proposed energy conservation standards for ten classes of refrigerators, refrigerator-freezers, and freezers (hereafter referred to as refrigerators) in a Notice of Proposed Rulemaking (Proposed Rule) on December 2, 1988 (53 FR 48796). DOE promulgated final standards for the ten classes on November 17, 1989. (Final Rule) (54 FR 47916). These standards take effect January 1, 1993.

The Proposed Rule was developed, based on detailed engineering and economic analyses. The engineering analysis was based on adding energy conserving design options to baseline units in each of the respective classes in order of increasing consumer paybacks. The design option with the fastest payback was added first, then the option with the second fastest payback, continuing in this manner until all the options were added that are technologically feasible. A discussion of the engineering analysis and the design options used in the Proposed Rule is found in the Proposed Rule's "Engineering Analysis of Design Options." See Technical Support Document, DOE/CE-0239, November 1988, chapter 3. (Hereafter referred to as the 1988 Technical Support Document.)

In performing the engineering analysis, the Department used a

computer model developed under contract to DOE by Arthur D. Little, Inc. (ADL). The ADL model is used to predict the energy consumption of a refrigerator, refrigerator-freezer or freezer, calculated from its design characteristics.

The model produces an equation that contains a constant number and a variable number. The constant is an indicator of the direct energy used for fan motors and heaters and compressor energy used to remove the internally generated heat from fan motors and heaters. The variable number calculates the energy needed to maintain the interior temperatures specified by the DOE test procedures. The energy needed depends upon the heat leakage into the cabinet, which is a function of the volume of the fresh food and freezer compartments. Therefore, this number will vary for different size equipment within a given class. A more detailed description of the model is provided in chapter 3 and appendix A of the 1989 Technical Support Document.

To run the ADL model requires detailed information on the cabinet dimensions, insulation levels, compressor performance, heat exchanger effectiveness, and auxiliary electrical equipment for different size equipment. When the Proposed Rule was issued, DOE had sufficient data for only three classes of refrigeration products: (1) Refrigerator-freezers—automatic defrost with top-mounted freezer without through-the-door ice service; (2) refrigerator-freezers—automatic defrost with side-mounted freezer without through-the-door ice service; and (3) upright freezers with manual defrost.

To predict the energy consumption of these three classes as a function of the volume of the fresh food and freezer compartments, the ADL model was used to provide the relationship between energy consumption and adjusted volume modeling products of different capacity but otherwise identical characteristics. The results of these calculations are regression equations dependent upon the characteristics, e.g., compressor efficiency, insulation efficiency, chosen for each model.

For the seven remaining classes of refrigeration products—(1) Refrigerators and refrigerator-freezers with manual defrost; (2) refrigerator-freezers with partial automatic defrost; (3) refrigerator-freezers—automatic defrost with bottom-mounted freezer without through-the-door ice service; (4) refrigerator-freezers—automatic defrost with top-mounted freezer with through-the-door ice service; (5) refrigerator-freezers—automatic defrost with side-mounted freezer with through-the-door ice service; (6) upright freezers with automatic defrost; and (7) chest freezers and all other freezers—the engineering analysis used a combination of manufacturers' estimates of energy use and extrapolation of simulation results from the ADL model for the three previous classes to predict energy use for the various design options for the seven classes.

Relationships were developed between energy use and adjusted volume for the three classes simulated by the ADL model, as previously discussed. The relationships between energy use and adjusted volume for the remaining seven classes were obtained by adjusting the regression equation.

The Department then analyzed a range of potential standard levels to determine the economic impact of each potential standard.

In the comment period, DOE received sufficient data concerning four additional classes of refrigeration products—(1) Refrigerator-freezer—partial automatic defrost; (2) refrigerator-freezers—automatic defrost with top-mounted freezer with through-the-door ice service; (3) refrigerator-freezers—automatic defrost with side-mounted freezer with through-the-door ice service; and (4) upright freezers with automatic defrost—to allow the use of the ADL model for these four classes. DOE thus used the ADL model for seven classes for the Final Rule, the three Initial classes and the four for which sufficient data were received.

For the remaining three classes of refrigeration products—(1) refrigerators and refrigerator-freezers with manual defrost; (2) refrigerator-freezers—automatic defrost with bottom-mounted freezer without through-the-door ice service; and (3) chest freezers and all other freezers—DOE still did not have sufficient data to use the ADL model. Thus, following the close of the comment period, a microcomputer spreadsheet version of the ADL model was developed which required less complete data than the full ADL model but more than data than DOE had available for the Proposed Rule. DOE had only enough additional data to run the spreadsheet model at certain sizes in each of the three classes, but not all sizes in those classes. For example, for manual defrost refrigerators and refrigerator-freezers, DOE ran the spreadsheet model at a size of 17 cubic feet and then extended this result to cover all sizes for capacities of less than 39 cubic feet.

In late 1989, after publication of the Final Rule, DOE staff plotted the standards in preparation for delivery of a technical paper on refrigerator design options at the American Society of Heating, Refrigerating and Air-Conditioning Engineers winter 1989–1990 meeting. This analysis of the 1993 standard levels showed that for certain sizes of units in each of the three classes affected by this Notice, the 1993 standard level, compared to the 1990 standard level, resulted in significantly greater reduction in maximum allowable energy use than for other sizes. For smaller sizes of manual defrost refrigerators and refrigerator-freezers, for example, the standard required a reduction in maximum energy use of approximately sixty percent as contrasted with a decrease on the order of twenty-five percent for most of the models in the other seven classes.[1] Further, the Department concluded that the standard level of the Final Rule cannot be engineered based on the design options identified. In fact, if retained, there is the risk that this standard would eliminate from the market compact manual defrost refrigerator-freezers and result in the increased sale of more consumptive compact automatic defrost refrigerator-freezers.

Based upon comments on the Proposed Rule, DOE changed the design options considered in the engineering analysis. These changes included recognizing an energy use inefficiency or "penalty" for chlorofluorocarbon substitution and less efficient compressors. DOE also added a design option, thicker insulation, which resulted in a more efficient unit. This new combination of designs should have resulted in the Final Rule's "max tech" level being more energy consumptive than that of the Proposed Rule. However, when these design options were used in the microcomputer spreadsheet version of the ADL model, the analysis resulted in more stringent levels, i.e., allowing less energy consumption. Based upon this review, DOE staff concluded that the engineering analysis was in error for this class and recommended that action be taken to correct the standard level.[2]

---

[1] Expressed differently, this standard is more stringent by one-third than the maximum technologically feasible level ("max tech") in the Proposed Rule. In the Final Rule, the "max tech" level is twice as stringent as that in the Proposed Rule.

[2] In 1989, subsequent to DOE staff identification of this problem, representatives of refrigerator manufacturers and of the Association of Home Applicance Manufacturers informally approached DOE with their concerns regarding the stringency of the standards for compact manual defrost refrigerators and refrigerator-freezers and automatic defrost refrigerator-freezers with bottom-mounted

Continued

Similarly, the Department concluded that the engineering analysis produced results that are more stringent for certain sizes of automatic defrost refrigerator-freezers with bottom-mounted freezer without through-the-door ice service than can be technologically achieved. Based on the conclusion that the engineering analysis was defective, DOE also decided to correct the standard level for the third class.[3]

The analysis used in developing the corrected standards contained in today's Notice (1) uses the energy consumption for the baseline volume derived for the Proposed Rule as found in appendix A of the 1988 Technical Support Document, (2) makes the adjustment for no chlorofluorocarbons (CFCs) as discussed in the Final Rule, and (3) obtains the energy/adjusted volume equations from the regression equations for the classes which were simulated with the ADL model, as was done in the Proposed Rule. This revised analysis results in the corrected standards equations which are the subject of today's Notice. The analysis was performed for all three classes of refrigerators for which the spreadsheet model was used.

Today's Notice specifies a reduction in energy use from that required by the 1990 standards for refrigerators and refrigerator-freezers with manual defrost of 6.5 percent for compact units, 2 cubic feet adjusted volume. The Final Rule required a 60.5 percent reduction for these units. For larger units, 17 cubic feet adjusted volume, today's Notice requires a 10.9 percent reduction while the Final Rule required a reduction of 28.4 percent.

For refrigeratror-freezers—automatic defrost with bottom-mounted freezer without through-the-door ice service, today's Notice requires a reduction of 32.7 percent for 18 cubic feet adjusted volume units. This compares with a reduction of 37.2 percent required by the Final Rule. For larger units, 21 cubic feet, today's Notice requires a 33.3 percent reduction, while the Final Rule required a reduction of 38.1 percent.

For chest freezers and all other freezers, today's Notice requires a reduction of 26.3 percent for the small units, 5 cubic feet adjusted volume. This compares with a reduction of 38.0 percent in the Final Rule. For larger units, 28 cubic feet adjusted volume, today's Notice requires a 26.6 percent reduction while the Final Rule required a reduction of 27.8 percent.

The Department is today correcting the standard levels found in 10 CFR part 430, § 430.32(a).

II. Environmental Review

In issuing the Proposed Rule, the Department prepared an Environmental Assessment (EA) (DOE/EA–0372) that was published within the 1988 Technical Support Document. The environmental effects associated with various standard levels were found not to be significant, and a Finding of No Significant Impact (FONSI) was published along with the Proposed Rule. (53 FR 48826, December 2, 1988).

The Department has concluded that the impact of today's Notice falls within the range of the FONSI previously published. Specifically, in the year 2010, the pollutant reductions of sulfur dioxide (SO_2), nitrogen dioxide (NO_2), and carbon dioxide (CO_2) addressed in the FONSI are 151,000 tons, 100,000 tons, and 9,180,000 tons, respectively. DOE considered the range of energy savings previously discussed and the market shares of the three affected classes. Refrigerators, and refrigerator-freezers with manual defrost account for 4.7 percent of refrigerator and refrigerator-freezer sales. Refrigerator-freezers with bottom-mounted freezers account for 2.5 percent of refrigerator and refrigerator-freezer sales. Chest freezers account for 47.4 percent of freezer sales. Based on the above, the Department estimates that the overall energy and pollutant savings from today's Notice will be reduced no more than 5.1 percent from the estimates provided in the Final Rule. Thus, in the year 2010, the revised pollutant reductions resulting from today's Notice of SO_2, NO_2, and CO_2 are estimated to be less than 117,000 tons, 70,000 tons, and 7,299,000 tons, respectively.

III. Regulatory Impact, Federalism and Regulatory Flexibility Reviews

The Department reviewed the Final Rule in accordance with the Department's obligations regarding the above subjects. Because of the minimal impact of the change resulting from today's Notice on the overall rulemaking in terms of the percentages of change of energy use and the market share of the affected classes previously discussed, the Department has concluded that the impact of today's Notice falls within the range and scope of the impacts presented in the Notice of Final Rulemaking and are addressed adequately in that Notice.

Issued in Washington, DC, October 18, 1990.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

List of Subjects in 10 CFR Part 430

Energy conservation, Household appliances.

For the reasons set out in the preamble, the following corrections are made to the final energy conservation standards for refrigerators, refrigerator-freezers, and freezers published in the Federal Register on November 17, 1988 (54 FR 47916) and which appear at 10 CFR 430.32(a).

PART 430—[AMENDED]

1. The authority citation for 10 CFR part 430 continues to read as follows:

Authority: Energy Policy and Conservation Act, Title III, Part B, as amended by National Energy Conservation Policy Act, Title VI, Part 2, by the National Appliance Energy Conservation Act, and by the National Appliance Energy Conservation Amendments of 1988 (42 U.S.C. 6291–6309).

2. Section 430.32(a) is correctly amended by revising items 1, 5, and 10 in the table to read as follows; paragraph (a) introductory text is set out for the convenience of the reader.

§ 430.32 Energy conservation standards and effective dates.

(a) Refrigerators/refrigerator-freezers/freezers. These standards do not apply to refrigerators and refrigerator-freezers with total refrigerated volume exceeding 39 cubic feet or freezers with total refrigerated volume exceeding 30 cubic feet.

---

freezers without through-the-door ice service. The information provided by industry representatives included new data in the form of graphs similar to material prepared by DOE staff and upon which DOE staff had already reached its conclusion as to error and the means for correction.

[3] The references to the discussion of the microcomputer spreadsheet program in section 3.2.4, Energy Use Data, of the 1989 Technical Support Document, DOE/CE–0277, November 1989 are superseded by this Notice.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 17

RIN 2900-AC31

Contract Medical Care; Non-Federal Hospital Payment Rates

AGENCY: Department of Health and Human Services and Department of Veterans Affairs.

ACTION: Final regulations.

SUMMARY: The Department of Health and Human Services (HHS) and the Department of Veterans Affairs (VA) have jointly amended VA's medical series of regulations to carry out provisions of Public Law 99-576, Veterans' Benefits Improvement and Health-Care Authorization Act of 1986. These regulations describe the payment methodology and amounts for non-Federal public and private hospital care provided at VA expense. Payment methodology and amounts will be determined by the Health Care Financing Administration (HCFA) PRICER.

EFFECTIVE DATE: November 23, 1990.

FOR FURTHER INFORMATION CONTACT: Paul C. Trybus, Chief, Policies and Procedures Division (136F), Medical Administration Service, Veterans Health Services and Research Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233-2504.

SUPPLEMENTARY INFORMATION: A total of twenty-two comments were received concerning the proposed regulatory changes published on pages 47725-47729 of the Federal Register of November 28, 1988 (53 FR 47725). Following careful analysis of these comments, the Department of Veterans Affairs (VA), in concert with the Department of Health and Human Services reopened the comment period to allow comment on a suggested change to the proposal. The suggested change would grant an exemption from these proposed VA regulations for alternative systems which have been granted a federal waiver under the provisions of 42 U.S.C. 1395f(b)(3) or 42 U.S.C. 1395ww(c), for Medicare payment. The former permits Medicare payment demonstration projects. The latter permits a State's hospital rate regulation system to be substituted for the Medicare payment system.

VA received five comments during the reopened comment period on the proposal to exempt alternative systems which have been granted a Federal waiver from the prospective payment system under either of these authorities for the purposes of Medicare payment. Those commenters all urged adoption of an exemption from these regulations. In urging that position, the commenters stated in essence that a separate VA payment policy would unnecessarily disrupt an alternative system of payment that is in operation, and has proven to be successful in effectively containing hospital costs.

After considering these comments, VA is exempting from these regulations those alternative systems which have been granted a Federal waiver for the purposes of Medicare payment. VA has taken this position for several reasons. In promulgating these regulations, VA and HHS are implementing a requirement in section 233 of Public Law 99-576. The clear purpose of that requirement is to contain costs VA incurs as a result of the hospitalization of VA beneficiaries in non-Federal facilities. Congress clearly contemplated that the payment policies reflected in such regulation would be similar to that established under the Medicare program. (Senate Report 99-444 (1986) p. 59). The above-cited provisions of law authorizing the waiver of alternative systems from the prospective payment system, for purposes of Medicare payment, also seek to achieve cost containment. Since Congress has provided for such an alternative cost-containment policy in connection with Medicare, VA would be furthering the purpose of any expectations underlying section 233 of Public Law 99-576 by making provisions in its regulation for such alternative systems. Moreover, imposing a different reimbursement system on providers participating under alternative systems may jeopardize or impede the progress made by the alternative systems, without necessarily achieving any significant additional cost containment benefit to the VA.

Fourteen commenters did not address the purpose for reopening the comment period, and instead outlined concerns that were raised during the previous comment period. There were no opposing comments received on the issue presented for reopening the comment period.

The final rule is promulgated in accordance with section 233 of Public Law 99-576, Veterans' Benefits Improvement and Health-Care Authorization Act of 1986, which requires VA and HHS to issue joint regulations concerning the payment methodology and amounts which VA would provide hospitals which furnish inpatient hospital care to veterans whose care has been authorized or will be sponsored by VA. The provisions of the statute concerning admission practices will be addressed in a separate rulemaking document being proposed by HHS. That regulation will be codified at 42 CFR 489.20. This final rule utilizes a payment system that duplicates the HHS Prospective Payment System (PPS) in most respects, including the provisions of 42 U.S.C. 1395f(b)(3) and 42 U.S.C. 1395ww(c), which are separate authorities that override the Medicare prospective payment system (PPS). The differences from the Medicare system are in the method VA will use to reimburse PPS hospitals for capital-related costs, and direct medical education costs, and to pay non-PPS hospitals for their services. Revisions in this final rule are made as a result of the re-opened comment period. The final rule adopts the proposed regulation with substantive changes, discussed below.

Medicare Methodology

Section 1886(d) of the Social Security Act (42 U.S.C. 1395ww(d)) established the prospective payment system for inpatient hospital services furnished to Medicare beneficiaries. Under PPS, payment for the operating costs of inpatient hospital services furnished by hospitals subject to the system (generally, short-term, acute-care hospitals) is made on the basis of prospectively determined rates and applied on a per discharge basis. Payment for other costs related to inpatient services (capital-related costs, kidney, heart and liver acquisition costs incurred by hospitals with approved transplantation centers, direct costs of medical education and the costs of qualified nonphysician anesthetists in small rural hospitals) is made on a reasonable cost or other applicable basis.

Additional payments are made for outlier cases, for indirect medical education costs, and for hospitals that serve a disproportionate share of low income patients. Under PPS, a hospital is paid a prospectively determined payment rate, based on the patient's diagnosis, for furnishing inpatient services and is at risk for operating costs that exceed its payment rate. Similarly, if costs are below the payment rate, hospitals may keep the difference.

The PPS provides a payment amount for inpatient operating costs including: (1) Operating costs for routine services such as the costs of room, board, and routine nursing services; (2) operating costs for ancillary services, such as radiology and laboratory services furnished to hospital inpatients; (3) special care unit operating costs (intensive care type unit services); and (4) malpractice insurance costs related to services furnished to inpatients.

The following inpatient hospital costs are excluded from the prospective payment amounts and paid for on a reasonable cost or other applicable basis: (1) Capital-related costs (2) costs of services furnished by interns and residents in approved teaching programs, as described in sections 1861(b)(6) and 1886(h) of the Social Security Act (the Act), (3) kidney, heart and liver acquisition costs incurred by hospitals with approved transplantation centers, and (4) the costs of qualified nonphysician anesthetists in small rural hospitals.

Certain types of hospitals are not paid under PPS and are termed non-PPS hospitals. These hospitals include psychiatric, rehabilitation, long-term care, children's and cancer hospitals. Also included in the non-PPS hospital definition are psychiatric and rehabilitation units which are located in PPS hospitals. These are termed distinct part hospital units.

The Final Rule

Under the final rule, VA would apply the following methodology to pay hospitals. VA would receive a hospital bill for services to a particular veteran. VA will determine if the services provided can be authorized for payment in accordance with 38 CFR 17.50b or 17.80. If the care is payable, under the final rule, VA will use the commercially available "GROUPER" software to assign a Diagnostic Related Group (DRG) to the episode of care. This is the same GROUPER that Medicare and its fiscal intermediaries use to determine DRGs for Medicare payment. VA will then use a computer program developed by the Health Care Financing Administration (HCFA) called the HCFA PRICER to determine the payment amount. This program duplicates what the Medicare fiscal intermediaries use to determine payment for inpatient operating costs and additional payments for outliers (i.e., day or cost outliers), disproportionate share adjustment, and indirect medical education for facilities covered by PPS.

HCFA requires each participating hospital to submit to the fiscal intermediaries a cost report that contains information on its overall costs of operation, including capital-related costs, kidney, heart and liver acquisition costs, and direct medical education costs. HCFA then pays the hospitals, for allowable costs not covered by the PPS payments, either the Medicare share of their reasonable costs or other applicable payments. In accordance with the final rule, VA will pay hospitals the VA share of these costs based on a national average cost of capital-related costs, kidney, heart and liver acquisition costs incurred by hospitals with approved transplantation centers, direct costs of medical education and the costs of qualified nonphysician anesthetists in small rural hospitals, which HCFA has determined to be 9 percent of the average PPS payment. VA will adjust this figure each year based on information provided by HCFA. VA chose to use this approach so hospitals would not have to report excluded cost data to two government departments. HCFA requires each non-PPS hospital and distinct part hospital unit to report its costs to intermediary then determines the individual hospital cost-to-charge ratio. This ratio reflects the ratio between HCFA allowed costs and the charges the hospital charges the public for hospital care. The cost-to-charge ratio may be used to approximate the cost of services by multiplying the hospital's charges for services to Medicare beneficiaries by its cost-to-charge ratio. Medicare fiscal intermediaries use a departmental cost-to-charge ratio to determine payments to non-PPS hospitals and distinct part hospitals for ancillary services. In order for hospitals not to have to report this data to two government departments, VA will use the national operating cost-to-charge ratio for non-PPS hospitals of 63 percent plus the 9 percent add-on for capital-related costs, kidney, heart and liver acquisition costs incurred by hospitals with approved transplantation centers, direct costs of medical education and the costs of qualified nonphysician anesthetists in small rural hospitals as its multiplier for payment determinations to non-PPS hospitals. Therefore each non-PPS hospital's payment will be calculated by multiplying their charges by 72 percent.

VA has adopted limited exceptions to the payment principles set forth above. These are discussed below.

Responses to Comments

In responding to the publication of the proposed regulation, commenters addressed 12 different areas of concern. Each area will be addressed in the aggregate rather than responding to each concern of an individual commenter.

The preamble to the proposed regulation included a statement to the effect that VA thought that the implementation of the regulations would not have a significant economic impact on a substantial number of small entities. Thirteen responders from the state of Alaska disagreed with this postulate, citing its impact in the State of Alaska, and urged that VA either postpone the implementation of the regulation in the State of Alaska so that a regulatory flexibility analysis under the Regulatory Flexibility Act (RFA), 5 U.S.C. 603–604, could be done to ascertain the economic impact in the State of Alaska, or completely suspend the implementation of the regulations in Alaska.

As regards to these commenters' assertions that the regulation would have a significant economic impact on a substantial number of small entities, VA acknowledges that this rule will result in hospitals receiving lower payment per VA patient than under the current payment methodology. It is important to note, however, that when caring for VA patients, Alaskan hospitals are currently

paid in full for each episode of care. This is not always the case for private patients since some of them fail to pay. Currently, these hospitals thus save collection cost and have effectively received a greater payment per VA case than received from other patients.

Based on VA experience, it appears that only 14 hospitals in Alaska are likely to treat veterans and thereby be affected by this rule. Of these, only four are considered small entities within the meaning of the Regulatory Flexibility Act. The Size Standards Division of the Small Business Administration (SBA) provides that in order for a hospital to be considered as a small entity under the RFA that it must have an annualized revenue of $3.5 million or less (13 CFR 121.2).

VA has reviewed the economic impact of the final rule in the State of Alaska. The methodology by which VA reached this projection is as follows. HCFA has indicated that nationally the ratio between HCFA payment and billed charges is 72 percent for PPS hospitals. HCFA has indicated that multiplying this ratio by the billed charges for a given episode of care would approximate the amount of payment an average hospital would receive under PPS. VA then multiplied its payments to Alaskan hospitals by that same percentage (72 percent) and subtracted the product from VA payment to that hospital in FY 1988 to ascertain what the reduction in VA payments would be under the final rule. This reduction was then divided by the hospital's total costs (as reported to HCFA) to determine the total reduction in hospital revenue resulting from the imposition of these regulations.

Based on our analysis, the four hospitals that do qualify as small businesses under the RFA will experience a reduction of 0.21 percent to 1.45 percent of their total revenue under the final regulation. It appears that, in general, the smaller hospitals will absorb a smaller percentage reduction than those not considered small entities under the RFA. Based on this analysis, VA concludes that the final rule will not cause a significant economic impact on a substantial number of small entities.

VA has considered the suggestion in some of the comments that VA establish a different payment methodology for Alaska because the regulation would limit hospital payment to a formula that does not, in their view, fully pay them. It is noted that the regulations' methodology makes provision for cost of living adjustments so that Alaskan hospitals get a higher rate of payment. For example, special provisions of the Medicare PPS system address the higher costs incurred by hospitals in Alaska; the high wage index adjustments for the labor-related portion of the PPS standized payment amounts; and the special adjustment (currently an increase of 25 percent) for non-labor related costs. The wage index would also apply to the labor-related component of costs paid on a reasonable cost basis. Therefore, establishing entirely different payment methodologies for application in individual States, as suggested, would undercut the purpose which joint VA—HHS regulations were to achieve.

VA acknowledges that non-Federal hospitals in Alaska generally have a greater veteran caseload than hospitals in other States. Providing and entirely different methodology for Alaska, however, would dilute the effect which the regulations were intended to achieve, to make fair payments while achieving cost containment. Congress anticipated that VA would adopt payment policies similar to those under Medicare. Indeed, the effect on those hospitals is essentially the same as it would be if, instead of being VA beneficiaries, the patients in question were Medicare beneficiaries, and payment were being provided under the Medicare program.

VA has for years simply paid hospitals in Alaska and elsewhere for their "usual and customary charges." As a result of that unregulated approach, VA experienced significant increases in contract care costs in Alaska and elsewhere in recent years. Given a statutory mandate to develop regulations in concert with HHS, VA is doing no more than applying the general Medicare payment formula, which Congress considered to be an appropriate mechanism. That payment model is aimed at making fair payments, while achieving cost containment. In applying that model evenhandedly, VA is simply seeking to carry out the purposes the legislation sought to achieve (See Senate Report 99-44 (1986), pp. 58-60).

VA does recognize that its role in Alaska, and thus the impact of this regulation, differs from that in other States. VA operates no hospital in Alaska, it has no arrangement with any other Federal provider to furnish hospital care to Alaskan veterans at this time, and it relies extensively on broad contracting authority to meet veterans' need (38 U.S.C. 603(a)(5)). As a result, there is a disproportionate mix in the veteran contract care caseload in comparison with other states. For the reasons discussed above, VA does not believe these circumstances warrant an exemption or establishment of a different payment methodology for Alaskan hospitals. However, the immediate impact of the proposed change could be formidable and potentially disruptive to some of these hospitals, none of which qualify as small business entities. Accordingly, the final rule makes provision for an interim payment methodology so as to permit an orderly transition period. Thus, the final rule establishes a one-year transition period applicable to episodes of care beginning on or after the effective date of the regulation. During that period VA will pay Alaskan hospitals the amount determined by the HCFA PRICER plus 50 percent to the difference between the amount billed by the hospital and the amount determined by the PRICER. After the one-year transition has elapsed, VA will pay the amount determined by the PRICER.

Seven commenters expressed a view of another subject, asserting that VA should pay capital costs and direct medical education costs using actual cost data or another applicable basis (as HCFA does) rather than, as was proposed, basing payment for these costs on a national average. No change is made in the final rule in response to these comments. Yearly, each PPS hospital provides HCFA with its actual capital costs and direct medical education costs. HCFA will then determine the national average of these items and will pass this information to VA. VA will use the HCFA PRICER to determine the exact DRG payment that Medicare would allow and then add to this amount the cost of capital and direct medical education using a national average. This streamlined approach roughly approximates what Medicare would pay. It is noted, under Section 1886(g)(3)(A) of the Act, HCFA has not paid the full amount of incurred capital costs since 1987. In addition, under section 1886(a), enacted by section 6002 of OBRA 1989, the current discount is 15 percent. Further, it should be noted that capital-related costs are scheduled to be incorporated into the Medicare PPS by October 1, 1991, as required by section 1886(g)(1)(A) of the Act. VA realizes that the use of a national average may overcompensate some hospitals (for that year) which have lower capital and direct medical education costs while at the same time may not provide full dollar compensation to those hospitals that have higher costs that year. However, since this is an average figure, VA anticipates that many hospitals will experience fluctuation in these costs from year to year and may as often be overcompensated, as they fall into the

lower cost portion of the spectrum, as undercompensated. VA is also cognizant of the fact that payment on the basis of actual cost results in more precision. For VA to seek to achieve such precision would be unreasonable, however, comparing the cost of accomplishing such precision to the relatively small numbers of veterans whose care VA sponsors (in relation to the size of the Medicare program) and the generally limited benefit that could be conferred through that effort on each individual hospital. In contrast, the cost of achieving such precision would be very heavy. In order for VA to collect and maintain such data VA would have to increase its Central Office staffing by 15 and increase the information collection burden on the public by some 10,000 hours. VA's budget for Medical Administration Service, which would have to support such staffing, has in fact been shrinking, and that staffing has been reduced from 46 to 26 over the period of 1981 to 1989. Achieving the sought-after precision would, therefore, come at a very substantial cost to VA in administering its own health care system, which consists of 172 hospitals and 223 outpatient clinics. Therefore, this regulation will rely on the use of national averages to pay for the cost of capital and medical education.

The proposed rule indicates that VA would pay non-PPS hospitals at a ratio of 64 percent of billed charges. (This figure was in error; the correct HCFA-calculated figure is 63 percent). Non-PPS hospitals are those that are excluded from the Medicare Prospective Payment System. These facilities include hospitals and distinct part hospital units such as psychiatric units and rehabilitation hospitals. Each year these facilities provide HCFA with their cost reports which indicate their aggregate charges for their services and what their services cost. Last year, HCFA determined that when it divided the non-PPS hospitals' cost by their charges that the resulting ratio was 63 percent. Five commenters requested that VA adopt HCFA's method of payment for non-PPS hospitals. All expressed the view that payment based on this percentage of billed charges was not adequate. The final rule does not adopt this suggestion, but VA will provide for an increased level of payment of these hospitals at a ratio of 72 percent of billed charges. The 72 percent payment level includes the 63 percent ratio of operating cost to charges and the 9 percent add-on for capital-related costs, kidney, heart and liver acquisition costs incurred by hospitals with approved transplantation centers, direct costs of medical education and the costs of qualified nonphysician anesthetists in small rural hospitals. In considering the comments, it has become apparent that paying non-PPS hospitals at the proposed percentage rate would result in payments at less than cost for most such hospitals. Taking this into account, VA will pay non-PPS hospitals at the 72 percent rate, which is the same rate which HCFA pays the average non-PPS hospital. We believe this revision will ameliorate the central concern raised by the commenters.

In adopting this change, however, VA is not adopting the very complex formula which HCFA applies in paying these hospitals. VA realizes that HCFA's payment method for non-PPS providers would result in more precision. However, as stated above VA would have to employ additional staff and increase the information collection burden on the public to achieve the requested precision. The cost of achieving this level of precision would be unreasonable in relation to the relatively small number of veterans whose care VA authorizes in non-PPS facilities.

Five commenters expressed the view that VA did not address the impact that these regulations would have on rural hospitals and urged that VA take the needs of rural hospitals into consideration. In fact, VA's payment methodology does take account of the circumstances associated with a rural location. This methodology uses the HCFA PRICER, which is a computer program that VA will use to duplicate the Medicare PPS payment methodology. The HCFA PRICER takes into account the provsions of Public Law 100–203 which were intended by Congress to address the needs of rural hospitals. For example, under the HCFA PRICER for discharges on or after January 1, 1990, rural hospitals received an increase in standardized rates of 9.72 percent. This compares to increases of 5.62 percent for hospitals in large urban areas and 4.97 percent for hospitals located in other urban areas. Differential updates were also provided by Public Law 101–239 effective for discharges occurring on or after January 1, 1990. Rural hospitals received a 9.72 percent increase as compared to 5.62 percent for large urban hospitals and 4.97 percent for other urban hospitals. Since VA is using the HCFA PRICER to emulate the Medicare PPS methodology and the HCFA PRICER contains an adjustment for rural hospitals mandated by Congress, no change in the rule is deemed warranted. The PRICER program also incorporates a number of other provisions which afford favorable treatment to hospitals in rural areas, such as the special treatment afforded Rural Referral Centers and Sole Community Hospitals, and provisions treating certain rural hospitals as urban for purposes of applying the wage index. In addition, the provisions of Public Law 101–239 created a new type of rural hospital that receives special treatment for cost reporting periods beginning on or after April 1, 1990, and ending on or before March 31, 1993. These hospitals are known as Medicare-dependent small rural hospitals.

The proposed rule provided that VA would use the same methodology that HCFA uses to pay hospitals with the exception that VA would use a streamlined approach to approximate HCFA's capital and direct medical education add-on payments, for care provided to veterans under VA sponsorship. Two commenters requested that VA use the same methodology that is used to make DRG payments under the Defense Department's CHAMPUS program to non-DoD providers of health care. The final rule makes no change in response to this suggestion. In administering the CHAMPUS program, DoD has contracted with fiscal intermediaries who are familiar with PPS methodology. These intermediaries determine the CHAMPUS payments based on cost reports submitted by health care providers. It would not be practicable for VA to use the CHAMPUS methodology since it is based on a very different patient profile. The CHAMPUS population is made up primarily of women and children while VA's population is made up primarily of males who are closer in age to patients covered by the Medicare program. This is important since the DRG assignment made by the commercially available grouper uses age and sex characteristics to assign a DRG.

One commenter, without requesting any changes to the proposed rule, asked if VA would make day and cost outlier payments on transfers. VA will make cost outlier payments and this issue is addressed in the final rule at 38 CFR 17.50f(d) and 38 CFR 17.57(d). Under Medicare, day outlier payments are made only to the discharging hospital. Thus, they are not made to a transferring hospital. See section 42 CFR 412.62. The final rule applies the same limitation. See 38 CFR 17.50f(d).

The proposed regulations state that VA will pay for current PPS pass-throughs such as the cost of capital and the cost of direct medical education. One commenter, without requesting a

change, asked if VA would reimburse hospitals for items that are pass-throughs in PPS. As discussed above, the final rule provides that VA will add a fixed percentage amount for the cost of capital and direct medical education to the DRG payments in lieu of pass-through payments based on costs or other applicable basis.

Under current VA policy, VA is the primary payer for all approved care in non-VA facilities. One commenter suggested that VA should be the secondary payer and pay the balance after the veteran's insurance had paid the hospital. VA feels that it would not be appropriate to address this issue in this final rule, particularly as it raises significant issues that were not raised in the proposal. VA may, however, study this issue in the future.

VA has proposed to use the HCFA PRICER to determine payments to non-VA hospitals for care provided to veterans. The HCFA PRICER makes a calculation to determine payment for the disproportionate share adjustment. The disproportionate share adjustment increases payments to certain hospitals for medical care provided to indigents for whom the hospital will not receive payment for services provided. One commenter expressed the belief that VA did not consider the disproportionate share adjustment. Since the HCFA PRICER calculates an adjustment for disproportionate share and VA is going to use the HCFA PRICER, it is clear that qualifying hospitals will be paid for the disproportionate share adjustment under the proposed regulation. Accordingly, the final rule reflects no change on this point.

Every year PPS and non-PPS hospitals submit cost data to HCFA. HCFA then determines each hospital's payment for capital-related costs and the cost of direct medical education. HCFA also determines each non-PPS hospital's cost-to-charge ratio by dividing the cost of care by billed charges. HCFA then determines a national ratio for each of these items. VA's payment methodology will be revised each year with the data supplied by HCFA. VA has revised the proposed regulation to delete references to the exact amounts of the adjustments for capital-related costs, kidney, heart and liver acquisition costs incurred by hospitals with approved transplantation centers, direct costs of medical education, the costs of qualified nonphysician anesthetists in small rural hospitals, and the cost-to-charge ratio for non-PPS hospitals. VA has made this change to avoid having to amend this regulation annually to reflect adjustments made by HCFA. The final regulation provides that VA will, however, publish in the Federal Register the annual changes to adjustments for the cost of capital and medical education and the cost-to-charge ratio for non-PPS hospitals once they have been determined by HCFA. VA does not consider this change in the body of the regulation to be substantive.

This final regulation is considered non-major under the criteria of Executive Order 12291, Federal Regulation. It will not have an annual effect on the economy of $100 million or more; it will not result in major increases in costs for consumers, individual industries, Federal, State or local government agencies, or geographic regions. It will have no adverse effect on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Secretary certifies that this final regulation will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 through 612. It also will impose no regulatory, paperwork or administrative burdens on small entities since the change concerns the way VA pays for medical care in non-VA hospitals.

The Catalog of Federal Domestic Assistance number is 64.009.

List of Subjects in 38 CFR Part 17

Alcoholism, Claims, Dental health, Drug abuse, Foreign relations, Government contracts, Grants programs-health, Health care, Health facilities, Health professions, Medical devices, Medical research, Mental health programs, Nursing home care, Philippines, Veterans.

Approved: April 25, 1990.

Edward J. Derwinski,

Secretary of Veterans Affairs.

Approved: August 8, 1990.

Louis W. Sullivan,

Secretary of Health and Human Services.

38 CFR Part 17, Medical, is amended as follows:

PART 17—[AMENDED]

1. The authority citation for § 17.50e is revised to read as follows:

§ 17.50e Use of hospitals under sharing agreements.

* * * * *

(Authority: 38 U.S.C. 5033)

2. Section 17.50f is revised to read as follows:

§ 17.50f Payment for authorized public or private hospital care.

Except as otherwise provided in this section, payment for public or private hospital care authorized under § 17.50b of this part shall be based on a prospective payment system similar to that used in the Medicare program for paying for similar inpatient hospital services in the community. Payment shall be made using the Health Care Financing Administration (HCFA) PRICER for each diagnosis-related group (DRG) applicable to the episode of care.

(a) Payment shall be made of the full prospective payment amount per discharge, as determined according to the methodology in subparts D and G of 42 CFR part 412, as appropriate.

(b)(1) In the case of a veteran who was transferred to another facility before completion of care, VA shall pay the transferring hospital an amount calculated by the HCFA PRICER for each patient day of care, not to exceed the full DRG rate as provided in paragraph (a) of this section. The hospital that ultimately discharges the patient will receive the full DRG payment.

(2) In the case of a veteran who has transferred from a hospital and/or distinct part unit excluded by Medicare from the DRG-based prospective payment system or from a hospital that does not participate in Medicare, the transferring hospital will receive a payment for each patient day of care not to exceed the amount provided in paragraph (i) of this section.

(c) VA shall pay the providing facility the full DRG-based rate or reasonable cost, without regard to any copayments or deductible required by any Federal law that is not applicable to VA.

(d) If the cost or length of a veteran's care exceeds an applicable threshold amount, as determined by the HCFA PRICER program, VA shall pay, in addition to the amount payable under paragraph (a) of this section, an outlier payment calculated by the HCFA PRICER program, in accordance with subpart F of 42 CFR part 412.

(e) In addition to the amount payable under paragraph (a) of this section, VA shall pay, for each discharge, an amount to cover the non-Federal hospital's capital-related costs, kidney, heart and liver acquisition costs incurred by hospitals with approved transplantation centers, direct costs of medical education, and the costs of qualified nonphysician anesthetists in small rural hospitals. These amounts

will be determined by the Chief Medical Director on an annual basis and published in the "Notices" section of the Federal Register.

(f) Payment shall be made only for those services authorized by VA.

(g) Payments made in accordance with this section shall constitute payment in full and the provider or agent for the provider may not impose any additional charge on a veteran or his or her health care insurer for any inpatient services for which payment is made by the VA.

(h) Medical services not included in inpatient operating costs which the DRG payment covers (42 CFR part 412) shall be paid only to the extent they are reasonable and not in excess of rates or fees the provider of services charges the general public for similar services in the community.

(i) Hospitals of distinct part hospital units excluded from the prospective payment system by Medicare and hospitals that do not participate in Medicare will be paid at the national cost-to-charge ratio times the billed charges that are reasonable, usual, customary, and not in excess of rates or fees the hospital charges the general public for similar services in the community.

(j) A hospital participating in an alternative payment system that has been granted a Federal waiver from the prospective payment system under the provisions of 42 U.S.C. section 1395f(b)(3) or 42 U.S.C. section 1395ww(c) for the purposes of Medicare payment shall not be subject to the payment methodology set forth in this section so long as such Federal waiver remains in effect.

(k) Payments for episodes of hospital care furnished in Alaska that begin during the period starting on the effective date of this section through the 364th day thereafter will be in the amount determined by the HCFA PRICER plus 50 percent of the difference between the amount billed by the hospital and the amount determined by the PRICER. Claims for services provided during that period will be accepted for payment by VA under this paragraph (k) until December 31 of the year following the year in which this section became effective.

(Authority: Section 233, Pub. L. 99-576)

3. Section 17.87 is revised to read as follows:

§ 17.87 Allowable rates and fees.

When it has been determined that a veteran has received public or private hospital care, the expenses of which may be paid under § 17.80 of this part, the payment of such expenses shall, except as otherwise provided in this section, be based on a prospective payment system similar to that used in the Medicare program for paying for similar inpatient hospital services in the community. Payment shall be made by using the HCFA PRICER for each diagnosis-related group (DRG) applicable to the episode of care.

(a) Payment shall be made of the full prospective payment amount per discharge, as determined according to the methodology in subparts D and G of 42 CFR part 412, as appropriate.

(b)(1) In the case of a veteran who was transferred to another facility before completion of care, VA shall pay the transferring hospital an amount calculated by the HCFA PRICER for each patient day of care, not to exceed the full DRG rate as provided in paragraph (a) of this section. The hospital that ultimately discharges the patient will receive the full DRG payment.

(2) In the case of a veteran who has transferred from a hospital and/or distinct part unit excluded by Medicare from the DRG-based prospective payment system and hospitals that do not participate in Medicare, the transferring hospital will receive a payment for each patient day of care not to exceed that provided in paragraph (i) of this section.

(c) VA shall pay the providing facility the full DRG-based rate without regard to any copayments or deductible required by any Federal law that is not applicable to VA.

(d) If the cost of length of a veteran's care exceeds an applicable threshold amount, as determined by the HCFA PRICER program, VA shall pay, in addition to the amount payable under paragraph (a) of this section, an outlier payment calculated by the HCFA PRICER program, in accordance with subpart F of 42 CFR part 412.

(e) In addition to the amount payable under paragraph (a) of this section, VA shall pay, for each discharge, an amount to cover the non-Federal hospital's capital-related costs, kidney, heart and liver acquisition costs incurred by hospitals with approved transplantation centers, direct costs of medical education, and the costs of qualified nonphysician anesthetists in small rural hospitals. These amounts will be determined by the Chief Medical Director on an annual basis and published in the "Notices" section of the Federal Register.

(f) Payment shall be made only for those services authorized by VA.

(g) Payment by VA shall constitute payment in full and the provider or agent for the provider may not impose any additional charge on a veteran or his or her health care insurer for any inpatient services for which payment is made by VA.

(h) Medical services not included in inpatient operating costs which the DRG covers (42 CFR part 412) shall be paid or reimbursed only to the extent they are reasonable and not in excess of rates or fees the hospital or provider of services charges the general public for similar services in the community.

(i) Hospital or distinct part hospital units excluded from the prospective payment system by Medicare and hospitals that do not participate in Medicare will be paid at the national cost to charge ratio times the billed charges that are reasonable, usual, customary, and not in excess of the rates or fees the hospital charges the general public for similar services in the community.

(j) A hospital participating in an alternative payment system that has been granted a Federal waiver from the prospective payment system under the provisions of 42 U.S.C. section 1395f(b)(3) or 42 U.S.C. section 1395ww(c) for the purposes of Medicare payment shall not be subject to the payment methodology set forth in this section so long as such Federal waiver remains in effect. VA pays such a hospital in accordance with paragraph (i) of this section.

(k) Payments for episodes of hospital care furnished in Alaska that begin during the period starting on the effective date of this section through the 364th day thereafter will be in the amount determined by the HCFA PRICER plus 50 percent of the difference between the amount billed by the hospital and the amount determined by the PRICER. In order to cover this special dispensation period, claims for services provided on the enactment date of this regulation, and extending during this period, will be accepted for payment by VA until December 31 of the year following the year in which these regulations were enacted.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 672

[Docket No. 91050-0010]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of prohibition of retention of groundfish.

SUMMARY: The Secretary of Commerce (Secretary) is prohibiting further retention of pollock by vessels fishing in the Western and Central Regulatory Areas of the Gulf of Alaska and is requiring that pollock be treated in the same manner as prohibited species from 12 noon, Alaska local time, October 19, 1990, through December 31, 1990. This action is necessary to prevent the total allowable catch (TAC) for pollock in the combined Western and Central Regulatory Areas from being exceeded before the end of the fishing year. The intent of this action is to promote optimum use of groundfish while conserving pollock stocks.

EFFECTIVE DATES: 12 noon, Alaska local time (A.l.t.), October 19, 1990, through midnight, A.l.t., December 31, 1990.

FOR FURTHER INFORMATION CONTACT: Jessica A. Gharrett, Resource Management Specialist, NMFS, 907-586-7229.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Gulf of Alaska Groundfish Fishery (FMP) governs the groundfish fishery in the exclusive economic zone in the Gulf of Alaska under the Magnuson Fishery Conservation and Management Act. Regulations implementing the FMP are at 50 CFR 611.92 and part 672. Section 672.20(a) of the regulations establishes an optimum yield (OY) range of 116,000-800,000 metric tons (mt) for all groundfish species in the Gulf of Alaska. Total allowable catches (TACs) for target species and species groups are specified annually within the OY range and apportioned among the regulatory areas and districts.

Under § 672.20(c)(3), when the Regional Director, Alaska Region, NMFS (Regional Director), determines that the TAC of any target species or "other species" category in a regulatory area or district has been reached, the Secretary will publish a notice in the Federal Register declaring that the species or species group is to be treated as a prohibited species under § 672.20(e) in

all or part of that regulatory area or district.

The 1990 TAC specified for pollock in the Western and Central Regulatory Areas (including Shelikof Strait) is 70,000 mt (55 FR 3223, January 31, 1990). The Regional Director reports that U.S. vessels caught 55,178 mt of pollock through September 29 in the combined Western and Central Regulatory Areas. At current catch rates, the TAC will be taken by October 19, 1990.

Therefore, pursuant to § 672.20(c)(3) and (e), the Secretary is declaring that pollock must be treated in the same manner as prohibited species in the combined Western and Central Regulatory Areas of the Gulf of Alaska effective 12 noon, A.l.t., October 19, 1990, through midnight, December 31, 1990.

Classification

The Assistant Administrator for Fisheries, NOAA, finds for good cause that it is impractical and contrary to the public interest to provide prior notice and comment or to delay the effective date of this notice.

This action is taken under § 672.20 (c)(3) and (e) and is in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 55, No. 206
Wednesday, October 24, 1990

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 246

Special Supplemental Food Program for Women, Infants and Children (WIC); Review of Food Packages

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice of intent to conduct a review and solicit comments.

SUMMARY: In accordance with the mandate of section 123(c) of the Child Nutrition and WIC Reauthorization Act of 1989 (Pub. L. 101–147), the Department announces its intent to conduct a review of the appropriateness of the foods provided by the Special Supplemental Food Program for Women, Infants and Children (WIC). Directors of WIC State and local agencies and other individuals with expertise in the fields of nutrition and public health, as well as other interested parties, are encouraged to comment on issues proposed for consideration by the Department and to suggest additional issues for consideration within the scope of this review.

DATES: To be assured of consideration, comments must be received on or before December 24, 1990.

ADDRESSES: Comments should be sent to Ronald J. Vogel, Director, Supplemental Food Programs Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, room 1017, Alexandria, Virginia 22302, (703) 756–3742. Comments on this notice should be clearly labeled "Food Packages Review Notice" and should identify the specific issue(s) addressed. All written comments will be available for public inspection during regular business hours (8:30 a.m. to 5 p.m., Monday through Friday) at the office of the Food and Nutrition Service, 3101 Park Center Drive, Alexandria, Virginia 22302.

FOR FURTHER INFORMATION CONTACT: Philip K. Cohen, Supplemental Food Programs Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, room 1017, Alexandria, Virginia 22302, (703) 756–3730.

SUPPLEMENTARY INFORMATION: This Notice has been reviewed under Executive Order 12291 and has been classified not major. This Notice will not have an annual effect on the economy of $100 million or more, nor will it cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. This action will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Notice imposes no new reporting or recordkeeping provisions that are subject to OMB review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

This action is not a rule as defined by the Regulatory Flexibility Act (5 U.S.C. 601–612) and thus is exempt from the provisions of the Act.

This program is listed in the Catalog of Federal Domestic Assistance Programs under No. 10.557 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR part 3015, subpart V, and final rule-related notice published June 24, 1983 (48 FR 29114)).

Background

The authorizing legislation for the WIC Program, section 17 of the Child Nutrition Act (CNA) of 1966, as amended, established the program to provide supplemental foods and nutrition education to low-income pregnant, breastfeeding and postpartum women, infants and children up to age 5 who are at nutritional risk. The Program also serves as an adjunct to health care during critical times of growth and development to prevent the occurrence of health problems and to improve the health status of participants.

The CNA clearly established the WIC Program as "supplemental" in nature, that is, the food packages issued to various categories of participants are not intended to provide a complete diet but are designed to complement additional wholesome foods needed for a balanced diet. The Department administers a variety of food assistance programs which are designed to work together to provide a more nutritious diet to the Nation's low-income persons. Low-income families can, and frequently do, receive benefits from more than one of these Programs. The largest of these programs, the Food Stamp Program, provides general food assistance in the form of coupons which are used to increase the food-buying power of low-income individuals and families. Other programs are designed with a more limited population in mind. For example, the National School Lunch Program provides meals to children in school and the Child and Adult Care Food Program provides meals to persons in child and adult care centers and family day care homes. WIC Program benefits are intended to meet the special nutritional needs of a very specific population. The nutrition education provided by WIC assists participants in choosing foods which, together with the supplemental foods contained in the packages, meet their total dietary needs.

Section 17(b)(14) of the CNA defines "supplemental foods" as "those foods containing nutrients determined by nutritional research to be lacking in the diets of pregnant, breastfeeding, and postpartum women, infants, and children, as prescribed by the Secretary." The legislation provides substantial latitude to the Department in designing WIC food packages and places the obligation on the Department to prescribe foods which successfully target those nutrients critical to growth and development and typically lacking in the diets of the WIC-eligible population. Historically, the Department has based its prescriptions of WIC foods on sound nutritional research and input from State and local agencies, the health and scientific communities, industry and the general public. Further, these prescriptions have been developed with regard to a set of fundamental principles which are discussed below. Food package requirements appear in the WIC Program regulations at § 246.10(c). The current food packages (Appendix) were established through program regulations in 1980 (45 FR 74854 (November 12, 1980)). To better meet the nutritional needs of participants, the 1980 rulemaking created six different monthly packages: two for infants, one

for children and women with special dietary needs, one for children 1 to 5 years of age, one for pregnant and breastfeeding women, and one for nonbreastfeeding postpartum women. These packages were designed to follow infants' developmental needs and current pediatric feeding recommendations, complement the eating patterns of preschool children, and supplement the special requirements of pregnant and breastfeeding women.

Most importantly, the packages were developed to provide foods that are rich sources of the nutrients that tend to be lacking in the diets of the WIC-eligible population. The original legislation for the WIC Program specifically identified protein, iron, calcium and vitamins A and C as the target nutrients (Section 9 of Pub. L. 92-433, September 26, 1972). However, subsequent legislation deleted the references to specific target nutrients and instead directed the Department to prescribe the appropriate nutrients (Section 3 of Pub. L. 95-627, November 10, 1978). The Department determined, through an examination of nutritional research prior to the 1980 rulemaking, that the original target nutrients continued to be lacking among the WIC-eligible population. Thus protein, iron, calcium and vitamins A and C were again proposed for public comment (44 FR 69254 (November 30, 1979)), and were retained in the final rulemaking. Given the supplemental nature of the WIC Program, the food packages were not intended to supply 100 percent of the Recommended Daily Allowances (RDA) of each specified nutrient. Participants are expected to obtain a portion of the RDA from other food sources. However the packages do provide categories of foods which are high in one or more of the target nutrients and are capable of providing a substantial portion, and in some instances the entire amount, of the RDAs for the targeted nutrients.

Section 17(f)(12) of the CNA directs the Department to assure that, to the extent possible, the fat, sugar and salt content of WIC foods is appropriate. Several changes made to the WIC food packages in the 1980 rulemaking responded specifically to this mandate. For example, the Department established a limit on the amount of sugar permitted in WIC cereals and on the amount of cheese that can be issued, in part to moderate the salt content of the packages. With regard to the issue of fat content, the packages are designed to maintain a wide range of variability in fat levels within the food packages, depending on the particular foods prescribed. Individual tailoring enables State and local agencies to adapt food packages to the individual participant's needs for higher or lower fat levels, as well as to limit salt and sugar content as appropriate.

Aside from considerations which are specified in legislation, a prime consideration in food package design is cost. The Department is committed to serving as many eligible persons as possible while maintaining the nutritional integrity of the program. Efficiency in providing nutrients is important since increases in the total cost of the food packages reduce the number of participants served by the program. Thus, cost is an important consideration in the selection of WIC foods, and the packages are designed to encourage further cost control by permitting State and local agencies the flexibility to specify lower-cost food brands, types and container sizes within regulatory parameters.

State and local agencies are permitted flexibility in other aspects of the food packages as well. The quantities in the packages are expressed as maximum levels which must be available to participants as needed. However, State and local agencies have the authority to tailor quantities according to the needs of individual participants or categories of participants when based on a sound nutritional rationale. These tailoring provisions, established in program regulations (§ 246.10) and supplemented by FNS Instruction 804-1, are designed to permit State agencies to implement their own nutrition policies and philosophies within the parameters of the food packages. Section 17(f)(13) of the CNA and regulations at § 246.10(e) also give the Department the authority to approve substitution of foods by State agencies to allow for different cultural eating patterns under certain circumstances. State agencies must demonstrate that the substitute foods are nutritionally equivalent to foods prescribed by the Department. Pursuant to section 212(a) of the Hunger Prevention Act of 1988 (Pub. L. 100-435), which amended section 17(b) of the CNA, WIC regulations also give State agencies even greater flexibility to adapt food packages to the circumstances of homeless persons (§ 246.10(e)(3)).

In addition, the food packages are designed with regard to a number of practical considerations which reflect participant and program needs. The WIC foods should be readily available commercially, offer variety and versatility in preparation to participants, and have broad appeal. The foods should also permit daily consumption by an individual over a month's time. The WIC food package is an individual food prescription which, in order to have the full effect in improving nutritional status, must be consumed by the participant and not other family members. Further, the foods should generally be of domestic origin with minimal processing, since the WIC Program, along with other food assistance programs administered by the Department, participates in a longstanding partnership with American agriculture and endeavors to provide foods which support the nation's farming industry. Lastly, the packages should be administratively manageable for State and local agencies and vendors. That is, they should be clearly describable on food instruments and easily understood by both participants and vendors.

The Department acknowledges the continuing advances in nutritional research since the current food packages were established in 1980. Recommended dietary practices are constantly evolving in response to new knowledge and may hold significant implications for the WIC Program. Food technology has also advanced substantially over the last decade, resulting in a large number of new products, forms and container sizes. Many of these new products are specially fortified or formulated to address the needs of a special population, such as persons with allergies. The Department continues to receive requests to modify the current food packages and permit greater substitution of foods or the instruction of additional foods.

Mandated Food Package Review

The appropriateness of WIC foods continues to be an issue of major interest to the WIC community and to other nutrition and health professionals and representatives of the food industry. Accordingly, Congress mandated, in section 123(c) of Public Law 101-147, the Child Nutrition and WIC Reauthorization Act of 1989, that the Department conduct a review of the appropriateness of WIC food packages. The legislation directs the Department to examine the nutrient density of foods; to consider how effectively protein, calcium and iron are provided to WIC Program participants; and to consider the extent to which nutrients, for which program participants are most vulnerable to deficiencies, such as iron, thiamin, riboflavin, vitamin A, and zinc, are effectively provided to participants. The Act mandates that a final report be provided to Congress by June 30, 1992.

Review Procedure

The Department believes that the consideration of such important and complex issues will be best accomplished through public participation and is therefore soliciting input from all segments of the WIC community, as well as other informed, concerned members of the public. Further, the Department wishes to ensure that its review provides for the open and equitable consideration of these issues. The procedure which the Department has established for conducting its review is designed to provide the broadest possible base for public input, to include access to technical expertise from independent, credible entities, and to permit consideration of pertinent issues by a knowledgeable forum which is broadly representative of the WIC community.

Specially, the Department plans to enlist independent, technical experts to review comments submitted in response to this Notice and to develop technical papers summarizing and assessing this input for the Department's consideration. These papers will be presented for consideration to the National Advisory Council on Maternal, Infant and Fetal Nutrition (NAC), authorized by section 17(k) of the CNA, to consider issues relevant to the WIC Program and to make recommendations to the President and Congress. The NAC consists of 24 members (including State and local health officials and WIC Program administrators from a variety of agencies, physicians, program participants and a representative of the food industry) who share a common interest in and knowledge of the WIC Program. The Council's consideration of these issues will be included in the Department's report to Congress. This report, in turn, may influence future legislative action by Congress with regard to the WIC Program and/or regulatory action by the Department. Any program regulations issued by the Department as a result of this review would be published as proposals for public comment prior to promulgation of a final rulemaking.

Review Considerations/Parameters

Given the critical importance of food package content to nutritional impact of the WIC Program, commenters should carefully weigh the potential effects of their recommendations on the overall integrity of the packages. Responses to this notice should be developed with serious regard to the dietary needs of the WIC-eligible population, the supplemental nature of the program and the critical impact of cost of program services. In addition, the Department encourages commenters to submit suggestions with the following considerations in mind: (1) Cultural and ethnic food preferences; (2) commercial availability, variety and appeal of foods; (3) versatility in food preparation; (4) feasibility of apportionment into daily servings for an individual over a month's time; (5) domestic origin of foods; (6) State and local agency flexibility; and (7) administrative manageability.

The principles outlined above (and discussed elsewhere in this Notice) constitute a framework upon which WIC food packages have been developed. The Department encourages commenters to present their recommendations in the context of their potential impact on the affected food package(s) and their responsiveness to these principles or to alternate principles which the commenter believes should be considered.

Further, comments should include justification in terms of current nutritional research. Simple expressions of opinion or statements of position, without benefits of clearly stated rationale based on scientific evidence, would be of little use to the Department in the consideration of such complex issues.

Review Issues

The Department carefully considered how best to present the issues in this Notice. Attempts to provide background information specific to each issue inevitably resulted in issue descriptions which could bias responses. The Department believes that this review will benefit from the broadest possible scope of public input with minimal Departmental direction. Therefore, the following issues proposed for consideration are broadly stated without Departmental comment. Within the context of these broad issues, commenters are encouraged to state their responses as specifically as possible. Commenters may address additional issues which are within the scope of this review. Each of the issues presented below is numbered. In order to ensure that comments receive full and appropriate consideration, commenters are asked to precede each comment with the number of the issue to which it pertains, and to clearly define issues they have chosen to address which are not listed in this Notice.

1. What evidence exists to support or contraindicate the continuance of the five current target nutrients (high-quality protein, iron, calcium, and vitamins A and C) in the WIC food packages? What, if any, changes in or additions (e.g., thiamin, riboflavin, or zinc) to the WIC target nutrients should be considered and why?

2. What evidence exists to support or contraindicate the current WIC food packages as nutrient-dense (i.e., high nutrient to calorie rate) and bioavailable sources (i.e., high nutrient to calorie rate) and bioavailable sources (i.e., readily absorbed and utilized by the body) of the recommended WIC target nutrients? What, if any, foods should be introduced as nutrient-dense and bioavailable sources of the recommended WIC target nutrients and why?

3. Participants are currently divided into six groups for the purpose of prescribing food packages, and maximum monthly allotments of foods within each packages, and maximum monthly allotments of foods within each package have been established. What evidence exists to support these six groups, or to indicate the need for revisions of any of these groups? What evidence exists to support the maximum monthly allowances for foods within the food package for each of the six groups, or to indicate the need for revisions of any of these maximum allowances?

4. State agencies have the authority, with Federal approval based on a nutrition rationale, to categorically tailor WIC food packages to better address the nutritional needs of subgroups of participants (e.g., reduced quantities of foods in WIC food packages prescribed for 1 and 2 year old children compared to their older counterparts). What guidelines should the Department use in approving State agency proposals for categorically tailored food packages?

5. In addition, State agencies have the authority to tailor WIC food packages to better meet the nutritional needs of individual participants. For example, the amount of sugar, fat, sodium, and cholesterol provided to a specific participant by the food package can be modified through nutrition tailoring. What evidence exists to indicate that current WIC food packages provide sufficient flexibility for such individual tailoring, or to indicate that the design of any of the food packages should be changed to more fully accommodate or restrict individual tailoring?

6. Current regulations limit the sugar content of cereals which may be prescribed to participants. Is there any evidence to support or refute the need to establish regulatory limits on the amounts of sugar and other substances (e.g., fat, sodium, cholesterol, or artificial flavors, colors, or sweeteners) which may be contained in WIC food packages?

7. State agencies have the authority, with Federal approval, to make food substitutions in the WIC food packages to accommodate cultural eating patterns. Currently, any cultural food substitute must be comparable to the traditional WIC food counterpart in cost, availability, and nutritional value (at least with respect to the WIC target nutrients). What, if any, revisions should be made to the criteria to which State agencies must adhere in making such substitutions and why?

Dated: October 18, 1990.

Betty Jo Nelsen,

Administrator, Food and Nutrition Service.

MAXIMUM MONTHLY ALLOWANCES FOR WIC FOOD PACKAGES

[Food package numbers and target populations]

Foods	Food package I	Food package II	Food package III	Food package IV	Food package V	Food package VI
	Infants 0–3 months	Infants 4–12 months	Children/women with special dietary needs[1]	Children 1–5 years	Pregnant or breast-feeding women (up to 1 year post-partum)	Nonbreast-feeding postpartum women (up to 6 months postpartum)

[1] The supplemental foods described below are not authorized solely for the purpose of enhancing nutrient intake or managing body weight of participants.

[2] *Formula in Food Packages I and II*—refers to iron-fortified infant formula, which is a complete formula not requiring the addition of any ingredients other than water prior to being served in a liquid state, and which contains at least 100 milligrams of iron per liter of formula at standard dilution which supplies 67 kilocalories per 100 milliliters; i.e., approximately 20 kilocalories per fluid ounce of formula at standard dilution.

Formulas which do not meet these requirements are authorized when a physician determines that the infant has a medical condition which contraindicates the use of infant formula as described above. Low-calorie formulas are not authorized solely for the purpose of managing body weight.

RTF formula is only authorized when the competent professional authority determines and documents that there is an unsanitary or restricted water supply, there is poor refrigeration, or the person who is caring for an infant may have difficulty in correctly diluting concentrated liquid or powdered formula.

Formula in Food Package III—refers to product that is intended for use as an oral feeding and prescribed by a physician for a participant who has a medical condition which precludes or restricts the use of conventional foods and necessitates the use of a formula. Such medical conditions include, but are not limited to: metabolic disorders, inborn errors of amino acid metabolism, gastrointestinal disorders, malabsorption syndrome and allergies. Documentation of the physician's determination of the need for a formula and the specific formula prescribed shall be included in the participant's certification file.

The addition of 52 fluid ounces of concentrated liquid, 1 pound of powdered or 104 fluid ounces of RTF formula may be issued on an individual basis provided the need is demonstrated and documented in the participant's certification file by the competent professional authority.

[3] Vegetable juice is not authorized for infants due to the higher potential for food allergies. Issuance of juice prior to the time when the infant can drink from a cup is discouraged. The competent professional authority shall instruct the participant's parent or guardian to feed the juice to the participant from a cup to prevent "bottle caries."

[4] Infant juice which contains a minimum of 30 milligrams of vitamin C per 100 milliliters.

[5] Single strength fruit juice or vegetable juice, or both, which contains a minimum of 30 milligrams of vitamin C per 100 milliliters; or frozen concentrated fruit or vegetable juice, or both, which contains a minimum of 30 milligrams of vitamin C per 100 milliliters of reconstituted juice. Combinations of single strength and frozen concentrated juice may be issued as long as the total volume does not exceed the amount specified for single strength juice.

[6] Dry infant cereal which contains a minimum of 45 milligrams of iron per 100 grams of dry cereal. Cereal plus infant formula or cereal plus fruit combinations are not authorized infant cereals.

[7] Dry cereal (hot or cold) which contains a minimum of 28 milligrams of iron per 100 grams of dry cereal and not more than 21.2 grams of sucrose and other sugars per 100 grams of dry cereal (6 grams per ounce).

[8] Pasteurized fluid whole milk which is flavored or unflavored and which contains 400 International Units of vitamin D per quart (.9 L); or pasteurized fluid skim or lowfat milk which is flavored or unflavored and which contains 400 International Units of vitamin D and 2000 International Units of vitamin A per quart (.9 L); or pasteurized cultured buttermilk which contains 400 International Units of vitamin D and 2000 International Units of vitamin A per quart (.9 L).

Evaporated whole milk which contains 400 International Units of vitamin D per reconstituted quart (.9 L) or evaporated skimmed milk which contains 400 International Units of vitamin D and 2000 International Units of vitamin A per reconstituted quart (.9 L) may be substituted for fluid whole milk at the rate of 13 fluid ounces (.4 L) per quart (.9 L) of fluid whole milk. Dry whole milk which contains 400 International Units of vitamin D per reconstituted quart (.9 L) may be substituted for fluid whole milk at the rate of 1 pound (.4 kg) per 3 quarts (2.8 L) of fluid whole milk.

Nonfat or lowfat dry milk which contains 400 International Units of vitamin D and 2000 International Units of vitamin A per reconstituted quart (.9 L) may be substituted for fluid whole milk at the rate of 1 pound (.4 kg) per 5 quarts (4.7 L) of fluid whole milk.

Domestic cheese (pasteurized process American, Monterey Jack, Colby, natural Cheddar, Swiss, Brick, Muenster, Provolone, Mozzarella Part-Skim or Whole) may be substituted for fluid whole milk at the rate of 1 pound (.4 kg) of cheese per 3 quarts (2.8 L) of fluid whole milk. 4 pounds (1.8 kg) is the maximum amount of

cheese which may be substituted unless the participant is lactose intolerant. Additional cheese may be issued on an individual basis in cases of lactose intolerance, provided the need is documented in the participant's file by the competent professional authority.

² Dried egg mix may be substituted at the rate of 1.5 pounds (.7 kg) egg mix per 2 dozen fresh eggs or 2 pounds (.9 kg) egg mix per 2¼ dozen fresh eggs.

³⁴ Peanut butter or mature dry beans or peas including, but not limited to, lentils, black, navy, kidney, garbanzo, soy, pinto and mung beans, crowder, cow, split and black-eyed peas.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

Changes in the Customs Service Field Organization; Apalachicola, Carrabelle, and Port St. Joe, FL

AGENCY: U.S. Customs Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to amend the Customs Regulations by closing the ports of entry of Apalachicola and Carrabelle and designating Port St. Joe as a Customs station. Given the inactivity at these ports, together with the necessity for providing full Customs service at such inactive ports, closing Apalachicola and Carrabelle as ports of entry and converting Port St. Joe to a Customs station are warranted by the circumstances. These changes are proposed in order to obtain more efficient use of Customs personnel, facilities and resources, and to provide better service to carriers, importers and the public.

DATES: Comments must be received on or before December 24, 1990.

ADDRESSES: Written comments (preferably in triplicate) may be addressed to the Regulations and Disclosure Law Branch, U.S. Customs Service, 1301 Constitution Avenue NW., room 2119, Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Joseph O'Gorman, Office of Inspection and Control, 202-566-9425.

SUPPLEMENTARY INFORMATION:

Background

Customs ports of entry and stations are locations where Customs officers or employees are assigned to accept entries of merchandise, clear passengers, collect duties, and enforce the various provisions of Customs and related laws. The significant difference between ports of entry and stations is that at stations, the Federal Government is reimbursed for:

(1) The salaries and expenses of its officers or employees for services rendered in connection with the entry or clearance of vessels; and

(2) Except as otherwise provided by the Customs Regulations, the expenses (including any per diem allowed in lieu of subsistence), but not the salaries of its officers or employees, for service rendered in connection with the entry or delivery of merchandise.

The list of designated Customs ports of entry is set forth in § 101.3(b), Customs Regulations (19 CFR 101.3(b)) and Customs stations are listed in § 101.4(c), Customs Regulations (19 CFR 101.4(c)). The Customs organizational structure consists of regions, districts, ports of entry within districts, and stations supervised by ports. This change is proposed pursuant to the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR 1949-1953 Comp., Ch. II), and pursuant to authority provided by Treasury Department Order No. 101-5 (47 FR 2449), as well as 5 U.S.C. 301.

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to continue to provide better service to carriers, importers, and the public, Customs proposes to close the Apalachicola and Carrabelle ports of entry located in the Florida panhandle area, and at the same time convert Port St. Joe to a Customs station. These ports of entry have been inactive and not manned for a number of years. Only some six vessels were entered at Port St. Joe during the past three-year period.

Adequate Customs service will continue to be provided to the Panhandle region of Florida through the ports of Panama City and Pensacola as well as the proposed Port St. Joe station. Pensacola, Panama City, and Port St. Joe are located along the coast in a linear pattern and are thus able to provide convenient service to importers in that area. In addition, the Port of Mobile is located in close proximity to Pensacola and importers/brokers had indicated their preference for using this larger port of entry to enter and clear merchandise, which is reflected in low workload figures for the Panhandle ports.

Since there generally appears to be no immediate increase in international activity in the Panhandle area, closing these ports of entry would have little if any economic impact in this area, especially in view of the total absence of commercial activity at these ports, except for the little business carried on at Port St. Joe.

Comments

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9 a.m. and 4:30 p.m. at the Regulations and Disclosure Law Branch, room 2119, Customs Headquarters, 1301 Constitution Avenue, NW., Washington, DC 20229.

Drafting Information

The principal author of this document was Earl Martin, Regulations and Disclosure Law Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Executive Order 12291 and Regulatory Flexibility Act

Because this proposal relates to the organization of Customs, it is not a regulation or rule subject to E.O. 12291.

Similarly, it is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*). Customs routinely establishes, expands, and consolidates Customs ports of entry throughout the U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although the proposal may have a limited effect upon some small entities in the affected areas, it is not expected to be significant because changes in the Customs field organization in other areas have not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Act. Nor is it expected to impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Lists of Subjects in 19 CFR Part 101

Customs duties and inspection, Exports, Imports, Organization and functions (Government agencies).

Proposed Amendments

It is proposed to amend part 101, Customs Regulations (19 CFR part 101) as set forth below:

PART 101—GENERAL PROVISIONS

1. The authority for part 101 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 2, 66, 1202 (General Note 8, Harmonized Tariff Schedule of the United States) 1623, 1624.

§ 101.3 [Amended]

2. § 101.3(b), Customs Regulations (19 CFR 101.3(b)), is amended by removing the listings "Apalachicola, Fla.", "Carrabelle, Fla. (E.O. 7508, Dec. 11, 936; 1 FR 2149)", and "Port St. Joe, Fla. (E.O. 7818, Feb. 17, 1938; 3 FR 503)", in the column headed "Ports of Entry," in the Tampa, Florida, district of the Southeast Region.

§ 101.4 [Amended]

3. Section 101.4(c) is amended by inserting, in appropriate alphabetical order, in the listing for "Tampa, Fla." under the "District" column, "Port St. Joe" in the column headed "Customs stations" and "Panama City" in the column headed "Port of entry having supervision".

Approved: October 17, 1990.

Samuel H. Banks,

Acting Commissioner of Customs.

Peter K. Nunez,

Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 90-447, RM-7351]

Radio Broadcasting Services; Bowling Green, KY

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Bowling Green Broadcasters Inc., licensee of Station WCBZ(FM), Channel 244A, Bowling Green, Kentucky, proposing the substitution of Channel 244C3 for Channel 244A at Bowling Green, and the modification of Station WCBZ(FM)'s license to specify operation on Channel 244C3. The community could receive its first wide coverage area FM service. A site restriction of 15.6 kilometers (9.7 miles) southwest of the community is required at coordinates North Latitude 36-53-00 and West Longitude 86-34-20. In accordance with § 1.420(g) of the Commission's Rules, we shall not accept competing expressions of interest in the higher powered channel at Bowling Green or require the petitioner to demonstrate the availability of an additional equivalent channel for use by interested parties.

DATES: Comments must be filed on or before December 10, 1990, and reply comments on or before December 26, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Jeffrey W. Malickson, P.O. Box 32466, Charlotte, North Carolina 28232 (Attorney for Bowling Green Broadcasters, Inc.).

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 90-447, adopted September 24, 1990, and released October 19, 1990. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Docket Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

---

47 CFR Part 73

[MM Docket No. 90-448, RM-7430]

Radio Broadcasting Services; Morro Bay, CA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by Don Stewart, seeking the allotment of Channel 231A to Morro Bay, California, as that community's second local FM broadcast service. Coordinates for this proposal are 35-21-48 and 120-50-42.

DATES: Comments must be filed on or before December 10, 1990, and reply comments on or before December 26, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the

petitioner, as follows: Don Stewart, c/o William L. Zavelo, Esq., 12360 Brookhurst Street, Suite A, Garden Grove, California 92640.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 90-449, adopted September 27, 1990, and released October 19, 1990. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

47 CFR Part 73

[MM Docket No. 90-450, RM-7391]

Radio Broadcasting Services; Winterset, IA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by AFM Associates seeking the substitute of Channel 259C3 for Channel 256A at Winterset, Iowa, and the modification of its construction permit for Station KTDG(FM) to specify operation on the higher powered channel. Channel 259C3 can be allotted to Winterset in compliance with the Commission's minimum distance separation requirements with a site restriction of 13.7 kilometers (8.5 miles) south to avoid a short-spacing to Station KFGQ, Channel 257A, Boone, Iowa, and to the outstanding construction permit for Channel 256A at Eldora, Iowa. The coordinates for this allotment are North Latitude 41-12-34 and West Longitude 94-02-09. In accordance with § 1.420(g) of the Commission's Rules, we will not accept competing expressions of interest for use of Channel 259C3 at Winterset or require the petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before December 10, 1990, and reply comments on or before December 26, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Robert S. Stone, Esq., McCampbell & Young, 2021 Plaza Tower, P.O. Box 550, Knoxville, Tennessee 37901-0550 (Counsel to petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 90-450, adopted September 27, 1990, and released October 19, 1990. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

Department of the Air Force

48 CFR Ch. 53

Air Force Logistics Command Federal Acquisition Regulation Supplement; Special Contracting Methods, Vendor Rating System

AGENCY: Department of the Air Force, DOD.

ACTION: Proposed rule.

SUMMARY: The Air Force proposes to amend chapter 53 of title 48 of the Code of Federal Regulations by adding the Air Force Logistics Command (AFLC) Federal Acquisition Regulation as Appendix A, consisting of parts AFLC 5317 and AFLC 5352. AFLC is developing the Vendor Rating System (VRS) for use as an objective contractor performance evaluating, rating, and ranking system. The intended effect is to assist AFLC contracting officers in determining which competitive offer represents the greatest value to the Government by providing each offer's historical performance on AFLC contracts in terms of rating in quality and delivery. The procedure will facilitate awards to contractors who have delivered quality supplies within specified times under AFLC contracts. VRS provides for a ranking of the offers under a solicitation considering the evaluated offer amount and the VRS ratings.

DATES: Comments must be submitted on or before November 23, 1990

FOR FURTHER INFORMATION CONTACT: S. Wiginton, AFLC/PMPL, Wright-Patterson AFB OH 45433-5001.

SUPPLEMENTARY INFORMATION:

A. Background

AFLC/VRS is intended to implement in part the "DOD Action Plan to improve the Quality of Spare and Repair Parts through Reductions in Contractor Nonconformances." The DOD Action Plan presents 26 objectives for improving the quality of spare parts. The AFLC VRS implements Objective Number 4, which is to encourage the use of quality factors in the source selection process for spare and repair parts by centralizing, automating, collecting, and sharing contractor performance information and by maximizing the use of existing sources of contractor performance information to improve acquisition processes, purge defective material and improve the quality of DOD spare and repair parts.

The VRS will be initiated within AFLC by a 10-month test period at three of the five air logistics centers. Adjustments or revisions to the policy and provision resulting from test period data will be incorporated before AFLC-wide implementation.

B. Regulatory Flexibility Act

This procedure may have a significant impact on a substantial number of small entities. Therefore, an Initial Regulatory Flexibility Analysis (IRFA) has been prepared and will be sent to the Chief Counsel for Advocacy of Small Business Administration. A copy of the IRFA may be obtained from AFLC/PMPL, ATTN: S. Wiginton, Wright-Patterson AFB OH 45433-5001.

C. Paperwork Reduction Act

This rule does not contain information collection requirements which require the approval of OMB under the criteria of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

List of Subjects in 48 CFR Chapter 53

Government procurement.

Therefore, it is proposed to amend title 48 of the Code of Federal Regulations chapter 53 by adding Appendix A to include part AFLC 5317 and part AFLC 5352 to read as follows:

Appendix A to Chapter 53—Air Force Logistics Command Federal Acquisition Regulation Supplement

Authority: 5 U.S.C. 301 and FAR 1.301

Subpart AFLC 5317.91—Vendor Rating System

AFLC 5317.9100 Scope of subpart.

This subpart prescribes policies and procedures for the AFLC contractor performance evaluation system identified as the Vendor Rating System (VRS). VRS is a contractor performance evaluation, rating, and ranking system. It is designed to assist the contracting officer in determining the awardee whose offer represents the greatest value to the Government in accordance with stated criteria.

AFLC 5317.9101 Definitions.

The following terms and definitions apply to VRS and this subpart:

(a) *Computed offer.* An initial offer under a solicitation plus all evaluation costs identified in the solicitation, e.g., First Article, transportation, and/or other costs. The computed offer will be calculated by unit or total amount depending on whether the Government requirement and the evaluation costs are established as unit or total quantity amounts.

(b) *Delivery rate (DR).* A computation of the 12-month delivery performance history of a contractor using the number

BEST COPY AVAILABLE

of contract schedule deliveries completed after the due date because of contractor caused reasons compared to the number of schedules completed during the same period by that contractor. The computation will be carried to the fourth decimal place.

(c) *Greatest value.* The most value to the Government considering price, quality, delivery, and other factors. It is a determination of the contracting officer based on consideration of factors impacting a Government requirement. Considerations may be, but are not limited to, an offeror's quality and delivery performance history, evaluated price, complexity of the item(s), and time to delivery versus need.

(d) *Quality rate (QR).* A computation of the 12-month quality performance history of a contractor using the count of contractor-caused units reported defective under quality deficiency reports (QDRs) compared to the number of units delivered for the same period by that contractor. The computation will be carried to the fourth decimal place.

(e) *Ranking.* The order of all responsive offerors to a solicitation, considering stated VRS factors and the computed offer amount, from the highest to the lowest with the highest ranked first in order.

(f) *VRS competitive range.* Those offerors on a solicitation whose quality and delivery performance histories result in a minimum rating of 98 in quality and 85 in delivery elements and whose price offers are within 15 percent of the lowest price offer. The low offeror will not be in the VRS competitive range unless performance history meets the minimum ratings. The competitive range may be otherwise established with the approval two levels above the contracting officer.

AFLC 5317.9102 Policy.

AFLC 5317.9102-1 Uses.

(a) VRS shall apply to all AFLC air logistics center (ALC) competitively negotiated, National Stock Number (NSN) identified, spare part acquisitions estimated to exceed $10,000 in total value. These evaluations will be processed through the VRS database/software application.

(b) The VRS:

(1) Provides data to analyze a contractor's historical quality and delivery performance by Federal Stock Class (FSC) and total business with AFLC ALC central contracting activities, and

(2) Provides quality and delivery performance information on those contractors by FSC and total business with the ALC central contracting activities.

AFLC 5317.9102-2 Objectives.

(a) The primary objective of VRS is to provide the contracting officer with a procedure for making an award based on the greatest value to the Air Force. Management information and contract status tracking systems are merged into an evaluation procedure using quality and delivery performance historical data on all AFLC ALC contractors.

(b) An expected benefit from VRS is contractor improvements in performance on AFLC contracts and enhancement of AFLC's ability to acquire quality supplies on time from proven producers.

(c) Improvements in quality and delivery performance will decrease administrative costs of processing unacceptable material and the contract administration actions required on delinquent contract items and enhance the quality of the material.

AFLC 5317.9102-3 Responsibilities.

(a) HQ AFLC/PMMT, Wright-Patterson AFB OH, is responsible for maintenance of records to support the decision making process leading to command-wide implementation including the rationale for systems applications and computations.

(b) HQ AFLC/PMPL, Wright-Patterson AFB OH, is responsible for issuance of policy and AFLC-wide implementation.

(c) HQ AFLC/PMKL (00-ALC/PML), Hill AFB UT, is responsible for providing the Automated Contract Preparation System (ACPS) data feed to VRS.

(d) SM-ALC/PMXD, McClellan AFB CA, is responsible for design, management, and maintenance of the VRS database and applications programs to extract data from J041/G021/ACPS for VRS, and queries required to obtain data from the VRS data base.

AFLC 5317.9103 Procedures.

AFLC 5317.9103-1 Data sources.

(a) The QR is computed using a contractor's data from G021, or its successor system, and the INFOCEN network for QDR data and the J041 system for the number of units delivered.

(b) The DR is computed using a contractor's data from J041 for delivery schedules completed on time and delinquent.

(c) The QR and DR are computed for a contractor's Contract and Government Entity (CAGE) code by each FSC and total business with AFLC. The applicable rates will be provided with the ACPS abstract.

AFLC 5317.9103-2 Performance standards.

(a) The VRS standards and rating symbols for historical quality and delivery performance are:

(1) Exceptional (E)—Exceeds AFLC target performance range. A rating for QR: 99.0000 or higher. A rating for DR: 95.0000 or higher;

(2) Acceptable (A)—Meets AFLC target performance range. A rating for QR: 98.9999 to 98.0000. A rating for DR: 94.9999 to 85.0000;

(3) Marginal (M)—Does not meet AFLC acceptable performance range but may receive award when a higher rated offeror is not responsive to the solicitation, exceeds the competitive range criteria, or is determined unacceptable for some other reason. A rating for QR: 97.9999 to 97.0000. A rating for DR: 84.9999 to 75.0000; and,

(4) Unacceptable (U)—Fails to meet marginal rating and should not be considered for an award. A rating for QR: Less than 97. A rating for DR: Less than 75.

(b) Data for the quality and delivery performance rates will be updated on a monthly basis. The update will be data from the previous month and effective on the tenth working day of the following month.

(c) Performance history ratings will be provided for each contractor by individual FSC and total of all FSCs.

(d) An offeror with performance history in the FSC of the item(s) on the solicitation will be evaluated using that offeror's quality and delivery performance history rating in that FSC.

(e) An offeror with no AFLC performance history in the FSC of the item(s) on the solicitation will be evaluated using that offeror's AFLC total quality and delivery performance history rating in all other FSCs.

(f) An offeror with performance history only in quality performance will be evaluated using that rate and the delivery performance will be evaluated as acceptable with zeros (00.0000) assigned for the DR. A limited preaward survey, as a minimum, should be performed for the delivery element. File documentation of an affirmative determination of contractor responsibility specifically addressing delivery performance is required before award.

(g) An offeror with no AFLC performance history in any FSC will be evaluated as acceptable with zeros (00.0000) assigned for QR and DR for evaluation. A preaward survey should

BEST COPY AVAILABLE

be performed. File documentation of an affirmative determination of contractor responsibility is required before award.

(h) HQ AFLC/PM and ALC/PM personnel will have overnight query access to VRS information. Information to be provided to other Government agencies or Air Force offices will only be released in writing by a Director or Deputy Director in the office of the HQ AFLC/PM, or higher level, at HQ AFLC or a division chief or deputy division chief, or higher level, at an ALC. All released data must carry the restrictive legend "CONFIDENTIAL CONTRACTOR INFORMATION—FOR OFFICIAL USE ONLY." All other releases of VRS information must have prior coordination of the local Staff Judge Advocate.

(i) A data retrieval and storage program, the VRS Data Base History (DBH), will be maintained by SM-ALC/PMXD. The data base will be accessed by the ALCs for responding to management and contractor queries and protest documentation. The DBH storage and retention period is 24 months. The retrieval query will provide for overnight response with printout. All printouts will carry

AFLC 5317.9103-3 Evaluation.

(a) The ACPS abstract function will, after completion of all other evaluations established by the solicitation (e.g., Balance of Payments, Quantity Discount, transportation costs, and Multiple Awards), convert the offers for each solicitation item into computed offers and provide the amounts on the abstract.

(b) The VRS spreadsheet will be provided with the abstract as a separate document.

(1) The spreadsheet will list CAGE, computed offer, QR and standard rating symbol, DR and standard rating symbol, and rank each offeror for each separately evaluated item. Offers will be ranked in order of their standard rating and then their computed offer amount.

(i) Three contractors, all rated exceptional in QR and DR, would be ranked in order of their computed offer from the lowest to the highest.

(ii) Three contractors, given a mix of ratings, will be ranked by order of the rating symbols (E/E, E/A, A/A, E/M, A/M, M/M, E/U, A/U, M/U, and U/U).

(2) Items involving subline items, including attachments and exhibits, will be evaluated as one item using total subline items and quantities for the item.

(3) Provide the standard rating symbol (E, A, M, or U) for quality and delivery for each offeror.

(4) The spreadsheet will be annotated as "RESTRICTED EVALUATION DATA—CONTRACTING OFFICER DELIBERATION DOCUMENT."

(5) The contractor performance data on the spreadsheet will be considered confidential contractor information and given appropriate protection.

(c) Only offerors rated exceptional or acceptable in quality and delivery performance will be considered in the VRS competitive range and further evaluated for award. A minimum of two offers rated exceptional or acceptable is required for the competitive range to be established under VRS by the ACPS process.

(d) The contracting officer may make a greatest value award based on, but not limited to, one of the following selection criteria:

(1) The low computed offer with VRS symbol of exceptional.

(2) The computed offer of an AFLC Blue Ribbon Program contractor in the FSC of the solicited item(s) which is within ten percent of the low computed offer.

(3) The computed offer, not from an AFLC Blue Ribbon Program contractor, of an offeror coded exceptional in both areas which is within ten percent of the low computed offer.

(e) The rate differences may be considered in making the award decision when more than one offeror receives the same symbols or symbol combination.

(f) The basis for the award decision will be documented in the contract file.

(g) Each offeror not in the competitive range will be notified when the determination is made. ACPS will provide notice letters to the offerors determined outside the competitive range for contracting officer signature and transmittal. The letters will be provided with the abstract and VRS spreadsheet.

(h) If the criteria in AFLC 5317.9102-2(c) are not met, the ACPS will not generate the notice letters.

(i) If the offer selected for award is not the lowest-priced responsive and responsible offer, the contracting officer shall conduct written or oral discussions as prescribed at FAR 15.610, "Written or Oral Discussions," and solicit best and final offers as prescribed at FAR 15.611, "Best and Final Offers." As a minimum for solicitations under VRS, the technical deficiencies to be addressed to the offerors in the competitive range will be their individual QR and DR.

AFLC 5317.9103-4 Responsibility determination.

(a) VRS establishes performance standards to determine a competitive range based on historical performance. It neither negates the requirement for an affirmative determination of contractor responsibility, determines a contractor ineligible for award, nor makes any other negative determination of contractor responsibility. The rating system may provide an indication of a contractor's responsibility by computing the quality and delivery rates for historical performance. It does not reflect the most current data available on a contractor.

(b) The Automated Contractor Responsibility Review Program (ACRRP) review is not negated by this system. Regardless of the awardee, an affirmative determination of responsibility is required since the VRS ratings are computed using data recorded through the previous month and the rates apply through the following month. ACRRP review is required to obtain current information prior to making an award. Current delinquency rate, notification of issuance of Method C or D letters, results of recent preaward surveys, or notices of potential problem areas from various sources should be considered.

AFLC 5317.9103-5 Approvals.

(a) Division level approval in writing is required prior to:

(1) Issuing a competitive, negotiated solicitation for NSN identified items and estimated to exceed $10,000 when VRS will not be used; or

(2) Awarding a contract to any offeror with a marginal or unacceptable rating in the quality or delivery element.

(b) The following prior approval levels apply when the award is not to be made to the lowest price offeror:

(1) Chief of the contracting branch when the difference between the low price offer and the award price exceeds $50,000 up to $150,000.

(2) Chief or Deputy Chief of the contracting division when the difference between the low price offer and award price exceeds $150,000 up to $250,000.

(3) Director or Deputy Director of the contracting office when the difference between the low price offer and award price exceeds $250,000 up to $500,000.

(4) Commander or Vice Commander, Air Logistics Center, when the difference between the low price offer and the award price is $500,000 or more.

AFLC 5317.9103-6 Reporting.

The following data will be accumulated in the VRS automated system:

(a) Number of competitive awards exceeding $10,000 which did not use the VRS and the reason(s).

(b) Number of competitive awards over $25,000 which did not use the VRS and the reason(s).

(c) Number of awards using VRS including:

(1) Number of awards and total dollars to the highest ranked offeror;

(2) Number of awards, total dollars, and dollar amount of premium price to exceptional ranked offerors who were and were not the low price offeror;

(3) Number of awards, total dollars, and dollar amount of premium price to a combination of exceptional and acceptable rated offerors who were and were not the low price offeror. Breakout between exceptional and acceptable standard ratings in quality and delivery performance;

(4) Number of awards, total dollars, and dollar amount of premium price to acceptable rated offerors who were and were not the low price offeror;

(5) Number of awards, total dollars, and dollar amount of premium price to a combination of acceptable and marginal rated offerors who were and were not the low price offeror. Breakout between acceptable and marginal standard ratings in the quality and delivery performance;

(6) Number of awards, total dollars, and dollar amount of premium price to marginal rated offerors who were and were not the low price offeror;

(7) Number of awards, total dollars, and dollar amount of premium price to a combination of marginal and unacceptable rated offerors who were and were not the low price of feror. Breakout between marginal and unacceptable standard ratings in the quality and delivery performance;

(8) Number of awards, total dollars, and dollar amount of premium price to unacceptable rated offerors who were and were not the low price offeror;

(9) Number of awards, total dollars, and dollar amount of premium price to other rating combinations. Breakout by standard rating combinations and performance areas; and

(10) Total number of awards and dollars.

(d) Listing or tracking system which identifies the contract number and NSN for VRS awards. This listing will be retained for 24 months.

AFLC 5317.9103–7 Solicitation provision.

The contracting officer shall insert the provision at AFLC 5352.217–9031, Vendor Rating System (VRS), in Section L of all solicitations for acquisitions meeting the criteria of AFLC 5317.9102–1(a).

SUBCHAPTER H—CLAUSES AND FORMS

PART 5352—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Authority: 5 U.S.C. 301 and FAR 1.301.

Subpart 5352.2—Texts of Provisions and Clauses

AFLC 5352.217–9031 Vendor Rating System.

As prescribed at AFLC 5317.9103–7, insert the following provision:

AFLC Vendor Rating System (VRS) (XXX 1991)

(a) Award of this contract will be made using the Air Force Logistics Command (AFLC) Vendor Rating System (VRS) procedure. VRS is a contractor performance evaluation system which provides each offeror's historical quality and delivery performance data by Federal Stock Class (FSC) and total business with AFLC central contracting activities. Data will be used to assist the contracting officer in evaluating offers to determine the VRS competitive range and which award will be of greatest value to the Government.

(b) Responsive offerors with quality or delivery performance history rated "Exceptional" or "Acceptable" and within 15 percent of the low evaluated price will be considered in the VRS competitive range. The VRS performance standards are:

(1) Exceptional: AFLC performance history files computing a quality rate of 99.0000 or higher and a schedules-completed-ontime rate of 95.0000 or higher.

(2) Acceptable: AFLC performance history files computing a quality rate of 96.9999 to 98.0000 and a schedules-completed ontime rate of 94.9999 to 85.0000.

(3) Of ferors with no performance history with AFLC will be rated "Acceptable" and assigned rates of 00.0000.

(4) The rate is an arithmetical computation based on the following:

(i) Offeror's history rating of experience with AFLC in the total FSC, not the specific item(s), of the solicited item(s); or

(ii) If the offeror has no AFLC history within the solicited FSC, the offeror's history rating of experience with AFLC in all other FSCs.

(c) Each separately awardable line item will be evaluated.

(d) Offers from contractors who are not rated "Exceptional" or "Acceptable" may be considered for award if the VRS competitive range determination does not permit an award decision by the contracting officer.

(e) The Government will award under this solicitation to the responsive, responsible offeror whose offer is determined to be the greatest value to the Government—price and other factors considered. The determination will be based on consideration of performance history, evaluated price, and time to delivery versus need if best effort delivery is a part of the solicitation. Additional specific evaluation factors may be identified in other provisions of the solicitation.

Note: The following optional wordings for paragraph (f) portrays two possible provisions. The wording to be used during the test period and the AFLC command-wide implementation will depend on the status of legislation and legal decisions regarding the award of negotiated contracts without discussion. Current GAO decisions do not permit award without discussions (Option I) when award is to other than the low price of feror. Comments regarding both options are requested.)

Option I for Paragraph (f)

(f) Award without discussion: The Government may accept other than the lowest offer and award on the basis of initial offers received without discussions.

(End of Provision)

Option II for Paragraph (f)

(f) Award with discussion: If the offer selected for award is not the lowest price responsive and responsible offer, written or oral discussions and solicitation of best and final offers will be conducted. As a minimum, the technical deficiencies to be addressed to the offerors in the competitive range will be their individual VRS quality and delivery rates followed by a request for best and final offers.

(End of Provision)

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3810-01-M

Notices

Federal Register
Vol. 55, No. 206
Wednesday, October 24, 1990

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

Fees and Costs

AGENCY: Administrative Office of the United States Courts.

ACTION: Notice of change in method of assessing the court's registry fee.

SUMMARY: The registry fee assessment provisions published in the Federal Register, May 11, 1989 (54 FR 20407), are hereby revised and converted from a one-time charge equal to all income earned in the first 45 days of the investment, to a charge of 10 percent of the income earned while funds are held in the court's registry.

Additionally, due to the practice of some courts of authorizing the investment of funds deposited with the court in proceedings beyond the scope of Rule 67 Fed. Rules of Civ. Proc. and, in recognition of the value to the litigants and obligation of the court to manage such funds, the fee is being extended to any funds placed into the court's registry and invested regardless of the nature of the action underlying the deposit.

EFFECTIVE DATE: December 1, 1990.

FOR FURTHER INFORMATION CONTACT: Assistant Accounting Officer, Accounting Branch, Financial Management Division, Administrative Office of the United States Courts, 1120 Vermont Avenue NW., Washington, DC 20544, (202) 633-6278.

SUPPLEMENTARY INFORMATION: Under its authority at 28 U.S.C. 1913, 1914(b), and 1930(b) to establish miscellaneous fees to be charged and collected by the clerks of courts, the Judicial Conference of the United States in September 1988, authorized the Director of the Administrative Office to impose a fee not exceeding three percent for the handling of registry funds held in the courts and invested in interest-bearing accounts. The fee is to be assessed from and may not exceed interest earnings. The Director was also instructed to review implementation of the fee and make adjustments from time to time.

As a result of a continuing review of the imposition of the fee and in consultation with various committees of judges and clerks concerning proposed revisions, the Director has decided that the fee will be revised from a one-time charge equal to the first 45 days interest earned, to a percentage charge on all income earned while funds are held in the court's registry.

Its application is also being extended to any case, where the court has authorized the investment of funds placed in its custody or held by it in trust in its registry regardless of the nature of the underlying action.

The fee will be deducted periodically, either at the time income is credited to the account or prior to any other distribution. Investments having a maturity date greater than one year will be assessed the fee at the time the investment instrument matures.

The revised fee will be (.10) or 10% × I where I = the total income received during each income period. For example, $100,000 deposited and invested in a 90-day certificate of deposit earning interest at an annual rate of 7.5% would be assessed a fee of $184.93 on the $1,849.31 interest earned for the quarter. The fee will be deducted at the time the certificate matures or is terminated.
[$100,000 × 7.5% / 365 × 90 days = $1,849.31 interest.]
$1,849.31 × 10% = $184.93 fee

If a second 90-day certificate was purchased upon maturity of the first, the same fee calculation would be applied to the earnings received from the second certificate.

If the investment instrument is in the form of a certificate of deposit which extends over several years, the fee will be 10% of the interest earned over the entire period. For example, if $100,000.00 were invested in a 3-year CD earning 7.5% compounded annually and payable at maturity, the fee would be $2,422.97.
[$100,000 × 7.5%] + [$107,500 × 7.5%] + [$115,562.50 × 7.5%] = $24,229.69 interest.
$24,229.69 × 10% = $2,422.97 fee

This new method of fee assessment recognizes the recurring cost of administering investment holdings over time. It also varies the fee in proportion to the income earned and the length of time the investment is held, and simplifies the computation of the fee for the courts when frequent fluctuations in principal sums placed into the court's registry for investment occur.

The new method of computing the fee will be applied to new investments of funds placed into court beginning on the effective date.

The new method will not be applied on investments in cases from which a fee has been exacted based on the prior method (interest earned in the first 45 days the funds were invested or the first 45 days following July 12, 1989). The new method will also not be applied in cases where the investment instrument has a maturity date greater than one year, but where a fee under the prior method applies but has not been deducted.

Example: In the three-year example above, if the date of the investment was June 22, 1989, the fee based on the prior method would have been $924.66 [$100,000 × 7.5%] / 365 × 45 = $924.66 payable from the interest received when the CD matures. Under the new method, the fee would be $2,422.97. However, because the previous method applies, only $924.66 is charged.

As with other miscellaneous fees authorized under 28 U.S.C. 1913, 1914, and 1930, this fee may be taxed as costs by the court pursuant to 28 U.S.C. 1920. In cases where the United States Government is a party to the action underlying the registry investment, the funds initially withheld in payment of the fee may be restored to the United States upon application filed with the court by the United States Attorney or other government counsel.

The fee does not apply in the District Court of Guam, the Northern Mariana Islands, the Virgin Islands, the United States Claims Court, or any other federal court whose fees are not set under the statutes cited above.

L. Ralph Mecham,
Director.

BILLING CODE 2810-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Colorado River Basin Salinity Control Program; Determination of Primary Purpose of Program Payments for Consideration as Excludable From Income

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of determination.

SUMMARY: The Secretary of Agriculture has determined that all cost-share payments under the Colorado River Basin Salinity Control Program are made primarily for the purposes of soil and water conservation, protecting or restoring the environment, or providing a habitat for wildlife. This determination is in accordance with section 126 of the Internal Revenue Code of 1954, as amended. This determination permits recipients of these payments to exclude them from gross income to the extent allowed by the Internal Revenue Service.

FOR FURTHER INFORMATION CONTACT: Director, Conservation and Environmental Protection Division, Agricultural Stabilization and Conservation Service, USDA, room 4714, South Agriculture Building, 14th and Independence Avenue SW., Washington, DC 20250, (202) 447-6221; or Director, Land Treatment Program Divsion, Soil Conservation Service, USDA, P.O. Box 2890, Washington, DC 20013 (202) 382-1670.

SUPPLEMENTARY INFORMATION: Section 126 of the Internal Revenue Code of 1954, as amended by the Revenue Act of 1978 and the Technical Corrections Act of 1979, 26 U.S.C 126, provides that certain payments made to persons under certain small watershed programs may be excluded from the recipient's gross income for Federal income tax purposes if the Secretary of Agriculture determines that payments are made "primarily for the purposes of conserving soil and water resources, protecting or restoring the enivronment, improving forests, or providing a habitat for wildlife * * *." The Secretary of Agriculture evaluates these conservation programs on the basis of criteria set forth in 7 CFR part 14, and makes a "primary purpose" determination for the payments made under each program. Before there may be an exclusion, the Secretary of the Treasury must determine that payments made under these conservation programs do not substantially increase the annual income derived from the property benefited by the payments. In addition, the Secretary of the Treasury must determine that the particular small watershed program is similar to the other Federal programs listed in section 126.

The Colorado River Basin Salinity Control Program is authorized by section 202(c) of the Colorado River Basin Salinity Control Act, as amended, 43 U.S.C. 1592(c). Funding for this program is allocated through annual Federal appropriations, which provide for financial, technical, and information and education assistance to owners and operators of agricultural land, helping them install improved irrigation water management systems on their land in order to reduce salt load contributions to the Colorado River system.

The Colorado River Basin Salinity Control Program provides financial and technical assistance to private landowners or operators who have control of agricultural lands located in approved project areas and have consented to the installation, management, and maintenance of improved irrigation water management systems that reduce the quantity of salt delivered to the Colorado River.

The purpose of the financial assistance component of the program is to assist landowners or operators with the cost of the installation of improved irrigation delivery and application systems. This cost-share program is administered within USDA by the Agricultural Stabilization and Conservation Service with technical assistance provided by the Soil Conservation Service and information and education assistance provided by the Cooperative Extension Service.

Under the regulations governing the Colorado River Basin Salinity Control Program (7 CFR part 702) county Agricultural Stabilization and Conservation committees (COC) may enter into contracts with individuals or entities that have control of land identified in USDA Salinity Control Reports as land that is contributing to the salt loading of the Colorado River. Funds are allocated to project areas based on annually prepared project implementation plans (PIP). The National Salinity Control Coordinating Committee (SCCC) approves a list of eligible Salinity Reduction Practices (SRP) for cost sharing. Each local SCCC may select from this list those SRP's it will approve for cost sharing.

Costs eligible for cost sharing include, but are not limited to, any necessary approved costs incurred by the landowner or operator to install or implement an approved SRP, such as equipment costs, material and labor, not to exceed a rate established by the COC to be fair and reasonable.

Procedural Matters

The authorizing legislation and the procedures and policies for the Colorado River Basin Salinity Control Program have been examined using the criteria set forth in 7 CFR part 14. The USDA has concluded that the payments made under this cost share program are made to provide financial assistance to eligible persons in carrying out soil and water conservation measures, and protecting or restoring the environment. Furthermore, the Secretary of the Treasury has determined that the Colorado River Basin Salinity Control Program is a "small watershed program" within the meaning of 26 U.S.C. 126. *See* 26 CFR 16A.126-1(d)(1)(ii).

A Colorado River Basin Salinity Control Program, Primary Purpose Determination for Federal Tax Purposes, "Record of Decision" has been prepared and is available upon request from the Director, Land Treatment Program Division, Soil Conservation Service, P.O. Box 2890, Washington, DC 20013; or Director, Conservation and Environmental Protection Division, Agricultural Stabilization and Conservation Service, USDA, room 4714, South Agricultural Building, 14th and Independence Avenue SW., Washington, DC 20250.

Determination

As required by section 126(b) of the Internal Revenue Code of 1954, as amended, I have examined the authorizing legislation, regulations, and operating procedures of the Colorado River Basin Salinity Control Program. In accordance with the criteria in 7 CFR part 14, I have determined that all cost-share payments made under this program are for soil and water conservation, protecting or restoring the environment, and providing wildlife habitat. Subject to further determination by the Secretary of the Treasury, this determination permits payment recipients to exclude from gross income, for Federal income tax purposes, all or part of such payments made under the Colorado River Basin Salinity Control Program.

Signed at Washington, DC on October 17, 1990.

Clayton K. Yeutter,

Secretary of Agriculture.

Public Hearing Regarding Establishment of a New Tobacco Auction Market; Georgia

Notice is hereby given of a public hearing regarding an application to establish as a new market Ocilla, Georgia, and to combine the new market with the Fitzgerald, Georgia, tobacco market.

Date: November 1, 1990.
Time: 10 a.m. local time.
Place: Irwin County Court House, Irwin Avenue (Highway 129) Ocilla, Georgia.
Purpose: To hear testimony and to receive evidence regarding an application for tobacco inspection and price support services to a new market, Ocilla, Georgia, which would be consolidated with the currently designated market of Fitzgerald, Georgia. The application was made by B.B. Rogers and Richard Rogers, Gold Leaf Warehouses, Fitzgerald, Georgia.

This public hearing will be conducted pursuant to the joint policy statement and regulations governing the extension of tobacco inspection and price support services to new markets and to additional sales on designated markets (7 CFR 29.1 through 29.3).

Dated: October 22, 1990.
John E. Frydenlund,
Deputy Assistant Secretary, Marketing and Inspection Services.

[TB-90-009]

Public Hearing Regarding Establishment of a New Tobacco Auction Market; Virginia

Notice is hereby given of a public hearing regarding an application to merge the South Hill and Kenbridge, Virginia, tobacco markets.

Date: October 30, 1990.
Time: 9 a.m. local time.
Place: Conference Room of the Holiday Inn, Interstate 85 and Highway 58, South Hill, Virginia.
Purpose: To hear testimony and to receive evidence regarding an application for tobacco inspection and price support services to a new market, which would be a consolidation of the currently designated markets of South Hill and Kenbridge, Virginia. The application was made by R. R. Gunn, Kenbridge Tobacco Board of Trade, Kenbridge, Virginia.

This public hearing will be conducted pursuant to the joint policy statement and regulations governing the extension of tobacco inspection and price support services to new markets and to additional sales on designated markets (7 CFR 29.1 through 29.3).

Dated: October 22, 1990.
John E. Frydenlund,
Deputy Assistant Secretary, Marketing and Inspection Services.

COMMISSION ON CIVIL RIGHTS

Agency Information Collection Under Review by the Office of Management and Budget

AGENCY: U.S. Commission on Civil Rights (CCR).
ACTION: Notice.

SUMMARY: The Commission on Civil Rights is evaluating the implementation, enforcement and effectiveness of the Fair Housing Amendments Act of 1988 (FHAA). The proposed, one-time survey of 120 State and local human rights agencies has now been forwarded to OMB for review and clearance under the Paperwork Reduction Act of 1980. Copies of the proposed information collection may be obtained from James S. Cunningham, Director, Office of Programs Policy and Research, U.S. Commission on Civil Rights, 1121 Vermont Ave., NW., Washington, DC 20425, telephone (202) 376-8582. Comments regarding this information collection should be addressed to the OMB Desk Officer: Joe Lackey, Office of Information and Regulatory Affairs, OMB, Room 3208, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: James S. Cunningham.
DATES: Comments must be submitted on or before November 23, 1990.
SUPPLEMENTARY INFORMATION:
TITLE: Survey of State and Local Human Rights Agencies.
DESCRIPTION: The proposed survey of 120 State and local human rights agencies will address issues concerning their role in enforcing Title VIII of the Fair Housing Act. Prior to passage of FHAA, these agencies, which had been certified by HUD as operating under a law that was "substantially equivalent" to Federal law, processed most of the cases filed as Title VIII violations. Although FHAA "grandfathered" in all such agencies, they will become ineligible to process Federal cases if they have not been recertified by January 12, 1992. Two years after passage of the 1988 amendments, only three of the 120 currently equivalent agencies have been recertified. Should significant numbers of agencies fail to be recertified, the Federal fair housing enforcement effort could be seriously weakened. The proposed survey will be used to assess: (1) The role of human rights agencies in Federal fair housing enforcement, (2) problems encountered by agencies in seeking recertification under Title VIII, and (3) consequences and policy options available if many agencies fail to recertify.
RESPONDENTS: 120 State and local human rights agencies that have a role in enforcing Title VIII of the Fair Housing Act.
REPORTING BURDEN: The burden for this one-time data collection of a maximum of 120 responses is estimated at 14 hours per response or 1,680 burden hours for reporting; and at 6 hours per response or 720 hours for the record keeper.

Dated: October 18, 1990.
Wilfredo J. Gonzalez,
Staff Director.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Endangered Marine Mammals; Scripps Institution of Oceanography

AGENCY: National Marine Fisheries Service, NOAA, DOC.
ACTION: Application for Permit, Walter H. Munk Scripps Institution of Oceanography (P470).

SUMMARY: Notice is hereby given that the Applicant has applied in due form for a Permit to take endangered marine mammals as authorized by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543), the National Marine Fisheries Service Regulations Governing Endangered Fish and Wildlife permits (50 CFR parts 217-222), the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

1. *Applicant:* Walter H. Munk, Scripps Institution of Oceanography (A-025), Institute of Geophysics and Planetary Physics, La Jolla, California 92093
2. *Type of Permit:* Scientific research
3. *Name of Animals:*
Minke whale (*Balaenoptera acutorostrata*)
Blue whale (*Balaenoptera musculus*)
Fin whale (*Balaenoptera physalus*)
Sei whale (*Balaenoptera borealis*)
Humpback whale (*Megaptera novaeanglice*)

Southern right whale (*Balaena australis*)
sperm whale (*Physeter macrocephalus*)
Killer whale (*Orcinus orca*)
Dusky dolphin (*Lagenorhynchus obscurus*)
Commerson's dolphin (*Cephalorhynchus commersonii*)
Long-finned pilot whale (*Globicephala melaena*)
Southern bottlenose whale (*Hyperoodon planifrons*)
Southern elephant seal (*Mirounga leonina*)
Antarctic fur seal (*Arctocephalus gazella*)

4. *Number of Animals*: Applicant estimates that no more than 100 pinnipeds or 10 cetaceans will be harassed during the course of this experiment, depending on the distribution of animals near the test site. All size, sex and age classes of baleen whales, killer whales, Antarctic fur seals, southern elephant seals, and adult make sperm whales may be harassed.

5. *Type of Take*: Acoustic harassment in the course of an experiment to assess potential impacts on marine mammals of acoustic signals designed to detect global ocean warming. Researchers will measure vocalization rates, respiration and direction of swimming to determine whether the behavior of the animals changes in response to the acoustic signal.

6. *Location and Duration of Activity*: January 26 until February 5, 1991, in the vicinity of Heard Island in the Southern Indian Ocean in an area of 40 km radius around a point 53° 14' South, 74° 31' East.

Concurrent with the publication of this notice in the Federal Register, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East West Hwy., rm. 7330, Silver Spring, Maryland 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this application are summaries of those of the applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East West Highway, room 7330, Silver Spring, Maryland 20910;
Director, Alaska Region, National Marine Fisheries Service, NOAA, 709 West 9th Street, Federal Bldg., Juneau, Alaska 99802;
Director, Northeast Region, National Marine Fisheries Service, NOAA, One Blackburn Drive, Gloucester, Massachusetts 01930;
Director, Northwest Region, National Marine Fisheries Service, NOAA, 7600 Sand Point Way, NE., BIN C15700, Seattle, Washington 98115;
Director, Southeast Region, National Marine Fisheries Service, NOAA, 9450 Koger Boulevard, St. Petersburg, Florida 33702;
Director, Southwest Region, National Marine Fisheries Service, NOAA, 300 South Ferry Street, Terminal Island, California 90731–7415; and
Administrator, Western Pacific Area Office, National Marine Fisheries Service, NOAA, 2570 Dole Street, room 106, Honolulu, Hawaii 96822–2398.

Dated: October 17, 1990.

Nancy Foster,

Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-M

National Technical Information Service

Prospective Grant of Exclusive Patent License; Ross Laboratories

This is notice in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Technical Information Service (NTIS), U.S. Department of Commerce, is contemplating the grant of an exclusive license in the United States to practice the invention embodied in U.S. Patent 4,842,886, "Formulated Milk Concentrate and Beverage" to Ross Laboratories, a Division of Abbott Laboratories, having a place of business at Columbus, Ohio 43216. The patent rights in this invention have been assigned to the United States of America.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license for the field of infant and medical nutritional products may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The invention is a formulated milk concentrate emulsion comprising about 25–60% by weight of nonfat dry milk solids, 15–40% by weight of water, 3–40% by weight of a nondairy edible oil, and 0–35% by weight of sugar, wherein the weight ratio of nonfat dry milk solids to water is between 1:0.55 and 1:0.75 and wherein there is no added emulsifier.

The availability of the invention for licensing was published in the Federal Register Vol. 53, No. 176, (1988). A copy of the instant patent application may be purchased from the NTIS Sales Desk by telephoning 703/487–4650 or by writing to Order Department, NTIS, 5285 Port Royal Road, Springfield, VA 22161.

Inquiries, comments and other materials relating to the contemplated license must be submitted to Girish C. Barua, Center for Utilization of Federal Technology, NTIS, Box 1423, Springfield, VA 22151. Properly filed competing applications received by the NTIS in response to this notice will be considered as objections to the grant of the contemplated license.

Douglas J. Campion,

Patent Licensing Specialist, Center for Utilization of Federal Technology, National Technical Information Service, U.S. Department of Commerce.

BILLING CODE 3510-04-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Limit and Guaranteed Access Level for Certain Cotton Textile Products Produced or Manufactured in Guatemala

October 19, 1990.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing a limit and a guaranteed access level for the new agreement year.

EFFECTIVE DATE: January 1, 1991.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566–5810. For information on

embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

A Memorandum of Understanding (MOU) dated November 9, 1989 between the Governments of the United States and Guatemala establishes an import limit and a guaranteed access level for cotton textile products in Categories 347/348, produced or manufactured in Guatemala and exported during the period January 1, 1991 through December 31, 1991.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 54 FR 50797, published on December 11, 1989). Information regarding the 1991 CORRELATION will be published in the Federal Register at a later date.

Requirements for participation in the Special Access Program are available in Federal Register notices 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; 54 FR 50425, published on December 6, 1989; and 55 FR 3079, published on January 30, 1990.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the MOU, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

October 19, 1990.

Commissioner of Customs
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; pursuant to the Memorandum of Understanding (MOU) dated November 9, 1989 between the Governments of the United States and Guatemala; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1991, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 347/348, produced or manufactured in Guatemala and exported during the period January 1, 1991 through December 31, 1991, in excess of 563,300 dozen.

Imports charged to this category limit for the periods July 1, 1989 through February 28, 1990 and March 1, 1990 through December 31, 1990 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for these periods have been exhausted by previous entries, such goods shall be subject to the level set forth in this directive.

The level set forth above is subject to adjustment in the future according to the provisions of the MOU dated November 9, 1989 between the Governments of the United States and Guatemala.

Additionally, pursuant to the MOU dated November 9, 1989 and the terms of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986), 52 FR 26057 (July 10, 1987) and 54 FR 50425 (December 6, 1989), effective on January 1, 1991, a guaranteed access level of 1,000,000 dozen is being established for properly certified textile products assembled in Guatemala from fabric formed and cut in the United States in cotton textile products in Categories 347/348 which are re-exported to the United States from Guatemala during the period January 1, 1991 through December 31, 1991.

Any shipment for entry under the Special Access Program which is not accompanied by a valid and correct certification and Export Declaration in accordance with the provisions of the certification requirements established in the directive of January 24, 1990 shall be denied entry unless the Government of Guatemala authorizes the entry and any charges to the appropriate specific limit. Any shipment which is declared for entry under the Special Access Program but found not to qualify shall be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 90-25131 Filed 10-23-90; 8:45 am]

BILLING CODE 3510-DR-M

Permitting Entry of Certain Textile Products Exported From Tanzania

October 19, 1990.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs permitting entry of certain textile products.

EFFECTIVE DATE: October 24, 1990.

FOR FURTHER INFORMATION CONTACT: Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377–4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended (42 FR 1453); Executive Order 12475 of May 9, 1984 (49 FR 19996); section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

In a letter published in the Federal Register on August 17, 1990 (55 FR 33744), the Chairman of the Committee for the Implementation of Textile Agreements (CITA) directed the Commissioner of Customs to deny entry for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 340, 341, 347, 348, 640 and 641 which are exported from Tanzania, with Tanzania identified as the country of origin, and presented for entry on and after August 18, 1990, regardless of the date of export.

As a result of an investigation conducted by Commerce and Customs, CITA has identified certain textile and apparel exporters transshipping goods through Tanzania in circumvention of textile agreements negotiated pursuant to Section 204. Accordingly, the Customs Service will deny entry to future shipments from these sources. Additionally, CITA directs the Commissioner of Customs, effective on October 24, 1990, to permit entry of cotton and man-made fiber textile products in Categories 340, 341, 347, 348, 640 and 641 exported from Tanzania.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 54 FR 50797, published on December 11, 1989).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee For the Implementation of Textile Agreements

October 19, 1990.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Effective on October 24, 1990, this directive cancels the directive of August 13, 1990 issued to you by the Chairman of the Committee for the Implementation of Textile Agreements which directed you to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 340, 341, 347, 348, 640 and 641 which are

exported from Tanzania, with Tanzania identified as the country of origin, and preceded for entry on and after August 18, 1990, regardless of the date of export.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Telecommunications Service Priority System Oversight Committee; Establishment

ACTION: Establishment of the Telecommunications Service Priority System Oversight Committee.

SUMMARY: Under the provisions of Public Law 92-463, "Federal Advisory Committee Act," notice is hereby given that the Telecommunications Service Priority System Oversight Committee (TSPSOC) is being established.

The TSPSOC will advise the Manager, National Communications Systems and senior Defense Department officials regarding developments and problems in the Telecommunications Service Priority (TSP) System with the overall objective of recommending actions to correct system faults and prevent their recurrence. Specific aims of the TSPSOC will include: assessing responsiveness of the TSP System to national security and emergency preparedness requirements; reviewing and evaluating the adequacy and currency of policies, procedures and documentation requirements of the TSP System; and, assessing the design, and operation of the TSP System to ensure continued enhancement of capabilities in the light of emerging technological advances.

The TSPSOC will be composed of approximately 18 members, including both federal, state and local government and non-government individuals. Considerable efforts will be made to ensure that the members will be well-balanced as to points of view represented and the requirements of the functions to be performed. Members will be selected from among National Communications System organizations, private industry, telecommunications service vendors, and state and local governments.

Dated: October 18, 1990.

Linda M. Bynum,

Alternate OSC Federal Register Liaison Officer, Department of Defense.

[FR Doc. 90-25125 Filed 10-23-90; 8:45 am]

BILLING CODE 3810-01-M

Corps of Engineers; Department of the Army

Intent To Prepare Draft Environment Impact Statement (DEIS) for the Lower Amite River Flood Control, Louisiana, Study

AGENCY: U.S. Army Corps of Engineers, DOD, New Orleans District.

ACTION: Notice of intent.

SUMMARY: The purpose of this study is to investigate measures to provide flood relief to portions of Baton Rouge, Denham Springs, and other communities along the Amite River and its tributaries.

FOR FURTHER INFORMATION CONTACT: Questions regarding the proposed project and draft EIS should be addressed to: Mr. David Reece, telephone (504) 862-2522 or FTS 403-2522; mailing address—U.S. Army Corps of Engineers, Planning Division (CELMN-PD-RE), P.O. Box 60267, New Orleands, Louisiana 70160-0267.

SUPPLEMENTARY INFORMATION:

1. *Study authority:* This study is being conducted in response to a 1967 resolution of the Committee on Public Works of the United States Senate.

2. *Proposed project:* The purpose of this project is to reduce flood damages in certain areas of the Amite Basin by measures that would either reduce the height of flood stages or protect people and property from floodwaters, or both. Non-structural measures, such as improved floodplain management, will also be investigated.

3. *Alternatives.* Alternatives most likely to be studied in detail include: a 12,000-acre recreation reservoir with an 8,000-acre flood storage pool; a dry reservoir with about 13,000 acres of flood storage capacity; a reservoir with a permanent pool yet to be determined but less than that of the 12,000-acre reservoir; non-structural measures that could stand alone or be conducted with structural measures; and a no-action plan.

4. *Scoping process.* a. Extensive scoping has been done in conjunction with providing flood control measures for the Amite Basin. In 1985, more than 100 persons attended scoping meetings for the state's proposed Darlington Reservoir and, as a result of that scoping, 114 letters of comment were received. Following that scoping, a detailed study was performed under contract by Espey, Huston and Associates for the state. Many of the findings of that investigation will be used by the Corps during the course of the present study. Our present study will examine alternatives similar to those studied by the state, focusing on the same issues of concern. Since 1985, the Corps has continued to interact with state and local officials, as well as various interested groups and individuals, to insure that pertinent issues and concerns are addressed in either a state or Federal study. The scoping document prepared for the 1985 meetings and continued interaction with interested parties, as well as the findings of the study conducted by the state, will guide the course of the present Corps study.

b. Significant issues to be addressed in the EIS include: mineral resources, land use, public safety, fisheries, recreation resources, water quality, displacement of people, wildlife, aquatic habitat, property ownership and values, community cohesion, timber, endangered species, public services and facilities, swamps, cultural and historic resources, bottomland hardwoods, riparian habitat, aesthetics, community and regional growth, agriculture, business and industrial activity, upland hardwoods, natural and scenic streams, local government finance and tax revenues, and economic costs and benefits.

c. The U.S. Department of the Interior will provide a Fish and Wildlife Coordination Act Report. Coordination will be maintained with the U.S. Fish and Wildlife Service on endangered species. Also, coordination will be maintainted with the U.S. Soil Conservation Service regarding prime and unique farmlands. The Agricultural Stabilization and Conservation Service will be consulted regarding the "Swampbuster" provisions of the Food Security Act. The Corps will prepare a section 404(b)(1) Evaluation for review by the U.S. Environmental Protection Agency. Coordination will be maintained with the Advisory Council on Historic Preservation and the State Historic Preservation Officer. The Louisiana Department of Natural Resources will be consulted regarding consistency with the Coastal Zone Management Act. The Lousiana Department of Wildlife and Fisheries will be contacted concerning impacts to Natural and Scenic Streams. Application will be made to the Louisiana Department of Environmental Quality for a Water Quality Certificate.

d. A 45-day review period will be allowed so that all interested agencies, groups, and individuals will have the opportunity to comment on the draft report and EIS.

5. *Scoping meeting.* Since extensive scoping has already occurred, no additional formal scoping meetings will be scheduled.

6. *Availability.* The draft report and EIS are scheduled to be available to the public during the summer of 1992.

Dated: October 1, 1990.

Richard V. Gorski,

Colonel, U.S. Army, District Engineer.

BILLING CODE 3710-01-M

Office of the Secretary

Defense Nuclear Agency; Membership of the Performance Review Board

AGENCY: Defense Nuclear Agency, DOD.

ACTION: Notice of membership of the Defense Nuclear Agency Performance Review Board.

SUMMARY: This notice announces the appointment of the members of the Performance Review Board (PRB) of the Defense Nuclear Agency (DNA). The publication of PRB membership is required by 5 U.S.C. 4314(c)(4). The Performance Review Board shall provide fair and impartial review of Senior Executive Service performance appraisals and make recommendations regarding performance and performance awards to the Director, Defense Nuclear Agency.

EFFECTIVE DATE: The effective date of service for the appointees of the DNA PRB is on or about 19 November 1990.

FOR FURTHER INFORMATION CONTACT: D. Dial-Alfred, Policy Branch (CVPO), Defense Nuclear Agency, Washington, DC 20305-1000, (703) 325-7593.

SUPPLEMENTARY INFORMATION: The names and titles of the members of the DNA PRB are set forth below. All are DNA officials unless otherwise identified:

Dr. George W. Ullrich, Deputy Director
Major General Walter E. Webb, USAF, Director for Operations
Mr. Robert L. Brittigan, General Counsel
Mr. Curtis L. Dierdorff, Director of Personnel, Defense Mapping Agency
Dr. Spiros G. Pallas, Special Assistant to the Deputy Director for Tactical Warfare Programs, Office of the Secretary of Defense

The following DNA officials will serve as alternate members of the DNA PRB, as appropriate:

Dr. E. John Ainsworth, Scientific Director
Mr. John M. Bachkosky, Director for Plans, Programs and Requirements
Dr. Paul H. Carew, Comptroller
Mr. Frederick S. Celec, Deputy Director for Operations
Mr. Jonathan Z. Farber, Special Assistant to the Deputy Director
Mr. David G. Freeman, Director, Acquisition Management Office
Dr. Kent L. Goering, Chief, Structural Dynamics Division
Mr. Richard L. Gullickson, Chief, Electromagnetic Applications Division
Dr. Don A. Linger, Director for Test
Mr. Clifton B. McFarland, Jr., Chief, Weapons Effects Division
Mrs. Joan Ma Pierre, Director for Radiation Sciences
Mr. Robert C. Webb, Chief, Electronics Effects Division
Dr. Leon A. Wittwer, Chief, Atmospheric Effects Division

Dated: October 16, 1990

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Implementation Plan for Conducting Systematic Evaluation Program at the Rocky Flats Plant; Response to Recommendation 90-5 of the Defense Nuclear Facilities Safety Board

AGENCY: Department of Energy.

ACTION: Notice and request for Public comment.

SUMMARY: Pursuant to section 315(d) of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2285(d), the Department of Energy (DOE) hereby publishes notice of a response of the Secretary of Energy (Secretary) to Recommendation 90-5 of the Defense Nuclear Facilities Safety Board, concerning an implementation plan for conducting a Systematic Evaluation Program at the Rocky Flats Plant. DOE hereby requests public comment on the response of the Secretary to Recommendation 90-5.

DATES: Comments, data, views, or arguments concerning the Secretary's response are due on or before 30 days from the date of this notice.

ADDRESSES: Send comments, data, views, or arguments concerning the Secretary's response to: Defense Nuclear Facilities Safety Board, 625 Indiana Avenue NW., Suite 700, Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Donald F. Knuth, Deputy Assistant Secretary for Operations, Defense Programs, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

Dated: October 18, 1990.

Donald F. Knuth,

Deputy Assistant Secretary for Operations, Defense Programs.

October 15, 1990.

The Honorable John T. Conway,
Chairman,
Defense Nuclear Facilities Safety Board, 625 Indiana Avenue NW., Suite 700, Washington, DC 20004.

Dear Mr. Chairman: In accordance with Section 315 of Public Law 100-456 and with Defense Nuclear Facilities Safety Board Recommendation 90-5, which I accepted in my June 13, 1990, letter to the Board, I am enclosing the Department of Energy's (DOE) implementation plan for conducting a Systematic Evaluation Program at the Rocky Flats Plant. This program has already been initiated. We will keep you informed of our progress.

Our implementation plan is designed to take full account of the experience gained by the commercial power reactor industry under the Systematic Evaluation Program developed by the Nuclear Regulatory Commission to assess the safety adequacy of design at several of the older power reactors. As a result we believe that the overall concept and much of the detailed content of this plan can be equally applicable to other DOE facilities.

In connection with the above, I wish to take this opportunity to inform you that I have directed that a Systematic Evaluation Program also be initiated for the reactors at the Savannah River Site. We will keep you informed of our progress in executing this program as well.

Sincerely,

James D. Watkins,

Admiral, U.S. Navy (Retired).

SYSTEMATIC EVALUATION PROGRAM ROCKY FLATS PLANT IMPLEMENTATION PLAN

1.0 Introduction

1.1 Purpose

The structures and equipment at the U.S. Department of Energy (DOE) Rocky Flats Plant were, for the most part, designed and placed in operation long before current technical standards and criteria, design bases, and analytical procedures applicable to such structures and equipment were developed. In some cases, the design of these structures and equipment falls short of providing protection against natural phenomena and extreme conditions comparable to that which would be provided in facilities recently built. There is, therefore, a need to systematically assess the safety significance of

differences between the facility designs at Rocky Flats and more modern standards to ensure that a balanced and integrated level of safety is achieved for long-term operation of the Rocky Flats Plant.

In the short-term, before plutonium operations are resumed, numerous safety and operational improvements will have been implemented. A DOE operational readiness review will also have been conducted to confirm that these improvements are in place and effective. These efforts will include the actions necessary to respond to Defense Nuclear Facilities Safety Board recommendations 90-4, "Operational Readiness Review," and 90-6, "Criticality Safety at the Rocky Flats Plant."

With the completion of these efforts, the Department believes that the health and safety of the public will be assured during the conduct of plutonium operations while a systematic evaluation program as described below is completed.

Accordingly, DOE will develop and implement a Systematic Evaluation Program (SEP) at the Rocky Flats Plant, to commence as soon as practicable and be completed over about the next 4 years. The DOE has discussed this completion date with the Board, which finds it responsive to the Board's recommendation. The reasons and justification for the 4-year completion schedule will be communicated to the appropriate congressional committees in accordance with the requirements of law. The purpose of the SEP is to establish an integrated approach to assessing the design adequacy of the current Rocky Flats facilities from a safety point of view and to establish a basis for defining any needed facility improvements. The SEP will address all outstanding safety issues related to design and include, but not be limited to, consideration of the following items:

- Severe external events, with particular emphasis on seismic events, high winds, externally initiated fire, and airplane crashes;
- Severe internal events, with particular emphasis on internally initiated fire or explosion, flooding, chemical reactions, and accidental criticality;
- Ventilation system performance under severe external and internal events, including redundancy considerations; and
- Systems interaction.

An integrated assessment of the results of the evaluation, including criteria and procedures for making backfit decisions, will permit appropriate emphasis to be given to improving safety defense in depth at the Rocky Flats Plant. Experience with an SEP at the Nuclear Regulatory Commission (NRC) showed that an integrated assessment process provides an effective and efficient means to resolve a large number of interrelated issues and make balanced decisions regarding the need for improvements in plant safety.

1.2 Background

In 1977, the NRC initiated a Systematic Evaluation program to review the designs of older operating nuclear power plants to reconfirm and document their safety. Phase I of the SEP identified the safety topics to be reviewed and corresponding acceptance critiera. Phase II was the review of these topics for 10 older operating plants, including 5 of the oldest. The plant reviews consisted of comparision of the existing plant design against the current licensing criteria. Subsequently, the differences from current licensing criteria were evaluated in an integrated assessment to determine their relative safety signficance and the appropriate corrective action on a plant-specific basis. The purpose was not necessarily to bring the older plants into compliance with the newer requirements, but rather to ensure that the safety issues addressed by the requirements were either not present, or were adequately treated by the older plants. For example, administrative controls may be provided adequate resolution of issues addressed by design features in later plants. Initial reports from the NRC's SEP were issued in 1982.

The NRC SEP took place at a number of facilities over a period of about 5 years. Although some facility improvements were accomplished during this period, the concept of making plant specific improvements on the basis of integrated assessment meant that most improvements could not be implemented until the SEP was completed at the specific plant.

1.3 Terms and Definitions

The following terms and definitions are used within the SEP:

Topic—A technical subject selected for evaluation within the SEP. The identification of topics is based on consideration of a board range of technical issues, requirements, and potential topics. Topics may vary signficantly in scope.

Safety objective—A concise summary of the basic safety function(s) of the structures, systems, and components associated with a topic with respect to normal operation and design basis events. The safety objective is to be used to assess the significance of any deviations from current design requirements that may be identified during the SEP.

Current design requirements—Current DOE technical requirements for a topic applicable to new design activities. Commercial nuclear and industrial standards other than those currently referenced in DOE requirements will be considered in establishing design requirements, where necessary.

Acceptance criteria—Technical requirements for a topic to be used in the SEP evaluation of the topic. These criteria are to support the safety objective for their respective topic, but they may be less conservative than current design requirements.

Evaluation methodology—Technical approaches and methods to be applied in the evaluation of the facilities at the Rocky Flats Plant to determine how they measure up to the topic acceptance criteria. These methods may include deterministic analyses of selected design basis events, risk assessments to determine the contribution of the topic to overall facility risks, tests, design reviews, or as-built verifications.

2.0 Program Description

2.1 Scope

The SEP will focus primarily on public health and safety risks associated with accident prevention and mitigation. Significant contributors to the public risk resulting from normal operations, that are identified by the SEP, will also be addressed.

Worker safety within a particular facility will be considered when the SEP is applied to that facility. However, public safety is the primary reason for the SEP, and secondary emphasis will be placed on occupational hazards.

The SEP will provide for the early identification and timely resolution of any significant safety deficiencies discovered during the implementation of the program. The Rocky Flats Plant Issues Management Program will provide the necessary mechanism to ensure early evaluation of these significant safety deficiencies.

The Rocky Flats SEP will not address environmental, waste, emergency planning, and security issues, except to the extent that they are involved in the prevention and mitigation of the safety risks defined above. The SEP will not include upgrades of the plant required for the resumption of plutonium operations. However, the SEP will take account of the upgrades made before resumption.

The SEP at the Rocky Flats Plant will include all high and moderate hazard facilities, as defined in DOE Order 5481.1B, and any other facilities which perform a special function required for accident mitigation or emergency management. The SEP will focus on assessing the safety of structures, systems, and components. Operator training, maintenance, organization and management, planning, etc., will not be addressed, except to the extent that they directly affect the functional capability and safety performance of the structures, systems, and components.

The SEP to be performed at the Rocky Flats Plant will be somewhat broader than the SEP performed by the NRC, which was limited to public health and safety risks associated with accident prevention and mitigation. It will not cover the same scope as the NRC's Integrated Safety Assessment Program, which provided the regulatory framework for plant-specific resolution of significant SEP issues, all pending licensing actions, changes in regulatory requirements, and dominant contributors to risk.

The schedule and budget for the required SEP improvement actions will be accomplished outside of the SEP as a part of the normal budget and schedule process for the Rocky Flats Plant. Provisions will be established for tracking the implementation and closure of these SEP-related improvement actions, including an appropriate change control process.

2.2 Approach

The program will be carried out in four phases. The SEP will consist of three phases: identification and selection of the topics and requirements; performance of evaluation; and development of an integrated program of improvements. These will be followed by the fourth phase: implementation. These phases are described more fully in Section 3, below. Plans describing the objectives, procedures, and decision criteria for each phase of the SEP will be developed by the Rocky Flats contractor and approved by DOE. Upon the completion for each phase, a report will be prepared by the Rocky Flats contractor describing implementation and results, with special attention to any changes made to the original plan. DOE will issue a report on its evaluation of the contractor's report for each phase of the SEP.

A project management plan and quality assurance plan, developed by the contractor and approved by DOE, will provide for appropriate documentation and approval of any needed changes from the approved plans. Plan changes, if any, and the justification for the changes will be reported in quarterly reports, as well as in the final report for each phase.

Responsibilities and functions are specified in Section 4.

All plans and reports, including quarterly progress reports, will be submitted to the Defense Nuclear Facilities Safety Board upon receipt at DOE Headquarters.

2.3 SEP Objectives

DOE has established the following objectives for the Systematic Evaluation Program to be conducted at the Rocky Flats Plant:

(a) Compare structures, systems, and components in moderate and high hazard facilities with acceptance criteria for significant safety issues (topics).

(b) Evaluate departures from acceptance criteria, and provide for early identification of significant deficiencies for timely resolution.

(c) Decide on a program of plant improvements based on an integrated assessment.

(d) Assure that the SEP topic evaluations are brought to closure, and that provisions exist for tracking the implementation and closure of SEP-related plant improvements.

(e) Coordinate with other related programs at the Rocky Flats Plant, such as the upgrade of Safety Analysis Reports.

(f) Document the procedures, decision criteria, and results of each phase of the SEP.

2.4 Assumptions

The scope and approach for the SEP have been developed on the basis of the following assumptions:

- The other evaluation and upgrading programs for the Rocky Flats Plant (e.g., security, Safety Analysis Reports) will be implemented in reasonable accordance with current plans and schedules;
- DOE's new backfit policy will be available to guide decisions to be amde in Phase 3 of this SEP;
- The existing program control and tracking systems will allow individual facility improvements derived from the SEP to be identified and tracked to resolution within the context of the overall plant program of upgrades and improvements.

3.0 Detailed Technical Approach

This section describes the four phases of activity that constitute DOE's overall program for defining and implementing integrated safety improvements in the structures, systems, and components at the Rocky Flats Plant. The first three phases constitute the SEP, and the fourth phase covers implementation of any identified improvements.

Phase 1, "Topic Selection and Development of Evaluation Plans," includes the selection of SEP topics and development of a topics list, the definition of safety objectives, the identification of current design requirements, the definition of acceptance criteria and methodologies for the evaluation, and the planning for the detailed evaluation of each topic.

Phase 2, "Evaluation of Topics," includes evaluation of structures, systems, and components for each topic, determination and ranking of the safety significance of deviation(s) from criteria, for resolution of immediate safety concerns, identification of options for resolution of remaining deviations, and initial decisions for implementation of low cost improvements. Throughout this process an acceptable safety-safeguards interface will be maintained. In determining the safety significance of an item, the following attributes will be considered: an increase in the frequency of a plutonium release, an increase in the consequences of a plutonium release, a reduction in the safety margin that is provided to guard against a plutonium release, or identification of an Unreviewed Safety Question.

Phase 3, "Integrated Assessment," includes identification of improvement alternatives for the higher cost improvements, assessment of inter-relationships of topics and improvement alternatives, cost-benefit analyses and evaluations, and decisions regarding needed improvements. This effort will result in the identification and ranking of proposed improvement actions for the Rocky Flats Plant.

Phase 4 includes the planning, budgeting, and implementation of the improvements proposed as a result of the SEP integrated assessment.

3.1 Phase 1: Topic Selection and Development of Evaluation Plans

Phase 1 will include the identification and selection of potentially significant safety topics to be evaluated in the SEP and definition of the evaluation criteria and methodology to be used for evaluating each topic. An SEP Phase 1 Plan and Schedule will be developed by the Rocky Flats contractor and submitted to DOE for approval. The Phase 1 Plan will include more detailed instructions for performance of the Phase 1 activities.

3.1.1 Topic Selection

The topic selection activity will include the identification and selection of safety topics to be evaluated within the SEP at the Rocky Flats Plant. The identification of potential SEP topics is to include reviews of:

- Experience and operating history at Rocky Flats and other comparable facilities, including input from experts on plutonium processing facility design and operations;
- Technical issues contained in the Rocky Flats Plant Issues Management system; and
- NRC experience with commercial reactor SEPs, and commercial nuclear industry issues as identified in NRC generic licensing and inspection activities.

The topic selection process will consider sources of information from a broad perspective, including DOE orders and requirements, SEP experience gained from the commercial reactor sector, and other relevant documents such as NRC Regulatory Guides for plutonium facilities.

Potential topics are to be combined into a single master list of potential SEP topics. When combining these lists, the topics will be reviewed and screened using criteria similar to those applied in the NRC SEP. For example, redundant topics and topics not applicable to the Rocky Flats facilities may be deleted, and related and similar topics will be combined. In addition, topics may be deleted based on an assessment of potential safety significance, and the basis for deletion will be documented. Topic selection criteria are to be defined in the Phase 1 Plan. The underlying criterion for the SEP is that the topic must be of sufficient safety significance to warrant evaluation within the SEP. The resultant topics will be organized, to the extent practical, to align with the NRC standard format guide for safety analysis reports for plutonium processing facilities.

3.1.2 Acceptance Criteria and Evaluation Methodology

Safety objectives, current design requirements, acceptance criteria, and evaluation methodologies will be defined and documented for each of the selected topics. This process will consider the current design requirements defined in regulations and DOE orders, as well as the current industry requirements, standards, or practices.

3.1.3 Evaluation Plan

An evaluation plan will be developed for the evaluation of each topic. The development of the topic evaluation plans is to include the identification of any previous or ongoing safety evaluations at the Rocky Flats Plant that will be incorporated within the SEP evaluation of the topics, and the definition of interfaces with related topics. The topic evaluation plans will be directed towards identifying deviations from the acceptance criteria, with a focus on meeting the safety objectives of the topic with respect to identified design basis events.

3.1.4 Phase 1 Report

The results of the Phase 1 activities will be documented by the Rocky Flats contractor in a Phase 1 Report, which will include the final SEP topics list, and for each topic the safety objectives, current design requirements, acceptance criteria, evaluation methodology, and the topic evaluation plan. DOE will issue a report of its evaluation of the contractor's Phase 1 Report.

3.2 Phase 2: Evaluation of Topics

An SEP Phase 2 Plan and Schedule will be developed by the Rocky Flats contractor and submitted to DOE for approval. The schedule for the evaluation of each topic or group of topics will be developed based on a relative ranking of the topics. This ranking will take into consideration the potential safety significance of the topic, relationship to other topics, sequential requirements, and other factors.

Phase 2 of the SEP will include the evaluation of the SEP topics and the definition of any proposed facility improvements. The evaluation of each topic will be performed in accordance with the topic evaluation plan. The evaluation will identify and address differences and departures between the existing facility configuration and the acceptance criteria. If the evaluation determines that the safety objectives, current design requirements, and acceptance criteria are met, the topic will be closed with no further action required, other than documentation of the basis for reaching this conclusion. The safety significance of any deviations from current design requirements will be evaluated with respect to the safety objectives and to determine if the acceptance criteria are met.

If potential Unreviewed Safety Questions are identified during the SEP, they will be promptly referred to plant managers for processing and resolution. Prompt corrective actions will be taken where necessary for protection of the health and safety of the public. If Unreviewed Safety Questions are identified early in the SEP program that could affect resumption of operations, prompt notification to management will be made and appropriate actions will be taken to resolve the questions or to suspend any associated plutonium operations that may have been resumed.

Those deviations from acceptance criteria that can be resolved at a low cost (for example, procedure or programmatic changes), will be identified for early action. If the deviation is determined to be of minor or no safety significance, the topic will be closed.

At the conclusion of the evaluation of each topic, the results will be documented in an evaluation report for that topic. Where appropriate, the topic evaluation reports will include proposed action(s) to resolve deviations from acceptance criteria.

The results of the Phase 2 evaluations will be documented in a Phase 2 Report prepared by the Rocky Flats contractor. DOE will issue a report on its evaluation of the contractor's Phase 2 Report.

3.3 Phase 3: Integrated Assessment

An SEP Phase 3 Plan and Schedule for the integrated assessment will be prepared by the Rocky Flats contractor and submitted to DOE for approval.

Upon completion of the Phase 2 evaluation of all topics, an integrated assessment of the SEP Phase 2 results and proposed improvement actions will be performed. This effort will include consideration of alternative means of satisfying the safety objective for each topic. The integrated assessment will be performed in accordance with a documented decision process, which will include the following considerations:

- Interrelationship between individual topics and the associated actions for improvement;
- Relationships between other ongoing DOE defense complex programs, e.g., Defense Programs modernization, and SEP proposed actions for improvement;
- Cost-effectiveness of proposed actions with respect to a reduction in risk to the public health and safety;
- DOE's new backfit policy, including alternative actions for improvement;
- Remaining facility lifetime; and
- Improvements in defense in depth provided by safety systems and administrative controls.

The integrated assessment will result in the definition of an integrated set of recommended improvement actions. These proposed improvement actions will be ranked in broad categories of significance to facilitate the subsequent budgeting and scheduling of proposed

plant improvement projects. The SEP will ensure that provisions have been made for tracking the proposed improvements to completion. However, the planning, budgeting, and implementation of the improvements will be carried out in Phase 4.

The results of the integrated assessment process will be documented in a Phase 3 report by the Rocky Flats contractor. DOE will issue a report on its evaluation of the contractor's Phase 3 Report.

3.4 Phase 4: Implementation

Upon completion of the integrated assessment as documented in the Phase 3 Report, the recommended SEP corrective actions and improvements will be planned and scheduled. This process will include ranking the proposed actions consistent with other ongoing or future programs to upgrade the Rocky Flats Plant, and obtaining necessary approvals including any required for NEPA.

4.0 Administration of the Program

4.1 Responsibilities

The principal DOE responsibility for the SEP at the Rocky Flats Plant is assigned to the Deputy Assistant Secretary for Facilities, Defense Programs. To ensure adequate DOE management direction to the SEP and ongoing oversight of the SEP implementation, these responsibilities are delegated, through the Defense Programs management chain, to the DOE Systematic Evaluation Program Manager. The DOE SEP Manager is responsible for development of overall SEP policy, program development, budget preparation and justification, and broad program direction. The SEP Manager will ensure proper involvement of affected DOE Headquarters staff in the Rocky Flats SEP, and proper coordination and approval of SEP plans and reports.

The DOE Rocky Flats Office SEP Coordinator is responsible for the routine DOE activities of the SEP, consistent with the SEP Implementation Plan for the Rocky Flats Plant and directions from the DOE SEP Manager. The DOE Rocky Flats Office SEP Coordinator is to be the point of contact for routine information flow from the Rocky Flats Contractor to Headquarters.

The Rocky Flats Contractor has principal responsibility for the implementation of the Rocky Flats SEP consistent with the SEP Implementation Plan and the DOE approved plans for each Phase of the SEP. This responsibility includes: development and maintenance of the Project Management Plan, the Quality Assurance Plan, and the detailed plans for Phases 1, 2, and 3; implementation of Phases 1, 2, and 3; preparation of reports to document the results of each Phase; and coordination of plans and reports with DOE for review and approval. The Rocky Flats contractor is responsible for assembling the necessary team to ensure effective execution of the SEP.

4.2 Project Management Plan

A Project Management Plan (PMP) will be developed for the Rocky Flats SEP by the Rocky Flats contractor in accordance with the requirements of DOE 4700.1, "Project Management System." The PMP is to document the plans, schedules, and systems that those responsible for managing the project are to use.

The Rocky Flats SEP PMP is to include:

(1) Project Summary (including a project description and objectives).

(2) Project Milestones (Levels 1 and 2).

(3) Work Breakdown Structure (Levels 1, 2, and 3).

(4) Activity Network (to reflect sequences and dependencies).

(5) Organization and Responsibilities (for both DOE and the Rocky Flats Contractor).

(6) Budget.

(7) Reporting and Review Process.

4.3 Quality Assurance Plan

A Quality Assurance Plan (QAP) will be developed for the Rocky Flats SEP in accordance with the requirements of DOE 4700.1, "Project Management System," DOE 5700.6B, "Quality Assurance," and ANSI/ASME NQA-1. NQA-1 has been chosen as the basic document since it is endorsed by DOE 5700.6B as the preferred standard for nuclear facilities. The purpose of the QAP is to provide adequate confidence that the Rocky Flats SEP objectives are accomplished, and that SEP activities are performed in a controlled manner to meet technical and documentation requirements.

Development of the QAP is to include identification of the quality assurance elements which are applicable to each phase of the Rocky Flats SEP, and definition of the specific requirements for each element. The QAP will include activities and responsibilities for the Rocky Flats contractor and for interfaces with DOE.

The QAP is to include provisions for establishment and implementation of a change control process for the Rocky Flats SEP. This change control process will not include those change controls associated with the implementation of the SEP improvements because they are outside the scope of the SEP.

The QAP is to be developed and maintained by the Rocky Flats contractor and approved by DOE. Annual reviews of the QAP are to be performed to assure that the plan is kept current.

5.0 Schedule

Phase I of the SEP will be completed within 1 year of the issuance of this Implementation Plan. The Phase I report will include a schedule for the remaining phases. DOE will provide quarterly progress reports to keep the Board apprised of the status of progress being made toward completion of the SEP. In the event that additional time is necessary to complete a phase, or in the event that changes or supplements are required for already issued reports, DOE will promptly inform the Board and indicate the reasons justifying the change in the schedule or report content.

BILLING CODE 6450-01-M

Bonneville Power Administration

Availability Announcement of the Alternative Cost Determination for Fiscal Year 1990 Billing Credits Solicitation

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of availability. BPA File No.: BCR-3. BPA is announcing the availability of the Alternative Cost Proposal in the BPA Billing Credits Solicitation.

SUMMARY: BPA, in compliance with its Billing Credits Policy, as amended August 30, 1984 (48 FR 20275), has determined the alternative costs for the Billing Credits Solicitation. The alternative costs represent the estimated costs BPA would incur as a result of acquiring new resources to meet future firm load obligations. These alternative costs are consistent with BPA's Resource Program. BPA is willing to commit to these Alternative Costs for the full duration of billing credit contracts signed pursuant to this Billing Credits solicitation. These alternative costs form the basis for billing credits for conservation activities, and the upper limit on the amount of a billing credit for a resource other than conservation.

Responsible official: Paul Norman, Billing Credits Project Manager, is the official responsible for BPA's alternative costs.

DATES: Alternative costs are effective immediately.

FOR FURTHER INFORMATION CONTACT: For a copy of the BPA alternative costs, please contact the Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212.

Telephone numbers, voice/TTY, for the Public Involvement office are: 503–230–3478 in Portland; toll-free 800–452–8429 for Oregon outside of Portland; 800–847–6048 for Washington, Idaho, Montana, Utah, Nevada, Wyoming, and California. Information may also be obtained from:

Mr. George E. Gwinnutt, Lower Columbia Area Manager, suite 243, 1500 NE. Irving Street, Portland, Oregon 97232, 503–230–4551.

Mr. Robert N. Laffel, Eugene District Manager, room 306, 211 East Seventh Avenue, Eugene, Oregon 97401, 503–687–6952.

Mr. Wayne R. Lee, Upper Columbia Area Manager, room 561, West 920 Riverside Avenue, Spokane, Washington 99201, 509–456–2518.

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406–329–3060.

Mr. Ronald K. Rodewald, Wenatchee District Manager, room 307, 301 Yakima Street, Wenatchee, Washington 98801, 509–662–4377, extension 379.

Mr. Terence G. Esvelt, Puget Sound Area Manager, suite 400, 201 Queen Anne Avenue North, Seattle, Washington 98109–1030, 206–442–4130.

Mr. Thomas V. Wagenhoffer, Snake River Area Manager, 101 West Poplar, Walla Walla, Washington 99362, 509–522–6225.

Mr. Richard Itami, Idaho Falls District Manager, 1527 Hollipark Drive, Idaho Falls, Idaho 83401, 208–523–2706.

Mr. Thomas H. Hankenship, Boise District Manager, room 480, 304 North Eighth Street, Boise, Idaho 83702, 208–334–9137.

SUPPLEMENTARY INFORMATION:

I. Background

The alternative costs represent the estimated costs which BPA would incur as a result of acquiring new resources to meet future firm load obligations. These alternative costs reflect BPA's cost of acquisition, and are set forth in the way these costs would be recovered in BPA's rates for firm electric power.

A. Basis for Alternative Costs

These alternative costs stem from the BPA Resource Program analysis, and are therefore consistent with the Resource Program. These alternative cost determinations agree with resource offers which are currently being considered by BPA. Part of BPA's alternative cost analysis was a survey of current market conditions, and BPA found that other resource developments and purchases in the region today also agreed with BPA's alternative cost determinations.

BPA is willing to commit to these alternative costs for the full duration of billing credit contracts signed in this first round of billing credits. However, new alternative costs would be calculated for subsequent billing credit solicitations, and the methodology and assumptions for deriving these new alternative costs may change significantly from those relied on today.

BPA expects to have completed at least one round of competitive solicitations prior to the next billing credit solicitation, and this should provide additional information about the cost of future resource acquisitions.

These alternative costs form the basis for billing credits for conservation activities, and the upper limit on the amount of a billing credit for a resource other than conservation.

B. Alternative Resource Types

The Resource Program analysis and market surveys indicated that a single resource type cannot be considered as the alternative resource. There are several types of potentially cost-effective resources available for acquisition, all at about the same real levelized cost. These alternative resource types include:

- Cogeneration.
- System purchases.
- Displaceable purchases.
- Small hydro.
- Conservation.
- Combustion turbines (CT).

Therefore, rather than base the alternative costs on a single resource type, a range of alternative cost streams was identified, based on the range of alternative types of resources available to BPA for acquisition. The range of cost streams reflects the different fixed-to-variable cost ratios for these resource alternatives. These alternative cost streams differ in terms of the first year cost and rate of increase over time of the total alternative cost, but not in terms of the real levelized value of the alternative cost. Some resources, like small hydro, are capital intensive with most of the cost being fixed over time, while other resource types such as combustion turbines and displaceable purchases have costs that are predominantly composed of variable, or operating costs. One advantage of having a range of alternative cost streams is that it allows an alternative cost stream to be chosen which is most consistent with the cost stream of the billing credit resource.

C. Adjustment for Resource Characteristics

Since resource operating characteristics may have a significant effect on the cost of the resource to BPA, differences between the operating characteristics of the alternative cost resource and the billing credit resource must be taken into account.

These important characteristics are:

Capacity: The amount of capacity the resource would provide, or peak load reduction it would cause.

Seasonal distribution: The amount of firm energy the resource provides or saves in each month.

Displaceability: The ability to displace a resource when substitute sources of energy are available at lower operating costs.

BPA has estimated the marginal value of each of these resource characteristics, and will adjust the benchmark alternative costs as necessary to account for any differences between the alternative resource and the actual billing credit resource.

A special case of this potential adjustment to alternative costs is the Puget Sound Area of Western Washington. This area is a net importer of electric power, principally from regions east of the Cascades. This circumstance, coupled with rapid load growth in the area, is expected to cause voltage instability problems in the area under certain contingencies (*e.g.*, extremely cold weather, temporary loss of transmission lines). This voltage instability could result in reduction in service quality throughout the area, including blackouts. BPA and utilities serving the area are examining alternative solutions to this problem, including the acceleration of conservation programs and the development of additional generation within the area. To the extent that BPA can estimate the value of a billing credits proposal as it serves to alleviate the voltage instability problem, credit will be given in the evaluation.

D. Final Alternative Costs Determination

The alternative costs and adjustment values included in the solicitation are not sufficient to allow customers to determine the exact final alternative cost that would be included in a billing credit contract. The information in this solicitation does allow an approximation of the alternative cost. However, the final alternative cost determination for contract approval will be subject to BPA's evaluation of the

billing credit resource characteristics and contract negotiations.

II. Benchmark Real Levelized Alternative Costs

BPA's benchmark alternative costs are listed in Table 1. These alternative costs are presented in real levelized values (1990 dollars), for different on-line dates and various contract terms. These are called "benchmark" alternative costs because they will typically need to be adjusted to reflect the operating characteristics of a particular billing credit resource.

TABLE 1.—BENCHMARK REAL LEVELIZED ALTERNATIVE COSTS

[Mills per kWh (1990 Dollars)]

Resource life	1992	1993	1994	1995	1996
5	25.0	25.3	25.5	25.8	26.0
10	25.9	26.2	26.4	26.7	26.9
15	26.8	27.0	27.3	27.5	27.8
20	27.7	28.0	28.2	28.5	28.7
25	28.5	28.8	29.2	29.6	30.0
30	29.2	29.7	30.2	30.7	31.2
35	30.0	30.6	31.2	31.9	32.5
40	30.7	31.5	32.3	33.0	33.8
45	31.5	32.4	33.3	34.2	35.1
50	32.2	33.2	34.3	35.3	36.3

III. Nominal Alternative Costs

A. Introduction

The real levelized alternative costs described above are the basis for the nominal alternative costs upon which billing credits are actually computed.

Real levelized costs exclude the effects of inflation on resource costs. "Nominal" alternative costs include the effects of inflation, and are not levelized. Nominal alternative costs represent the actual year-by-year payments BPA would expect to make if it adquired the alternative resources.

B. Alternative Resource Types

As explained previously, BPA might acquire any of several types of resources, all at approximately the same real levelized cost. These resource types fall into three basic categories:

a. Hydro-type resources, with high capital costs and low variable cost. Nominal costs for these resources tend to start high, but do not rise very fast over the project life.

b. Cogenerative and system purchases. The fixed-to-variable cost ratios on these resouces vary, but tend to be more evenly split than for hydro-type resources.

c. Combustion turbine and displaceable purchases. These resources have low capital costs, but high variable costs. Consequently, their annual costs are low at first, but are subject to substantial escalation over time.

C. Fixed and Variable Alternative Costs

The nominal alternative costs have been divided into fixed and variable components. Table 2 shows the fixed, variable, and total alternative costs for the first contract years, expressed in 1990 dollars, corresponding to the benchmark real levelized alternative costs presented previously for two different on-line dates, two different contract terms, and for the three resource types described above.

The fixed component represents the annual payment to recover the capital cost of the alternative resource.

The variable component of the nominal alternative cost will be specified in 1990 dollars when the contract is signed, and then will be adjusted for each year of the contract by multiplying by the ratio of the Gross National Product (GNP) deflator index for each contract year to the GNP deflator index in 1990 to account for the effects of general inflation.

TABLE 2.—NOMINAL FIRST YEAR ALTERNATIVE COST: EXPRESSED IN 1990 DOLLARS

	Var cost (mills/kWh)	Fix Cost (mills/kWh)	Total (mills/kWh)
On-Line 1992:			
Displaceable Purchase/CT-Type Resource 20 yr Life	21.5	9.3	30.8
Displaceable Purchase/CT-Type Resource 40 yr Life	21.5	18.1	39.6
Cogen/System Sale-Type Resource 20 yr Life	14.3	21.9	36.2
Cogen/System Sale-Type Resource 40 yr Life	14.3	34.3	48.6
Hydro-Type Resource 20 yr Life	4.1	36.2	40.3
Hydro-Type Resource 40 yr Life	4.1	52.4	56.5
On-Line 1996:			
Displaceable Purchase/CT-Type Resource 20 yr Life	23.6	7.8	31.4
Displaceable Purchase/CT-Type Resource 40 yr Life	23.6	20.4	44.0
Cogen/System Sale-Type Resource 20 yr Life	15.4	20.4	35.8
Cogen/System Sale-Type Resource 40 yr Life	15.4	36.2	51.6
Hydro-Type Resource 20 yr Life	5.1	36.2	41.3
Hydro-Type Resource 40 yr Life	5.1	56.5	61.6

D. Example Nominal Cost Streams

Table 2 shows the nominal fixed, variable, and total alternative costs for three resource types corresponding to the 27.7-mill real levelized benchmark alternative cost for a 20-year resource and 40-year resource for 1992 and 1996 on-line dates. These nominal costs would correspond with the benchmark real levelized alternative costs from Table 1 of 27.7 and 30.7 for the 1992 on-line date (20-year and 40-year resource life, respectively) and 28.7 and 33.8 for the 1996 on-line date (20-year and 40-year resource life, respectively).

E. Adjustment of Fixed Alternative Costs

The nominal fixed alternative costs presented here are based on certain assumptions about how the alternative resources would be financed, and how BPA would pay those capital costs. There is no way of knowing in advance exactly how the fixed costs of the alternative resources would be shaped over the resource life, because financing arrangements can vary dramatically from resource to resource. In addition, the actual operating life of the alternative resources may vary from what is assumed here.

Because of this uncertainty, BPA is willing to adjust the shape of the fixed component of alternative cost. Shapes different from those shown here may be proposed by customers, and will be considered by BPA. Limitations on BPA's willingness to change the shape of alternative costs are:

a. That the real levelized alternative cost not increase,

b. That the new shape be one which BPA might reasonably expect to actually face on a resource acquisition, and

c. That the change in shape is to accommodate some real financing constraint or resource characteristic which makes the fixed cost shapes presented here unworkable for a particular billing credit resource.

IV. Materials Available

Copies of the BPA Billing Credits Solicitation (July 1990) and the BPA Billing Credits Policy (August 1984) are available from BPA's Public Involvement office. Refer to the "For Further Information Contact" section of this notice.

Issued in Portland, Oregon, on October 15, 1990.

James J. Jura,

Administrator.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. QF85-282-004, et al.]

Archbald Power Corporation, et al. Electric Rate, Small Power Production, and Interlocking Directorate Filings

October 16, 1990

Take notice that the following filings have been made with the Commission:

1. Archbald Power Corporation

[Docket No. QF85-282-004]

On October 9, 1990, Archbald Power Corporation (Applicant) of 100 Australian Avenue, Suite 304, West Palm Beach, Florida 33406, submitted for filing a Petition for Temporary Waiver of Operating Standard and Request For Expedited Consideration. Specifically, Applicant requests waiver of the Commission's operating standard for the period beginning September 11, 1990, through December 31, 1990, with respect to its 20.2 MW topping-cycle cogeneration facility located in Archbald Borough, Pennsylvania.

The original certification was issued on April 24, 1985. A recertification was issued on September 8, 1988. Applicant filed notices of qualifying status on December 29, 1988, and April 9, 1990.

Comment date: November 5, 1990, in accordance with Standard Paragraph E at the end of this notice.

2. New England Power Company

[Docket No. EL91-13-000]

Take notice that on October 4, 1990, New England Power Company (NEP) tendered for filing an amendment of service agreement between NEP and New Hampshire Electric Cooperative.

Comment date: October 29, 1990, in accordance with Standard Paragraph E at the end of this notice.

3. Central Virginia Electric Cooperative, Inc. and Craig-Botetourt Electric Cooperative, Inc. v. Virginia Electric and Power Company

[Docket No. EL90-52-000]

Take notice that on September 21, 1990 Central Virginia Electric Cooperative, Inc. (Central Virginia) and Craig-Botetourt Electric Cooperative, Inc. (Craig) (collectively, Cooperatives) tendered for filing a complaint against Virginia Electric and Power Company (VEPCO). Cooperatives state that the rates currently charged Cooperatives by VEPCO are excessive, unjust, unreasonably and unduly discriminatory. Cooperatives further state that the increased rates proposed by VEPCO in Docket No. ER90-540-000 are excessive, unjust, unreasonable and unduly discriminatory and therefore unlawful under the Federal Power Act.

In their complaint Cooperatives request that the Commission consolidate this docket with Docket Nos. EL90-49-000, EL90-51-000, and ER90-540-000.

Comment date: November 15, 1990, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-25076 Filed 10-23-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP91-112-000, et al.]

Transwestern Pipeline Co., et al.; Natural Gas Certificate Filings

October 18, 1990.

Take notice that the following filings have been made with the Commission:

1. Transwestern Pipeline Co.

[Docket No. CP91-112-000]

Take notice that on October 11, 1990, Transwestern Pipeline Company (Transwestern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP91-112-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport gas on behalf of Enron Gas Marketing, Inc. (Enron), a marketer of natural gas, under Transwestern's blanket certificate issued in Docket No. CP88-133-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Transwestern proposes to transport on an interruptible basis up to 200,000 MMBtu of natural gas equivalent per day on behalf of Enron pursuant to a transportation agreement dated September 11, 1990, between Transwestern and Enron. Transwestern would receive the gas at existing delivery points in Arizona, Oklahoma, Texas and New Mexico and redeliver equivalent volumes at existing delivery points in Arizona, Texas, Oklahoma and New Mexico.

Transwestern states that the estimated average daily and annual quantities would be 150,000 MMBtu and 73,000,000 MMBtu, respectively. Service under § 284.223(a) commenced on September 11, 1990, as reported in Docket No. ST91–57–000, it is stated.

Comment date: November 26, 1990, in accordance with Standard Paragraph G at the end of this notice.

2. Northern Natural Gas Co., Division of Enron Corp.

[Docket No. CP91–114–000]

Take notice that on October 11, 1990, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, Houston, Texas 77002, filed in Docekt No. CP91–114–000 an application pursuant to section 7(b) of the Natural Gas Act for permission for and approval to abandon, by removal, the Gray County #1 compressor station and all appurtenant facilities, including miscellaneous valves and piping, located in Gray County, Texas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Northern states that the Gray County #1 compressor station (Gray #1) was constructed to maintain the Panhandle-White Deer gas supply system and was placed into service on October 18, 1980. It is stated that the Gray #1 is a single stage compression facility and consists of one 228 horsepower single stage unit and one 111 horsepower single stage unit. It is submitted that currently, 15 wells flow gas at an average throughput of approximately 1,000 Mcf per day to the suction side of the Gray #1. It is stated that the gas is then discharged into the suction side of the McConnell compressor station, which is a two stage compression facility and consists of two 736 horsepower units and one 810 horsepower unit.

Northern submits that the Gray #1 has not been utilized for several years because compression has not been needed at this location to maintain deliveries of system supply to Northern's customers because of a decline in deliverabilities due to the plugging and abandoning of numerous wells. It is stated that compression located at the McConnell compressor station currently provides all of the required compression since there is sufficient line and compression capability at the McConnell compressor station to handle both McConnell's and Gray's gas. Therefore, Northern explains, the proposed abandonment of the Gray #1 will not result in the abandonment of any service to any of Northern's existing customers or producers, nor will the proposed abandonment adversely affect Northern's ability to receive gas since compression at the Gray #1 is no longer needed. Northern further states that approval of the abandonment will improve the efficiency of Northern's overall system operations by making the Gray #1 compression, unnecessary at its present location, available for possible future use elsewhere.

Comment date: November 6, 1990, in accordance with Standard Paragraph F at the end of this notice.

3. Southern Natural Gas Co.

[Docket No. CP91–120–000]

Take notice that on October 11, 1990, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP91–120–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Municipal Gas Authority of Georgia (MGAG), under Southern's blanket certificate issued in Docket No. CP88–316–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern requests authorization to transport, on an interruptible basis, up to a maximum of 100,000 MMBtu of natural gas per day for MGAG from receipt points located in Offshore Texas, Offshore Louisiana, Texas, Louisiana, Mississippi and Alabama to various points of delivery located in Georgia. Southern anticipates transporting 7,500 MMBtu of natural gas on an average day and an annual volume of 2,737,500 MMBtu.

Southern states that the transportation of natural gas for MGAG commenced August 23, 1990, as reported in Docket No. ST90–4599–000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Southern in Docket No. CP88–316–000.

Comment date: November 20, 1990, in accordance with Standard Paragraph G at the end of this notice.

4. K N Energy, Inc.

[Docket No. CP63–140–007]

Take notice that on October 1, 1990, K N Energy, Inc. (K N), 12055 West Second Place, Lakewood, Colorado 80215, filed in Docket No. CP63–140–007 a petition pursuant to section 7 of the Natural Gas Act to amend the Commission order issued in Docket Nos. CP63–140–000 and CP63–140–001, as amended, in order to construct and operate sales taps to make direct retail sales to customers located on or near K N's transmission facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

K N requests that the Commission issue an order amending K N's blanket certificate issued in Docket Nos. CP63–140–000 and CP63–140–001, as amended, granting K N permission to use the automatic authorization procedure set forth in § 157.211(a)(1) of the Commission's Regulations to construct and operate sales taps in order to make direct retail sales to customers located on or near its transmission facilities, or to issue an order approving such proposal. As an alternative, K N requests that the Commission issue an order reinstituting the historical automatic sales tap authority on a broad basis to those pipelines that would qualify.

K N states that on March 16, 1983, in Docket Nos. CP63–140–000 and CP63–140–001, the Commission granted K N a blanket certificate of public convenience and necessity pursuant to subpart F of part 157 of the Regulations, authorizing K N to perform certain routine activities on a self-implementing basis, subject to the notice procedure as set forth in § 157.205.

It is stated that on June 18, 1984, K N petitioned for an amended blanket certificate authorizing K N to utilize the prior notice procedure pursuant to § 157.205 for § 157.211(b) construction and operation of on-system sale taps for new or existing direct retail customers. K N states that in that petition it stated that the added costs, delays and uncertainties involved in obtaining a section 7(c) certificate were a deterrent to potential customers and an impediment to K N's ability to provide service. It is indicated that on November 23, 1984, the Commission granted K N the blanket authority it had requested in Docket No. CP63–140–002 and that to date, K N has filed such requests for

Market authorization to install approximately 414 sales taps.

K N states that on October 20, 1986, it filed a petition to amend its blanket certificate in order to permit K N to use the automatic authorization procedure of § 157.211(a)(1) of the Regulations to construct and operate sales taps to make direct retail sales to 200 MMBtu or less of natural gas per day to customers who are at or near its transmission facilities but who are not right-of-way grantors. It is indicated that such petition was denied by the Commission order dated September 17, 1987, and that rehearing was denied by the Commission order dated March 24, 1988.

K N states that by this subject petition it is renewing its request that the Commission amend the blanket certificate issued to K N in Docket Nos. CP83–140–000 and CP83–140–001, as amended, to permit K N to use the automatic authorization procedure set forth in § 157.211(a)(1) of the Regulations in order to construct and operate sales taps for the ultimate delivery of up to 200 MMBtu of natural gas per day to residential, small commercial, agricultural, and small industrial end users located on or near K N's transmission facilities. K N states that it is limiting its request in that the proposed automatic authority would not be used to service customers within another local distributor's franchise area. K N points out that it is unique in that it makes most of its gas sales at retail as a local distributor subject to state and local regulation. K N further indicates that, unlike most other interstate pipelines, many of its jurisdictional transmission pipelines are used to serve rural customers for domestic and agricultural purposes. Finally, K N states that it has a retail service obligation under state law.

K N specifically states that it is not seeking automatic authorization to add additional wholesale delivery points to new or existing sales-for-resale customers or to add sales taps for large volume customers.

Comment date: November 6, 1990, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

5. Texas Eastern Transmission Corp.

[Docket No. CP91–10–000, Docket No. CP91–11–000]

Take notice that on October 1, 1990, Texas Gas Transmission Corporation, Post Office Box 2521, Houston, Texas 77252–2521, filed in the respective dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under its blanket certificate issued in Docket No. CP88–136–007, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection.[1]

A summary of each transportation service which includes the shippers identity, the peak day, average day and annual volumes, the receipt point(s), the delivery point(s), the applicable rate schedule, and the docket number and service commencement date of the 120-day automatic authorization under § 284.223 of the Commission's Regulations is provided in the attached appendix.

Comment date: November 30, 1990, in accordance with Standard Paragraph G at the end of this notice.

[1] These prior notice requests are not consolidated.

Docket No. (date filed)	Applicant	Shipper name	Peak day avg, annual [2]	Points of Receipt	Points of Delivery	Start up date, rate schedule	Related dockets [3]
CP91–10–000 (10–1–91)	Texas Eastern Transmission Company.	Amerada Hess Corporation.	100,000 100,000 36,500,000	Offshore LA, LA, AL, AR, IL, IN, KY, MO, NJ, MS, NY, OH, PA, TN, TX, WV.	Offshore TX & LA, TX, LA.	8–1–90, IT–1	CP88–136–007, ST90–4562–000.
CP91–11–000 (10–1–91)	Texas Eastern Transmission Company.	Delta Pipeline Company.	2,511 2,511 916,515	Offshore LA, LA, AL, AR, IL, IN, KY, MO, MS, NJ, NY, OH, PA, TN, TX, WV.	Offshore TX & LA	8–1–90, IT–1	CP88–136–007, ST90–4561–000.

[2] Quantities are shown in MMBtu unless otherwise indicated.
[3] The RP docket corresponds to applicant's blanket transportation certificate. If an ST docket is shown, 120-day transportation service was reported in it.

6. Questar Pipeline Co.

[Docket No. CP90–2265–000]

Take notice that on September 21, 1990, Questar Pipeline Company (Questar), 79 South State Street, Salt Lake City, Utah 84111, filed an application, as supplemented October 5, 1990, with the Commission pursuant to section 7(b) of the Natural Gas Act (NGA) for permission and approval to retroactively abandon a firm natural gas sale which was converted to a firm natural gas transportation service for Mountain Fuel Supply Company (Mountain Fuel), all as more fully set forth in the application which is open to public inspection.

Questar proposes to abandon, effective November 1, 1989, a daily firm natural gas sale of 53,850 dekatherms under its FERC Rate Schedule CD–1 to Mountain Fuel. Questar states that it converted this sale to a daily firm transportation service of 53,850 dekatherms under its FERC Rate Schedule T–1 for Mountain Fuel on November 1, 1989, as reported in its initial report filed in Docket No. ST90–3746.

Comment date: November 6, 1990, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural

Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA90-1-63-003]

Carnegie Natural Gas Co.; Compliance Filing

October 17, 1990.

Take notice that on October 12, 1990, Carnegie Natural Gas Company ("Carnegie") tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1:

Third Substitute Ninth Revised Sheet No. 8
Third Substitute Ninth Revised Sheet No. 9
First Revised Sheet No. 114
Original Sheet No. 114a
First Revised Sheet No. 115
Original Sheet No. 115a

Carnegie states that these revised tariff sheets, which among other things revises sections of its purchased gas adjustment ("PGA") clause, are being filed in compliance with a Commission order issued on September 13, 1990, in Docket Nos. TA90-1-63-000, TA90-1-63-001, and TA90-1-63-002. Pursuant to this order, the Commission required Carnegie to recompute its surcharge rate included in Carnegie's annual PGA filed on June 19, 1990, in Docket No. TA90-1-63-000, with an effective date of September 1, 1990. The September 13th Commission order required changes in certain tariff language to specify the method used by Carnegie to compute its current adjustment for Rate Schedule LVIS and to comply with § 154.305(b)(2) of the Commission's regulations. The Commission also required Carnegie to provide additional information supporting its filing. Carnegie states that its filing complies with the Commission's order in these dockets. In support of its filing, Carnegie attached revised tariff sheets, schedules, working papers, and other information.

Carnegie states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 25, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 1417-001; Project No. 1835-013]

Central Nebraska Public Power and Irrigation District; Nebraska Public Power District; Extend Comment Date

October 5, 1990.

On August 20, 1990, the Federal Energy Regulatory Commission (FERC) issued notices of application for Projects No. 1835 and 1417 that established October 5, 1990, as the notice comment due date for each. (55 FR 35937, September 4, 1990).

Numerous parties have requested to extend the notice comment dates of the above-mentioned projects. Therefore, we are extending the comment period to November 20, 1990, as to coincide with receipt of the environmental impact statement scoping comments.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM91-3-22-000]

CNG Transmission Corp.; Proposed Changes in FERC Gas Tariff

October 17, 1990.

Take notice that CNG Transmission Corporation ("CNG"), on October 15, 1990, pursuant to section 4 of the Natural Gas Act, the Stipulation and Agreement approved by the Commission on October 6, 1989, in Docket Nos. RP88-217, *et al.*, and § 12.9 of the General Terms and Conditions of CNG's FERC Gas Tariff, filed six (6) copies of the following revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1:

Proposed To Be Effective September 1, 1990

Second Substitute First Revised Sheet No. 211
Substitute First Revised Sheet No. 212

Proposed To Be Effective October 1, 1990

First Revised Sheet No. 41
First Revised Sheet No. 45
Second Revised Sheet No. 46
First Revised Sheet No. 49
Second Revised Sheet No. 52
First Revised Sheet No. 203
First Revised Sheet No. 205
First Revised Sheet No. 206
First Revised Sheet No. 207
First Revised Sheet No. 208
Second Revised Sheet No. 209
Third Revised Sheet No. 210
Second Revised Sheet No. 211
Second Revised Sheet No. 212
Original Sheet No. 212A

Proposed To Be Effective November 1, 1990

Third Revised Original Sheet No. 32
Second Revised Sheet No. 49

BEST COPY AVAILABLE

The purpose of the filing is to flow through changes in take-or-pay costs allocated to CNG by its pipeline suppliers. Also, CNG is proposing to revise tariff language to permit it to recover past take-or-pay amounts that are billed from Tennessee Gas Pipeline Company to CNG that are directly assignable to Corning National Gas Corporation. CNG is also proposing a voluntary reduction in its fuel retention and fuel charges under Rate Schedules TF and TI.

CNG states that copies of this filing were served upon CNG's customers as well as interested parties.

Any person desiring to be heard or to protest said filing should be file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should filed on or before October 25, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. G-4579-004, et al.[1]]

Mobil Exploration and Producing North America, Inc., et al.; Order on Remand and Filing Requirements For Successors-in-Interest

Issued October 17, 1990.

Before Commissioners: Martin L. Allday, Chairman; Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

In *Mobil Exploration and Producing North America, Inc.* v. *FERC*,[2] (Mobil) the United States Court of Appeals for the Fifth Circuit affirmed in part and vacated in part the Commission's order in *George R. Brown Partnership*, (George R. Brown) [3] which had applied the Commission's new policy on successor certificates that the Commission announced in February 1988 in Tenneco Oil Co. (Tenneco).[4] In George R. Brown, the Commission reviewed appeals of orders issued by the Director of the Office of Pipeline and Producer Regulation (Director) [5] that had been filed by various producers who had acquired leasehold interests in gas producing property, and requested successor certificates. The orders issued by the Director granted the certificates but limited the rates to the predecessors' rates in effect on the date of transfer of the properties and required the producers to refund any amounts in excess of the predecessor's rates collected between the time of acquisition of the leasehold interest and the time of filing for a successor certificate because the producers had failed to meet the one-year limit imposed in Tenneco.

Prior to 1988, the Commission's policy was to issue certificates to successors and to permit the successors to collect all periodic and monthly escalations from the time of acquisition to the time they filed for the successor certificate, regardless of when the application was made. In Tenneco, the Commission changed its policy and imposed a one-year time limit for making the successor filing, and stated that if the successor filing was not timely, the successor would be limited to the rate in effect when the property was acquired. However, Tenneco stated that the new policy would be prospective and would not apply to successor applications already on file.[6]

Several months after Tenneco, petitioners in Mobil [7] filed their applications for successor certificates for interests acquired by them more than one year prior to the filings. Applying the Tenneco rule, the Director issued the certificates but required the applicants to refund amounts in excess of the predecessors' rates collected between the time each acquired the property and the time each filed for a successor certificate. On review, in George R. Brown, the Commission waived the Tenneco one-year filing requirement for a period of ninety (90) days following the February 5, 1988 issuance of Tenneco.[8] However, since the filings by petitioners were made more than one year after the effective date of the property transfer, and were not made within the 90-day waiver period, the Commission upheld the Director's orders directing petitioners to make refunds.[9]

In Mobil, the court affirmed the portions of the Commission's orders that required successors in interest to file for a certificate within one year of the effective date of the transfer, or within the 90-day waiver period following the Tenneco order. The court also upheld the Commission's decision to announce the change in policy in an adjudication rather than in a rulemaking. However, the court stated that where the Commission changes its policy and announces a new principle, and it does so by adjudication, the Commission must provide notice of the new policy "which is reasonably calculated to inform all those whose legally protected interests may be affected by the new principle."[10] The Tenneco order was not published in the Federal Register, was one of 75 orders on a consent agenda and passed with no discussion at the Commission meeting, no request for rehearing was filed because the new policy announced therein was inapplicable to the producer in Tenneco, and there was nothing in the heading or the ordering paragraphs to signal a change in policy. Under these circumstances, the court found that the Commission "failed to provide actual or constructive notice reasonably calculated to inform petitioners of the one-year time limit." [11] Accordingly, the court vacated the portions of the order requiring refunds as to petitioners who did not have actual or constructive notice of the one year time limit to file. This order implements the court's decision.

The portions of the George R. Brown order that require petitioners to refund any rates in excess of the predecessors' rates collected until the time of filing are vacated. In addition, this order shall be published in the Federal Register to provide all affected parties with notice to Tenneco policy.

In order to allow sufficient time for compliance, the Commissioin will waive the Tenneco policy for a period of 90 days following publication of this order in the Federal Register.

---

[1] See attached Appendix.

[2] 883 F.2d 388 (5th Cir. 1989).

[3] 44 FERC ¶ 61,169 (1988), *reh'g denied, sub nom.* Mobil Exploration and Producing North America, Inc. *et al.*, 46 FERC ¶ 61,281 (1989).

[4] 34 FERC ¶ 61,063 (1986).

[5] The orders were issued on July 7, 1987, August 10, 1987, September 3, 1987, September 25, 1987, and September 28, 1987.

[6] Since the Commission allowed the applicant in Tenneco to retain all rate increases, no rehearing was filed.

[7] Petitioners were Mobil Exploration and Producing North America, Inc., Tenneco Inc. and Texas Producing Inc., and OXY USA Inc. (formerly Cities Service Oil and Gas Corporation). Other producers directed to make refunds in George R. Brown were not parties to the appeal.

[8] The Commission explained that the 90-day waiver period was to provide 30 days for rehearing of Tenneco, 30 days for Commission action on the request, and 30 days for successors to prepare and make the filing with the Commission.

[9] The Commission's order granted the appeals of producers whose filings were within the 90-day waiver period or who had demonstrated good cause for a waiver of the refund.

[10] 877 F.2d at 198.

[11] *Id.* at 200.

In light of the Court's finding concerning the notice issue, we believe that other successors who were required to make refunds because of untimely filings may not have had adequate notice and sufficient time to comply. Accordingly, we will also vacate the refund condition imposed in successor certificates listed in the Appendix.

The Commission Orders

(A) The portions of the *George R. Brown* order that require petitioners to refund any rate in excess of the predecessors' rates collected from the date of transfer until the successor filing are vacated.

(B) The portions of any certificated of public convenience and necessity listed on the Appendix that imposed a refund obligation based upon the failure to timely file in accordance with the Tenneco rule are vacated.[18]

(C) The Secretary shall cause this order to be published in the Federal Register.

By the Commission.

Lois D. Cashell,

Secretary.

[18] The petition filed by Pennzoil Product Co. in Docket NO. CI91-[illegible], a docket on the appendix, to reopen the proceeding and vacate the refund obligation, is dismissed as moot.

BILLING CODE 6717-01-M

[Docket No. RP91-9-000]

National Fuel Gas Supply Corp.; Limited Purpose Rate Change Filing

October 17, 1990.

Take notice that on October 15, 1990, National Fuel Gas Supply Corporation (National), pursuant to Section 4 of the Natural Gas Act and in compliance with the Niagara Import Point Projects Phase III certificate order, 52 FERC ¶61,257, issued on September 13, 1990 in CP88-194-001 et al, submitted a limited purpose rate change.

National states the purpose of this filing is to change the firm transportation rates for specific shippers in Phase I and Phase II to match the rates approved for Phase III. This limited purpose rate change filing was authorized by the Commission in the Niagara Import Point Project Phase III certificate order.

Phase I service is National's firm transportation of gas into and out of storage, between Ellisburg and Leidy, Pennsylvania, associated with Transco's SS-2 storage service, certificated on July 27, 1989. National Fuel Gas Supply Corporation, et al., 48 FERC ¶61,121 (1989). Phase II service is National's firm transportation for the TEMCO/ESSO project between the Niagara import point and Wharton, Pennsylvania, certificated on May 2, 1990. National Fuel Gas Supply Corporation, et al., 51 FERC ¶61,113 (1990).

National states that this limited purpose rate change will have no impact on any of National's other existing customers. These rates are based only on the costs of the incremental facilities to be built to provide the Phase I, II, and III transportation services.

National proposes to charge the following rates for all its Niagara transportation services, regardless of Phase, for each zone:

	Demand	Commodity
Zone I	$1.2[illegible] per Mcf	$0.0480 per Mcf
Zone II	$0.65[illegible] per Mcf	$0.0243 per Mcf
Zone III	$0.90[illegible] per Mcf	$0.0409 per Mcf
Total	$2.87[illegible] per Mcf	$0.1132 per Mcf

The following revised tariff sheets have been filed, as part of Volume 2 of National's FERC Gas Tariff, to reflect these proposed rates:

Phase I

Special Rate Schedule X-54
First Revised Sheet No. 796

Phase II

Special Rate Schedule X-57
Second Revised Sheet No. 857
First Revised Sheet No. 869

National requests that: (1) The notice of this limited purpose rate filing be published immediately, with a shortened comment period of no more than seven days; (2) the proposed rates for National's Niagara Import Point Project Phase I and Phase II shippers not be suspended and made subject to refund; and (3) these rates be put into effect immediately thereafter, and in no case later than November 1, 1990.

National has appended to this filing two exhibits to support the rate changes.

Exhibit 1 is a copy of the Staff's actual workpapers used to compute the approved rates in the Phase III order for National. The Staff has these workpapers included in the formal record for the Niagara Import Point Projects on October 2, 1990.

Exhibit 2 is National's own worksheets for deriving costs-of-service and setting the rates for all three zones. National states that it replicated Staff's worksheets, adjusted only to correct obvious computing errors. These errors are described in the filing, and relate to Zone I billing determinants, Zone III billing determinants, accumulated deferred income taxes, and equity component of AFUDC.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 24, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

Federal Energy Regulatory Commission

[Docket No. TA91-1-37-005]

Northwest Pipeline Corp.; Refund Report

October 17, 1990.

Take notice that on September 28, 1990, Northwest Pipeline Corporation (Northwest) tendered for filing a refund report that reflects refunds made under tariff sheets accepted by the Commission in compliance with the Commission order that was issued on March 29, 1990 in Docket No. TA90-1-37-000.

Northwest notes that a copy of this refund report is being served on all jurisdictional sales customers and affected state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990). All such protests should be filed on or before October 25, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ91-1-8-007; TM91-1-8-001]

Tennessee Gas Pipeline Co.; Tariff Filing

October 17, 1990.

Take notice that on October 15, 1990, Tennessee Gas Pipeline Company (Tennessee) tendered for filing, in compliance with the Commission's September 27, 1990 Letter Order (Letter Order) in the captioned proceedings, the following tariff sheets to be effective October 1, 1990:

Second Revised Volume No. 1
Substitute Twentieth Revised Sheet No. 30
Substitute Eighteenth Revised Sheet No. 20A
Substitute Eleventh Revised Sheet No. 22
Substitute Sixth Revised Sheet No. 22A
Substitute Tenth Revised Sheet No. 23
Substitute Tenth Revised Sheet No. 24

Original Volume No. 2
Substitute Tenth Revised Sheet No. 10

Tennessee also tendered for filing Substitute Eleventh Revised Sheet No. 10 to Original Volume No. 2, to become effective November 1, 1990.

The purpose of this filing is to revise the Annual Charge Adjustment (ACA) to reflect the revision in the ACA rate established in the Commission's order in Docket Nos. RM87-3-000, TM91-1-20-000, *et al.*, and in the Commission's Letter Order. Tennessee filed Substitute Eleventh Revised Sheet No. 10, to be effective November 1, 1990, to replace Eleventh Revised Sheet No. 10, which reflected the old ACA rate and was filed on October 1, 1990 in Tennessee Gas Pipeline Company, Docket No. CP87-132.

Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1990)). All such protests should be filed on or before October 24, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TM91-3-29-000]

Transcontinental Gas Pipe Corp.; Proposed Changes in FERC Gas Tariff

October 17, 1990.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on October 15, 1990, certain revised tariff sheets to Second Revised Volume No. 1 of its FERC Gas Tariff included in Appendix A attached to the filing.

Transco states that the purpose of the filing is to track rate changes attributable to (1) storage services purchased from Consolidated Natural Gas (CNG) under its Rate Schedule GSS and transportation services purchased from National Fuel Gas Supply Corporation (National Fuel) under its Rate Schedule X-42 the costs of which are included in the rates and charges payable under Transco's Rate Schedule LSS, (2) storage services purchased from Texas Eastern Transmission Corporation (TETCO) under its Rate Schedule X-28 the costs of which are included in the rates and charges payable under Transco's Rate Schedule S-2, (3) transportation services purchased from National Fuel under its Rate Schedule X-34 the costs of which are included in the rates and charges payable under Transco's Rate Schedule SS-2, and (4) transportation services purchased from North Penn Gas Company (North Penn) under its rate Schedule SS the costs of which are included in the rates and charges payable under Transco's Rate Schedule SS-1. The tracking filing is being made pursuant to Section 4 of Transco's Rate Schedule LSS Section 4 of Transco's Rate Schedule SS-2, Section 5 of Transco's Rate Schedule SS-1, and Section 26 of the General Terms and Conditions of Volume No. 1 of its FERC Gas Tariff.

Included in Appendices B through H attached to the filing are explanations of each of the tracking rate changes, the proposed effective date of such changes and details regarding the computation of the revised LSS, S-2, SS-2, and SS-1 rates.

Also included therein for filing are revised tariff sheets which incorporate the Rate Schedule LSS, S-2, SS-2, and SS-1 rate changes proposed therein into subsequent intervening rate filings which have been accepted or are currently pending Commission acceptance on the effective dates reflected thereon.

Transco states that copies of the filing are being mailed to each of its customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE. Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before October 24, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,
Secretary.

Office of Fossil Energy

[FE Docket No. 90-86-NG]

V.H.C. Gas Systems, L.P.; Order Granting Blanket Authorization To Import and Export Natural Gas, Including Liquefied Natural Gas

AGENCY: Office of Fossil Energy, DOE.
ACTION: Notice of an order granting blanket authorization to import and to export natural gas, including liquefied natural gas.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting V.H.C. Gas Systems, L.P. (V.H.C. Gas Systems) blanket authorization to import up to 150 Bcf and to export up to 150 Bcf of natural gas, including liquefied natural gas, over a two-year period beginning on the date of the first import or export.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 15, 1990.

Clifford P. Tomaszewski,
Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Proposed Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.
ACTION: Notice of proposed implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) announces the proposed procedures for the disbursement of $788,586.45, plus accrued interest, obtained by the DOE under the terms of five consent orders. The DOE received $101,000 pursuant to a consent order with Benton Pruet d/b/a P & R Trading Company and a total of $687,586.45 pursuant to four separate consent orders with Trigon Exploration Company, Inc., *et al.* The four Trigon Exploration Company, Inc. (Trigon) consent orders are with Trigon and C. William Rogers, Trigon and Omni Drilling Partnership No. 1978-2, Trigon and D. Bryan Ferguson, and Trigon and Entex, Inc. The OHA has tentatively determined that the funds will be distributed in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986).

DATES AND ADDRESSES: Comments must be filed in duplicate on or before November 23, 1990, and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585. All comments should display a reference to case numbers LEF-0018 & LEF-0019.

FOR FURTHER INFORMATION CONTACT: Thomas L. Wieker, Deputy Director, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-2390.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy (DOE), 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision and Order sets forth the procedures that the DOE has tentatively formulated to distribute $788,586.45 that has been remitted to the DOE pursuant to the terms of five consent orders. The DOE received $101,000 pursuant to a consent order with Benton Pruet d/b/a P & R Trading Company. The DOE also received $687,586.45 pursuant to four separate Trigon Exploration Company, Inc. (Trigon) consent orders with Trigon and C. William Rogers, Trigon and Omni Drilling Partnership No. 1978-2, Trigon and D. Bryan Ferguson, and Trigon and Entex, Inc. The DOE is currently holding the funds in an interest bearing account pending distribution.

The DOE has tentatively determined to distribute these funds in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986). Under the Modified Policy, crude oil overcharge monies are divided among the states, federal government, and injured purchasers of refined products. Under the plan we are proposing, refunds to the states would be in proportion of each state's consumption of petroleum products during the period of price controls. Refunds to eligible purchasers would be based on the number of gallons of petroleum products which they purchased and the extent to which they can demonstrate injury.

Applications for refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of the publication in the Federal Register, and should be sent to the address set forth at the beginning of this notice. All comments received will be available for public inspection between the hours of 1 p.m. through 5 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Hearings and Appeals, located in room 1E-234, 1000 Independence Avenue SW., Washington, DC 20585.

Dated: October 18, 1990.

George B. Breznay,
Director, Office of Hearings and Appeals.

Implementation of Special Refund Procedures

Names of Firms: Benton Pruet d/b/a P&R Trading Company Trigon Exploration Company, Inc., *et al.*
Dates of Filing: July 7, 1990, July 17, 1990.
Case Numbers: LEF-0018, LEF-0019.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special refund procedures. 10 CFR 205.281. These procedures are used to refund monies to those injured by actual or alleged violations of the DOE price regulations.

In this Decision and Order, we consider two Petitions for the Implementation of Special Refund Procedures filed by the ERA for crude oil overcharge funds. The first petition deals with Benton Pruet d/b/a P&R Trading Company (Pruet) (Case No. LEF-0018). This Office issued a Remedial Order against Pruet for violations of the crude oil resale regulations during the period from September 1979 through November 1980. *P&R Trading Company*, 13 DOE ¶ 83,023 (1985). Pruet subsequently appealed to the Federal Energy Regulatory Commission. Pruet and the DOE then entered into a consent order (No. 0A03X00035) under which Pruet remitted $101,000 in settlement of the DOE's claims.[1]

[1] The Remedial Order found that Pruet committed violations of the regulations concerning the resale of crude oil during the period from September 1979 through November 1980. The consent order settles Pruet's liability with regard to any potential violation of the federal petroleum and price regulations during the period from September 1, 1979 through January 27, 1981. Consent Order at ¶

Continued

The second petition deals with Trigon Exploration Company, Inc. (Trigon), *et al.*, a producer of crude oil (Case No. LEF-0019). On August 30, 1985 the ERA issued a Proposed Remedial Order to Trigon alleging violations of the regulations regarding the sale of crude oil during the period June 1979 through December 1980. The DOE has subsequently entered into four consent orders with Trigon and four working interest owners who have remitted a total amount of $687,586.45 in settlement of any potential violations arising out of the sale of crude oil from June 1979 through January 21, 1981 (all four consent orders are subsumed under one consent order number: 650C00374). 52 FR 27574 (July 22, 1987). These consent orders are with Trigon and C. William Rogers, Trigon and Omni Drilling Partnership No. 1978–2, Trigon and D. Bryan Ferguson, Trigon and Entex, Inc. (hereinafter collectively referred to as Trigon, *et al.*).

In sum, Pruet and Trigon, *et al.*, remitted $788,586.45 to the DOE. This Proposed Decision and Order sets forth the OHA's tentative plan to distribute these funds. Comments are solicited.

The general guidelines which the OHA may use to formulate and implement a plan to distribute refunds are set forth in 10 CFR part 205, subpart V. The subpart V process may be used in situations where the DOE cannot readily identify the persons who may have been injured as a result of actual or alleged violations of the regulations or ascertain the amount of the refund each person should receive. For a more detailed discussion of subpart V and the authority of the OHA to fashion procedures to distribute refunds, see Office of Enforcement, 9 DOE ¶ 82,508 (1981), and Office of Enforcement, 8 DOE ¶ 82,597 (1981). We have considered the ERA's request to implement subpart V procedures with respect to the monies received from Pruet and Trigon, *et al.*, and have determined that such procedures are appropriate.

I. Background

On July 28, 1986, the DOE issued a Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986) (the MSRP). The MSRP, issued as a result of a court-approved Settlement Agreement in In re: The Department of Energy Stripper Well Exemption Litigation, M.D.L. No. 378 (D. Kan. 1986) (the Stripper Well Agreement), provides that crude oil overcharge funds will be divided among the states, the federal government, and injured purchasers of refined petroleum products. Under the MSRP, up to twenty percent of these crude oil overcharge funds will be reserved to satisfy valid claims by injured purchasers of petroleum products. Eighty percent of the funds, and any monies remaining after all valid claims are paid, are to be disbursed equally to the states and federal government for indirect restitution.

Shortly after the issuance of the MSRP, the OHA issued an Order that announced its intention to apply the Modified Policy in all subpart V proceedings involving alleged crude oil violations. Order Implementing the MSRP, 51 FR 29689 (August 20, 1986). In that Order, the OHA solicited comments concerning the appropriate procedures to follow in processing refund applications in crude oil refund proceedings. On April 6, 1987, the OHA issued a Notice analyzing the numerous comments and setting forth generalized procedures to assist claimants that file refund applications for crude oil monies under the Subpart V regulations. 52 FR 11737 (April 10, 1987) (the April Notice).

The OHA has applied these procedures in numerous cases since the April Notice, i.e., New York Petroleum, Inc., 18 DOE ¶ 85,435 (1988) (*NYP*); Shell Oil Co., 17 DOE ¶ 85,204 (1988) (Shell); Ernest A. Allerkamp, 17 DOE ¶ 85,079 (1988) (Allerkamp), and the procedures have been approved by the United States District Court for the District of Kansas as well as the Temporary Emergency Court of Appeals (TECA). In the case In re: The Department of Energy Stripper Well Exemption Litigation, various states filed a Motion with the Kansas District Court, claiming that the OHA violated the Stripper Well Agreement by employing presumptions of injury for end-users and by improperly calculating the refund amount to be used in those proceedings. In re: The Department of Energy Stripper Well Exemption Litigation, 671 F. Supp. 1318 (D. Kan. 1987), aff'd 857 F.2d 1481 (Temp. Emer. Ct. App. 1988). On August 17, 1987, Judge Theis issued an Opinion and Order denying the states' Motion in its entirety. The court concluded that the Stripper Well Agreement "does not bar [the] OHA from permitting claimants to employ reasonable presumptions in affirmatively demonstrating injury entitling them to a refund." *Id.* at 1323. The court also ruled that, as specified in the April Notice, the OHA could calculate refunds based on a portion of the M.D.L. 378 overcharges. *Id.* at 1323–24.

II. The Proposed Refund Procedures

A. Refund Claims

We now propose to apply the procedures discussed in the April Notice to the crude oil subpart V proceeding that is the subject of the present determination. As noted above, an alleged crude oil violation amount of $788,586.45, plus interest, is covered by this proposed Decision. We have decided to reserve the full twenty percent of the alleged crude oil violation amount, or $157,717.29, plus interest, for direct refunds to claimants, in order to insure that sufficient funds will be available for refunds to injured parties.

The process which the OHA will use to evaluate claims based on alleged crude oil violations will be modeled after the process the OHA has used in subpart V proceedings to evaluate claims based upon alleged overcharges involving refined products. *E.g.*, Mountain Fuel Supply Co., 14 DOE ¶ 85,475 (1986) (Mountain Fuel). As in non-crude oil cases, applicants will be required to document their purchase volumes and prove that they were injured as a result of the alleged violations. Applicants who were end-users or ultimate consumers of petroleum products, whose businesses are unrelated to the petroleum industry, and who were not subject to the DOE price regulations are presumed to have been injured by any alleged crude oil overcharges. In order to receive a refund, end-users need not submit any further evidence of injury beyond the volume of petroleum products purchased during the period of price controls. *E.g.*, A. Tarricone, Inc., 15 DOE ¶ 85,495 at 88,893–96 (1987). However, the end-user presumption of injury can be rebutted by evidence which establishes that the specific end-user in question was not injured by the crude oil overcharges. *E.g.*, Berry Holding Co., 16 DOE ¶ 85,405 at 88,797 (1987). If an interested party submits evidence that is sufficient to cast serious doubt on the end-user presumption, the applicant will be required to produce further evidence of injury. *E.g.*, NYP, 18 DOE at 88,701–03.

Reseller and retailer claimants must submit detailed evidence of injury, and may not rely on the presumptions of injury utilized in refund cases involving refined petroleum products. They can, however, use econometric evidence of the type employed in the OHA Report to the District Court in the Stripper Well Litigation, 6 Fed. Energy Guidelines ¶ 90,507. Applicants who executed and submitted a valid waiver pursuant to one of the escrows established in the Stripper Well Agreement have waived their rights to apply for crude oil refunds under subpart V. *Mid-America Dairyman, Inc.* v. *Herrington*, 878 F.2d 1448 (Temp. Emer. Ct. App. 1989); *accord*, Boise Cascade Corp., 18 DOE ¶ 85,970 (1989).

Refunds to eligible claimants who purchased refined petroleum products will be calculated on the basis of a volumetric refund amount derived by dividing the alleged crude oil violation amounts involved in this determination ($788,586.45) by the total consumption of petroleum products in the United States during the period of price controls (2,020,997,335,000 gallons). Mountain Fuel, 14 DOE at 88,868 n.4. This yields a volumetric refund amount of $0.00000039 per gallon.

As we stated in previous Decisions, a crude oil refund applicant will be required to submit only one application for crude oil overcharge funds. *E.g.*, Allerkamp, 17 DOE at 88,176. Any party that has previously submitted a refund application in the crude oil refund proceedings need not file another application. That previously filed application will be deemed to be filed in all crude oil proceedings as the procedures are finalized. A deadline of June 30, 1988 was established for the first pool of crude oil funds. The first pool was funded by crude oil refund proceedings, implemented pursuant to the MSRP, up to and including Shell. A deadline of October 31, 1990 was established for applications for refunds from the second pool of crude oil funds. The second pool was funded by those crude oil proceedings beginning with World Oil Co., 17 DOE ¶ 85,568, corrected, 17 DOE ¶ 85,669 (1988), and ending with Texaco Inc., 19 DOE ¶ 85,200, corrected, 19 DOE ¶ 85,238 (1989). The

---

101 & 501. The OHA has contacted Pruet's attorney and has determined that Pruet never engaged in any refined product related activities. *See* Record of Telephone Conversation between Raymond P. Rayner, Jr., OHA Attorney Advisor, and William F. Cockrell, Jr., Attorney for Pruet (September 21, 1990). Accordingly, the OHA believes that the entire settlement was for potential crude oil violations.

deadline for filing an application for refund from the third pool of funds was established as March 31, 1991 by Bi-Petro, Inc., 20 DOE ¶ 85,271 (1990). The volumetric refund amount for the third pool of funds will be increased as additional crude oil violation amounts are received in the future. Notice of any additional amounts available in the future will be published in the Federal Register.

B. Payments to the States and Federal Government

Under the terms of the MSRP, we propose that eighty percent of the alleged crude oil violation amounts subject to this Proposed Decision, or $830,880.16, plus interest, should be disbursed in equal shares to the states and federal government for indirect restitution. Refunds to the states will be in proportion to the consumption of petroleum products in each state during the period of price controls. The share or ratio of the funds which each state will receive is contained in Exhibit H of the Stripper Well Agreement. When disbursed, these funds will be subject to the same limitations and reporting requirements as all other crude oil monies received by the states under the Stripper Well Agreement.

It Is Therefore Ordered That:

The refund amounts remitted to the Department of Energy by Beaton Frost d/b/a P & R Trading Co. and Trigon Exploration Company, Inc., *et al.*, will be distributed in accordance with the foregoing Decision.

SUPPLEMENTARY INFORMATION:

Office of Solid Waste and Emergency Response

Title: Hazardous Waste Industry Studies (EPA ICR # 0918.04; OMB # 2050-0042). This is a renewal of a currently approved collection.

Abstract: EPA proposes to conduct surveys of, and site visits to, facilities in various industries to collect hazardous waste information on industrial process residuals, their quantities, characteristics, and how they are managed. The information will be used to expand and refine the list of RCRA hazardous wastes requiring management controls in the industries studied.

Burden statement: The estimated average public reporting and recordkeeping burden for this collection of information is about 27 hours per respondent. This estimate includes all aspects of the information collection including time for reviewing instructions, gathering data, and preparing and submitting the instrument to the Agency.

Respondents: Industries that generate or manage hazardous waste. The specific fifteen industries projected for study are: Dioxin Producing Industries, Carbamate Pesticides, Organobromines, Solvents, Petroleum Refining, Chlorinated Aromatics, Dyes and Pigments, Coke and By-products, Paint Production, Wood Preserving, Used Oil Recycling, Pharmaceuticals, Pulp and Paper, Plastics and Resins, and Industrial Organics.

Estimated number of respondents: 1377.

Estimated total annual burden of respondents: 44,147 hours.

Frequency of collection: On occasion.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden, to:

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: NSPS for Grain Elevators—Information Requirements. (Subpart DD) (ICR #1130.06; OMB #2060-0082). This is a renewal of a previously approved collection.

Abstract: Owners or operators of grain storage elevators, must notify EPA of construction, reconstructions, modifications, shutdowns, date of anticipated and actual start-ups, and date and results of all performance tests. They must also maintain records of all performance test results, as well as the occurrence and duration of any start-up or malfunction. The States and/or EPA use these data to determine compliance with the standards, to target inspections, and, when necessary, to use as evidence in court.

Burden statement: The annual public burden for this collection of information is estimated to average approximately 43 hours per response for reporting, and 3 hours per recordkeeper. This estimate includes the time needed to review instructions, search existing data sources, gather the data needed, and review the collection of information.

Respondents: Owners and operators of grain elevators.

Estimated no. of respondents: 1 respondent will report and 20 respondents will keep records.

Estimated no. of responses per respondent: 2.

Estimated total annual burden on respondents: 145 hours.

Frequency of collection: Once and on occasion.

Title: NSPS for Hot Mix Asphalt Facilities—Information Requirements. (Subpart I) (ICR #1127.03; OMB #2060–0083). This is a renewal of a previously approved collection.

Abstract: Owners or operators of hot mix asphalt facilities must notify EPA of construction, reconstructions, modifications, shutdowns, date of anticipated and actual start-ups, and date and results of all performance tests. They must also maintain records of all performance test results, as well as the occurrence and duration of any start-up or malfunction. The States and/or EPA use these data to determine compliance with the standards, to target inspections, and, when necessary, to use as evidence in court.

Burden statement: The public annual burden for this collection of information is estimated to average approximately 43 hours per response for reporting, and 1.5 hours per recordkeeper. This estimate includes the time needed to review instructions, search for existing data sources, gather the data needed, and review the collection of information.

Respondents: Owners and operators of hot mix asphalt facilities.

Estimated no. of respondents: 60 respondents will report and 1,010 respondents will keep records.

Estimated no. of responses per respondent: 1.

Estimated total annual burden on respondents: 4,071 hours.

Frequency of collection: Once and on occasion.

Title: NSPS for Petroleum Dry Cleaners—Information Requirements (subpart JJJ) (ICR #0997.03; OMB #2060–0079). This is a renewal of a previously approved collection.

Abstract: Owners or operators of the affected facilities must notify EPA of construction, reconstructions, modifications, shutdowns, date of anticipated and actual start-ups, and date and result of all performance tests. They must also maintain records of all performance test results, as well as the occurrence and duration of any start-up or malfunction. The States and/or EP use these data to determine compliance with the standards, to target inspections, and, when necessary, to use as evidence in court.

Burden statement: The annual public burden for this collection of information is estimated to average approximately 8 hours per response for reporting, and 73 hours per recordkeeper. This estimate includes the time needed to review instructions, search existing data sources, gather data needed, and review the collection of information.

Respondents: Owners and operators of petroleum dry cleaning plants which were installed after December 14, 1982, and having a dryer capacity greater than 84 pounds.

Estimated no. of respondents: 18.

Estimated no. of responses per respondent: 1.

Estimated total annual burden on respondents: 1,462 hours.

Frequency of collection: Once and on occasion.

Title: Benzene NESHAP—Information Requirements (subpart J) (ICR #1153.03; OMB #2060–0068). This is a reinstatement of a previously approved collection. The clearance for this collection expired July 31, 1990.

Abstract: Owners or operators of petroleum refineries and chemical manufacturers, must notify EPA of construction, reconstructions, modifications shutdowns, and date of anticipated and actual start-up. They must monitor for fugitive benzene emissions, and must keep records of this monitoring and of the leaks detected from valves, pumps, and compressors, as the steps taken to make repairs. Owners or operators must also submit semiannual reports of these emissions, leaks, and repairs. The States and/or EPA use these data to determine compliance, to target inspections, and, when necessary, as evidence in court.

Burden statement: The annual public burden for this collection of information is estimated to average approximately 17 hours per response for reporting, and 57 hours per recordkeeper. This estimate includes the time needed to review instructions, search existing data sources, gather data needed, and review the collection of information.

Respondents: Owners and operators of petroleum refineries and chemical manufacturers.

Estimated no. of respondents: 200.

Estimated no. of responses per respondent: 2.

Estimated total annual burden on respondents: 17,985 hours.

Frequency of collection: Once and semiannually.

Send comments regarding the burden estimates, or any other aspect of the information collections, including suggestions for reducing the burdens, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch, 401 M Street SW., Washington, DC 20460

and

Nicolas Garcia, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place NW., Washington, DC 20530

Dated: October 18, 1990.

BILLING CODE 6570–06–M

FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL

Request for Comment on Personal Property Appraising

AGENCY: Appraisal Subcommittee, Federal Financial Institutions Examination Council.

ACTION: Request for comments.

SUMMARY: The Appraisal Subcommittee of the Federal Financial Institutions Examination Council ("Appraisal Subcommittee") is issuing a request for comments on the feasibility and

desirability of extending the provisions of title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 to the function of personal property appraising and personal property appraisers.

This request for comments affords all interested parties an opportunity to provide substantive comments and data on the possibility of creating an appraisal regulatory framework for personal property evaluations similar to the supervisory scheme for real estate appraisals. The Appraisal Subcommittee will carefully review and consider the comments received within the context of completing its study.

DATES: Comments must be received on or before December 24, 1990.

ADDRESSES: All comments should be sent to the Appraisal Subcommittee, Federal Financial Institutions Examination Council, 1776 G Street NW., suite 850B, Washington, DC 20006 or delivered to the same address between the hours of 9 a.m. and 5 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: Jim Porter at (202) 906–5743.

SUPPLEMENTARY INFORMATION: The purpose of title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 is to promote the safety and soundness of insured institutions by requiring the real estate appraisals utilized in connection with federally related transactions be performed in writing in accordance with uniform standards by individuals whose competency has been demonstrated and whose professional conduct will be subject to effective supervision. Section 1122 of title XI directs the Appraisal Subcommittee of the Federal Financial Institutions Examination Council to conduct a study to determine the feasibility and desirably of extending the provisions of title XI to the function of personal property appraising and personal property appraisers in connection with Federal financial and public policy interests. The Appraisal Subcommittee is to report its findings to Congress in February 1991.

For the purposes of this Notice for Public Comment, "personal property" is defined as:

identifiable portable and tangible objects with are considered by the general public as being "personal," e.g. furnishings, artwork, antiques, gems and jewelry, collectibles, machinery and equipment; all property that is not classified as real estate. (Source: Uniform Standards of Professional Appraisal Practice published by The Appraisal Foundation.)

As part of this study the Appraisal Subcommittee is seeking, from all interested parties, substantive comments on issues surrounding the costs and benefits of extending the real estate appraisal regulatory scheme to personal property evaluation. The following questions raise significant issues on which comment is sought, but are not intended to be limiting in nature. Comments are invited on any substantive issue relating to personal property appraising and personal property appraisers. The Subcommittee is especially interested in any factual supporting information or examples that serve as the basis for comments, in particular, information presented in the form of lists, charts, graphs, and tables, which detail specific data. Please respond to as many of the following questions as you consider appropriate.

General

(1) Respondent Affiliation:
(a) A financial institution with federally insured deposits.
(b) A financial institution with trade association.
(c) A personal property appraisal firm or individual.
(d) A personal property appraiser trade association.
(e) A real estate appraisal firm or individual.
(f) A real estate appraiser trade association.
(g) Law firm or individual.
(h) Accounting firm or individual.
(i) Governmental agency.
(j) Other.

(2) What are the major categories of personal property used as collateral for loans and what are the methods for evaluation of each category?

(3) What types of loans collateralized by personal property have caused the largest losses to financial institutions?

(4) What role have weaknesses in the personal property evaluation process had in the losses on loans collateralized by personal property? If possible, segregate losses associated with failure to perfect an interest in collateral and losses from assets that are expected to depreciate more rapidly than the related loan amortizes from losses caused by faulty evaluation.

(5) What types of loans collateralized by personal property have a good record of performance and how has the collateral evaluation process assisted in maintaining the favorable record?

(6) What factors should be used in determing the level of detail required in a personal property evaluation?

(7) What are the similarities and differences between personal property lending and real estate lending? (For example, loan terms, loan-to-value ratios, emphasis on collateral protection, payment sources, methods for evaluating collateral and other pertinent aspects of the credit decision process.)

Personal Property Appraisal Standards

(8) Considering the diversity of categories of personnal property, is it feasible to have one set of uniform appraisal standards for all possible types of non-real assets or would there have to be different standards for major categories of personal property?

(9) What would be the direct and indirect cost of requiring federally mandated uniform personnal property appraisal standards and how can these costs be measured?

(1) How would public policy interests benefit from the creation of uniform personal property appraisal standards and how can these benefits by quantified?

Personal Property Licensing Procedures and Qualification Criteria

(11) If there is licensing, should there be one licensing process for all categories of personal property appraisers or should there be different licensing procedures for each major category of personal property?

(12) What should be the minimum qualifications criteria for appraisers that conduct personal property evaluations for insured financial institutions?

(13) What would be the direct and indirect costs of federally mandated licensing and how can these costs be measured?

(14) Would financial institutions and the federal deposit insurance system benefit from the creation of a licensing process and how can these benefits be qualified?

Regulation and Supervision of Personal Property Appraisers

(For discussion purposes only, questions #15 through #23 assume that uniform personal property appraisal standards and licensing of personal property appraisers are both feasible and desirable.)

(15) Who should establish the uniform evaluation standards—financial institution trade associations, personal property apraiser trade associations, regulatory agencies, federal or state legislative bodies, or others?

(16) What type of procedure should be required to initially formulate uniform standards and what would be the process for amending the standards?

(17) Who should establish the qualification and testing criteria—financial institution trade associations, personal property appraiser trade associations, regulatory agencies, federal or state legislative bodies, or others?

[FR Doc. 90
BILLING COD

(18) Should the licensing and testing boards be state or federal agencies, trade associations, or some other form of organization?

(19) What type of procedures should be required initially to formulate licensing qualification benchmarks and what should be the process for amending the criteria?

(20) If uniform personal property appraisal standards are developed, what level of supervisory enforcement is required—should standards be made into regulations carrying the force of law, be informational safety and soundness guidelines, or have some other form?

(21) Should the standards, licensing requirements, and regulatory structure be imposed on a financial institution's purchase of, and investment in, personal property, or limited only to lending collateralized by personal property?

(22) If the licensing body is not a federal agency, should it be subject to federal monitoring and supervision and what type of disciplinary powers should the federal agency have, if any?

(23) If licensing is implemented, should registry fees for personal property appraiser be the same as those levied on real property appraisers?

Other Comments

(24) Please discuss other issues concerning the feasibility and desirability of extending the provisions of title XI to the function of personal property appraising and personal property appraisers not addressed in the previous questions.

(25) In summary, do you believe that uniform personal property standards and licensing of personal property appraisers are:

(a) Desirable and—

(b) Feasible?

Why?

Information generated from the comments received will be used to augment other sources of data available to the Appraisal Subcommittee and ensures that the Subcommittee's findings reflect the broadest range of possibilities.

Dated: October 19, 1990.

Fred D. Finke,

Acting Chair of the Appraisal Subcommittee of the Federal Financial Institutions Examination Council.

BILLING CODE 6210-01-M

FEDERAL MARITIME COMMISSION

Inquiry Into Practices Affecting Shipping in the United States/Japan Trade; Harbor Management Fund

The Foreign Shipping Practices Act of 1988, 46 U.S.C. app. 1710a ("FSPA" or "1988 Act") directs and authorizes the Federal Maritime Commission ("Commission") to take corrective action against foreign shipping practices that have an adverse effect upon the operations of United States carriers. Section 10002(b) of the FSPA provides that the Commission shall investigate whether "any laws, rules, regulations, policies, or practices of foreign governments, or any practices of foreign carriers or other persons providing maritime services in a foreign country result in the existence of conditions that—(1) adversely affect the operations of United States carriers in United States oceanborne trade; and (2) do not exist for foreign carriers of that country in the United States under the laws of the United States or as a result of acts of United States carriers or other persons providing maritime or maritime-related services in the United States." 46 U.S.C. app. 1710a(b). The FSPA thus authorizes the Commission to investigate not only foreign governmental laws, rules or policies, but also the practices of foreign carriers or other persons or groups providing maritime or maritime-related services in a foreign country.

The FSPA defines "maritime services" as "port-to-port carriage of cargo by the vessels operated by ocean common carriers." 46 U.S.C. app. 1710a(a)(3). The FSPA defines "maritime-related services" as "intermodal operations, terminal operations, cargo solicitation, forwarding and agency services, non-vessel-operating common carrier operations, and all other activities and services integral to total transportation systems of ocean common carriers and their foreign domiciled affiliates on their own and others' behalf." 46 U.S.C. app. 1710a(a)(4).

In furtherance of the authority to investigate and take corrective action against adverse foreign shipping practices, section 10002(d) of the FSPA provides that the Commission may, by order, require common carriers and other persons to provide information to the Commission as is necessary and appropriate. 46 U.S.C. app. 1710a(d). The FSPA provides also that the Commission may require the response to such an informational order to be made under oath and in the form and within the time prescribed by the Commission. 46 U.S.C. app. 1710a(d).

In addition, section 15 of the Shipping Act of 1984 ("1984 Act") authorizes the Commission to require any common carrier to file with the Commission reports on that carrier's operations. 46 U.S.C. app. 1714(a). Whoever violates an order issued under the 1984 Act is liable for civil penalties. 46 U.S.C. app. 1712(a).

By separate Order issued pursuant to section 10002(d) of the FSPA and section 15 of the 1984 Act, the Commission is requiring certain named ocean common carriers to report on the status of a particular shipping condition in the United States/Japan trade ("Trade"). The particular condition which is the subject of the Commission's Order is a fund established by the Japan Harbor Transportation Association ("JHTA") which is known as the Harbor Management Fund ("Fund").

According to accounts appearing in the trade press and other sources of information, the JHTA levies a charge against U.S. and other carriers serving ports in Japan which charge is paid into the Fund. The charge imposed on U.S. and other carriers is allegedly not related to maritime services provided to carriers at Japanese ports but is used to finance other projects, in particular, an import distribution system, a type of project not generally considered the responsibility of ocean common carriers. Moreover, it has been reported that the Fund has been used to support nonshipping related business activities of JHTA members through the International Port Cargo Distribution Association ("IPCD"), an organization said to be created by JHTA. Press accounts also report allegations that the Fund's schedule of charges favors Japanese carriers, and that the Fund is at least implicitly supported by the Japan Ministry of Transport ("MOT"). The establishment and administration and use of the Fund by the JHTA raises a question of whether the Fund constitutes an unfavorable or adverse shipping condition in the U.S.-Japan trade, within the meaning of the 1988 Act. The Commission is not aware of any similar practice imposed upon Japanese carriers at U.S. ports.

The Commission's informational order requires the U.S.-flag and Japanese-flag carriers serving the Trade to report on the purposes and uses of the Fund, its effect on carrier operations, and possible disparate impact on U.S. and Japanese carriers and other matters.

The Commission notes that representatives of the governments of the affected countries will be holding a series of meetings beginning in November 1990 to discuss and seek to resolve the issue of the Fund. The

Commission welcomes and supports these efforts and hopes that the discussions will lead to a resolution of this issue. In this regard, the Commission is also seeking information from the U.S. Departments of State and Transportation concerning the Harbor Management Fund and the progress of these governmental discussions.

The Commission, however, has its own responsibility and obligation under the FSPA to keep U.S. trade in shipping services open and free of unfair impediments and practices that adversely affect U.S. carriers. The Commission will therefore carefully review and evaluate the information received in response to its Order to determine whether further action under the Foreign Shipping Practices Act, or other authority, is warranted.

In order to have as full and complete a consideration of this issue as possible, the Commission, by this Notice, is also inviting all interested persons to file information, views, and comments with respect to the effect of the Fund on ocean shipping services used in the import or export of goods to or from the United States and Japan. The Commission welcomes these comments and any suggestions for action that the Commission might usefully take to ameliorate this problem. It is expected that the information received from all sources will allow for a full evaluation of the Harbor Management Fund and will enable the Commission to determine whether an investigation under the Foreign Shipping Practices Act, or other authority, is warranted or required.

Any interested person may submit such information, views or comments on or before November 20, 1990 by addressing them to the Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573 in an original and 15 copies.

By the Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., room 10220. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments and protests are found in §§ 560.602 and/or 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No: 224-003813-013.

Title: Department of Transportation of the State of Hawaii/Matson Terminals, Inc. Terminal Agreement.

Parties:

Department of Transportation of the State of Hawaii

Matson Terminals, Inc.

Filing Party: Edward Y. Hirata, Director, Department of Transportation of the State of Hawaii, 869 Punchbowl Street, Honolulu, Hawaii 96813-5097.

Synopsis: The Agreement provides for design, construction and lease of improvements to the Sand Island container terminal. Payment of the cost of such improvements shall be in accordance with the terms and conditions set forth in this Agreement.

By Order of the Federal Maritime Commission.

Dated: October 18, 1990.

Joseph C. Polking,

Secretary.

Agreement No.: 224-004008-011.

Title: Port of Oakland/Marine Terminals Corporation Terminal Agreement.

Parties:

Port of Oakland (Port)

Marine Terminals Corporation (MTC).

Synopsis: The Agreement amends the parties' basic agreement to provide: (1) MTC with 90 days time, from the date the Port gives notice of the availability of assigned premises following completion of earthquake damage repairs, to procure users for available terminal areas; (2) for a minimum annual tariff revenue standard of 35,000 revenue tons per net acre; (3) for an annual crane usage compensation quota of 25 crane hours per net acre following the return of portions of the assigned premises after completion of earthquake repairs; and (4) for setting forth certain negotiated adjustment compensation factors to be applicable during the agreement's option extended period ending June 30, 1994.

Agreement No.: 224-200287-001.

Title: Port of Oakland/Mitsui O.S.K. Lines, Ltd. Terminal Agreement.

Parties:

Port of Oakland

Mitsui O.S.K. Lines, Ltd. (Mitsui).

Synopsis: The Agreement amends the final subparagraph of Paragraph 2 of the parties' basic agreement to provide that in the event Mitsui exercises either of its options to extend the term of the agreement and/or relocates its operation to another Port of Oakland facility, the parties will file with the Commission amendment(s) setting forth the exercise of such option(s) and/or, if applicable, the adjusted compensation involved.

By Order of the Federal Maritime Commission.

Dated: October 18, 1990.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Banc One Corporation, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding

company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than November 13, 1990.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East sixth Street, Cleveland, Ohio 44101:

1. Banc One Corporation, Columbus, Ohio; to acquire 100 percent of the voting shares of Marine Bank Chicago, Chicago, Illinois.

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. Button Gwinnett Bancorp, Inc., Norcross, Georgia; to become a bank holding company by converting the charter of its subsidiary, Button Gwinnett Savings Bank FSB, Norcross, Georgia, to a national banking association charter.

2. Community Trust Financial Services Corporation, Hiram, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of Community Trust Bank, Hiram, Georgia.

3. Southtrust Corporation, Birmingham, Alabama; to acquire 100 percent of the voting shares of SouthTrust Bank of columbia, N.A., Columbia, South Carolina, a *de novo* bank.

C. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First Michigan Bank Corporation, Holland, Michigan; to acquire 100 percent of the voting shares of Maynard Allen State Bank, Portland, Michigan.

D. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Hooker Bank Holding Company, Lincoln, Nebraska; to become a bank holding company by acquiring Republic Bank of Nebraska, Columbus, Nebraska, in organization, which will be the successor to a merger with Commerce Savings Columbus, Columbus, Nebraska.

2. SCB Financial Corporation, Smith Center, Kansas, parent of Smith County Bank and Trust Company, Smith Center, Kansas; to merge with Lull and Rush Agency, Lebanon, Kansas, and thereby indirectly acquire First National Bank of Lebanon, Lebanon, Kansas. The banks will merge subsequent to the holding company merger.

E. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Landmark Bancshares, Inc., Euless, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Landmark Bank-Mid Cities, Euless, Texas.

F. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Assistant Vice President) 101 Market Street, San Francisco, California 94105:

1. Interwest National Bancorp, Reno, Nevada; to become a bank holding company by acquiring 85.67 percent of the voting shares of Fallon National Bank of Nevada, Fallon, Nevada.

Board of Governors of the Federal Reserve System, October 18, 1990.

Jennifer J. Johnson,

Associate Secretary of hte Board.

BILLING CODE 6210-01-M

Deutsche Bank AG; Acquisition of Company Engaged in Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a) or (f) of the Board's Regulation Y (12 CFR 225.23(a) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 13, 1990.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. Deutsche Bank AG, Frankfurt (Main), Germany; to engage through a fee-sharing arrangement with Gleacher & Co. Inc., New York, New York in providing merger and acquisition and corporate advice to U.S. and non-U.S. clients; performing feasibility studies for U.S. and non-U.S. clients; providing valuation services in connection with foregoing; and rendering fairness opinions in connection with M&A transactions. First Regional Bancorporation, 76 Federal Reserve Bulletin ____ (1990); The Fuji Bank, Ltd., 75 Federal Reserve Bulletin 577 (1989).

Board of Governors of the Federal Reserve System, October 18, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Valley National Bancorp, et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Banking Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless

otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than November 13, 1990.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. Valley National Bancorp, Wayne, New Jersey; to acquire Mayflower Financial Corporation and its subsidiary, Mayflower Savings Bank, SLA, both of Livingston, New Jersey, and thereby engage in operating a savings and loan association pursuant to § 225.25(b)(9); and selling travelers checks, money orders with a face value of $1,000 or less and U.S. savings bonds pursuant to § 225.25(b)(12) of the Board's Regulation Y.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. ANB Corporation, Muncie, Indiana; to acquire Muncie Federal Savings Bank, Muncie, Indiana, and Service Management Corporation, Muncie, Indiana, and thereby engage in the operation of a savings association pursuant to § 225.25(b)(9); financial planning pursuant to § 225.25(b)(20); and brokerage services pursuant to § 225.25(b)(15) of the Board's Regulation Y. These activities will be conducted in the State of Indiana.

C. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Nebraska Bancorporation, Inc., Alliance, Nebraska; to acquire ANB Savings Bank, F.S.B., Alliance, Nebraska, and thereby engage in operating a savings and loan association pursuant to § 225.25(b)(9) of the Board's Regulation Y. This is an OAKAR transation.

D. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Assistant Vice President) 101 Market Street, San Francisco, California 94105:

1. U.S. Bancorp, Portland, Oregon; to acquire Heartfed Financial Corporation, Auburn, California, and thereby engage in operating a savings association pursuant to § 225.25(b)(9) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, October 18, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Citicorp; Proposal To Act as Drawee for Variably Denominated Payment Instruments

Citicorp, New York, New York, has applied, pursuant to secton 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)(3)), for prior approval to act as drawee directly and indirectly through its subsidiary, Citicorp Services Inc., Chicago, Illinois, for variably denominated payment instruments without limitation as to face value when such instruments are sold or issued by Citicorp affiliates or unaffiliated third parties. The Board previously has approved the issuance of certain payment instruments without limitation as to face value subject to a number of restrictions that impose reporting and reserve requirements. *See, e.g., Well Fargo & Company*, 72 Federal Reserve Bulletin 148 (1986). Citicorp proposes to conduct this activity free of the reserve requirements previously imposed by the Board.

Citicorp proposes to issue payment instruments through unaffiliated financial institutions and other organizations as well as through its own depository institution subsidiaries. Where payment instruments are to be issued or sold by these unaffiliated institutions, Citicorp proposes that reserve requirements be eliminated. Where payment instruments with face amounts of over $10,000 are to be issued or sold by Citicorp affiliates, Citicorp proposes to place only the excess amounts over $10,000, rather than the entire face amount, in demand deposit accounts at Citicorp bank subsidiaries until the instruments are paid. Citicorp proposes to offer these services nationwide.

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with the Board's approval, engage in any activity "which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." 12 U.S.C. 1843(c)(8). The Board has previously determined that, subject to certain reporting and reserve requirements, the sale of issuance of payment instruments without limit as to face value is an activity permissible for bank holding companies. *See, e.g., Wells Fargo & Co.* 72 Federal Reserve Bulletin 148 (1986).

In determining whether an activity is a proper incident to banking, the Board must consider whether the proposal may "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." 12 U.S.C. 1843(c)(8). Citicorp contends that permitting Citicorp to engage in the proposed activities would result in increased competition, greater convenience to customers, and increased efficiency in the provision of financial services.

In publishing the proposal for comment the Board does not take a position on issues raised by the proposal. Notice of the proposal is published solely in order to seek the views of interested persons on the issues presented by the application and does not represent a determination by the Board that the proposal meets or is likely to meet the standards of the BHC Act.

Any comments or requests for a hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than November 13, 1990. Any request for a hearing on this application must be accompanied, as required by § 262.3(e)) of the Board's Rules of Procedure (12 CFR 262.3(e)), by a statement of the reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute,

summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, October 18, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Patrick R. Wilmerding, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than November 7, 1990.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Patrick R. Wilmerding*, Brookline, Massachusetts, and J. Crosby Player, Lenox, Massachusetts; to acquire 24.99 percent of the voting shares of USA Bancorp, Incorporated, Boston, Massachusetts, and thereby indirectly acquire Olympic International Bank and Trust Company, Boston, Massachusetts.

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *William Warner Williams, Sr.*, Opelika, Alabama; Kathryn Ann Mitchell, Opelika, Alabama; Jimmy Alan LaFoy, Opelika, Alabama; and Wanda Streetman McCaghren, Auburn, Alabama; to acquire 10.1 percent of the voting shares of Farmers National Bancshares, Inc., Opelika, Alabama, and thereby indirectly acquire Farmers National Bank of Opelika, Opelika, Alabama.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Bobby J. Osborne*, North Little Rock, Arkansas; to acquire an additional 10.25 percent of the voting shares of National Banking Corp., North Little Rock, Arkansas, for a total of 27.55 percent, and thereby indirectly acquire National Bank of Arkansas in North Little Rock, North Little Rock, Arkansas.

D. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Lazard Freres & Co.*, New York, New York; LFCP Corporation, New York, New York; Corporate Advisors, L.P., New York, New York; Corporate Partners, L.P., New York, New York; Corporate Offshore Partners, L.P., Hamilton, Bermuda; State Board of Administration of Florida, Tallahassee, Florida; LFXR Corp., New York, New York; and LFXR Partners, L.P., New York, New York; to acquire 1.2 percent of the voting share of First Bank System, Inc., Minneapolis, Minnesota, and thereby indirectly acquire First Bank, N.A., Minneapolis, Minnesota; First Bank North, N.A., Duluth, Minnesota; First Bank Southeast, Rochester, Minnesota; First Bank Central, N.A., St. Cloud, Minnesota; First National Bank East, Grand Forks, North Dakota; First Bank of Minnesota, Virginia, Minnesota; First Bank South, N.A., Mankato, Minnesota; First Bank of North Dakota, N.A., Fargo, North Dakota; First Bank Montana, N.A., Billings, Montana; First Bank, N.A., Milwaukee, Wisconsin; and First Bank South Dakota, N.A., Sioux Falls, South Dakota; FBS Washington Bancorporation, Inc., Minneapolis, Minnesota, and thereby indirectly acquire First Bank Washington, Omak, Washington; and Central Bancorporation, Inc., Denver, Colorado, and thereby indirectly acquire Central Bank of Denver, Denver, Colorado; Central Bank Southeast, N.A., Englewood, Colorado; Central Bank of Pueblo, N.A., Pueblo, Colorado; Central Bank of North Denver, N.A., Denver, Colorado; Central Bank Centennial, Littleton, N.A., Colorado; Central Bank Westminster, N.A., Westminster, Colorado; Central Bank Broomfield, N.A., Broomfield, Colorado; Central Bank Chatfield, N.A., Littleton, Colorado; Central Bank Grand Junction, N.A., Grand Junction, Colorado; Central Bank of Greeley, N.A., Greeley, Colorado; Central Bank Academy Blvd, N.A., Colorado Springs, Colorado; Central Bank Aspen, N.A., Aspen, Colorado; Central Bank Glenwood Springs, N.A., Nagelwood Springs, Colorado; Central Bank Garden of Gods, N.A., Colorado Springs, Colorado; Central Bank of Chapel Hills, N.A., Colorado Springs, Colorado; and Central Bank of Aurora, N.A., Aurora, Colorado.

2. *Janice W. Maher*, Grand Rapids, Minnesota; to acquire an additional 46.63 percent of the voting shares of Jan-Mar Corporation, Coleraine, Minnesota, for a total of 89 percent and thereby indirectly acquire First National Bank, Coleraine, Minnesota.

3. *Trust of Richard W. Perkins*, Wayzata, Minnesota; to acquire 28.13 percent of the voting shares of Duke Financial Group, Inc., St. Paul, Minnesota, and thereby indirectly acquire Citizens State Bank of Montgomery, Montgomery, Minnesota; Peoples Bank of Commerce, Cambridge, Minnesota; and State Bank of New Prague, New Prague, Minnesota.

4. *Mark R. White*, Grand Rapids, Minnesota; to acquire an additional 43.63 percent of the voting shares of Jan-Mar Corporation, Coleraine, Minnesota, and thereby indirectly acquire First National Bank, Coleraine, Minnesota.

F. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Don R. Simcox*, Norman, Oklahoma; to acquire an additional 7.23 percent of the voting shares of City Bancorp of Norman, Inc., Norman, Oklahoma, for a total of 25.93 percent and thereby indirectly acquire City National Bank and Trust Company, Norman, Oklahoma.

G. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Bill Hull Barbee*, Kilgore, Texas, to acquire an additional 1.01 percent for a total of 1.17 percent; Francis Elmo Brown, Jr., Kilgore, Texas, to acquire 12.25 percent for a total of 12.80 percent; William Robert Crim, Kilgore, Texas, to acquire 4.08 percent for a total of 5.12 percent; Gibson Management Group, Inc., Longview, Texas, to acquire 1.68 percent; Sanny Sue Holland, Kilgore, Texas, to acquire 2.84 percent; Thomas Mancel Hopkins, Kilgore, Texas, to acquire 0.82 percent; Hydro-Seal Valve Company, Inc., Kilgore, Texas, to acquire 4.08 percent; Don Milton Kerr, Kilgore, Texas, to acquire 8.16 percent for a total of 8.36 percent; Jimmy Dolan Kirkland, White Oak, Texas, to acquire 4.08 percent; Janet Stanley Miller, Dallas, Texas, to acquire 4.08 percent; David Mobley Grantor Trust, to acquire 8.16 percent; Tom Marion Mobley, II, Kilgore, Texas, to acquire 4.08 percent; Claude Willard Rhodes, Jr., Kilgore, Texas, to acquire 4.08 percent; Robert Wayne Sigmon, White Oak, Texas, to

acquire 4.68 percent; Constance Smith, Kilgore, Texas, to acquire 2.04 percent; Ronald E. Spradlin, III, Kilgore, Texas, to acquire 4.09 percent for a total of 6.20 percent; Paul Henry Story, Kilgore, Texas, to acquire 0.68 percent; and Larry Von Tate, Kilgore, Texas, to acquire 4.08 percent of the voting shares of Kilgore First Bancorp, Inc., Kilgore, Texas, and thereby indirectly acquire Kilgore First National Bank, Kilgore, Texas.

Board of Governors of the Federal Reserve System, October 18, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Health Care Policy and Research

Public Meeting on Clinical Practice Guidelines for Management of Acute Post-Operative Pain

A public meeting is being held on clinical practice guidelines for Management of Acute Post-Operative Pain. The guidelines are under development by a panel of experts and health care consumers, arranged by the Agency for Health Care Policy and Research. A Notice announcing the development of seven sets of clinical practice guidelines and inviting written comments was published in the Federal Register on August 28 (55 FR 35186).

In addition to the solicitation of written material in the August 28 Federal Register, a series of public meetings is being arranged to provide an opportunity for interested parties to provide relevant information and comments concerning the particular guidelines under development.

The meeting to address guidelines for Management of Acute Post-Operative Pain will be held on November 20, as follows:

November 20, 1990, 8 a.m. to Noon
J. W. Marriott Hotel, 1331 Pennsylvania Avenue, Washington, DC 20004 (Salons D & E)

Background

The Omnibus Budget Reconciliation Act of 1989 (Pub. L. 101–239), enacted on December 19, 1989, added a new title IX to the Public Health Service Act (the Act) which established the Agency for Health Care Policy and Research (the Agency) to enhance the quality, appropriateness and effectiveness of health care services, and access to such services.

Section 911 of the Act established, within the Agency, the Office of the Forum for Quality and Effectiveness in Health Care (the Forum). Section 912 of the Act directs the Forum to arrange for the development and periodic review and updating of: Clinically relevant guidelines that may be used by physicians, educators and health care practitioners to assist in determining how diseases, disorders, and other health conditions can most effectively and appropriately be prevented, diagnosed, treated, and managed clinically.

Section 912 of the Act also provides that by not later than January 1, 1991, the Administrator of the Agency shall assure the development of an initial set of guidelines, standards, performance measures, and review criteria that includes not less than 3 clinical treatments or conditions that:

1. Account for a significant portion of expenditures under the Medicare program, and have a significant variation in the frequency of the type of treatment provided; or
2. Otherwise meet the needs and priorities of the Medicare program.

Section 914 of the Act lists factors to be considered in establishing priorities for guidelines, including the extent to which the proposed guidelines would:

1. Improve methods of prevention, diagnosis, treatment and clinical management, and thereby benefit a significant number of individuals;
2. Reduce clinically significant variations among providers in making diagnoses and providing treatments, or reduce significant variations in the outcomes of health care services or procedures; and
3. Reduce variations in the services and procedures utilized for diagnosis and treatment (and potentially produce savings in health care expenditures).

Based on these statutory criteria, consultation with the Health Care Financing Administration (in accordance with 42 U.S.C. 1320b–12(a)), studies conducted by the Institute of Medicine, availability of reliable research data, and a high degree of professional consensus, the following topics have been selected for initial guideline development.

1. Visual Impairment due to Cataract in the Aging Eye
2. Diagnosis and Treatment of Benign Prostatic Hyperplasia
3. Urinary Incontinence in the Adult
4. Prediction, Prevention and Early Treatment of Pressure Sores in Adults
5. Delivery of Comprehensive Care in Sickle Cell Disease
6. Management of Acute Post-Operative Pain
7. Diagnosis and Treatment of Depressed Outpatients in the Primary Care Setting

To meet the requirement to assure the development of initial guidelines by January 1991, the Forum has arranged for panels of experts in the above-listed topics and consumers who will develop the specific guidelines. Panel responsibilities include assessment of the available scientific evidence and clinical consensus and determination of the scope of the guideline.

Arrangements for November 20 Public Meeting on Management of Acute Post-Operative Pain

Representatives of organizations and other individuals are invited to provide relevant written comments and information and make a brief (5 minutes or less) oral statement to the panel. The Office of the Forum for Quality and Effectiveness in Health Care is making the administrative arrangements for this public meeting on behalf of the panel. Individuals and representatives who would like to attend must register with the Forum at the address set out below by November 12 and indicate whether they plan to make an oral statement. Those wishing to make oral statements and provide written comments and information should also submit copies of these to the Forum by November 12. If more requests to make oral statements are received than can be accommodated between 8 a.m. and Noon on November 20, the co-chair persons will allocate speaking time in a manner which ensures, to the extend possible, that a range of views of health care professionals and providers, health care consumers, and product and pharmaceutical manufacturers is presented. Those who cannot be allocated their requested speaking time because of time constraints may be assured that their written comments will be considered by the panel in developing the guidelines.

Stephen H. King, M.D., Director, Forum for Quality & Effectiveness in Health Care, Agency for Health Care Policy & Research, Parklawn Building, rm 18A46, 5600 Fishers Lane, Rockville, Md 20857, Phone 301–443–8754, Fax 301–443–7470.

Meetings on additional topics will also be announced in the Federal Register.

Dated: October 18, 1990.

J. Jarrett Clinton,

Assistant Surgeon General, Acting Administrator.

BILLING CODE 4160-90-M

Food and Drug Administration

Advisory Committee Meeting; Cancellation

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is canceling the meeting of the Veterinary Medicine Advisory Committee scheduled for October 31 and November 1, 1990. The meeting was announced by notice in the Federal Register of September 28, 1990 (55 FR 39729). The decision to cancel this meeting was prompted by the uncertainty surrounding FDA's Fiscal Year 1991 budget appropriation.

FOR FURTHER INFORMATION CONTACT: Gary E. Stefan, Center for Veterinary Medicine (HFV-244), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-0830.

Dated: October 18, 1990.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

Health Care Financing Administration

Public Information Collection Requirements Submitted to the Office of Management and Budget for Clearance

AGENCY: Health Care Financing Administration, HHS.

The Health Care Financing Administration (HCFA), Department of Health and Human Services, has submitted to the Office of Management and Budget (OMB) the following proposals for the collection of information in compliance with the Paperwork Reduction Act (Pub. L. 96-511).

1. *Type of Request:* New; *Title of Information Collection:* Information Collection Requirements in BPD-306, Termination of Enrollment; *Form Numbers:* HCFA-R-141; *Use:* The termination of enrollment requirement will allow States the option of restricting disenrollment from certain Medicaid HMOs and Community Health Centers by requiring enrollees to meet good cause criteria for disenrollment after the first month of enrollment; *Frequency:* On occasion; *Respondents:* State/local governments, businesses/other for profit, and small businesses/organizations; *Estimated Number of Responses:* 2,000; *Average Hours per Response:* .25; *Total Estimated Burden Hours:* 500.

2. *Type of Request:* Revision; *Title of Information Collection:* Medicaid Program Budget Report; *Form Number:* HCFA-25; *Use:* State Medicaid Agencies prepares these forms which are used by HCFA for developing national Medicaid budget estimates, quantification of budget assumptions, and issuance of quarterly Medicaid Grant Awards; *Frequency:* Quarterly; *Respondents:* State/local governments; *Estimated Number of Responses:* 228; *Average Hours per Response:* 25; *Total Estimated Burden Hours:* 5,700.

3. *Type of Request:* Revision; *Title of Information Collection:* Medicaid Integrated Review Schedule; *Form Number:* HCFA-301; *Use:* Medicaid State Agencies are rquired to perform quality control reviews. The review schedule serves as the comprehensive data entry form for all quality control reviews in the Aid to Families with Dependent Children (AFDC), Food Stampe, and Medicaid programs; *Frequency:* Monthly; *Respondents:* State/local governments; *Estimated Number of Responses:* 37,000 Medicaid Assistance Only (MAO) and 65,192 AFDC; *Average Hours per Response:* MAO-.65 reporting and .43333 recordkeeping; AFDC-.10 reporting and .06659 recordkeeping; *Total Estimated Burden Hours:* 30,569 reporting and 20,374 recordkeeping for a total of 50,943.

4. *Type of Request:* Extension; *Title of Information Collection:* Medicare Therapeutic Shoe Demonstration Program Certification And Prescription Form; *Form Number:* HCFA-609; *Use:* These forms are completed by providers participating in a demonstration and are used by the demonstration contractor to check Medicare eligibility, randomize applicants, and provide baseline information for the evaluation; *Frequency:* Annually; *Respondents:* Businesses/other for profit; and small businesses/organizations; *Estimated Number of Responses:* 27,466; *Average Time per Response:* 5 minutes; *Total Estimated Burden Hours:* 2,291.

5. *Type of Requests:* Extension; *Title of Information Collection:* Chronic Renal Disease Medical Evidence Report; *Form Number:* HCFA-2728; *Use:* These forms are completed by End-stage Renal Disease (ESRD) facilities and patients so that HCFA and the Social Security Administration can determine whether ESRD claimants are entitled to Medicare benefits; *Frequency:* On occasion; *Respondents: Individuals/households, businesses/other for profit; and small businesses/organizations; Estimated Number of Responses:* 48,000; *Average Hours per Response:* .25; *Total Estimated Burden Hours:* 12,000.

6. *Type of Request:* Revision; *Title of Information Collection:* Medicaid Integrated Quality Control Review Workaheet; *Form Number:* HCFA-316; *Use:* These forms are completed by State agencies to collect both case characteristics and quality control data for all quality control reviews for the Aid to Families with Dependent Children (AFDC), Food Stamps, and Medicaid programs; *Frequency:* Monthly; *Respondents:* State/local governments; *Estimated Number of Responses:* Integrated States: 17,700 for Medical Assistance Only (MAO) and 1,091 for ineligible AFDC stratum cases; non-integrated States: 20,582 for MAO and 1,466 for ineligible AFDC stratum cases; *Average Hours per Response:* Reporting: Integrated States 5.42 for MAO and 2.71 for ineligible AFDC stratum cases; non-integrated States: 8 for MAO and 4 for ineligible AFDC stratum cases; Recordkeeping: Integrated States: .8 for MAO and .8 for ineligible AFDC stratum cases; non-integrated States: .33 for MAO and .67 for ineligible AFDC stratum cases; *Total Estimated Burden Hours:* 259,419 (reporting) and 19,239 (recordkeeping) for a total of 278,658.

Additional Information or Comments: Call the Reports Clearance Officer on 301-966-2088 for copies of the clearance request packages. Written comments and recommendations for the proposed information collections should be sent directly to the following address: OMB Reports Management Branch, Attention: Allison Herron, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: October 16, 1990.

Gail R. Wilensky,

Administrator, Health Care Financing Administration.

BILLING CODE 4120-03-M

[BPO-091-PN]

Medicare Program; Data, Standards and Methodology Used To Establish Budgets for Fiscal Intermediaries and Carriers

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed notice.

SUMMARY: This notice describes the data, standards, and methodology that would be used to establish fiscal intermediary and carrier budgets for fiscal year (FY) 1991, beginning October 1, 1990. Intermediaries and carriers assist in the administration of the Medicare program by performing numerous functions related to paying for medical services and equipment.

Sections 1816(c)(1) and 1842(c)(1) of the Social Security Act require us to publish for public comment in the Federal Register data, standards, and methodology we intend to use to establish budgets for Medicare intermediaries and carriers.

DATES: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on November 23, 1990.

ADDRESSES: Address comments in writing to: Health Care Financing Administration, Department of Health and Human Services, Attention: BPO-091-PN, P.O. Box 26676, Baltimore, Maryland 21207.

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments.

In commenting, please refer to file code BPO-091-PN.

If you prefer, you may deliver your comments to room 309-G Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC or to room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Comments will be available for public inspection as they are received, beginning approximately three weeks after publication, in room 309-G of the Department's office at 200 Independence Avenue SW., Washington, DC 20201, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone 202-245-7890).

FOR FURTHER INFORMATION CONTACT: J. Thomas Hessenauer, (301) 966-7542.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 1816 of the Social Security Act (the Act), public or private organizations and agencies participate in the administration of part A of the Medicare program (Hospital Insurance) under agreements with the Secretary of HHS. These agencies or organizations are known as fiscal intermediaries, and they perform bill processing and benefit payment functions for the Medicare program. Most providers of services (such as hospitals, skilled nursing facilities (SNFs), and home health agencies (HHAs)) submit bills to these intermediaries, which determine whether the services are covered under Medicare and determine correct payment amounts. The intermediaries then make payments to the providers on behalf of the beneficiaries.

Under section 1842 of the Act, the Secretary of HHS is also authorized to enter into contracts with entities, known as carriers, to fulfill various functions in the administration of part B of the Medicare program (Supplementary Medical Insurance). Beneficiaries, physicians, and other suppliers of services or supplies, submit claims to these carriers. The carriers determine whether the services or supplies are covered under Medicare and the payment amount (usually on the basis of reasonable charges) for the services or supplies and then make payment to the appropriate party.

Fiscal Intermediary and Carrier Budget Process

Oversight of intermediary and carrier performance by HCFA is exercised by staff of both the central office and regional office (RO). In general, national policies are addressed at the central office level, and regional and local policies and operations are addressed by the regional offices. Communication between HCFA and the intermediaries and carriers is continuous. Established consultation workgroups, consisting of representatives of HCFA central office, regional offices and Medicare contractors, meet periodically.

HCFA central office is responsible for developing a national contractor budget for both part A and part B of the Medicare program. The budget is formulated over a 15-month period, beginning in March of the year preceding the fiscal year to which it applies. It is formulated after input from the contractor community, HCFA's ROs, various central office components, several levels in the Department of HHS, and the Office of Management and Budget (OMB). Prior to submittal to the President for approval and forwarding to Congress.

Our past practice has involved use of the HCFA ROs in obtaining budget estimates from the contractors. The ROs' assessment of the contractor's needs is reviewed during a budget level determination process based on current claims processing trends, legislative mandates, administrative initiatives, current year performance standards and criteria, and the availability of funds appropriated by Congress, subsequently allocate funding within these constraints.

Section 4035(a) of Public Law 100-203; the Omnibus Budget Reconciliation Act of 1987 (OBRA7), amended sections 1816(c) (1) and 1842(c) (1) of the Act by requiring the Secretary to publish in the Federal Register, by no later than September 1 before each fiscal year, the final data, standards, and methodology to be used to establish budgets for fiscal intermediaries and carriers under these sections for that fiscal year. We also are required to publish in the Federal Register for public comment the data, standards, and methodology we will use at least 90 days before September 1.

We have been unable to meet the statutory mandate to publish a proposed notice at least 90 days before September 1. Although we have not published the proposed notice within the timeframe contemplated by the statute, we nevertheless want to assure interested parties that they will be provided an adequate opportunity to comment on the data, standards, and methodology to be used to establish budgets before they are issued in final. To the extent that comments received warrant revisions to the proposed data, standards, and methodology, we will make such changes before issuing the final notice. Moreover, if appropriate, we will issue revised Budget Performance Requirements (BPRs) to intermediaries and carriers. We will also renegotiate any affected areas of intermediary and carrier budgets within the level of funding made available by Congress.

Additionally, as in prior years, we have had and will continue to seek extensive input from the involved parties, particularly contractors. Their input is used as part of the basis for the national contractor budget that was presented to Congress. That budget is the basis for the contents of this notice. Therefore, we do not believe that the delay in publishing this proposed notice will disadvantage the contractors as they have already been apprised of the contents of this document at meetings, via letters, and telephone calls. The delay will neither diminish the depth of the consultation nor the negotiation with the parties most affected by this notice.

We will make every effort to meet the requirement to publish a final notice by September 1. If providing a 30 day comment period and evaluating comments after the proposed notice on the data, standards, and methodology is

published makes this not possible, we will make every effort to publish the final notice as near as possible to September 1.

II. Overview of Fiscal Year 1991 National Medicare Contractor Budget: Data, Standards and Methodology

The FY 1991 Medicare contractor budget request was submitted to Congress in January 1990. Due to budget constraints the workload for the FY 1991 request is expressed in terms of work processed and for part A (82.4 million) is 1.4% less than the FY 1990 workload which was based on receipts. For part B (465.1 million) the workload results in a 0.5% increase. Our estimate involved the use of a regression model that uses the last 36 months of actual contractor workload data. The software runs the historical data through five different statistical models, selects the one best suited to the characteristics of the data, and provides a forecast using the model providing the best fit. For the FY 1991 projections, we used January 1990 data which were the latest available at the time. The resulting projections will be updated monthly to assure that the most timely data are available for budgeting purposes.

Based on the projected FY 1990 unit costs for processing bills and claims, we applied a 3.3 percent inflation factor (the economic assumption used by the OMB based on changes to the Consumer Price and Wage Index as developed by the Department of Labor). This amount is then further adjusted for savings achieved by prior and anticipated productivity investments, and costs associated with new legislation. This calculation results in a new unit cost, which, when multiplied by the part A and/or part B workloads, shows the total amount to be earmarked for bills and claims payment in FY 1991.

A. Medicare Contractor Functional Areas

The Medicare contractor budget consists of seven functional area responsibilities performed by intermediaries for part A and eight functional area responsibilities performed by carriers for part B. The functional area responsibilities for part A are: (1) Bills Payment; (2) Reconsiderations and Hearings; (3) Medicare Secondary Payer; (4) Medical Review and Utilization Review; (5) Provider Audit (Desk Reviews, Field Audits and Provider Settlements); (6) Provider Reimbursement; and (7) Productivity Investments. The functional area responsibilities for part B are: (1) Claims Payment; (2) Reviews and Hearings; (3) Beneficiary/Physician Inquiries; (4) Medical Review and Utilization Review; (5) Medicare Secondary Payer; (6) Participating Physicians; (7) Professional Relations; and (8) Productivity Investments. These functions are funded from the Hospital Insurance (HI) and Supplementary Medical Insurance (SMI) trust funds. The data, standards and methodology used in these functional areas are discussed in section III. In the following national budget summary, we have combined the discussion of functional areas common to both intermediaries and carriers. However, data specific to part A and part B are provided under each heading.

1. Bills Payment and Claims Payment

We currently estimate the part A processed workload to be 82.4 million bills in FY 1991. This estimate results from a workload regression model that uses the last 36 months of intermediary data through January 1990 and the current funding available for processing claims. Intermediaries are required by section 1816(c) of the Act (as amended by section 9311 of Pub. L. 99–509, the Omnibus Budget Reconciliation Act of 1986 (OBRA 86)), to pay 95 percent of part A bills within 24 days of receipt. This workload level includes 2.2 million claims for PAP smears as provided for in Omnibus Budget Reconciliation Act of 1989, Pub. L. 101–239 (OBRA 89).

The part B processed workload is currently projected at 465.1 million claims based on the current funding available. All part B claims must be processed within the same timeframes as part A bills, except that participating physician claims must be paid within 17 days of receipt. This workload level includes 4.5 million claims for PAP smears as provided for in OBRA 89.

Section 4031 of OBRA 87 amended sections 1816(c) and 1842(c) of the Act to impose a 14-day payment floor standard effective October 1, 1988 for part A bills and part B claims. This standard provides that no payment may be made within 14 calendar days after the date that the bill/claim is received. The OBRA 87 provisions expired in September 1989. HCFA has administratively retained the statutory floor with a waiver period. The waiver period is scheduled to end on September 30, 1990. Thus, the 14-day payment floor will apply again beginning October, 1990. Section 4031 also prohibits the Secretary from issuing before October 1, 1990, other regulations, instructions or policies intended to slow down Medicare payments.

2. Reconsiderations (Reviews Under Part B) and Hearings

This function includes all activities related to guaranteeing due process of law as a result of contractor action (i.e., disallowances) on bills and claims.

Section 4032 of OBRA 87 amended section 1816(f) of the Act to require that intermediaries process 75 percent of reconsiderations within 60 days beginning in FY 1990. As a result of the FY 1990 funding levels, we reevaluated the reconsiderations, reviews, and hearings process with an aim to further increase efficiency. For FY 1991 we expect to achieve reduced costs through expanded use of on-the-record and telephone hearings and through the use of audio response units to replace labor intensive methods of answering inquiries.

3. Medicare Secondary Payer

The Medicare Secondary Payer (MSP) function is the first of three initiatives (Medicare Secondary Payer, Medical Review and Utilization Review, and Provider Audit) we developed as "Payment Safeguards" in an attempt to safeguard the Medicare program against improper payments.

The focus of the MSP initiative is to ensure that the Medicare program pays for covered care only after reimbursement from other primary insurers has been made. An intermediary and a carrier must administer the program in a manner that achieves maximum savings and cost avoidance to the Medicare trust funds. Medicare Secondary Payer activities center on claims involving: the working aged; spousal working aged; beneficiaries with end-stage renal disease; beneficiaries eligible for payment under automobile, medical liability and no-fault insurance; individuals eligible for or receiving workers compensation; and the disabled. By concentrating efforts in these key areas, the Medicare program has had tremendous success in recovering and reducing improper program payments.

Medicare contractors are responsible for identifying MSP situations and aggressively pursuing the recovery of improper payments from the appropriate party. In conjunction with the actuary, we develop specific savings goals for each contractor based on past performance.

The standard for determining the amount of MSP funding a contractor will receive in FY 1991 is based on savings goals, workload volumes, required systems changes, and any special

projects that may be assigned to contractors.

We gather actual MSP claims volume, overall claims volume for the prior fiscal year, and special project data (e.g., cost of claims, amount of savings achieved). We compare a contractor's previous year's data to the contractor's projections for the next fiscal year and allocate funding in proportion to the savings goals to be achieved. Additional funding is allocated for specific projects as required. The amounts vary based on the scope of the project, extent of systems changes if any, and workload.

For FY 1991 we have included funding to implement the IRS/SSA/HCFA data match project created by section 6202 of OBRA '89 (Pub. L. 101–239).

4. Medical Review and Utilization Review

In addition to processing and paying claims from providers of services and Medicare beneficiaries, the contractors perform a medical review (MR) of claims to determine whether services were medically necessary and constituted an appropriate level of care.

Intermediaries are responsible for medical review of HHA, SNF, outpatient hospital services (excluding surgery), and other outpatient services, such as those provided by rehabilitation facilities, rural health clinics, etc. This review assures that medical care is necessary and appropriate and that quality medical services are delivered to Medicare beneficiaries.

During FY 1991, the review of HHA and outpatient services will account for most of the uses of medical review resources. Medical review of all HHA provider claims will be the responsibility of regional home health intermediaries.

In FY 1991, we will continue efforts in the standard cost analysis system developed in FY 1987 to evaluate the efficiency of carrier prepayment medical review screens. This systematic approach is expected to yield benefits to the medical review process, such as: (1) A current inventory of the number, types, and cost effectiveness of medical review screens; (2) ability to analyze the current inventory of screens and set a framework that yields a high return on investment; (3) ability to target strategies for specific medical review activities; and (4) measurement of the relative cost effectiveness of screens among different contractors.

In FY 1991, we will continue to focus on prepayment review, including additional mandatory prepayment screens. We also will continue with our efforts with postpayment medical review.

The carrier postpayment process consists of preparing profiles of providers and beneficiaries, identifying patterns of fraud and abuse, correcting program abuse or overutilization, preventing further abuse in service utilization by educating providers in acceptable norms and proper billing practices, recommending administrative action, where appropriate, and identifying areas for the development and installation of future prepayment review screens.

For FY 1991 an analytical diagnosis-based approach to identification of services for more intensified MR, termed patterns of care, will be implemented nationally. Funding is for carrier staff review of the system rather than development, which will be accomplished in FY 1990. We estimate that 20% of FY 1991 prepayment MR will be diagnosis related.

Carriers must continue to provide support to HHS/Office of Inspector General (OIG) in developing cases of suspected fraud and abuse. This is in addition to the fraud and abuse activities that currently exist in other intermediary and carrier functions.

The distribution of funding is in proportion to workload, individual contractor medical review/utilization review (MR/UR) projects, and the budget constraints brought about by reduced funding availability.

The actual and cost avoidance benefits in safeguarding program dollars are significant. Educational encounters lead to fewer incorrect billings and administrative cost avoidance in the form of reductions in the number of requests for reviews and hearings. We will continue to focus on: review of providers with demonstrably aberrant billing and practice patterns; review of educational efforts; and development of a methodology for quantifying the level of program and administrative cost avoidance resulting from postpayment medical review activities.

Carrier medical review costs will be offset by avoiding payment for medically unnecessary services through proper medical review/utilization review.

5. Provider Audit

For FY 1991 we have planned for the full compliment of audits to help in the identification and prevention of improper payments. These will include desk reviews, field audits, special audit activities and final settlements. Considering provider growth and the increase in cost-based reimbursement to PPS hospitals, HCFA will continue to give priority to the audits of PPS multi-facility hospitals as well as chain-affiliated providers. In addition, by concentrating effort on HHAs and SNFs which meet minimum audit criteria, HCFA will maximize the potential savings available from these providers. HCFA will also focus audit efforts on costs reported and allocated by home offices, since there are numerous incentives for chain home offices to maximize reimbursement through creative cost allocation practices.

6. Provider Reimbursement (Part A Only)

In FY 1991, Medicare contractors are required to provide reimbursement services to 28,000 health care providers. This represents an increase of approximately 3.5 percent over the number of providers requiring reimbursement services in FY 1990. Reimbursement services are required for provider-based SNFs and HHAs in addition to ESRD facilities, comprehensive outpatient rehabilitation facilities (CORFs), and hospices regardless of whether the provider is audited on an annual or other basis. The budget provides for the following activities:

- Collection of Provider Overpayments—A system must be maintained to collect and record overpayments made to providers. In addition to collection and recordkeeping activities, contractors will investigate and provide profile data on uncollectible overpayment cases and provide monthly reports to HCFA on the uncollectible accounts.
- Interim Payments—Interim payment rates must be established and periodically reviewed throughout the fiscal year for all Medicare providers. The interim rates process requires the review of provider cost and utilization statistics and the calculation of adjusted rates.
- Consultative Services—Onsite assistance must be provided to any provider experiencing difficulties in preparing the cost report, preparing claims or any other payment area.
- Records and Reports—According to specific instructions from HCFA, files and records must be established and maintained by the contractors to ensure proper payments to providers. In addition, several different provider cost and payment reports must be prepared and submitted quarterly to HCFA.
- System Tracking for Audit and Reimbursement (STAR)—The STAR system collects data on individual provider identification such as: name, provider number, number of beds/visits etc. The system also collected all data on the cost of Medicare contractors

performing audit and reimbursement functions, including interim rate setting, desk reviews, settlements and field audits. The STAR system will be integrated with other data retrieval systems to eliminate duplicate reporting and to establish one data base for information reported by intermediaries.

In determining the amount of reimbursement funding each contractor receives, we analyze provider profiles submitted by contractors. The provider profiles show types and numbers of periodic interim payment (PIP) and non-PIP providers. We review prior periods of reimbursement funding and assess the contractor's future needs based on projected provider workload and the availability of funds. We make every attempt to distribute funds in proportion to workload.

7. Productivity Investments

The costs of implementing new initiatives designed to improve the effectiveness of Medicare program administration are referred to as productivity investments (PIs). Productivity investments generally provide start-up funds for contractor activities. Once these projects are operational, funding for these projects becomes part of the contractor's ongoing costs. The criteria for selection of PIs to be implemented vary. For example, some PIs are required by legislation or regulatory requirements. We also fund projects that will improve administrative cost efficiency, for example, the Common Working File and Shared Maintenance/Shared Processing.

There is no single distribution methodology for the allocation of PI funds. After we determine the national cost of a PI, funds are divided among the contractors based on either the contractors' cost estimates or through HCFA derived formulas based on project specifications. Other PI initiatives require equal effort by all contractors regardless of size, and are, therefore, divided equally among contractors. Finally, other PIs, such as the common working file and shared maintenance/shared processing, are given only to contractors that are involved in the specific projects.

In FY 1991, we will fund the following PIs: for part A—common working file, shared software maintenance, shared claims processing, quality assurance program initiatives, facilities management and changes in UB-92; and for part B—common working file, shared software maintenance, shared claim processing, quality assurance program, revised HCFA 1500, beneficiary initiatives, durable medical equipment, standard statistical conventions, facilities management, revision of payment software, payment for physicians in under-served areas, electronic media claims, and provisions initiated as a result of OBRA 89.

8. Beneficiary/Physician Inquiries

The Medicare program is complex. It is based on many provisions required by law, regulations and policy dealing with entitlement, coverage of services, comprehensive payment rules, and the rights and responsibilities of beneficiaries. Since contractors are the direct link between beneficiaries, physicians, and the program, this activity includes all costs related to beneficiary, physician and supplier inquiries generated by means of telephone calls, correspondence, and personal visits, estimated to be 28.1 million in FY 1991. Current contractor performance and evaluation criteria and standards require that inquiries be processed within 30 calendar days. For telephone inquiries, the level of service for a busy signal must equate to an "all trunks busy" of no higher than 20 percent. All calls must be acknowledged in no more than 20 seconds and must be handled by a telephone representative within 120 seconds of acknowledgement. The standards require that 80 percent of the calls must be handled to completion during the initial call and that call backs must be made within 2 working days. These standards apply to both toll free and local calls.

9. Participating Physicians (Part B Only)

Participating physicians are those who agree to accept assignment on all Medicare claims in return for certain incentives/benefits. All physicians must be given an opportunity to enroll/disenroll in the participation program annually.

The participating physician program for carriers includes the following activities: monitoring Maximum Allowable Actual Charges (MAAC); producing and distributing Medicare Participating Physician Directory (MEDPARD); monitoring nonparticipating physicians for compliance with section 1842(m) of the Act as added by section 9332(d) of OBRA 1986; monitoring participating physicians; furnishing toll-free electronic media claims lines for participating physicians; responding to participation related inquiries from beneficiaries in a timely and responsive manner; enrolling participating physicians and suppliers; monitoring systems changes for pricing screens and files related to the participating physician program; and monitoring data requests (participation counts).

When the Congress initially provided funding for the participation program, we identified each of the activities involved and priced each activity nationally. An algorithm was developed for distributing the funds to each contractor for each activity. Some algorithms distributed funds based on workload and others based on the number of sites with systems changes. One activity was funded based on the participation rates. We then totaled the cost of the various activities for each carrier and provided funding accordingly.

Section 9332 of OBRA 86 requires HCFA to pay carrier bonuses for increasing the rate of physician participation in the Medicare program. The methodology used to determine carrier bonuses for FY 1991 will be published in a separate notice.

10. Professional Relations

The success of the Medicare program depends upon the continuing cooperation of individuals and institutions providing health care services.

Carriers must notify physicians and suppliers, in writing, of policy and procedure changes prior to the effective dates of changes. They are to develop claims prior to denial or reduction. Carriers must initiate regular contact with physicians/suppliers through representative organizations. Scheduling regular and periodic training for new personnel and as part of a continuing education program for previously trained staff on current Medicare coverage, reimbursement, and billing policy is required. Carriers must conduct regular meetings with beneficiaries or their representative organizations to inform them about the participation program. Carriers must also provide adequate telephone service in order to answer queries concerning claims status and processing questions. The funding provided in FY 1991 will allow carriers to perform the above activities and others as outlined in the Medicare Carriers Manual, section 4000. Funding is also included for the enforcement of proper diagnostic coding of claims, identification of referring, ordering and rendering physician and other provisions as required by provisions included in OBRA 90.

11. Printing Claims Forms

Although this activity is not among the seven contractor functional areas, it is a part of the national Medicare contractor budget. In the interest of

BEST COPY AVAILABLE

maintaining standard formats and quality of Medicare entitlement and report forms, intermediaries and carriers supply beneficiary enrollment and provider cost reporting forms. The use of these forms is essential to beneficiary notification, effective and efficient contractor operations, and other program purposes.

With a steady increase in the number of beneficiaries and providers, we project a corresponding increase in a substantial number of HCFA forms.

B. Contractor Unit Cost Calculations

A key step in the contractor budget process is the development of contractor unit costs for processing part A bills and part B claims. A factor in the development of contractor unit costs is a reduction (where appropriate) of the unit cost based upon the application of the Industrial Engineering (IE) Study. Among other objectives, the IE study was commissioned by HCFA to develop an optimal unit cost for processing bills and claims. To do so, the performers of the study conducted on-site visits to virtually every Medicare contractor. The following is a brief description of how we used the results of the IE study.

The IE study determined through an analysis of quality, timeliness and cost, an optimal national unit cost range for processing each claim type and processing medium (a range was established in order to compensate for the variety of claims processing environments among contractors). For example, a part A contractor typically processes (among others) inpatient hospital bills. These bills are received in either hardcopy form or are electronically submitted. The IE study determined the optimal national unit cost range associated with processing a hardcopy inpatient bill versus an electronically submitted inpatient bill. The study did the same with every type and medium of bill and claim.

Using the ranges established by the IE study, we developed one optimal national unit cost for each type and medium of bill and claim. For part A, we used the appropriate mean optimal unit cost and for part B we used the low end of the optimal cost range as the optimal cost by claim type and medium.

After establishing the optimal national unit cost for all types and mediums of bills and claims, we determined the workload mix for each contractor by calculating the proportion of its work by bill/claim type and medium. We then applied the appropriate optimal national unit cost to the workload mix in order to develop a weighted unit cost for each contractor, resulting in the individualized optimal unit cost that was used in determining each contractor's unit cost as described in section III.C under Bills Payment and Claims Payment.

III. Fiscal Year 1991 National Medicare Contractor Budget: Standards, Data, and Methodology

After the President's FY 1991 Medicare contractor budget request was submitted to the Congress in January 1990, HCFA proceeded to develop budget and performance requirements to be issued to the contractors. These requirements outline the scope of work that intermediaries and carriers are expected to perform during the upcoming fiscal year in each of the functional areas for which they are responsible. In April 1990, the budget and performance requirements were issued to the regional offices. The regional offices add information pertinent to intermediaries and carriers within their own region. These final individualized requirements were sent to each intermediary and carrier in early June to provide them with assistance in preparing their FY 1991 budget requests. Intermediaries and carriers must submit their budget requests to HCFA no later than six weeks after the issuance of the budget guidelines.

While intermediaries and carriers are preparing their budget requests, the Division of Contractor Financial Management within HCFA will develop preliminary budget allocations for the functional areas based upon historical patterns, workload growth/inflation assumptions, and any other available information. Both central office and regional office staff will review intermediary and carrier budget requests as they are submitted. Regional office staff will discuss the differences between the intermediary and carrier requests and the HCFA derived allocations and negotiate with each intermediary and carrier a final, mutually acceptable budget within the limits of the funding available to HCFA. The central office prepares a Financial Operating Plan (FOP) for each regional office that provides total regional funding authority for each functional area. The regional offices in turn prepare a Notice of Budget Approval (NOBA) for each intermediary and carrier that provides a full year budget plan subject to quarterly cash draw limitations.

A. Standards

In April 1990, the basic scope of work, along with new and special activities that intermediaries and carriers will be expected to perform, are described in the budget and performance requirements package. Intermediaries and carriers are expected to perform the work as described in the budget and performance requirements package and in accordance with the standards included in the CPEP for FY 1991. For consideration in developing their initial budget requests, we issued a draft copy of the CPEP standards to contractors on May 29, 1990.

B. Data

In developing the individual intermediary and carrier budgets for FY 1991, we will utilize the following sources of data that contain various workload volumes, functional costs, and manpower information. (The basic forms that supply the data that are utilized in developing intermediary and carrier budgets are the HCFA–1523/1524 and the HCFA–1565/1566.) Forms HCFA–1523/1524 (a multipurpose form which serves as the Budget Request, Notice of Budget Approval and Interim Expenditure Report); Forms HCFA–1523/1524A Schedule of Productivity Investments and Other; Forms HCFA–1523/1524B Schedule of Credits, EDP and Overhead; Forms HCFA–1523/1524C Schedule of Appeals; Forms HCFA–1523/1524D Schedule of MSP Costs; Forms HCFA–1525/1525A Contractor Audit Settlement Report (CASR); Schedules A, B, & C; Audit Priority Matrix; Crossover from CASR to Audit Priority Matrix; Provider Reimbursement Profile; Schedule of Providers Serviced; MSP Savings Report; MR/UR Savings Report; Form HCFA–2580 Cost Classification Report; Form HCFA–3259 Facilities and Occupancy Schedule; Forms HCFA–1565/1566 Carrier Performance Report/Monthly and Intermediary Workload Report; HCFA Actuary's Workload Estimates; OMB's Economic Assumption of 3.3 Percent; Industrial Engineering Study; Savings from Prior Productivity Investments; New Legislation Costs; Regional Office Recommendations; and Contract Provisions.

C. Methodology

The Medicare contractor budget is built around the previously listed seven major functions performed by intermediaries for part A and eight major functions performed by carriers for part B.

1. Bills Payment and Claims Payment

The individual intermediary and carrier workload levels for FY 1991 (subject to the national workload levels and approved funding) are determined by the regional offices based upon regional forecasted totals that are

derived from a statistical forecasting model. We are also projecting the number of bills/claims an intermediary and carrier expect to have pending at the end of FY 1990 using the same data. We then combine the FY 1991 receipt estimate with the anticipated end of FY 1990 pending level, and subtract the estimated FY 1991 pending for each intermediary and carrier to establish a processed workload (i.e., Estimated FY 1991 receipts + Estimated end of FY 1990 pending − Estimated end of FY 1991 pending = Estimated FY 1991 Processed Workload).

In order to price individual contractor bills/claims workloads, we develop a unit cost that is the cost of processing a single bill/claim. The individual intermediary and carrier unit costs for FY 1991 are calculated based upon unit costs (line 1 of the FY 1990 NOBA HCFA–1523/1524) in effect at the time that we perform our computations. The calculations include increases to recognize the cost of new legislation, and 3.3 percent for price inflation. Reductions associated with the application of the IE study and savings achieved from the common working file and other prior Productivity Investments will also be part of the formula employed in computing FY 1991 target unit costs. The regional offices will negotiate with intermediaries and carriers to resolve any differences between the HCFA target unit cost and the contractors' requested unit costs, within the limits of the funding available to HCFA.

2. Reconsiderations (Reviews Under Part B) and Hearings

We will allocate funding based on the amount of dollars spent (line 2 of the NOBA HCFA–1523/1524C) in the prior year, adjusted for inflation and volume. Specifically, we will adjust the previous year's costs for reconsiderations and hearings by the percentage change in inflation, which for FY 1991 is a 3.3 percent increase (a rate that reflects productivity gains generally for the economy, but which may cause over/understatement of costs depending on the productivity efficiencies experienced by the individual contractors), and for the percentage change in workload. We have revised these forms to allow us to capture more discrete workload and cost data. We will use these data to develop budgeted costs for reconsiderations and hearings as we do for bills payment and claims payment costs, that is, forecasted processed volume times unit cost. The individual intermediary and carrier budget allocations for reconsiderations, reviews, and hearings are determined by using the old methodology. If sufficient reliable data are collected, then we may redetermine the allocations by multiplying anticipated workload levels in FY 1991 times the newly developed unit cost. We will consider the current pending workload and projected receipts for each intermediary and carrier. The regional offices will negotiate with intermediaries and carriers to resolve any differences between the HCFA allocations and the contractors' requests, within the limits of the funding available to HCFA.

3. Beneficiary/Provider Inquiries (Part B Only)

The prior year's cost is adjusted by the percentage change in inflation, which for FY 1991 will be a 3.3 percent increase, as well as any projected workload increase or decrease to establish a budgeted amount for beneficiary and provider inquiries. We also consider special conditions unique to specific carriers in negotiating the budget. We are now developing new reporting requirements that will allow us to capture more discrete workload and cost data. We are beginning the year using the old budgeting methodology until we have sufficient reliable data under the new reporting system. We may use the data to develop a budgeted cost for beneficiary/provider inquiries by multiplying forecasted processed volume times unit cost The regional offices will negotiate with the carriers to resolve any differences between the HCFA allocations and carriers' requests, within the limits of the funding available to HCFA.

4. Provider Reimbursement (Part A Only)

In determining individual intermediary budgets for reimbursement activities, we first calculate an FY 1990 unit cost using the funding included on the latest FY 1990 NOBA (HCFA 1523/1524C) and dividing that amount of money by the workload reported on the Schedule of Providers Serviced (SPS) for the same period.

The SPS is a listing of all the facilities serviced by the intermediary. This report offers a more detailed description of the providers because it identifies them by type, bed size, and freestanding or provider-based and whether they are paid on a periodic interim payment basis. The SPS is submitted with each initial budget request so that a part of the analysis is the comparison of the composition of the provider community serviced by the intermediary and any change reported between fiscal years.

The unit cost found by dividing the amount of the FY 1990 NOBA by the workload from the SPS for the same period forms the first of the "raw" data used to project the FY 1991 budget. This unit cost is increased by 3.3 percent, which is the rate of inflation provided to HCFA by OMB. This adjusted unit cost is then multiplied by the FY 1991 workload as reported on the SPS. The result is then adjusted based on a review of cost documentation of special initiatives.

In order to resolve major differences between the intermediary's budget request and the amount developed by the preceding approach, we analyze the reimbursement profile that is an addendum to the budget request. This profile shows the cost claimed by type of reimbursement activity (Interim Rate Determinations, Overpayment Recoupment, Consulting Services, etc.).

The regional offices will negotiate with the intermediaries to resolve any differences between the HCFA allocations and the intermediaries' requests, within the limits of the funding available to HCFA.

5. Provider Audit (Part A Only)

For FY 1991, the provider audit function is divided into two major activities, desk reviews and settlements.

The basic report on all audit analysis is based on the Contractor Auditing and Settlement Report (CASR) (HCFA–1523/1525A). This form provides a breakout of audit activities and costs by type of provider as well as documents the savings incurred as a result of audit activity. Using this as a base, the desk review costs are developed by projecting the workload using the total count of providers serviced. (All cost reports must be desk reviewed.). The count of providers serviced is compared to the total shown on the Schedule of Providers Serviced for verification. We then multiply this count by the unit cost per desk review (developed from the latest CASR for FY 1990) to determine the cost of handling the FY 1991 workload at the FY 1990 unit cost.

Settlement costs are based on the workload projected in the intermediary's budget request multiplied by the unit cost for settlements found in the most recent CASR for FY 1990. This will cost out the FY 1991 activity at the FY 1990 level of expenditure.

The overriding priority of all audit efforts is comprised of the special activities required by legislation [e.g. COBRA, OBRAs]. The second priority is that all cost reports must be desk reviewed, and, to the extent possible, settled.

All of the above costs are adjusted for inflation, which for FY 1991 will be a 3.3 percent increase.

The regional offices will negotiate with intermediaries to resolve any differences between the HCFA allocations and the intermediaries' requests, within the limits of the funding available to HCFA.

6. Medicare Secondary Payer (MSP)

We will extract data, including processed volumes, costs and program savings, from the HCFA-1523/1524D and the MSP Savings Report (HCFA-1883/1884) to determine MSP funding allocations. These reports will include IRS/SSA/HCFA data match costs, volumes, and savings. In allocating the FY 1991 MSP budget to individual intermediaries and carriers, we consider (1) estimated potential savings goals by category and by State (e.g., working aged and spousal working aged insurance, automobile, medical liability and no-fault insurance, end-stage renal disease, disability, and workers compensation); (2) the relationship of available funds to expected savings among contractors; and (3) staffing mix differences, levels of systems sophistication, and special tasks. The regional offices will consider items 1, 2, and 3 of this paragraph when negotiating with intermediaries and carriers within the limits of the funding available to HCFA.

7. Medical Review/Utilization Review (MR/UR)

The individual intermediary and carrier MR/UR budgets for FY 1991 will be calculated in three components: prepayment medical review, postpayment activities, and medical review policy development (carriers only). As a part of the budget guidelines, we asked intermediaries and carriers to estimate (1) the number of bills/claims to be processed by bill types, (2) the required funding, (3) staff level changes expressed in terms of percent of full-time equivalents, and (4) the percent of electronic data processing costs attributable to MR/UR review. We will allocate to each contractor prepayment and postpayment medical review funding based upon the workload that an intermediary or carrier projects will be processed under the FY 1991 budget guidelines for medical review and the funds requested by the intermediary or carrier to perform the reviews. Carrier budgets for medical review policy development are based on levels of sophistication of carrier policy development and dissemination and the need for medical direction. The funding calculations for all MR/UR activities will include a 3.3 percent factor for price inflation, where applicable. The regional offices will negotiate with intermediaries and carriers to resolve any differences between the HCFA allocations and the contractors' requests, within the limits of the funding available to HCFA.

8. Participating Physicians (Part B Only)

In determining the individual carrier funding levels for the participating physician program for FY 1991, we considered the following factors: the number of physicians in the carrier's service area; the carrier's current participation rate; the carrier's recent performance in increasing its participation rate; the scope of work to be performed as outlined in the budget guidelines; and last year's cost experience. Since participating physicians are eligible for free electronic media claims (EMC) lines for billing, allowance has been made for these expenses. Carriers with lower participation rates will receive greater funding for MAAC violation monitoring and monitoring of nonparticipating physicians for compliance with elective surgery disclosure requirements. Carrier monitoring funds are allocated based on the national percentage of nonparticipating physicians. All carriers will receive the same funding amount for reporting participation statistics. Our computations of the carriers' budgets for these activities will include an allowance for price inflation. The regional offices will negotiate with the carriers to resolve any differences between the HCFA allocations and the carriers' requests, within the limits of the funding available to HCFA.

9. Productivity Investments

The costs of implementing legislation and new initiatives designed to improve the effectiveness and efficiency of Medicare program administration are referred to as Productivity Investments. Several allocation methodologies will be employed in calculating the Productivity Investment budgets for individual intermediaries and carriers. For those projects involving only single contractors or small groups of contractors, we will allocate funds based upon the specifications of the particular project. For those projects involving all intermediaries and/or carriers in that the costs are driven by bill/claims volume, we will distribute the funding based upon our workload projections for each contractor. Finally, for those projects involving all intermediaries and/or carriers that require equal effort regardless of the contractor's size, we derived a standard allocation to be given to all contractors. The regional offices will negotiate with the intermediaries and carriers to resolve any differences between the HCFA allocations and the contractors' requests, within the limits of the funding available to HCFA.

10. Professional Relations

In determining the individual carrier funding levels for the professional relations function for FY 1991, we considered the number of physicians and suppliers in the carrier's service area. Distribution of funds made available to HCFA for the performance of the professional relations function by carriers is made to each carrier based upon the ratio of physicians and suppliers in the carrier's service area to the national total of physicians and suppliers.

The sum of the preceding functions, plus printing costs, is the FY 1991 national Medicare contractor budget. HCFA distributes the funding to intermediaries and carriers in accordance with the established guidelines and allocations as previously discussed.

IV. Regulatory Impact Statement

Executive Order (E.O.) 12291 requires us to prepare and publish a regulatory impact analysis for any proposed notice that meets one of the E.O. 12291 criteria for a "major rule"; that is, that will be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Also, we generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Administrator certifies that a proposed notice would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, fiscal intermediaries and carriers are not considered to be small entities. Additionally, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis for any notice such as this that may have a significant impact on the operations of a substantial number of small rural

hospitals. Such an analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital which is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

This notice does not contain rules. Rather, the purpose of this notice is to fulfill our obligation under sections 1816(c) and 1842(c) of the Act, as amended by section 4035(a) of Public Law 100-203 to publish annually in the Federal Register, the data, standards, and methodology proposed to be used in establishing fiscal intermediary and carrier budgets. This information is to be published for public comment at least 90 days prior to the publication of the final data, standards, and methodology to be used. This proposed notice would not promulgate any rule or implement any policy, nor would it be a part of, or substitute for, any negotiations we intend to conduct with the intermediaries and carriers. The data, standards and methodology utilized to determine the FY 91 carrier and intermediary budgets have not been changed from those utilized to determine the FY 90 budgets. Any changes to the budget amounts would be the result of changes in the workload and the inflation factor as well as our negotiations with contractors rather than as a result of this notice. Thus, this document would not produce a change either in contractor operations or on program activities. In additon, this proposed notice would not affect provider or supplier reimbursement rates or fees.

For these reasons (than is, this proposed notice does not represent an attempt at rulemaking, and the publishing of this notice would not have a significant impact on any aspect of the Medicare program), this notice does not meet the $100 million criterion nor do we believe than it meets the other E.O. 12291 criteria. Therefore, this proposed notice is not a major rule under E.O. 12291, and a regulatory impact analysis is not required.

For these same reasons, we also have determined, and the Secretary certifies, that this proposed notice would not result in a significant impact on a substantial number of small entities and would not have a significant effect on the operations of a substantial number of small rural hospitals. Therefore, we are not preparing analyses for either the RFA or section 1102(b) of the Act.

VI. Response to Comments

Because of the large number of pieces of correspondence we normally receive on a proposed notice we are not able to acknowledge or respond to them individually. We will consider all comments contained in correspondence that we receive by the date specified in the "DATE" section of this preamble and will respond to the comments in our final notice.

BILLING CODE 4120-01-M

[HSQ-182-NC]

Medicare Program; Standards Applied by Utilization and Quality Control Peer Review Organizations: Consideration of Remote Rural Location and Other Relevant Factors

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of policy and request for comments.

SUMMARY: This notice advises interested parties about HCFA's implementation, without change in existing regulations, of section 4094(a) of the Omnibus Budger Reconciliation Act of 1987 (Pub. L. 100-203), and it provides the opportunity for comment. Section 4094(a) of Public Law 100-203 directs Utilization and Quality Control Peer Review Organizations (PROs), when developing review standards and norms, to "take into account the special problems associated with delivering care in remote rural areas, the availability of service alternatives to inpatient hospitalization, and other appropriate factors (such as the distance from a patients's residence to the site of care, family support, availability of proximate alternative sites of care, and the patient's ability to carry out necessary or prescribed self-care regimens) that could adversely affect the safety or effectiveness of treatment provided on an outpatient basis."

Since PROs are already supposed to take such factors into account when making medical review determinations, no change in existing regulations or policies is needed to ensure compliance with section 4094(a) of Public Law 100-203. We are, however, publishing this notice so that all interested parties will understand our current policies and have the opportunity to make their views known. Based on the comments we receive, we will reevaluate our current policies and, if necessary, further define those policies.

DATES: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on December 24, 1990.

ADDRESSES: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: HSQ-182-NC, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments. In commenting, please refer to file code HSQ-182-NC. Comments received timely will be available for public inspection as they are received, beginning approximately 3 weeks after publication of this document, in room 309-G of the Department's offices at 200 Independence Avenue SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Patricia Booth (301) 966-6660.

SUPPLEMENTARY INFORMATION:

I. Background

The Peer Review Improvement Act of 1982 (title I, subtitle C of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248)) amended part B of title XI of the Social Security Act (the Act) to establish the Utilization and Quality Control Peer Review Organization (PRO) program. The 1982 legislation provided that PROs assume the responsibilities that previously had been assigned to Professional Standards Review Organizations and fiscal intermediaries. Those responsibilities include the review of health care services funded under Medicare (title XVIII of the Act), to ensure that services furnished to Medicare beneficiaries are medically necessary and provided in the most appropriate setting (for example, acute care hospital versus skilled nursing facility (SNF) or a lesser level of care) and meet professionally recognized standards of quality. Where

services are not medically necessary or not delivered in the most appropriate setting. PROs have the authority to deny payments. In addition, PROs monitor and validate a sample of diagnostic and procedural information supplied by hospitals to fiscal intermediaries to establish for individual cases the propective payment amounts for hospitals.

Section 1154(a)(6)(A) of the Act requires that PROs "apply professionally developed norms of care, diagnosis, and treatment based upon typical patterns of practice within the geographic area served by the organization as principal points of evaluation and review, taking into consideration national norms where appropriate." Section 4084(a) of Public Law 100-203 amended this section of the Act by adding the requirement that PROs "shall take into account the special problems associated with delivering care in remote rural areas, the availability of service alternatives to inpatient hospitalization, and other appropriate factors (such as the distance from a patient's residence to the site of care, family support, availability of proximate alternative sites of care, and the patient's ability to carry out necessary or prescribed self-care regimens) that could adversely affect the safety or effectiveness of treatment provided on an outpatient basis."

In developing their review criteria, PROs generally use nationally recognized criteria adapted to meet PRO review requirements and to reflect local norms of practice and standards of medical practice (42 CFR 466.100). Additionally, 42 CFR 466.96 requires that a PRO denial of payment must be based on review by a local peer (or practitioner as appropriate).

When a PRO proposes to deny a payment or identifies a potential quality problem, the PRO must also permit the affected physicians or providers an opportunity to discuss the issue and present evidence to refute the PRO's provisional findings (42 CFR 466.93 and 1004.50).

In 1986, HCFA issued a policy statement to all PROs through its regional offices about the consideration of location and other relevant factors that stated, in part:

> Factors which may result in an inconvenience to a patient or family do not, of themselves, justify hospital admission or continued stay. Where such factors, however, affect the patient's health, the PRO will consider them in determining whether inpatient hospitalization is appropriate.

HCFA has interpreted this policy to require that PROs consider factors that affect the patient's need for inpatient hospitalization (that is, medical, environmental, social, etc.). This would include whether services that, under normal circumstances, could be provided on an outpatient basis should be provided on an inpatient hospital basis because of factors that could affect the health and safety of the patient. Thus, consistent with the provisions of section 4018(a) of Public Law 100-203, we already have policies in place that require that PROs take into account location and the other relevant factors cited in the law in conjunction with medical necessity when making decisions about inpatient hospital admissions and continued stays.

HCFA does not require PROs to make special efforts to obtain information about these factors when they are not included in the medical record. If medical records do not contain any documentation to allow the application of the factors, it is incumbent upon either the attending physician or the hospital to present, as part of the "opportunity to discuss," this evidance for the PRO's consideration. (If the case was denied, the beneficiary would be able to present the evidence as part of his or her request for reconsideration.)

Regulations governing PRO Medicare review activities are located in various parts of title 42 of the CFR (that is, parts 405, 412, 462, 466, 473, 476, 480, and 1004).

II. Request for Comments

HCFA has not established specific standards for PROs to use when considering location and other factors in the review process. This approach permits PROs flexibility to apply these factors based on practice patterns within their geographic areas. (This same flexibility is mandated by the Act for medical review criteria.) PROs should base determinations on circumstances peculiar to the areas they service (for example, terrain, weather conditions) and based on their staff's knowledge, experience, and training. Even with general guidelines, because of the uniqueness of each PRO area in terms of local norms of practice, topography, etc., and the fact that for questioned cases a physician makes the determination without reliance on criteria, we would expect some degree of variation in application of the statutory provision.

We have received some criticism alleging that PROs are not uniformly recognizing the factors cited in the law when making determinations. Therefore, we are seeking public input on the following specific issues:

1. Applicability to Both Admission and Continued Stay Decisions

HCFA maintains that the plain reading of the statutory language is that this provision applies to both continued stay and admission determinations. Several hospital industry organizations have communicated to us their contention that congressional intent was to have the provision apply "only" to admission determinations. This interpretation would create irrational situations in which a patient ostensibly could have an admission covered, taking into consideration other relevant factors, but could not remain in the hospital because the same factors would not be considered. Without specific statutory language to support the latter position, we contend that our interpretation of the provision, applying it equally to admissions and continued stay determinations, is consistent with the statutory requirement.

2. Meaning of "Outpatient Basis"

Section 4084(a) of Public Law 100-203 discusses situations (for example, availability of proximate alternative sites of care) that could adversely affect the safety or effectiveness of treatment provided on an "outpatient basis." We believe that it was the intent of Congress to limit the consideration of the factors cited in the law to short-term medically necessary services and not to expand Medicare coverage beyond the traditional benefit package. For example, the PRO would not approve hospitalization for SNF, intermediate care facility (ICF) or home health care level services because of these other factors, but could approve a short-term hospitalization when determining whether a patient having a surgical procedure performed should be admitted to the hospital as an inpatient versus having the procedure performed in the hospital outpatient department or an ambulatory surgical center. We do not believe these factors alone justify inpatient hospital admissions or continued stays for nonsurgical patients who require a lesser level of care such as a skilled nursing facility level of care or skilled home health services.

3. Definition of "Other Appropriate Factors"

We have not defined "other appropriate factors," but have relied on PROs to make determinations based on circumstances peculiar to their service areas and/or the individual case being reviewed. We are seeking public input about factors such as the distance a patient would be expected to travel, recognizing that there are differences

from area to area (for example, mountains, unimproved roads).

BILLING CODE 4120–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N–90–3162]

Privacy Act of 1974; Proposed Amendment to a System of Records

AGENCY: Department of Housing and Urban Development.

ACTION: Notification of a proposed amendment to an existing system of records.

SUMMARY: The Department is giving notice that it intends to amend the following Privacy Act system of records: HUD/H–11, Multifamily Tenant Characteristics Data.

EFFECTIVE DATE: This amendment shall become effective without further notice on November 23, 1990, unless comments are received on or before that date which would result in a contrary determination.

ADDRESSES: Interested persons are invited to submit comments regarding this notice to the Rules Docket Clerk, Office of General Counsel, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the above address.

As a convenience to commenters, the Rules Docket Clerk will accept brief public comments transmitted by facsimile ("FAX") machine. The telephone number of the FAX receiver is (202) 708–4337. Only public comments of six or fewer *total* pages will be accepted via FAX transmittal. This limitation is necessary in order to assure reasonable access to the equipment. Comments sent by FAX in excess of six pages will *not* be accepted. Receipt of FAX transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Rules Docket Clerk ((202) 708–2084). [These are not toll-free numbers.]

FOR FURTHER INFORMATION CONTACT: Donna L. Eden, Privacy Act Officer, Telephone Number (202) 708–0050. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION: HUD/H–11 contains a record for each individual receiving housing assistance from HUD under one of the following programs: Section 8, Public/Indian Housing, Section 236 (including Section 236 RAP), Rent Supplement, Section 221 (d)3 BMIR, and Section 202/8. This amendment is being made to reflect the Department's intention to maintain and use records that will identify all individuals who underreported income which was discovered while conducting income computer matches. In addition this system of records is being amended to change the name of the system to better reflect program coverage.

The amended portion of the system notice is set forth below. Previously, the system and prefatory statement containing the general routine uses applicable to all of the Department's systems of records were published in the "Federal Register Privacy Act Issuances, 1987 Compilation, Volume II."

A report, as required by 5 U.S.C. 552(a) of the Privacy Act, has been submitted to the Committee on Government Operations of the House of Representatives, the Committee on Governmental Affairs of the Senate, and the Office of Management and Budget (OMB) pursuant to paragraph 4b of Appendix I to OMB Circular No. A–130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985 (50 FR 52730, December 24, 1985).

Authority: United States Housing Act of 1937, as amended, 42 U.S.C. 1437 et seq., and the Housing and Community Development Amendments of 1981, Pub. L. 97–35, 95 Stat. 405.

Issued at Washington, DC October 18, 1990.

Michael F. Hill,

Acting Assistant Secretary for Administration.

HUD/H–11

SYSTEM NAME:

Multifamily Tenant Characteristics Data.

SYSTEM LOCATION:

Headquarters and Field Offices. For a listing of Field Offices with addresses, see 24 CFR part 16, Appendix A. Decentralized portions of this file may be maintained by selected contractors with research contracts.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This file contains a record for each individual receiving housing assistance from HUD under the following programs: Section 8, Public/Indian Housing, Section 236 (including Section 236 RAP), Rent Supplement, Section 221(d)3 BMIR, and Section 202/8. The file also contains a record of unreported or underreported income discovered in conducting an income verification match.

CATEGORIES OF RECORDS IN THE SYSTEM:

Manual and automated records consisting of: Identification information such as name; Social Security Number(s) (SSNs) for all individuals six (6) years of age and older; Alien Registration Information; address and tenant unit number; financial data such as income, contract rent amount; tenant characteristics such as number in family, sex of family member and minority code; unit characteristics such as number of bedrooms; geographic data such as county code and census tract; information used to verify data in the system; and information on the results of the follow-up phase of a computer match of tenant income verification (i.e., dollar amount of overpaid assistance, amount repaid, prosecution, and eviction).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

United States Housing Act of 1937; as amended, 42 U.S.C. 1437 et. seq., and the Housing and Community Development Amendments of 1981, Pub. L. 97–35, 95 Stat. 406.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

See routine uses paragraph in prefatory statement. Other routine uses include:

1. Federal, State, and local agencies (e.g., State agencies administering the State's unemployment compensation law, Office of Personnel Management, United States Postal Service, Department of Defense, and Social Security Administration)—to verify the accuracy and completeness of the data provided, to verify eligibility or continued eligibility in HUD's rental assistance programs, and to detect tenant fraud and abuse in assisted housing through the Department's tenant income computer matching program;

2. HUD persons under contract to HUD or under contract to another agency with funds provided by HUD—for the performance of research and statistical activities directly related to

the management of HUD's rental assistance programs, to support a quality control for tenant eligibility efforts requiring a random sampling of tenant files to determine the extent of administrative errors in making rent calculations, eligibility determinations, etc., and for processing certifications/recertifications; and,

3. Social Security Administration and Immigration and Naturalization Service—to verify alien status and continued eligibility to HUD's rental assistance programs.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folder; magnetic tape/disk/drum.

RETRIEVABILITY:

Name of tenant and all household members, address, SSN, or other identification number.

SAFEGUARDS:

File folders, automated records kept in a secured area. Access restricted to authorized individuals.

RETENTION AND DISPOSAL:

Obsolete records are destroyed or sent to a storage facility in accordance with HUD Handbook 2225.6, Records Disposition Management; HUD Records Schedules.

SYSTEM MANAGER AND ADDRESS:

For Section 8, Section 236 (including Section 236 RAP), Rent Supplement, Section 221(d)3 BMIR, and Section 202/8—

Office of the Assistant Secretary for Housing: Director, Housing Information and Statistics Division, Office of Management; Director, Planning and Procedures Division, Office of Multifamily Housing Management, Deputy Assistant Secretary for Multifamily Housing Programs.

For Public and Indian Housing—

Office of Assistant Secretary for Public and Indian Housing: Office of Public Housing, Chief, Occupancy Branch.

For Computer Matching Activities—

Office of Inspector General, Director, Program Integrity Division, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

NOTIFICATION PROCEDURE:

For information assistance, or inquiry about the existence of records, contact the Privacy Act Officer at the appropriate location, in accordance with 24 CFR part 16. A list of all locations is given in Appendix A.

RECORD ACCESS PROCEDURES:

The Department's rules for providing access to records to the individual concerned appear in 24 CFR part 16. If additional information or assistance is required, contact the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A.

CONTESTING RECORD PROCEDURES:

The Department's rules for contesting the contents of records and appealing initial denials by the individual concerned appear in 24 CFR part 16. If additional information or assistance is needed in relation to contesting the contents of records, it may be obtained by contacting the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A. If additional information or assistance is needed in relation to appeals of initial denials, it may be obtained by contacting the HUD Departmental Privacy Appeals Officer, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

RECORD SOURCE CATEGORIES:

Subject individuals, other individuals and organizations, Federal, State, and local agencies. PHA staff/private owners/management agents.

BILLING CODE 4210-62-M

DEPARTMENT OF THE INTERIOR

Nomination for National Indian Gaming Commission

AGENCY: Office of the Secretary, Interior.

ACTION: Notice.

SUMMARY: The Indian Gaming Regulatory Act (25 U.S.C. 2701, *et seq.*) provides for appointment by the Secretary of the Interior of two associate members of the National Indian Gaming Commission after public notice and an opportunity for comment. Notice is hereby given of the proposed appointment of Joel Matthew Frank, Sr., as an associate member of the Commission.

DATES: Comments must received by: November 23, 1990.

ADDRESSES: Comments should be addressed to: Morris Sharp, Director of Personnel, Department of the Interior, 849 C Street NW., Washington, DC 20240, (202) 208-6761.

SUPPLEMENTARY INFORMATION: Section 5(a) of the Indian Gaming Regulatory Act (25 U.S.C. 2704(a)) establishes a three-member National Indian Gaming Commission within the Department of the Interior. The Act provides that the Chairman of the Commission is to be appointed by the President with the advice and consent of the Senate. The two associate members of the Commission are to be appointed by the Secretary of the Interior (25 U.S.C. 2704(b)(1)). The Act provides that the Secretary shall publish notice of nominations for the associate member positions in the Federal Register and provide an opportunity for public comment.

Notice is hereby given of the proposed appointment of the following individual to be an associate member of the Commission for a term of three (3) years:

Joel Matthew Frank, Sr. Mr. Frank is an enrolled member of the Seminole Tribe of Florida. Since March, 1982, he has been employed as Executive Administrator of the Seminole Tribe of Florida and is currently responsible for the overall management and administration of all operations of the Seminole Tribe. He previously was employed by the Seminole Tribe of Florida for approximately two years as the Assistant Health Director and prior to that as a Health Planner. Beginning in 1975, he served for approximately four years as the Health Administrator for the Miccosukee Tribe of Indians of Florida. He currently serves as the President, United South and Eastern Tribes, Inc., Vice Chairman of the National Indian Gaming Association, and Board Member of the Florida Governor's Council on Indian Affairs. He previously served as the Vice President and Secretary of the United South College and St. Thomas University in Miami, Florida.

Persons wishing to comment on this proposed appointment may submit written comments to the address identified above. Comments must be received within 30 days of the date of the publication of this notice.

Dated: October 17, 1990.

Manuel Lujan, Jr.,

Secretary of the Interior.

[FR Doc. 90-25127 Filed 10-23-90; 8:45 am]

BILLING CODE 4310-RK-M

Bureau of Land Management

[WY-040-01-6910-10]

Rock Springs District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting of the Rock Springs District Advisory Council.

SUMMARY: This notice sets forth the schedule and agenda of a meeting of the Rock Springs District Advisory Council.

DATES: November 13, 1990, 9 a.m. until 4:30 p.m. and November 14, 1990, 8 a.m. until 12 p.m.

ADDRESSES: Rock Springs District Office, Bureau of Land Management, Highway 191 North, Rock Springs, Wyoming 82901.

FOR FURTHER INFORMATION CONTACT: Donald H. Sweep, District Manager, Rock Springs District, Bureau of Land Management, P.O. Box 1869, Rock Springs, Wyoming 82902-1869, (307) 382-5350.

SUPPLEMENTARY INFORMATION: The agenda for the meeting will include:

November 13, 1990:

1. Tour of BLM public lands in the Green River Resource Area. Tour topics include: Coal Bed Methane Proposals; Proposed Bridger Mine Expansion; and the Natural Corrals ACEC.

November 14, 1990:

1. Introduction and opening remarks.
2. Review of minutes from last meeting.
3. Review of tour topics.
4. Minerals Program activities briefing: Coal Bed Methane Proposals; Oil and Gas Activities; and Trona Expansion Including Brine Proposals.
5. Green River Resource Area Resource Management Plan update.
6. Highway 28 Farson Fence update.
7. Big Piney/LaBarge Coordinated Activity Plan update.
8. Update of Cumberland Grazing Allotment Management Plan.
9. Wild Horse Program update.
10. FY 91 Budget update.
11. Public comment period.

The meeting is open to the public. Interested persons may make oral statements to the Council between 11 a.m. and 12 p.m. on November 14, or file written statements for the Council's consideration. Anyone wishing to make an oral statement should notify the District Manager at the preceding address by November 9, 1990. Depending on the number of persons wishing to make oral statements, a time limit per person may be established by the District Manager.

Donald H. Sweep,

District Manager.

[FR Doc. 90-25083 Filed 10-23-90; 8:45 am]

BILLING CODE 4310-22-M

[WY-930-41-5700; WYW72253]

Proposed Reinstatement of Terminated Oil and Gas Lease; Wyoming

October 15, 1990.

Pursuant to the provisions of Public Law 97-451, 96 Stat. 2462-2466, and Regulation 43 CFR 3108.2-3 (a) and (b)(1), a petition for reinstatement of oil and gas lease WYW72253 for lands in Fremont County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this Federal Register notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW72253 effective June 1, 1990, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Beverly J. Priest,

Supervisory Land Law Examiner.

INTERNATIONAL TRADE COMMISSION

The Effects of Greater Economic Integration Within the European Community on the United States

AGENCY: International Trade Commission.

ACTION: Scheduling of deadline for submissions in connection with the third followup report.

SUMMARY: The Commission has commenced work on the third in a series of followup reports updating its initial report issued in July 1989 in connection with investigation No. 332-267, "The effects of Greater Economic Integration Within the European Community on the United States." The reports were requested under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) by the House Committee on Ways and Means and the Senate Committee on Finance in a letter received on October 13, 1988. Notice of the institution of the investigation and scheduling of a public hearing was published in the Federal Register of December 23, 1988 (54 FR 51328), and notice of the procedure to be followed in followup reports was published in the Federal Register of September 20, 1989 (54 FR 38751).

The report on the initial phase of the investigation was sent to the Committees on Monday, July 17, 1989. The first followup report was sent to the Committees on Friday, March 30, 1990, and the second followup report was sent on September 28, 1990. Copies of either the initial report "The Effects of Greater Economic Integration Within the European Community on the United States" (Investigation 332-267, USITC Publication 2204, July 1989), the first followup reports (Investigation 332-267, USITC Publication 2268, March 1990), or the second followup report (Investigation 332-267, USITC Publication 2318, September 1990) may be obtained by calling 202-252-1809, or from the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Requests can also be faxed to 202-252-2186.

The third followup report will be sent to the Committees on March 28, 1991.

EFFECTIVE DATE: October 5, 1990.

FOR FURTHER INFORMATION CONTACT: For further information on other than the legal aspects of the investigation contact Mr. John J. Gersic at 202-252-1342. For information on the legal aspects of the investigation contact Mr. William W. Gearhart at 202-252-1091.

WRITTEN SUBMISSIONS: Interested persons are invited to submit written statements concerning the investigation. Written submissions to be considered by the Commission for the third followup report should be received by the close of business on January 11, 1991. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be available

for inspection by interested persons. All submissions should be addressed to the Secretary at the Commission's office in Washington, DC.

Hearing impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810

Issued: October 18, 1990.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-462 (Final)]

Benzyl Paraben From Japan

AGENCY: United States International Trade Commission.

ACTION: Institution of a final antidumping investigation and scheduling of a hearing to be held in connection with the investigation.

SUMMARY: The Commission hereby gives notice of the institution of final antidumping investigation No. 731-TA-462 (Final) under section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the act) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Japan of benzyl p-hydroxybenzoate (benzyl paraben), provided for in subheading 2916.29.50 of the Harmonized Tariff Schedule of the United States, that have been found by the Department of Commerce, in a preliminary determination, to be sold in the United States at less than fair value (LTFV). Unless the investigation is extended, Commerce will make its final LTFV determination on or before December 12, 1990 and the Commission will make its final injury determination by February 5, 1991 (see sections 735(a) and 735(b) of the act (19 U.S.C. 1673d(a) and 1673d(b))).

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and C (19 CFR part 207), and part 201, subparts A through E (19 CFR part 201).

EFFECTIVE DATE: October 9, 1990.

FOR FURTHER INFORMATION CONTACT: Jeff Doidge, (202-252-1183), Office of Investigations, U.S International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-252-1000.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted as a result of an affirmative preliminary determination by the Department of Commerce that imports of benzyl paraben from Japan are being sold in the United States at less than fair value within the meaning of seciton 733 of the act (19 U.S.C. 1673b). The investigation was requested in a petition filed on June 29, 1990, by ChemDesign Corp., Fitchburg, MA. In response to that petition the Commission conducted a preliminary antidumping investigation and, on the basis of information developed during the course of that investigation, determined that there was a reasonable indication that the establishment of an industry in the United States was being materially retarded by reason of imports of the subject merchandise (55 FR 34626, August 23, 1990).

Participation in the investigation.—Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11), not later than twenty-one (21) days after the publication of this notice in the Federal Register. Any entry of appearance filed after this date will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Public service list.—Pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3), each public document filed by a party to the investigation must be served on all other parties to the investigation (as identified by the public service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Limited disclosure of business proprietary information under a protective order and business proprietary information service list.—Pursuant to § 207.7(a) of the Commission's rules (19 CFR 207.7(a)), the Secretary will make available business proprietary information gathered in this final investigation to authorized applicants under a protective order, provided that the application be made not later than twenty-one (21) days after the publication of this notice in the Federal Register. A separate service list will be maintained by the Secretary for those parties authorized to receive business proprietary information under a protective order. The Secretary will not accept any submission by parties containing business proprietary information without a certificate of service indicating that is has been served on all the parties that are authorized to receive such information under a protective order.

Staff report.—The prehearing staff report in this investigation will be placed in the nonpublic record on December 3, 1990, and a public version will be issued thereafter, pursuant to § 207.21 of the Commission's rule (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on December 18, 1990, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on December 10, 1990. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on December 13, 1990, at the U.S. International Trade Commission Building. Pursuant to § 207.22 of the Commission's rules (19 CFR 207.22) each party is encouraged to submit a prehearing brief to the Commission. The deadline for filing prehearing briefs is December 13, 1990. If prehearing briefs contain business proprietary information, a nonbusiness proprietary version is due December 14, 1990. Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23). This rule requires that testimony be limited to a nonbusiness proprietary summary and analysis of material contained in prehearing briefs and to information not

available at the time the prehearing brief was submitted. Any written materials submitted at the hearing must be filed in accordance with the procedures described below and any business proprietary materials must be submitted at least three (3) working days prior to the hearing (see § 201.6(b)(2) of the Commission's rules (19 CFR 201.6(b)(2))).

Written submissions.—Prehearing briefs submitted by parties must conform with the provisions of § 207.22 of the Commission's rules (19 CFR 207.22) and should include all legal arguments, economic analyses, and factual materials relevant to the public hearing. Posthearing briefs submitted by parties must conform with the provisions of § 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on December 24, 1990. If posthearing briefs contain business proprietary information, a nonbusiness proprietary version is due December 26, 1990. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before December 24, 1990.

A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for business proprietary data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any information for which business proprietary treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Business Proprietary Information." Business proprietary submissions and requests for business proprietary treatment must conform with the requirements of §§ 201.6 and 207.7 of the Commission's rules (19 CFR 201.6 and 207.7).

Parties which obtain disclosure of business proprietary information pursuant to § 207.7(a) of the Commission's rules (19 CFR 207.7(a)) may comment on such information in their prehearing and posthearing briefs, and may also file additional written comments on such information no later than December 31, 1990. Such additional comments must be limited to comments on business proprietary information received in or after the posthearing briefs. A nonbusiness proprietary version of such additional comments is due January 2, 1991.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to section 207.20 of the Commission's rules (19 CFR 207.20).

Issued: October 17, 1990.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation 337-TA-313]

Receipt of Initial Determination Terminating Respondents on the Basis of Consent Order Agreement; Spunbound Nonwoven Fabric and Fabric Made Therefrom

In the matter of certain process, apparatus, and components thereof, for the production of spunbound nonwoven fabric, and fabric made therefrom.

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondents on the basis of a consent order agreement: Reifenhauser GmbH & Co. Maschinenfabrik, Silver-Plastics GmbH & Co. KG, and Wayn-Tex, Inc.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on October 18, 1990.

Copies of the initial determination, the consent order agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

WRITTEN COMMENTS: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondents. The original and 14 copies of all such documents must be filed with the Secretary to the Commission, 500 E Street SW., Washington, DC 20436, no later than 10 days after publication of this notice in the Federal Register. Any person desiring to submit a document (or portions thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, Telephone 202-252-1806.

Issued: October 18, 1990.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Financial Docket No. 31736]

Dardanelle and Russellville Railroad; Acquisition Exemption, East Camden and Highland Southern Division

The Dardanelle & Russellville Railroad (D&R), a Class III railroad operating in Arkansas, has filed a notice of exemption to acquire a line of railroad from the East Camden & Highland Railroad Co. (EACH), also a Class III railroad. The involved line, EACH's Southern Division, extends between milepost L 99, near El Dorado, AR, and milepost L 125.2, near Lillie, LA, a distance of 26.2 miles.

D&R indicates that: (1) The properties operated by D&R and EACH will not connect with each other or with any other railroad in their corporate family; (2) the transaction is not part of a series of anticipated transactions that would connect the railroads with each other or with any other railroad in their corporate family; and (3) the transaction does not involve a Class I carrier.

Therefore, this transaction involves the acquisition of a nonconnecting carrier and is exempt from the prior review requirements of 49 U.S.C. 11343. *See* 49 CFR 1180.2(d)(2).

As a condition to use of this exemption, any employees affected by the transaction will be protected by the conditions set forth in "New York Dock

Ry.—Control—Brooklyn Eastern Dist.," 360 I.C.C. 60 (1979).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Pleadings must be filed with the Commission and served on: James M. Moody, Jr., Wright, Lindsey & Jennings, 2200 Worthen Bank Building, 200 West Capitol Avenue, Little Rock, AR 72201.

Decided: October 15, 1990.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 90-25133 Filed 10-23-90; 8:45 am]

BILLING CODE 7035-01-M

[Finance Docket No. 31745]

Clyde S. and Saundra Forbes and CSF Acquisition, Inc., Control, Operation, and Acquisition Exemption, Washington County Railroad Corp.

Clyde S. and Saundra Forbes and CSF Acquisition, Inc. (CSF), (jointly, petitioners) have filed a notice of exemption to manage, operate, and ultimately purchase the properties of Washington County Railroad Corporation (Washington). CSF, a noncarrier, is under control of the Forbes, its only shareholders. Petitioners will manage Washington for a period of 150 days, with the option to renew management and operation for additional 1-year periods.[1] Washington, a class III shortline railroad, holds authority to operate a rail line between Montpelier Junction and Graniteville, VT, owned by the State of Vermont.

CSF and the Forbes own and operate two other class III shortline railroads, Florida West Coast Railroad Company and New Hampshire and Vermont Railroad Company. They also manage and have the right (as yet unexercised) to acquire stock control of Northern Vermont Corporation, a noncarrier holding company that owns 100 percent of the common stock of two other class III shortline railroads: Lamoille Valley Railroad Corporation and Twin State Railroad Corporation. These arrangements have all been exempted from prior Commission approval by exemption notices or an exemption decision of the Commission.[2]

Petitioners state that: (1) The properties they operate and control do not connect with each other; (2) the acquisition of control is not part of a series of anticipated transactions that would connect the railroads with each other or any railroad in their corporate family; and (3) the transaction does not involve a class I carrier. The transaction involves the control of a nonconnecting carrier, and comes within the class exemption of 49 CFR 1180.2(d)(2).

As a condition to use of this exemption, any employees affected by the transaction will be protected by the conditions set forth in "New York Dock Ry.—Control—Brooklyn Eastern Dist.", 360 I.C.C. 60 (1979).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Pleadings must be filed with the Commission and served on: John D. Heffner, Gerst, Heffner, Carpenter & Podgorsky, 1700 K Street NW., suite 1107, Washington, DC 20006, and James S. Brock, Cheney, Brock & Saudek, P.C., P.O. Box 489, Montpelier, VT 05601.

Decided: October 11, 1990.

By the Commission, David M. Konschnick, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 25132 Filed 10-23-90; 8:45 am]

BILLING CODE 7035-01-M

---

[1] Petitioners assert that the proposed management arrangement may not require the Commission's prior review and approval under 49 U.S.C. 11343, citing the decision in Finance Docket No. 30703, "Canonie Atlantic Co. and Canonie, Inc.—Exemption from 49 U.S.C. 10901, 11301, and 11343 (Canonie)" (not printed), served September 11, 1986, but that this notice invoking the class exemption was filed out of an abundance of caution. Petitioners' reliance on *Canonie* is misplaced. The petitioner in *Canonie*, at the time of management, was not involved in any other regulated activity. The words "control or management" as used in 49 U.S.C. 11343 embrace all types of control or management. Here, the fact that petitioners, theoretically at least, would be subject to the orders of Washington's board of directors does not negative possession by them of actual control within the meaning of the statute. See "Collett—Control—Comet Freight Lines", 28 M.C.C. 85, 87-8 (1942).

[2] Finance Docket No. 31545, "Clyde S. and Saundra Forbes and CSF Acquisition, Inc.—Control Exemption—Lamoille Valley Railroad Company and Twin State Railroad Corporation" (not printed), decision served January 26, 1990, notice published January 29, 1990 (55 FR 2989), a petition for revocation and reconsideration is pending; Finance Docket No. 31548, "Clyde S. and Saundra Forbes and CSF Acquisition, Inc.—Continuance in Control Exemption—New Hampshire and Vermont Railroad Company" (not printed), notice served and published December 8, 1989 (54 FR 50660); and Finance Docket No. 31547, "New Hampshire and Vermont Railroad Company—Lease, Operation, and Acquisition Exemption—Boston and Maine Corporation" (not printed), notice served and published December 8, 1989 (54 FR 50660), a petition for revocation is pending.

DEPARTMENT OF JUSTICE

Lodging of Consent Decree; D & J Auto Sales, Inc.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on October 11, 1990 a proposed Consent Decree in *U.S.* v. *D & J Auto Sales, Inc.*, Civil Action No. 89-0044-H, was lodged with the United States District Court for the Western District of Virginia. The proposed Consent Decree involves claims against the defendant, a used car dealer, for allegedly knowingly tampering or causing tampering with catalytic converters on used cars in its sales inventory in violation of section 203(a)(3)(B) or the Clean Air Act, 42 U.S.C. 7522(a)(3)(B). The Decree requires defendant to pay a $5,000 civil penalty for past violations and not to violate the statute in the future.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *U.S.* v. *D & J Auto Sales, Inc.*, D.J. No. 90-5-2-1-1358.

The proposed Consent Decree may be examined at the office of the United States Attorney for the Western District of Virginia, U.S. Attorney's Office, Room 456, Poff Federal Building, 210 Franklin Road SW., Roanoke, VA 24011 or the U.S. Environmental Protection Agency, Field Operations and Support Division, Eastern Field Office I (EN-397F), 401 M Street SW., Washington, DC 20460. The proposed Consent Decree may also be examined at the Environmental Enforcement Section Document Center, 1333 F Street NW., suite 600, Washington, DC 20004, 202-347-7829. A copy of the proposed Consent Decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclosed a check in the amount of $1.50 (25 cents per page reproduction costs) payable to "Consent Decree Library."

George Van Cleve,

Acting Assistant Attorney General, Environment and Natural Resources Division.

[FR Doc. 90-25101 Filed 10-23-90; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree; Town and Country Auto Sales

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby

given that on October 11, 1990 a proposed Consent Decree in *U.S.* v. *William R. Johnson and Bonita M. Johnson d/b/a Town and Country Auto Sales*, Civil Action No. 89-0046-H, was lodged with the United States District Court for the Western District of Virginia. The proposed Consent Decree involves claims against the defendants, used car dealers, for allegedly knowingly tampering or causing tampering with catalytic converters on used cars in their sales inventory in violation of section 203(a)(3)(B) of the Clean Air Act, 42 U.S.C. 7522(a)(3)(B). The Decree requires the defendants to pay a $4,800 civil penalty for past violations and not to violate the statute in the future.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environmental and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *U.S.* v. *William R. Johnson and Bonita M. Johnson d/b/a Town and Country Auto Sales*, D.J. No. 90-5-2-1-1360.

The proposed Consent Decree may be examined at the office of the United States Attorney for the Western District of Virginia, U.S. Attorney's Office, room 456, Poff Federal Building, 210 Franklin Road SW., Roanoke, VA 24011 or the U.S. Environmental Protection Agency, Field Operations and Support Division, Eastern Field Office I (EN-397F), 401 M Street SW., Washington, DC 20460. The proposed Consent Decree may also be examined at the Environmental Enforcement Section Document Center, 1333 F Street NW., suite 600, Washington DC 20004 202-347-7829. A copy of the proposed Consent Decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $1.75 (25 cents per page reproduction costs) payable to "Consent Decree Library."

George Van Cleve,

Acting Assistant Attorney General, Environmental and Natural Resources Division.

[FR Doc. 90-25102 Filed 10-23-90; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree; E.H. Schilling & Son, General Contractors, et al.

In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), 42 U.S.C. 9622(i), and the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that on October 11, 1990, a proposed consent decree in *United States* v. *E.H. Schilling & Son, General Contractors, Inc., et al.*, Civ. Act. No. C-1-90-705 was lodged with the United States District Court for the Southern District of Ohio. This action was brought pursuant to CERCLA for cleanup of the E.H. Schelling & Son Landfill ("Site") located in Hamilton Township, Lawrence County, Ohio, and for the recovery of costs expended by the United States in connection with the Site.

The consent decree is entered into between plaintiff, the United States, and four defendants: E.H. Schilling & Son, General Contractors, Inc., Aristech Chemical Corporation, The Dow Chemical Company, and Ashland Chemical, Inc. (collectively "Settling Defendants"). The Settling Defendants are among the parties potentially responsible for the contamination at the Site.

The Decree requires the Settling Defendants to finance, design, and perform a $9.4 million remedial action at the Site. Under the Decree, Settling Defendants shall, *inter alia:* (1) Install and maintain a fence around the Site; (2) install and operate a leachate collection and treatment system; (3) implement a groundwater monitoring program, and, if the groundwater monitoring reveals contamination in excess of certain action levels, install and operate a groundwater collection system; (4) improve the stability of the earthen dam to meet requisite safety levels; (5) design and install a multi-layer cap over the Site; and (6) install and design a perimeter wall to prevent groundwater from flowing into the Site.

The Decree also requires the Settling Defendants to pay all outstanding past response costs incurred by EPA. Further, the Settling Defendants have agreed to pay all of EPA's future oversight costs, except for the first $236,000 of such costs.

The Department of Justice will receive comments relating to the proposed consent decree for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530. All comments should refer to *United States* v. *E.H. Schilling & Son, General Contractors, Inc., et al.*, DJ Ref. #90-11-2-474.

The proposed consent decree may be examined at the office of the United States Attorney, room 200, United States Post Office and Courthouse Building, 5th & Walnut Streets, Cincinnati, Ohio, and at the Region V Office of the Environmental Protection Agency, 230 S. Dearborn Street, Chicago, Illinois 60604; and the Environmental Enforcement Section, Environment and Natural Resources Division of the Department of Justice, room 1515, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center, 1333 F Street suite 600, NW., Washington, DC 20004, Telephone Number (202) 347-2072. In requesting a copy, please enclose a check in the amount of $66 (25 cents per page reproduction charge) payable to the Consent Decree Library.

Richard B. Stewart,

Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to Comprehensive Environmental Response, Compensation, and Liability Act; Puget Sound Power & Light Co., et al.; Correction

This is to correct the Notice which was published in the Federal Register on September 20, 1990, cited at Vol. 55, No. 183, pp. 38760-38761, *United States* v. *Puget Sound Power & Light Company et. al.*

This notice corrects the following errors:

In the first paragraph, the name of the case should appear as *United States* v. *Joseph Simon & Sons, et. al.* instead of *United States* v. *Puget Sound Power & Light Company, et al.* There are no other changes to this paragraph.

In the second paragraph, comments addressed to the Department of Justice should refer to *United States* v. *Joseph Simon & Sons, et. al.* instead of *United States* v. *Puget Sound Power & Light Company, et al.* There are no other changes to this paragraph.

In the third paragraph, the person to contact for examination of the proposed consent decree at Region X of the Environmental Protection Agency's Office of Regional Counsel has been added. The contact is Lynn M. Williams, Administrative Records Coordinator. There are no other changes to this paragraph.

The following new paragraph should be added as the last paragraph in this notice:

The Administrative Record may be examined at the Region X Office of the United States Environmental Protection Agency, Lynn M. Williams, Administrative Records Coordinator, Office of Regional Counsel, 1200 Sixth Avenue, Seattle, WA 98101, and at the Tacoma Public Library, Main Branch, 1102 Tacoma Avenue South, Tacoma, Washington 98402.

Richard B. Stewart,
Assistant Attorney General.

[FR Doc. 90-25089 Filed 10-23-90; 8:45 am]
BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act; Town of Southampton

In accordance with departmental policy as set forth in 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Town of Southampton*, Civil Action No. 90-3360, has been lodged with the United States District Court for the Eastern District of New York on September 24, 1990. The proposed consent decree requires the Town of Southampton to reimburse the United States for most of its past costs incurred at the North Sea Landfill Site, and to implement the remedy selected by the U.S. Environmental Protection Agency in its September 29, 1989 Record of Decision with respect to the first of three operable units at the Site.

The United States Department of Justice will receive comments relating to the proposed consent decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044, and should refer to *United States* v. *Town of Southampton*, DJ 90-11-3-837.

The proposed consent decree may be examined at the Office of the United States Attorney, Eastern District of New York, One Pierrepont Plaza, Brooklyn, New York 11201, and at the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278. A copy of the proposed consent decree can be obtained in person or by mail at the Environmental Enforcement Section Document Center, 1333 F Street NW., suite 600, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $16.75 (25 cents per page reproduction cost) payable to the Consent Decree Library.

Richard B. Stewart,
Environment and Natural Resources Division, Assistant Attorney General.

BILLING CODE 4410-01-M

Antitrust Division

Notice Pursuant to the National Cooperative Research Act of 1984; Microelectronics and Computer Technology Corp.

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Microelectronics and Computer Technology Corporation ("MCC") on July 11, 1990 filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing an additional area of planned activity and changes in its membership. The additional written notification was filed for the purpose of extending the protections of section 4 of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On December 21, 1984, MCC and its shareholders filed their original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the Federal Register pursuant to section 6(b) of the Act on January 17, 1985 (50 F.R. 2333). MCC and its shareholders filed additional notifications on March 29, 1985, July 30, 1986, November 7, 1988, December 23, 1988, February 25, 1987, December 23, 1987, March 4, 1988, August 16, 1988, September 19, 1988, January 16, 1990, March 7, 1990, and April 11, 1990. The Department published notices in the Federal Register in response to these additional notifications on April 23, 1985 (50 FR 15899), September 10, 1986 (51 FR 32263), December 8, 1986 (51 FR 44132), February 3, 1987 (52 FR 3356), March 19, 1987 (52 FR 8681), January 22, 1988 (53 FR 1850), March 29, 1988 (53 FR 10159), September 22, 1988 (53 FR 36810), October 26, 1988 (54 FR 43831), March 8, 1990 (55 FR 8612), April 9, 1990 (55 FR 13200), May 8, 1990 (55 FR 19114), and May 8, 1990 (55 FR 19114), respectively. On October 21, 1985, MCC filed an additional notification for which a Federal Register notice was not required.

MCC disclosed that it has established the Open System Satellite ("OSS") to its Packaging/Interconnect Technology program. OSS will conduct research in the area of multi-chip modules suitable for use in high performance work stations, personal computers, and high performance computers.

Effective April 25, 1990, and June 12, 1990, respectively, Advanced Packaging Systems and Tandem Computers, Inc. became Associate Members of MCC and participants in OSS.

Effective June 6, 1990, Conner Peripherals, Inc. became an Associate Member of MCC and a participant in MCC's Optics Program.

Joseph H. Widmar,
Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

LIBRARY OF CONGRESS

Copyright Office

[Docket No. RM 90-6]

Digital Audio Broadcast and Cable Services; Copyright Office Study

AGENCY: Library of Congress, Copyright Office.

ACTION: Notice of inquiry.

SUMMARY: The Copyright Office issues this Notice of Inquiry to inform the public that, responsive to a congressional request, it will examine the development of new digital audio broadcast and cable services and the effects implementation of such services may have on performers and copyright owners of copyrightable works under the Copyright Act of 1976, title 17 of the United States Code. The Office seeks public comment as to whether or not delivery of digital audio programming, transmitted by satellite systems, terrestrial systems, or by cable television systems, will affect copyright owners, and, if so, in what manner. In addition, should implementation new audio systems have negative effects on copyright owners for retransmissions of their works, the Office seeks proposals on the proper methods of compensating copyright owners while promoting the greatest availability of creative works to the public.

DATES: Initial comments should be received by no later than December 15, 1990. Reply comments should be received on or before January 31, 1991.

ADDRESSES: Interested persons should submit comments as follows: If sent by mail: United States Copyright Office, Library of Congress, Department 17, Washington, DC 20540. If delivered by hand: Office of the Register of Copyrights, Copyright Office, James

Madison Memorial Building, room 407, First and Independence Avenue SE., Washington, DC.

FOR ADDITIONAL INFORMATION CONTACT: Dorothy Schrader, General Counsel, Copyright Office, Library of Congress, Washington, DC 20540. Telephone: (202) 707–8380.

SUPPLEMENTARY INFORMATION:

1. Background

The Copyright Office is aware that several organizations in the United States plan to introduce audio services that will provide listeners with digital quality programming delivered to them over cable lines. In addition, other companies have applied to the Federal Communications Commission ("FCC") for permission to use certain frequencies to broadcast digital programming to home and automobile radios via satellite. There has also been discussion of a worldwide digital satellite service. Several foreign countries have already designed, manufactured, and tested digital audio systems that deliver quality signals to listeners via satellite and terrestrial equipment.

Technological developments in digital audio transmission currently follow two paths. The first is digital audio broadcasting, which promises to be a replacement for current FM and AM radio. Digital audio broadcasting is an interference-free, compact disc-quality signal that can be delivered via terrestrial-based and satellite transmission systems. Interest in digital audio broadcasting was sparked by receipt at the FCC of three separate applications requesting frequency allocations and authorization to begin transmission in digital audio format. The applications, filed on May 18, May 22, and July 27, 1990, respectively, petition the Commission for a rulemaking to allocate spectrum, adopt rules for a terrestrial digital audio broadcasting system, and approve satellite carriage and sale of digital audio signals. In response to the applications, the FCC published a Notice of Inquiry seeking comment on the applications, and posing broader regulatory questions as to technical requirements. *See* FCC Docket No. 90–357 (August 21, 1990). Indications are, however, that a regulatory framework will not likely be in place before 1992, which is when the World Administrative Radio Conference is scheduled to consider setting aside frequencies for digital audio broadcasting.

The second development in digital audio services involves cable systems. In the United States three companies are already testing digital audio music services made available via cable, which does not involve the same spectrum allocation limitations that digital audio broadcasting does. Services to be offered to cable subscribers include packages of channels containing all-digital music recorded on compact discs and delivered to homes via a special tuner, as well as digital simulcast of the sound tracks of motion pictures and television shows. Because it does not require prior FCC authorization, digital cable radio will probably become widespread sooner than will digital audio broadcasting.

The Chairman of the Senate Subcommittee on Patents, Copyrights, and Trademarks, Senator Dennis DeConcini of Arizona, by letter of July 25, 1990, requested the Copyright Office to conduct a study "to determine how the rights of copyrights owners of sound recordings and performers are protected with respect to digital audio transmissions." The Senator requested that the study include "any recommendations as to any additional means that may be necessary to protect the rights of copyright owners."

By this Notice of Inquiry, the Copyright Office seeks and invites public comment to assist the Office in the preparation of this study.

2. Policy Questions for Addressing Copyright Interests Regarding Digital Audio Broadcasting

Although certain inquiries pending before the FCC focus on technical aspects of digital audio broadcasting, and legislation has been introduced addressing the issue of spectrum allocation, the Office's concern is that the rights and interests of those who own copyrights in works that may easily be transmitted and then copied in digital form should be balanced with the public's interest in enhanced technology and improved sound quality. These concerns bring to light often-aired debates about home taping, the introduction of digital audio taping equipment into the United States' consumer market, and the possible introduction of royalty payment systems.

The Office seeks general comments and specific proposals from interested parties about the state of the technology in the field of digital audio transmissions, the economic viability of proposed systems, and information about how copyright interests might be affected by the introduction of digital audio transmission services. Commenting parties are encouraged to include descriptions of methods for compensating copyright owners for copying of near-perfect reproductions of their works via regional, national, or international digital audio transmission systems. Comments are also invited regarding the impact of copyright controls and royalties on public access to new digital audio transmission services.

Specifically, the Office invites public comment or information regarding the following:

(1) Would introduction of digital audio broadcasting services prompt the average listener to copy copyrighted works? Would a listener be more likely to copy digitally transmitted works than works now broadcast on AM or FM radio frequencies, or on television? To what degree can a listener's home taping habits be monitored and what technical limitations on home taping are feasible?

(2) Would the copying of works transmitted via digital audio broadcasting services significantly displace sales of copyrighted works recorded on phonorecords, audio tapes, or compact discs?

(3) Would a copyright owner have the practical ability to negotiate with the owners/operators of digital audio services for compensation for transmission of his/her works? If not could representatives of copyright owners, such as performing rights organizations, accomplish this task?

(4) Should a royalty be placed on recording materials, such as blank tapes, or on digital recording equipment itself, to be distributed among copyright claimants? If so, who would be responsible for administering this process?

(5) Should digital audio broadcasters be forced to scramble their broadcasts so that listeners wishing to receive a signal containing copyrighted works would be forced to acquire special equipment, thereby becoming accountable for the possible copying of copyrighted works?

(6) Describe existing and contemplated digital audio transmission services, including a description of (a) encryption systems, if any; (b) the means of transmitting prerecorded digital signals; (c) any plans to compress the digital signals; and (d) any proposals concerning transmission of digital subcode information embodied on prerecorded works.

(7) Provide information relating to the business and commercial aspects of digital audio transmission services, including (a) the current number of subscribers and predictions of future growth for existing digital cable services; (b) the anticipated start-up

dates and predicted audience size of proposed digital cable and broadcast services; (c) a description of the music channel offerings—both existing and contemplated; (d) the availability of "pay-per-listen" services; and (e) copyright licensing arrangements, if any.

Ralph Oman,

Register of Copyrights.

BILLING CODE 1410-07-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (90-67)]

NASA Advisory Council (NAC), Space Station Advisory Committee (SSAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Station Advisory Committee.

DATES: November 13, 1990, 8:30 a.m. to 5 p.m. and November 14, 1990, 8:30 a.m. to 2 p.m.

ADDRESSES: 600 Maryland Avenue SW., suite 2X52, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Dr. W.P. Raney, Code M-6, National Aeronautics and Space Administration, Washington, DC 20546, 202/453-4165.

SUPPLEMENTARY INFORMATION: The Space Station Advisory Committee (SSAC) is a standing committee of the NASA Advisory Council, which advises senior management on all Agency activities. The SSAC is an interdisciplinary group charged to advise Agency management on the development, operation, and utilization of the Space Station. The committee is chaired by Mr. Laurence J. Adams and is composed of 15 members including individuals who also serve on other NASA advisory committees.

This meeting will be open to the public up to the seating capacity of the room (which is approximately 40 persons including committee members and other participants). It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the participants.

TYPE OF MEETING: Open.

Agenda

November 13, 1990—

8:30 a.m.—Chairman's Remarks
9 a.m.—Program Status
  Budget
  Congressional
  Preliminary Design Review
10:30 a.m.—Special Review Activities
  Synthesis Group
  Advisory Committee on the Future of the U.S. Space Program
11:30 a.m.—Discussion
1 p.m.—Level II Integration Function
2 p.m.—Discussion
3 p.m.—Solutions Team Follow-up
4 p.m.—Discussion
5 p.m.—Adjourn

November 14, 1990—

8:30 a.m.—Task Group on Verification
9:30 a.m.—Task Group on Orbital Debris
10 a.m.—Space Station Science and Applications Advisory Subcommittee (SSSAAS) Update
11 a.m.—Discussion
2 p.m.—Adjourn

Dated: October 17, 1990.

John W. Gaff,

Advisory Committee Management Officer.

[FR Doc. 90-25094 Filed 10-23-90; 8:45 am]

BILLING CODE 7510-01-M

NATIONAL COMMISSION ON ACQUIRED IMMUNE DEFICIENCY SYNDROME

Meeting

AGENCY: National Commission on Acquired Immune Deficiency Syndrome.

ACTION: Notice of hearing and site visits.

SUMMARY: In accordance with Federal Advisory Committee Act, Public Law 92-463 as amended, the National Commission on Acquired Immune Deficiency Syndrome announces the forthcoming meeting of the Commission.

DATE AND TIME: November 27, 1990—9 a.m.-5 p.m., November 28, 1990—9 a.m.-5 p.m.

PLACE: Hearing Site, Gold Room, Radisson Normandie Hotel, San Juan, Puerto Rico.

TYPE OF MEETING: Open.

FOR FURTHER INFORMATION CONTACT: Maureen Byrnes, Executive Director, National Commission on Acquired Immune Deficiency Syndrome, 1730 K Street NW., suite 815, (202) 254-5125.

AGENDA: Both days in the morning, the Commission will hear testimony regarding the HIV epidemic in the Commonwealth of Puerto Rico and in the afternoons the Commission will visit facilities providing services to people with HIV infection and AIDS throughout the Island.

Maureen Byrnes,

Executive Director.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panels; Meetings

SUMMARY: In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting(s) to be held at 1800 G Street NW., Washington, DC 20550 (except where otherwise indicated).

SUPPLEMENTARY INFORMATION: The purpose of the meetings is to provide advice and recommendations to the National Science Foundation concerning the support of research, engineering, and science education. The agenda is to review and evaluate proposals as part of the selection process for awards. The entire meeting is closed to the public because the panels are reviewing proposals that include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), the Government in the Sunshine Act.

CONTACT PERSON: M. Rebecca Winkler, Committee Management Officer, room 208, 357-7363.

Dated: October 18, 1990.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 90-25099 Filed 10-23-90; 8:45 am]

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-280 and 50-281]

Virginia Electric and Power Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of license amendments revising the Technical Specifications for the Surry Power Station, Units 1 and 2, located in Surry County, Virginia. The proposed amendments change reactor coolant system pressure/temperature (P/T) limits and the power operated relief valve (PORV) setpoint for low temperature overpressure protection (LTOP).

Environmental Assessment

Identification of Proposed Action

The proposed amendments revise the reactor coolant system P/T limits based on evaluation of reactor vessel material properties expected for 15 effective full power years of operation (EFPY). The existing single P/T curve shown in Technical Specification Figure 3.1-1 is revised into two figures, representing P/T limits for heatup or cooldown, as appropriate. The amendments would limit the maximum plant heatup rate to 40°F/hr. The proposed amendments also revise the PORV setpoint for LTOP from 435 to 385 psig.

The Need for the Proposed Action

The existing P/T and LTOP specifications are based on a maximum of 11 EFPY. Facility operation beyond this point requires new P/T curves and LTOP limits representative of future operating conditions, reflecting changes in the reactor vessel material properties. The revisions provide operating limits to 15 EFPY. The revised P/T limits are also based on Regulatory Guide 1.99, Revision 2, and are consistent with guidance provided in Generic Letter 88-11.

Environmental Impacts of the Proposed Action

The proposed amendments affect power plant operating limits, but do not change the manner in which the facility is operated. Therefore, the proposed amendments do not increase normal radiological effluents, or add to occupational exposure. The proposed amendments do not change the generation or decay of isotopes present during normal operation. Therefore, possible post-accident radiological releases will not be more severe than previously determined. Furthermore, the amendments do not affect nonradiological effluents, so there is no other environmental impact. Therefore, the Commission concludes that there are no significant radiological or nonradiological environmental impacts associated with the proposed amendments.

Alternatives to the Proposed Action

Since the Commission has concluded there are no measurable environmental impacts associated with the proposed amendments, any alternatives will either have equivalent or greater impact.

The principal alternative would be to deny the requested amendments. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

The proposed amendments do not use resources in a manner other than that previously considered in the Final Environmental Statements dated May and June 1972 for Surry Units 1 and 2, respectively.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

Based on the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment. The Commission has therefore determined not to prepare an environmental impact statement for the proposed amendments.

For further details with respect to this action, see the application for amendments dated January 29, 1988, as supplemented February 20, 1989. These documents are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC, and at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

Dated at Rockville, Maryland, this 19th day of October 1990.

For the Nuclear Regulatory Commission.

Jon A. Norris,

Acting Director, Project Directorate II-2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 90-25114 Filed 10-23-90; 8:45 am]

BILLING CODE 7590-01-M

Nuclear Safety Research Review Committee; Meeting

In accordance with the requirements of the Federal Advisory Committee Act (FACA), the Nuclear Safety Research Review Committee (NSRRC) will hold its next meeting on November 8 and 9, 1990. The meeting will be held at the Holiday Inn Crowne Plaza, 1750 Rockville Pike, Rockville, Maryland. The meeting will be open to public attendance. The NSRRC provides advice to the Director of the Office of Nuclear Regulatory Research (RES) on matters of overall management importance in the direction of the NRC's program of nuclear safety research. The purpose of this meeting is to prepare a report providing NSRRC advice on what the strategy and content should be for a research program designed to meet NRC's essential regulatory requirements. This topic was the subject of detailed presentations made by the NRC staff at the previous NSRRC meeting on September 25 and 26.

Thursday, November 8, 1990

8 a.m.–5 p.m.: Prepare a working agenda for November 8 and 9, 1990. Review the status of Subcommittee information gathered from non-public meetings and direct inquiries. Deliberate on advice to be given to the NRC in a Committee report. Begin drafting the text of that report.

Friday, November 9, 1990

8 a.m.–4:30 p.m.: Continue activities initiated on Thursday, November 8, 1990.

4:30 p.m.: Adjourn.

Members of the public may file written statements regarding any matter to be discussed at the meeting. Members of the public may also make requests to speak at the meeting, but permission to speak will be determined by the Committee Chairperson in accordance with procedures established by the Committee. A verbatim transcription will be made of the meeting, and a copy of the transcript will be placed in the NRC's Public Document Room in Washington, DC.

Inquiries regarding this notice, any subsequent changes in the status of the meeting, the filing of written statements, requests to speak at the meeting, or the transcription, may be made to the Designated Federal Officer, Dr. Ralph O. Meyer (telephone: 301/492-3804), between 8:15 a.m. and 5 p.m.

Dated at Rockville, Maryland, this 18th day of October, 1990.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 90-25117 Filed 10-23-90; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-261]

Carolina Power & Light Co. (H. B. Robinson Steam Electric Plant, Unit No. 2); Exemption

I

The Carolina Power & Light Company (CP&L or the licensee) is the holder of Facility Operating License No. DPR-23 that authorizes operation of the H. B. Robinson Steam Electric Plant, Unit No. 2. The license provides, among other things, that the licensee is subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The facility is a single-unit pressurized water reactor at the licensee's site located in Darlington County, South Carolina.

II

On November 19, 1980, the Commission published a revised § 50.48 and a new appendix R to 10 CFR part 50 regarding fire protection features of nuclear power plants. The revised § 50.48 and appendix R became effective on February 17, 1981. Section III of appendix R contains 15 subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. One of these subsections, III.G.2 is the subject of the licensee's exemption request.

To achieve and maintain safe shutdown using one train of component cooling water (CCW) cables and equipment, section III.G.2.b of appendix R requires that:

> Separation of cables and equipment and associated non-safety circuits of redundant trains by a horizontal distance of more than 20 feet with no intervening combustible or fire hazards. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area * * *.

By letter dated July 30, 1990, as supplemented August 16, 1990, CP&L requested approval of an exemption from the above requirements of section III.G.2 for the CCW pump room. In specific, the requested exemption related to the "no intervening combustible" provision of section III.G.2.b.

III

By letter dated July 30, 1990, as supplemented August 16, 1990 the licensee requested approval of an exemption from the technical requirements of section III.G.2 of appendix R to 10 CFR part 50 for the CCW pump room. The requested exemption would allow for an increase in the quantity of intervening combustibles between redundant trains to a combined quantity that will not exceed a 1-hour fire loading. Previously, an exemption to appendix R section III.G.2 for the CCW pump room was granted on October 25, 1984. In part, that exemption allowed a combined quantity of intervening combustibles or fire hazards between redundant shutdown trains for a fire loading of 16 minutes.

The licensee plans to install new cable trays in the CCW pump room. Cable installed in these trays will be qualified to IEEE-383, Vertical Flame Test. The requested exemption would allow an increase in the quantity of intervening combustibles between redundant trains as well as an increase in the overall combustible loading in the area. Through existing design and administrative controls, CP&L has committed that the in-situ combustible fire severity in the area will not exceed a 1-hour fire loading.

The licensee has provided information on the level of fire protection already provided. These provisions include:

1. An early warning redundant cross-zoned fire detection system is provided;
2. A partial fire suppression sprinkler system is installed above all cable trays (including the presently proposed cable trays) and pumps;
3. No other combustible materials are in the CCW pump room except for one quart of lubricating oil with a high flashpoint (350°F) for each of the three pumps;
4. A portable fire extinguisher is in the CCW pump room, and additional fire extinguishers and manual fire hose stations are in adjacent areas;
5. Power cables to the redundant CCW pumps are installed in conduits with a 1-hour fire barrier wrap. All other cables are coated with flame retarded material or are IEEE-383, Vertical Flame Test, qualified. All cable trays (including the proposed cable trays) are qualified to IEEE 383.

Based on our review of the above information, the staff concludes that the licensee's existing fire protection configuration provides an equivalent level of safety to that achieved by compliance with appendix R to 10 CFR part 50.

Therefore, the Commission has determined that the exemption from section III.G.2.b of appendix R to 10 CFR part 50 in the CCW pump room should be granted.

IV

Pursuant to 10 CFR 50.12(a)(2), the Commission will not consider granting an exemption unless special circumstances are present. Item (ii) of the subject regulation includes special circumstances where application of the subject regulation would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule.

The underlying purpose of section III.G is to provide adequate protection of redundant components of safety-related equipment by limiting damage in the event of a fire at one safety-related component location so that the performance of the other safety-related component is not affected. The licensee has established that the substantial fire protection measures described in the licensee's July 30, 1990 submittal ensure that the configuration will not present an undue risk to public health and safety pursuant to 10 CFR 50.12(a)(1).

As described in the evaluation section of the exemption, the staff has concluded that the existing fire protection systems provide equivalent fire protection to that which would be provided by meeting the literal requirements of section III.G.2.b of appendix R. Therefore, the staff concludes that "special circumstances" exist for the licensee's requested exemption in that imposition of the literal requirements of the regulation in these particular circumstances is not necessary to achieve the underlying purpose of appendix R to 10 CFR part 50.

V

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a)(2)(ii), special circumstances are present in that the current level of fire protection satisfies the underlying sections of appendix R to 10 CFR part 50. Further, the staff has concluded that the requested exemption is authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest. Therefore, the Commission hereby grants an exemption from the requirements of section III.G.2.b of appendix R to 10 CFR part 50 for the CCW pump room as described in section II above.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of this exemption will have no significant impact on the environment (55 FR 41619).

For further details with respect to this section, see the licensee's request for exemption dated July 30, 1990, as

supplemented August 16, 1990, which are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC, and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535.

This exemption is effective upon issuance.

Dated at Rockville, Maryland this 17th day of October 1990.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, Division of Reactor Projects–I/II, Office of Nuclear Reactor Regulation.

[Docket No. 50-458]

Gulf States Utilities Co.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–47, issued to Gulf States Utilities Company (GSU) (the licensee), for operation of the River Bend Station, Unit 1, located in West Feliciana Parish, Louisiana.

In letters dated August 22, 1990, and October 17, 1990, GSU proposed an amendment which would permanently disable the steam condensing mode (SCM) of the residual heat removal (RHR) system. The August 22, 1990, submittal was previously noticed on September 19, 1990 (55 FR 38662), and described GSU's plans to weld plugs in the steam supply lines. Due to the exposure rates predicted using this method, GSU provided supplemental information in a letter dated October 17, 1990, which described the removal of the two steam supply line valves in the auxiliary building and installation of a blind flange in place of each. The two methods accomplish the same purpose, closing off the steam lines, but the latter will result in lower worker exposures. The TS modifications originally proposed remain unchanged.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee provided a revised analysis that addressed the above three standards with regard to the addition of the blank flanges. The analysis addressing the rest of the proposed amendment remains unchanged, but is repeated for completeness.

1. The proposed change would not significantly increase the probability or consequences of an accident because the only accident is the high energy line break (HELB) in the steam tunnel and auxiliary building. Valves 1E12*VF052MO A and B will be replaced by blind flanges in the steam supply lines to the RHR heat exchangers. With the proposed location of the blind flanges, a HELB in the auxiliary building due to the rupture of steam line to the RHR heat exchangers is unchanged from originally contained in the SAR. The HELB of the steam lines in the steam tunnel and of the RCIC [Reactor Coolant Isolation Cooling] steam supply line in the auxiliary building have also been previously evaluated and this analysis is not affected.

The HELB of the steam supply line is determined by the closure of the containment isolation valves 1E51*MOVF 063 and 064. This modification does not affect the operability of these valves or associated instrumentation. GSU has re-evaluated the setpoint of the RHR/RCIC steam line flow-high isolation instrumentation and concluded that the exiting setpoint is adequate. This conclusion is based upon the mass and energy release calculations for steam line breaks in the steam tunnel and auxiliary building. Calculations indicate that for a break of the 4" RCIC steam supply line in the auxiliary building, the existing trip setpoint would be exceeded within 0.1 seconds after the break and that flow would be terminated by closure of the containment isolation valves within 12 seconds. Lowering the existing setpoint would not significantly increase the response time of the containment isolation valves or decrease the inventory lost through the break. All equipment in the area is qualified based on the existing setpoint and calculated inventory loss. No increase in offsite release rates in excess of those previously would occur as a result of maintaining the existing setpoint. Based on the above, GSU concludes that the current setpoint of 60.7 inches H_2O is adequate and should become the permanent setpoint.

The blind flanges will be fabricated and installed to the same quality requirements as the original piping. Also the steam line piping supports were reviewed for the decrease weight and will be modified to ensure the seismic adequacy of the line. The blank flanges have been located so as to ensure that piping designed for steam service remains drained.

Valves 1E12*MOVF052A, 1E12*MOVF052B, and 1E12*MOVF028A were identified in the Fire Hazards Analysis as valves that must not spuriously reposition during a fire event. To ensure that these valves could be placed in the correct position during a fire event, control switches for these valves were included on the remote shutdown panel. Spurious repositioning of 1E12*MOVF052A or B could result in an interfacing system LOCA [Loss of Coolant Accident] (Wash 1400, Event V). Spurious repositioning of 1E12*MOVF028A could result in an overpressurization of the RCIC pump suction piping. With the implementation of this modification, the above events are no longer possible. The blind flanges in the RHR steam supply lines remove the possibility of the interfacing system LOCA. Electrically disabling 1E12*MOVF028A ensures that the valve cannot spuriously open during a fire event.

A review of the transient analyses (chapter 15 of SAR [Safety Analysis Report]) indicates that no credit has been taken for the SCM, including the radiological consequences of an MSIV [Main Steam Isolation Valve] isolation event as analyzed in [the] SAR. Section 15.2.4.2 did not take credit for SCM of RHR. Therefore, the elimination of this mode of operation will not affect the radiological consequences as reported in the SAR section 15.2.4.5 for the MSIV isolation event.

The only analysis which may be impacted by the permanent disabling of SCM is the number of main steam SRV [Safety/Relief Valve] cycles following an MSIV isolation. The SRV cycle analysis has been performed assuming that the SCM is unavailable. The value obtained is not greater than the current value of 15 used in section A.6A.9 of the SAR.

It is, therefore, concluded that this modification does not involve a significant increase in the probability or consequence of an accident.

2. The proposed change would not create the possibility of a new or different kind of accident from any previously evaluated because the design, fabrication and installation of the blind flanges will be the same requirements as the original piping (ASME III, Div. I). The blind flanges have been located so as to ensure that piping designed for steam service does not fill with water. Measures have been taken to ensure that the piping designed for steam service remains drained. No new or different relationships or interfaces with other systems or components have been created which could result in a new or different type of accident.

3. The proposed change would not involve a significant reduction in the margin of safety because there are no Technical Specification requirements for the SCM or RHR to be operable. Also, this mode is not a requirement for any other system required to be operable per the Technical Specifications.

Technical Specification section 3/4.3.2, "Isolation Actuation Instrumentation," specified that the RHR/RCIC steam line flow-high trip setpoint be less than or equal to 60.7 inches of water. This setpoint has been evaluated based on an RCIC steam supply line break maximum flow with the SMC or RHR disabled. A review of the mass and energy release calculations for a break of the 4" RCIC steam supply line in the auxiliary building indicates that the containment isolation valves would perform their function within the same time frame as previously analyzed. There would be no increase in offsite release rates. Environmental conditions in the RCIC steam line areas are not affected.

Therefore, based on the above considerations, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice. Written comments may also be delivered to Room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is disussed below.

By November 23, 1990, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714, which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555 and at the local public document room located at the Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted; In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully on the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1 (800) 325-6000 (in Missouri 1 (800) 342-6700). The Western Union operator should be given Datagram identification Number 3737 and the following message addressed to James C. Linville: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mark Wetterhahn, Esq., Bishop, Cook, Purcell and Reynolds, 1401 L Street NW., Washington, DC 20005, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer, or the Atomic Safety and Licensing Board that the petition and/or request, should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated October 17, 1990, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803.

Dated at Rockville, Maryland, this 18th day of October 1990.

For the Nuclear Regulatory Commission.

James C. Linville,

Acting Director, Project Directorate IV-2, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272-2142.

Upon Written Request, Copy Available From: Securities and Exchange Commission, Office of Consumer Affairs, 450 Fifth Street, NW., Washington, DC 20549.

Extension

Form N-8B-3
File No. 270-179
Form N-8B-4
File No. 270-180
Rule 30d-1
File No. 270-21

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq*), the Securities and Exchange Commission has submitted for extension of OMB approval Forms N-8B-3 and N-8B-4 and Rule 30d-1, all under the Investment Company Act of 1940.

Forms N-8B-3 is used by unincorporated management investment companies currently issuing periodic payment plan certificates to register under the Investment Company Act of 1940. Form N-8B-4 is used by face amount certificate companies to registar under that act. Each requires approximately 170 hours of reporting per respondent, annually.

Rule 30d-1 prescribes the minimum content of reports to shareholders that management investment companies must send at least semi-annually. The rule requires approximately 600 hours, annually, per respondent.

The estimates of average burden hours are made solely for the purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even a representative survey or study of the costs of SEC rules and forms.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549-0004, and Gary Waxman, Clearance Officer, Office of Information and Regulatory Affairs, Office of Management and Budget (Paperwork Reduction Projects 3235-0166 [Form N-8B-3], 3235-0247 [Form N-8B-4], and 3235-0025 [Rule 30d-1], room 3208 NEOB, Washington, DC 20503.

Dated: October 18, 1990.

Margaret H. McFarland,

Deputy Secretary.

[Rel. No. 34-28551; File No. 600-30]

Self-Regulatory Organizations; International Securities Clearing Corporation; Filing of Request for Extension of Temporary Registration as Clearing Agency

Notice is hereby given that on October 16, 1990, International Securities Clearing Corporation ("ISCC") filed with the Securities and Exchange Commission ("Commission"), pursuant to section 19(a) of the Securities Exchange Act of 1934 ("Act"), a request for extension of its registration as a clearing agency under section 17A of the Act for a period of one year.[1]

On May 12, 1989, the Commission granted the application of ISCC to become registered as a clearing agency pursuant to sections 17A and 19(a) of the Act, and rule 17Ab2-1(c) thereunder, for a period of eighteen months. At that time, the Commission granted ISCC an exemption from compliance with section 17A(b) (3)(C) of the Act.

ISCC provides clearance and settlement services to its members and to foreign financial institutions primarily by providing links that enable market participants to process and settle their international securities transactions through the facilities of centralized clearing entities in the United States and abroad. The Commission is publishing this notice of a request for an extension of that registration for a period of one year to solicit comment from interested persons.

[1] See letter from Karen L. Saperstein, Associate General Counsel, ISCC, to Brandon Becker, Associate Director, dated October 16, 1990.

BEST COPY AVAILABLE

Interested persons are invited to submit written data, views and arguments concerning the foregoing within thirty days of the date of publication of this notice in the Federal Register. Such written data, views and arguments will be considered by the Commission in granting registration or instituting proceedings to determine whether registration should be denied in accordance with section 19(a)(1) of the Act. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the application and all written comments will be available for inspection at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC. All submissions should refer to file number 600-20 and should be submitted by November 14, 1990.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 18, 1990.

BILLING CODE 8010-01-M

[Rel. No. 34-28542; File No. SR-NASD-90-57]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by National Association of Securities Dealers, Inc., Relating to Small Order Execution System Tier Size Classifications

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 4, 1990, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The NASD has designated this proposal as "a stated policy, practice or interpretation with respect to the meaning, administration, or enforcement of an existing rule" under section 19(b)(3)(A)(i) of the Act, which renders the rule effective upon the Commission's receipt of this filing. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing an interpretation of an existing rule pertaining to the Association's periodic reclassification of securities in the appropriate Small Order Execution System ("SOES") maximum order size tiers, as described more fully below.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the rule change is to notify the Commission of the reclassification of some 450 National Market System securities within the maximum SOES order size tier levels. The Association reviews the tier levels applicable to each security periodically (approximately every six months) to determine if the trading characteristics of the issue have changed so as to warrant a SOES tier level move. Such a review was conducted as of June 29, 1990, using second quarter, 1990 trading data and the established criteria:

A 1,000-share maximum order size for NASDAQ/NMS securities with an average daily nonblock volume of 3,000 shares or more a day, a bid price less than or equal to $100, and three or more market makers;

A 500-share maximum order size for NASDAQ/NMS securities with an average daily nonblock volume of 1,000 shares or more a day, a bid price less than or equal to $100, and two or more market makers;

A 200-share maximum order size for NASDAQ/NMS securities with an average daily nonblock volume of less than 1,000 shares a day, a bid price less than or equal to $250, and less than two market makers.

The 450 NASDAQ/NMS securities that have been reclassified as of October 15, 1990, are set out in an exhibit to the filing.

Notice to Members 90-67

The NASD believes that the proposed rule change is consistent with section 15A(b)(6) of the Act. Section 15A(b)(6) requires, among other things, that the rulemaking initiatives of the NASD be designed to "foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanism of a free and open market." The NASD believes that the reassessment of securities within SOES tier levels will further these ends by providing an efficient mechanism to facilitate small order executions in the NASDAQ market.

B. Self-Regulatory Organization's Statement on Burden of Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The following rule change has become effective pursuant to section 19(b)(3)(A)(i) of the Act and subparagraph (e) of Securities Exchange Act rule 19b-4 because the proposal has been filed as "a stated policy, practice or interpretation with respect to the meaning, administration, or enforcement of an existing rule." At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW, Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission

and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by November 14, 1990.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: October 18, 1990.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 90-25146 Filed 10-23-90; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 34-28554; File No. SR-NASD-90-35]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to Articles II and III of the NASD Code of Procedure

The National Association of Securities Dealers, Inc. ("NASD") submitted on July 13, 1990, and amended on September 24, 1990,[1] to the Securities and Exchange Commission ("SEC" or "Commission") a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[2] to amend Articles II and III of the NASD Code of Procedure ("Code"). The proposed rule change makes two substantive changes to the Code: (1) NASD National Business Conduct Committee ("NBCC") hearing panels will consist exclusively of current or former Governors associated with members;[3] and (2) decisions of the NBCC will be final decisions of the NASD, unless the Board, at the request of one or more Governors, calls for review of specific NBCC decisions.

Notice of the proposal, together with the substance of the terms of the proposed rule change, was given by the issuance of a Commission release (Securities Exchange Act Release No. 28405, August 31, 1990) and by publication in the Federal Register (55 FR 37787, September 13, 1990). No comments were received on the proposal.

This proposed rule change will amend article III, section 2(d) of the Code to eliminate the requirement that a current Governor serve on every hearing panel. The proposal allows hearing panels to consist of current or former Governors associated with members, thereby permitting hearing panels to be composed exclusively of recent former industry Governors.

The proposal will also amend article III, sections 6 and 7 in that the decisions of the NBCC will no longer require action by the full Board to be effective. The proposal provides that the decisions of the NBCC are the final decisions of the NASD in disciplinary cases, unless the Board calls for review on the request of one or more Governors.

In addition, the proposed rule change amends relevant sections of articles I, II, III, IV and X of the Code of Procedure to reflect and conform with the changes discussed above.[4] The proposed rule also amends article IX of the Code of Procedure regarding procedures on grievances concerning automated systems to allow the NASDAQ Hearing Review Committee to review subject decisions. Determinations of the NASDAQ Hearing Committee may be reviewed at the Board's discretion upon the request of one or more Governors.

The NASD believes the proposed rule change is necessary in order to improve the disciplinary process and to reduce the burden that this process imposes on the NBCC and the Board. Prior to approval of this rule the NBCC would normally appoint a Governor serving on the NBCC and a recent former Governor as a hearing panel. The allocation of time required of Governors serving on the NBCC to hearing panels was increasing to a level that could detract from the ability of the Governors to effectively address regulatory policy issues. The NASD found the increasing workload of the NBCC could be viewed as limiting the opportunity of members of the NBCC to participate on other committees and in the increasingly demanding work of the Board itself.[5] In addition, the NASD believes that by limiting the Board's review of NBCC decisions to occasions when one or more Governors believe such review is appropriate will limit the time commitment required from Governors, yet not reduce the fairness of the NASD disciplinary process.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of section 15A and the rules and regulations thereunder.[6] However, it is noted that the Division is concerned that the rule change does not provide a time frame in which the Board must determine whether it will review a decision of the NBCC. After this issue is examined by the Board in January 1991, the Division expects to be informed and will carefully consider the NASD's resolution regarding the necessity of determining a time period in which the board must decide if they are going to review NBCC decisions.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change, SR-NASD-90-35, be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: October 18, 1990.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 90-25147 Filed 10-23-90; 8:45 am]

BILLING CODE 8010-01-M

---

[1] Amendment No. 1 indicated that, in response to concerns raised by the Division of Market Regulation ("Division") the NASD will bring before the NASD Board of Governors at the January 1991 NASD Board Meeting the issue of whether a time period should be adopted in which the Board of Governors must decide whether or not to review NBCC decisions. The amendment also stated the Commission will be able to determine if decisions from the NASD NBCC are final or pending final review by the Board of Governors because the SEC will not receive any decision that is not final. In addition, a technical amendment was made to art. II, sec. 12 which added the word "either" before the words "is of the opinion that." This change was approved prior to the receipt of the amendment and is reflected in the notice published in the Federal Register. *See* the letter from Suzanne E. Rothwell to Katherine England, dated September 24, 1990.

[2] 15 U.S.C. 78s(b)(1) (1982).

[3] Article III, sec. 2(c) of the Code requires that (unless otherwise consented to by the parties) every member of a hearing panel must be currently associated with a member of the NASD. The proposed amendments would not alter this requirement.
